24EGT11 - ENGLISH FOR EFFECTIVE COMMUNICATION - I																		
(Common to all Engineering and Technology Branches)																		
Programme & Branch	All B.E/B.Tech Branches	Sem	Category	L	T	P	SL*	Total	Credit									
Prerequisites	Nil	1	HS	45	0	0	45	90	3									
Preamble	This course is designed to enhance the communication skills and verbal aptitude in English language required for various workplace communication and social interactions.																	
Unit – I	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing																	
Grammar: Parts of Speech – Articles – Determiners – Verbal Aptitude: Synonyms and Antonyms – Selecting Words – Listening: Listening and Filling in Information – Speaking: Introducing Oneself – Discussion on Social Media Etiquette – Reading: Importance of Good Communication – Comprehension and Inference, Reading for facts and opinions – Building a Positive Attitude: An Excerpt from <i>You Can Win</i> – Writing: Email Etiquette – Email Writing – Responding to Emails																		
Unit – II	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing																	
Grammar: Types of Sentences – Assertive, Interrogative, Imperative and Exclamatory – Question Tags– Verbal Aptitude: Prefixes and Suffixes – Collocations – Idiomatic Expressions – Listening: Identifying main and Secondary Points – Speaking: Asking Questions – Role Play – Reading: Reading for Comprehension – Verbal and Non-Verbal Communication – Winning Strategies: An Excerpt from <i>You Can Win</i> - Writing: Descriptive Writing – Product/Process Description – Letter Writing: Formal Letters – Seeking Permission and Inviting Chief Guest																		
Unit – III	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing																	
Grammar: Tenses – Phrasal Verbs– Verbal Aptitude: Jumbled Sentences – Sentence Formation– Listening: Taking Notes from a Discussion – Speaking: Retelling an Incident – Discussing Tourist Destinations – Reading: Process of Communication–Scanning - Motivating Yourself and Others Every Day: An Excerpt from <i>You Can Win</i> – Writing: Paragraph Writing: Narrative and Compare & Contrast																		
Unit – IV	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing																	
Grammar: Prepositions – Transitional Words/Phrases – Discourse Markers – Verbal Aptitude: One Word Substitution - Sentence Completion – Listening: Listening for Specific Information – Speaking: Small Talk–Telephonic Conversations– Reading: Channels of communication – Building Positive Self-Esteem and Image: An Excerpt from <i>You Can Win</i> – Writing: Instructions – Recommendations and Suggestions																		
Unit – V	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing																	
Grammar: Subject Verb Agreement – Gerunds and Infinitives– Verbal Aptitude: Homonyms, Homophones and Homographs – Cloze Test using Verb Forms, Prepositions and Articles – Listening: Listening and Identifying Parts from a Description – Speaking: Agreeing and Disagreeing – Reading: Skimming – Reading to Summarize – Setting and Achieving your Goals: An Excerpt from <i>You Can Win</i> – Writing: Transcoding: Identifying Trends and Patterns in Graphs and Expressing with Graph Specific Vocabulary																		
TEXT BOOK:

* includes Term Work (TW) & Assignments, Tutorials and Case Studies

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)
CO1	learn and use various aspects of English vocabulary to perform well in verbal aptitude tests of different types										
CO2	listen and understand different spoken discourses										
CO3	present ideas clearly and confidently in formal and informal conversations and discussions										
CO4	comprehend the given text and respond appropriately for technical and professional purposes										
CO5	select appropriate words , phrases and grammatical units and apply them in both spoken and written communication										

Mapping of COs with POs and PSOs

COs/ POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
CO1						1		1	3	1	1		
CO2									1	3		1	
CO3									2	3	1	2	
CO4						1				3	1	2	
CO5										3		2	

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN – THEORY

Test / Bloom's Category*	Remembering (K1) %	Understa nding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	-	35	50	-	-	15	100
CAT2	-	45	35	-	-	20	100
CAT3	-	30	35	35	-	-	100
ESE	-	20	40	20	-	20	100

* ±3% may be varied (CAT 1,2& 3 – 50 marks & ESE – 100 marks)

Board of Studies - S&H (English)

24MAC11 - MATRICES AND ORDINARY DIFFERENTIAL EQUATIONS										
(Common to all Engineering and Technology branches)										
Programme & Branch	All B.E/B.Tech Branches	Sem.	Category	L	T	P	SL*	Total	Credit	
Prerequisites	Nil	1	BS	45	7	16	52	120	4	
Preamble	To provide the skills to the students for solving different real time problems by applying matrices and ordinary differential equations.									
Unit - I	Matrices:									
	Introduction – Characteristic equation – Eigen values and Eigen vectors of a real matrix – Properties of Eigen values and Eigen vectors (without proof) – Cayley – Hamilton theorem (Statement and applications only) - Orthogonal matrices – Orthogonal transformation of a symmetric matrix to diagonal form – Quadratic form – Nature of Quadratic forms - Reduction of quadratic form to canonical form by orthogonal transformation.									
Unit - II	Ordinary Differential Equations:									
	Introduction – Solution of First order differential equations: Exact differential equations – Leibnitz's Linear Equation – Bernoulli's equation – Clairaut's equation - Applications: Law of natural growth and decay.									
Unit - III	Ordinary Differential Equations of Higher Order:									
	Linear differential equations of second and higher order with constant coefficients - Particular Integrals for the types: e^{ax} – $\cos ax / \sin ax$ – $x^n - e^{ax}x^n$, $e^{ax} \sin bx$ and $e^{ax} \cos bx$ – Differential Equations with variable coefficients: Euler-Cauchy's equation – Legendre's equation.									
Unit - IV	Applications of Ordinary Differential Equations:									
	Method of variation of parameters – Simultaneous first order linear equations with constant coefficients – Applications of differential equations: Simple harmonic motion – Electric circuits (Differential equations and associated conditions need to be given).									
Unit - V	Laplace Transform:									
	Introduction – Conditions for existence – Laplace transform of elementary functions – Basic properties – Derivatives and integrals of transforms – Transform of periodic functions - Inverse Laplace transform: Inverse Laplace transform of elementary functions – Partial fraction method – Convolution Theorem – Applications: Solution of linear ODE of second order with constant coefficients.									
LIST OF EXPERIMENTS / EXERCISES:										
1.	Introduction to MATLAB									
2.	Computation of eigen values and eigen vectors									
3.	Solving first order ordinary differential equations									
4.	Solving higher order ordinary differential equations									
5.	Solution of Simultaneous first order ODEs									
6.	Solving second order ODE by variation of parameters									
7.	Determining Laplace and inverse Laplace transform of basic functions									
8.	Solution of Second order ODE by employing Laplace transforms									
TEXT BOOK:

*includes Term Work (TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)
CO1	Use the matrix algebra methods and MATLAB for solving practical problems.										
CO2	Identify the appropriate method for solving first order ordinary differential equations.										
CO3	Solve higher order linear differential equations with constant and variable coefficients.										
CO4	Apply the concept of ordinary differential equations for modeling and finding solutions to engineering problems.										
CO5	Apply Laplace Transform to solve complex engineering problems.

24PHT11 - PHYSICS FOR COMPUTER SYSTEMS										
(Common to CSE, IT, CSD, AIDS & AIML branches)										
Programme& Branch	BE/B.Tech - CSE, IT, CSD, AIDS and AIML branches	Sem.	Category	L	T	P	SL*	Total	Credit	
Prerequisites	Nil	1	BS	45	0	0	45	90	3	
Preamble	This course aims to impart the knowledge on crystal physics, quantum physics, acoustics, ultrasonics, laser, fiber optics, and semiconductors. It also describes the applications of aforementioned topics in computer systems.									
Unit – I	Crystal Physics: Classification of solids – Space lattice – Unit cell – Crystal structure – Bravais lattice – Single and polycrystalline materials – Lattice planes – Miller indices – Interplanar spacing in cubic crystal – Number of atoms per unit cell – Atomic radius – Coordination number – Atomic packing factor – Body centered cubic– Face centered cubic – Hexagonal close packed crystal structure – Crystal imperfections: line, surface and volume imperfections.									
Unit – II	Quantum Physics and Applications: Blackbody radiation – Planck's theory – Compton scattering – Matter waves – Properties – Heisenberg uncertainty principle – Schrodinger's time-independent and time-dependent wave equations – Physical significance of wave function – Particle in a one-dimensional box.									
Unit – III	Acoustics and Ultrasonics: Classification of sound – Characteristics of sound – Reverberation and reverberation time – Growth and decay of sound – Sabine's formula for reverberation time – Determination of sound absorption coefficient – Factors affecting acoustics of buildings and their remedies – Ultrasonics – Properties of ultrasonic waves – Generation of ultrasonic waves – Magnetostrictive generator and Piezoelectric generator – Non-destructive testing – Flaw detection.									
Unit – IV	Laser and Fiber optics: Stimulated absorption – Spontaneous emission – Stimulated emission – Einstein's coefficients and their relations – Population inversion – Pumping – CO ₂ laser – Holography – Fiber optics – Numerical aperture and acceptance angle – Classification of optical fibers based on refractive index, modes and materials – Fiber optic communication system – Temperature and displacement sensors.									
Unit – V	Semiconducting Materials: Intrinsic semiconductor – Carrier concentration – Fermi level – Variation of conductivity with temperature – Determination of band gap – Extrinsic semiconductors – Carrier concentration in n-type and p-type semiconductors – Hall effect – Determination of Hall coefficient – Applications – Solar cell: Principle, construction and working.									
TEXT BOOK:

*includes Term Work (TW) & Online / Certification course hours

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	analyze seven crystal systems, interplanar spacing in cubic lattice, BCC, FCC, HCP crystal systems and the types of crystal imperfections and their impacts.											Analyzing (K4)
CO2	investigate the concepts of quantum mechanics to describe Planck's theory, Compton effect and the behavior of electrons in a metal by solving Schrodinger's wave equations.											Analyzing (K4)
CO3	explore the concepts of growth and decay of sound energy in a hall to compute Sabine's formula and to recognize the requirements of acoustically good buildings and also to describe the production of ultrasonic wave and testing of materials by non-destructive method.											Analyzing (K4)
CO4	examine the concepts of stimulated emission of radiation to explain the working and the applications of laser in engineering and technology. To apply the principle of propagation of light through optical fiber to compute acceptance angle and numerical aperture and also to explain fiber optic communication system and the working of fiber optic sensors.											Analyzing (K4)
CO5	Inspect the concept of density of states to compute the carrier concentration and band gap of intrinsic semiconductors and to compute the carrier concentration of extrinsic semiconductors, and also to explain the phenomenon related to Hall Effect and the working of solar cell.											Analyzing (K4)

Mapping of COs with POs and PSOs

24CSC12- PROGRAMMING IN C																				
(Common to CSE, IT, CSD, AIDS & AIML branches)																				
Programme & Branch	B BE/B.Tech - CSE, IT, CSD, AIDS and AIML branches	Sem	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Nil	1	ES	45	0	30	45	120	4											
Preamble	The course aims to provide exposure to problem-solving through programming. It introduces all the fundamental concepts of C Programming. This course provides adequate knowledge to solve problems in various domains																			
Unit – I	Introduction to C and Control Statements																			
The structure of a C program - Data - Variables – Declaring, assigning, and printing variables – Data Types – Constants – Enumeration Constants – Keywords – Operators: Precedence and Associativity – Expressions – Input/Output statements, - Control Structure: Decision-making statements																				
Unit – II	Arrays																			
Control Structure: Repetitive statements – for loop, while loop, and do-while loop-Arrays: Declaring and initializing 1D array – Two-dimensional arrays –Array Operations and Manipulations.																				
Unit – III	Strings and Pointers																			
Strings: Basics, declaring and initializing strings – string handling functions: standard and user-defined functions – character-oriented functions, Two-dimensional array of strings																				
Pointers: Memory access and pointers, pointer basics, declaring, initializing, and dereferencing a pointer, parameter passing mechanisms, operations on pointers																				
Unit – IV	Functions																			
Functions: Basics, The anatomy of a function – Types of functions based on arguments and return types – Passing 1D and 2D arrays as arguments to functions – Calling function from another function – recursive functions -Variable scope and lifetime - Storage classes- Pre-processor directives: #define: macros with and without arguments																				
Unit – V	User Defined data types																			
Structure basics –declaring and defining a structure – nested structures –Union-typedef– File Handling: Introduction – File operations: File opening and closing files – reading and writing data to files																				
LIST OF EXPERIMENTS / EXERCISES:																				
1	Programs for demonstrating the use of different types of operators like arithmetic, logical, relational, and ternary operators (Sequential structures)																			
2	Programs to illustrate the different formatting options for input and output																			
3	Programs using decision-making statements like 'if', 'else if', 'switch', and conditional, unconditional 'goto' (Selective structures)																			
4	Programs for demonstrating repetitive control statements like 'for', 'while', and 'do-while' (Iterative structures)																			
5	Programs for demonstrating one- and two dimensional arrays																			
6	Programs to implement various character and string operations with and without built-in library functions.																			
7	Programs to demonstrate the use of pointers																			
8	Programs to demonstrate modular programming concepts using built-in and user-defined functions																			
9	Programs to illustrate the use of user-defined data types																			
10	Programs to implement file handling

24ITT11-DIGITAL LOGIC PRINCIPLES AND DESIGN (Common to IT,AIML,AIDS branches)										
Programme & Branch	B.Tech., Information Technology, Artificial Intelligence and Machine Learning & Artificial Intelligence and Data science	Sem.	Category	L	T	P	SL*	Total	Credit	
Prerequisites	Nil	1	ES	45	0	0	45	90	3	
Preamble	This course enables the students to acquire the knowledge of binary logic, Boolean algebra, Boolean function its forms and their minimization methods and implementation using logic gates. Also, this course covers the analysis and synthesis of various combinational, clocked sequential circuits, shift registers and various types of counters.									
Unit - I	Number Systems and Boolean Algebra Number Systems - Complements – Signed Binary Numbers –Binary Codes – Binary Logic - Boolean Algebra: Definitions – Basic and Axiomatic –Theorems of Boolean Algebra – Boolean functions: Realization of functions using Logic gates – case study.									
Unit - II	Gate Level Minimization Canonical and Standard Forms of Boolean functions – Minimization of functions using Karnaugh Map – Don't-Care Conditions – NAND and NOR Implementation– Exclusive-OR function – case study.									
Unit - III	Combinational Logic Analysis procedure – Design procedure – Half Adder – Full Adder - Half Subtractor – Full Subtractor – Binary Adder-Subtractor – Code Converters - Magnitude Comparator – Decoders – Encoders – Multiplexers – Demultiplexers – Boolean Functions implementation using Multiplexers and Decoders– case study.									
Unit - IV	Sequential Logic Introduction – Flip-flops – Triggering – Analysis of clocked sequential circuits: State Equations – State Table – State Diagram– State Reduction and Assignment– Mealy and Moore machines and their circuit design procedure– case study.									
Unit - V	Register, Counter and Programmable Logic Shift Registers: SISO- SIPO- PISO-PIPO–Universal Shift register– Synchronous Counters: Binary Counter – up-down Binary Counter – BCD Counter – modulo-N Counter – Programmable Logic devices: PROM – PLA – PAL– case study.

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)
CO1	summarize the different number systems and binary codes and apply Boolean algebra to minimize the Boolean functions										
CO2	organize the Boolean functions in various forms, demonstrate their minimization using Map technique and show their implementation using universal logic gates.										
CO3	build various combinational logic circuits like adders, subtractors, comparator, code converters, decoders, encoders, multiplexers and demultiplexers and make use of their applications										
CO4	construct sequential logic circuits with various Flip flops										
CO5	identify various types of shift registers, build various types of synchronous counters and illustrate the applications of programmable logic devices

24TAM01- HERITAGE OF TAMILS																	
(Common to All Engineering and Technology Branches)																	
Programme & Branch	All B.E/B.Tech Branches	Sem.	Category	L	T	P	SL*	Total	Credit								
Prerequisites	NIL	1	HS	15	0	0	15	30	1								
Preamble	The objective of this course is to impart knowledge about Tamil language, literature, paintings, sculptures, folk arts, heroic games, doctrines, contribution of Tamils to Indian culture.																
UNIT I	Language and Literature								3								
Language families in india - dravidian languages – tamil as a classical language - classical literature in tamil – secular nature of sangam literature – distributive justice in sangam literature - management principles in thirukural - tamil epics and impact of buddhism & Jainism in tamil land - Bakthi literature azhwars and nayanmars - forms of minor poetry - development of modern literature in tamil - contribution of bharathiya and bharathidhasan.																	
UNIT II	Heritage - Rock Art Paintings to Modern Art – Sculpture								3								
Hero stone to modern sculpture - bronze icons - tribes and their handicrafts - art of temple car making - massive terracotta sculptures, village deities, Thiruvalluvar statue at Kanyakumari, making of musical instruments - mridhangam, parai, veenai, yazh and nadhaswaram - role of temples in social and economic life of tamils.																	
UNIT III	Folk and Martial Arts								3								
Therukoothu – karagattam - villu pattu - kaniyan koothu – oyillattam - leather puppetry – silambattam – valari - tiger dance - sports and games of tamils.																	
UNIT IV	Thinai Concept of Tamils								3								
Flora and fauna of tamils & aham and puram concept from tholkappiyam and sangam literature - aram concept of tamils - education and literacy during sangam age - ancient cities and ports of sangam age - export and import during sangam age - overseas conquest of cholas.																	
UNIT V	Contribution of Tamils to Indian National Movement and Indian Culture								3								
Contribution of tamils to Indian freedom struggle - the cultural influence of tamils over the other parts of India – self-respect movement - role of Siddha medicine in indigenous systems of medicine – inscriptions & manuscripts – print history of Tamil books.

24TAM01-தமிழர் மரபு											
(Common to All Engineering and Technology Branches)											
Programme & Branch	All B.E/B.Tech Branches	Sem.	Category	L	T	P	SL*	Total	Credit		
Prerequisites	NIL	1	HS	15	0	0	15	30	1		
Preamble	தமிழர்களின் மொழி, இலக்கியம், ஓவியங்கள், சிற்பக்கலைகள், நாட்டுப்புறக் கலைகள், வீர வினாயாட்டுக்கள், தினைக் கோட்பாடுகள், இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பைப் பற்றிய அறிவை வழங்குவதே இந்த பாடத்தின் நோக்கமாகும்.										
அலகு - I	மொழி மற்றும் இலக்கியம்										3
இந்திய மொழிக் குடும்பங்கள் - திராவிட மொழிகள் - தமிழ் ஒரு செம்மொழி - தமிழ் செவ்விலக்கியங்கள் - சங்க இலக்கியத்தின் சமயச் சார்பற் தன்மை - சங்க இலக்கியத்தில் பகிர்தல் அறம் - திருக்குறளில் மேலாண்மைக் கருத்துக்கள் - தமிழ் காப்பியங்கள், தமிழகத்தில் சமண பௌத்த சமயங்களின் தாக்கம் - பக்தி இலக்கியம், ஆழ்வார்கள் மற்றும் நாயன்மார்கள் - சிற்றிலக்கியங்கள் - தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி - தமிழ் இலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.											
அலகு - II	மரபு - பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை - சிற்பக் கலை										3
நடுகல் முதல் நவீன சிற்பங்கள் வரை - ஜம்பொன் சிலைகள் - பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினைப் பொருட்கள், பொம்மைகள் - தேர் செய்யும் கலை - சுடுமண் சிற்பங்கள் - நாட்டுப்புறத் தெய்வங்கள் - குமரிமுனையில் திருவள்ளுவர் சிலை - இசைக் கருவிகள் - மிருதங்கம், பறை, வீணை, யாழ், நாதஸ்வரம் - தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு.											
அலகு - III	நாட்டுப்புறக் கலைகள் மற்றும் வீர வினாயாட்டுக்கள்										3
தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஓயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம், தமிழர்களின் வினாயாட்டுகள்.											
அலகு - IV	தமிழர்களின் தினைக் கோட்பாடுகள்										3
தமிழகத்தின் தாவரங்களும், விலங்குகளும் - தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள் - தமிழர்கள் போற்றிய அறக்கோட்பாடு - சங்கக்காலத்தில் தமிழகத்தில் எழுத்தறிவும் கல்வியும் - சங்ககால நகரங்களும் துறை முகங்களும் - சங்ககாலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி - கடல்கடந்த நாடுகளில் சோழர்களின் வெற்றி.											
அலகு - V	இந்திய தேசிய இயக்கம் மற்றும் இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு										3
இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு - இந்தியாவின் பிறபகுதிகளில் தமிழ் பண்பாட்டின் தாக்கம் - சுயமரியாதை இயக்கம் - இந்திய மருத்துவத்தில் சித்த மருத்துவத்தின் பங்கு - கல்வெட்டுகள், கையெழுத்துப்படிகள் - தமிழ்ப் புத்தகங்களின் அச்சு வரலாறு.

24PHL11 - PHYSICS LABORATORY FOR COMPUTER SYSTEMS													
(Common to CSE, IT, CSD, AIDS & AIML branches)													
Programme& Branch	BE/B.Tech - CSE, IT, CSD, AIDS and AIML branches			Sem.	Category	L	T	P	SL*	TOT	Credit		
Prerequisites	Nil			1	BS	0	0	30	0	30	1		
Preamble	This course aims to impart hands on training in the determination of the physical parameters such as AC frequency, compressibility of a liquid, wavelength of laser, particle size, acceptance angle and numerical aperture of an optical fiber, specific resistance, band gap, thickness of a thin film and knowledge on the working of p-n diode and UJT, and also to impart skills on writing coding / developing project / product related to societal requirement.												
LIST OF EXPERIMENTS / EXERCISES:													
1.	Determination of the frequency of alternating current using electrically vibrating tuning fork (Melde's apparatus).												
2.	Determination of the wavelength of the given semiconductor laser.												
3.	Determination of the particle size of the given powder using laser.												
4.	Determination of the acceptance angle and numerical aperture of the given optical fiber.												
5.	Observation of the I-V characteristics of a p-n junction diode.												
6.	Observation of the I-V characteristics of a uni junction transistor.												
7.	Determination of the specific resistance of the given metallic wire using Carey Foster's bridge.												
8.	Determination of the band gap of a given semiconducting material using post-office box.												
9.	Determination of the thickness of a thin film using air-wedge arrangement.												
10.	Writing coding for any one of the above experiments / developing a project / a product.												
REFERENCES/ MANUAL /SOFTWARE:													
1.	Laboratory Manual												
COURSE OUTCOMES: On completion of the course, the students will be able to													
CO1	determine the frequency of an alternating current, the wavelength of a semiconductor laser and the particle size of a powder material,										BT Mapped (Highest Level)		
CO2	determine the acceptance angle and numerical aperture of an optical fiber, the I-V characteristics of a p-n diode and the I-V characteristics of a UJT.										Analyzing (K4), Precision (S3)		
CO3	determine the specific resistance of a metallic wire, the band gap of semiconducting materials, the thickness of a thin film and develop a coding / project / product.										Analyzing (K4), Precision (S3)

24GCL11 – FOUNDATION LABORATORY - MANUFACTURING, DESIGN AND ROBOTICS (Common to all BE/BTech branches)													
Programme & Branch		All BE/BTech Branches			Sem.	Category	L	T	P	SL*	Total	Credit	
Prerequisites		Nil			1/2	ES	0	0	90	0	90	3	
Preamble		This course provides the hands-on experience to develop a prototype model with the basic knowledge of Computer-aided Design, Manufacturing Processes, 3D Printing Technology, Robotics and Embedded Control.											
LIST OF EXPERIMENTS / EXERCISES:													
PART A – Manufacturing Laboratory (30 Hours)													
1	Selection of product, free hand sketching and detailing												
2	Construction of model using Arc/TIG/MIG/Gas/Spot welding operations												
3	Enhancing the model with sheet metal												
4	Creating the parts of the model using lathe												
5	Creating the parts of the model using milling and drilling machines												
PART B – Product Design and Development Laboratory (30 Hours)													
1	Free hand sketching and detailing of the component												
2	3D part modelling of the component using CAD software												
3	Engineering Analysis of the component model												
4	Generate the component using 3D printer												
PART C – Robotics Laboratory (30 Hours)													
1	Design of electronic circuit and its debugging												
2	Assembly and interfacing of sensors, actuators and wireless communion modules with audrino UNO												
3	Development of embedded programming and interfacing for motion control and obstacle avoidance												
4	Demonstration and testing of robot in static environment												
REFERENCES/ MANUAL /SOFTWARE:													
1	Foundation Engineering Laboratory Manual												
2	SOLID WORKS 2022 Software												
COURSE OUTCOMES: On completion of the course, the students will be able to													
CO1	develop the prototype model using mechanical operations like welding, forming and machining processes												
CO2	sketch 3D model and develop the prototype using 3D printer												
CO3	design and develop the autonomous robot for real-time applications												
Mapping of COs with POs and PSOs													
COs/POs /PSOs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2

24EGT21 - ENGLISH FOR EFFECTIVE COMMUNICATION - II																		
(Common to all Engineering and Technology branches)																		
Programme & Branch	All B.E/B.Tech Branches	Sem	Category	L	T	P	SL*	Total	Credit									
Prerequisites	Nil	2	HS	45	0	0	45	90	3									
Preamble	This course aims at up skilling the learners to listen, speak, read, and write as well as to facilitate the students in practicing the language skills to acquire verbal and communicative proficiency in professional and academic contexts.																	
sUnit – I	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing								9									
Grammar: Simple, Compound, and Complex Sentences – Verbal Aptitude: Odd Words – Paired words – Listening: Listening to a Match Commentary and Filling in a Table – Listening to TED talks - Speaking: Apologizing – Talking about Manners and Etiquette – Reading: Scanning a Text, Power Point Presentations – The Best Way to Start a New Habit : An Excerpt from <i>Atomic Habits</i> Writing: Business Letters: Enquiry and Complaint																		
Unit – II	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing								9									
Grammar: Direct and Indirect Speech – Verbal Aptitude: Words often Confused – Verbal Analogy – Listening: Listening to a Lecture and Sorting Information – Career Related Conversation – Speaking: Group Discussion – Speaking about Career Choices and Professional Skills – Reading: Reading for Local and Global Comprehension – How to Find and Fix the Causes of Your Bad Habits: An Excerpt from <i>Atomic Habits</i> - Writing: Job Application: Cover Letter and Resume – Student Portfolio																		
Unit – III	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing								9									
Grammar: Active and Passive Voice – Verbal Aptitude: Error Spotting – Sentence Improvement – Abbreviations and Acronyms – Listening: Listening to Podcast Interviews and News/Motivational Speeches – Speaking: Presenting a Point of View – Giving Opinions about Podcast – Reading: Reading a Procedure – Cross Cultural Communication - How to Make Good Habits Inevitable and Bad Habits Impossible: An Excerpt from <i>Atomic Habits</i> – Writing: Types of Essays: Argumentative and Opinion based Essays																		
Unit – IV	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing								9									
Grammar: If/Conditional Clause – Modals Verbs – Conversational Devices - Verbal Aptitude: Sentence Correction – Sentence Selection – Listening: Listening and Filling a Mind Map – Listening to Interviews, Celebrity talks – Speaking: Giving Advice and Suggestions – Interviewing Classmates - Reading: Reading for Information, Researching for Supporting Evidence – Technical Communication: Modes of Technology-based Communication – How to Stick with Good Habits Every Day : An Excerpt from <i>Atomic Habits</i> Writing: Dialogue Writing – Writing Reviews: Product and Documentary films/Web Series																		
Unit – V	Grammar, Verbal Aptitude, Listening, Speaking, Reading & Writing								9									
Grammar: Common Errors in Tenses – Verb - Preposition combinations – Verbal Aptitude: Coding and Decoding – Listening: Listening for key points – Speeches of New Inventions – Speaking: Asking for and Giving Permission – Talking about Gadgets, Inventions and Technology – Reading: Categorizing Information – Technical Communication: Effective use of Technology-based Communication – The Goldilocks Rule: How to Stay Motivated in Life and Work: An Excerpt from <i>Atomic Habits</i> – Writing: Report Writing: IV Report and Case Study Report

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	construct contextual and functional grammar to enhance the linguistic competence											Applying (K3)
CO2	listen, comprehend and infer implied meanings of the given text											Applying (K3)
CO3	speak clearly to develop competence to participate in oral discourses such as discussions / meetings / interviews and deliver presentations											Creating (K6)
CO4	critically read various texts by understanding contextual meanings and respond appropriately											Understanding (K2)
CO5	Analyze different genres of writing and making precise non-technical and technical documents											Analyzing (K4)

24MAC23 – PROBABILITY AND STATISTICS										
(Common to CSE, IT & CSD branches)										
Programme & Branch	B.E & Computer Science Engineering B.E – Computer Science and Design & B.Tech – Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit	
Prerequisites	Nil	2	BS	45	7	16	52	120	4	
Preamble	To provide an in-depth knowledge in random variables, correlation, sampling theory and promote the ability to use probability distributions and analysis of variance to experimental data.									
Unit – I	Random Variables: Discrete and Continuous random variables – Probability Mass and Probability density functions – Mathematical expectation and Variance – Moments – Moment generating function.									
Unit – II	Standard Probability Distributions: Discrete Distributions: Binomial distribution – Poisson distribution – Geometric distribution – Continuous Distributions: Uniform distribution – Exponential distribution – Normal distribution.									
Unit – III	Two Dimensional Random Variables: Introduction – Joint probability distributions – Marginal and conditional distributions – Covariance – Correlation and regression.									
Unit – IV	Testing of Hypothesis: Introduction – Critical region and level of significance – Types of Errors – Large sample tests: Z-test for single mean and difference of means – Small sample tests: Student's t-test for testing significance of single mean and difference of means – F-test for comparison of variances – Chi-square test for independence of attributes.									
Unit – V	Design of Experiments: Analysis of variance – One way classification: Completely Randomized Design – Two way classification: Randomized Block Design – Three way classification: Latin Square Design.									
LIST OF EXPERIMENTS / EXERCISES:										
1.	Introduction to R studio.									
2.	Identifying Mean and Variance for discrete and continuous random variables.									
3.	Computation of probability using Binomial, Poisson and Normal distributions.									
4.	Finding the Marginal and conditional distributions of two-dimensional random variable.									
5.	Computation of correlation coefficient for the given data.									
6.	Testing significance of means by student's t – test.									
7.	Testing the independence of attributes by Chi-square test.									
8.	Analyze whether the difference in means is statistically significant by completely randomized design.

*includes Term Work (TW) & Online / Certification course hours

COURSE OUTCOMES:											BT Mapped (Highest Level)
On completion of the course, the students will be able to											
CO1	Interpret the concept of random variables and know the basics of R studio.										
CO2	Apply the standard probability distributions in real time situations.										
CO3	Apply the concepts of two dimensional random variables and regression in engineering problems.										
CO4	Apply statistical tests for solving engineering problems involving small and large samples.										
CO5	Apply the concepts of analysis of variance to experimental data.

24CYT13 - CHEMISTRY FOR ELECTRONICS AND COMPUTER SYSTEMS																	
(Common to EEE, EIE, ECE, CSE, CSD, IT, AIDS & AIML branches)																	
Programme & Branch	B.E - EEE, EIE, ECE, CSE, CSD, B.Tech - IT, AIDS & AIML branches	Sem.#	Category	L	T	P	SL*	Total	Credit								
Prerequisites	Nil	1 / 2	BS	45	0	0	45	90	3								
Preamble	This course aims to emphasize the engineering students to realize the importance of water technology, energy storage devices, organic electronic materials, fabrication of PCBs, insulating materials and the need for e-waste management. It aims to impart the fundamentals of chemistry towards innovations in engineering and also for societal applications.																
Unit – I	WATER TECHNOLOGY								9								
Introduction - types of water - hardness of water- expression of hardness - units of hardness –water quality parameters-estimation of hardness of water by EDTA method – determination of alkalinity - DO, BOD and COD (Definition and Significance only) - disadvantages of using hard water in industry: scale, sludge and boiler corrosion - softening of water: Internal treatment process - carbonate and calgon conditioning - External treatment method - demineralization process and reverse osmosis.																	
Unit – II	ENERGY STORAGE DEVICES								9								
Batteries: Introduction - discharging and charging of battery - characteristics of battery - types of batteries – primary battery: silver button cell - secondary battery: Ni-Cd battery -modern battery: lithium-ion battery - choice of batteries for electric vehicles. Fuel Cells: Introduction - Importance and classification of fuel cells - description, principle, components and working of fuel cells: alkaline fuel cell, phosphoric acid fuel cell and direct methanol fuel cell - comparison of batteries with fuel cells.																	
Unit – III	ORGANIC ELECTRONIC MATERIALS								9								
Organic Electronic Materials: Introduction – types of organic semiconducting materials – comparison of organic with inorganic semiconducting materials – organic light emitting diodes – construction and working mechanism – comparison of LCD vs OLED. Fabrication of PCB: Introduction – electroplating (copper) process - electroless plating (nickel) process – printed circuit board (PCB) fabrication.																	
Unit – IV	INSULATING MATERIALS								9								
Introduction - requirements - classification (solid, liquid & gas) - preparation, properties and applications of solid inorganic insulator: ceramic materials - solid organic insulator: epoxy resin - liquid insulator: transformer oil - gas insulator: SF ₆ - electrical resistivity - factors influencing electrical resistivity of materials - composition, properties and applications of high resistivity materials: Nichrome - polymers as electrical insulator.																	
Unit – V	E-WASTE AND ITS MANAGEMENT								9								
Introduction - E- Waste definition - sources of e-waste – hazardous substances in e-waste - effects of e-waste on environment and human health - need for e-waste management - waste minimization techniques for managing e-waste – chemistry of recycling of e-waste (magnetic separation, eddy current, density separation - recovery of metals using acid leaching process) - disposal treatment methods of e- waste - Incineration, pyrolysis, land fill - global scenario of e-waste – e-waste in India- case studies.

1st sem for EEE, EIE, ECE & 2nd sem for CSE, CSD, IT, AIDS & AIML

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	analyze the water quality parameters for suitability of industrial and domestic applications.											Analysing (K4)
CO2	examine the chemistry of energy storing devices and meeting the future prospectus of energy storage.											Analysing (K4)
CO3	simplify the working mechanism of organic electronic materials and apply the concept of plating techniques in PCBs fabrication.											Analysing (K4)
CO4	identify the suitable insulating materials for industrial applications.											Analysing (K4)
CO5	categorize the e-waste and reduce its impacts on future environment.											Analysing (K4)

24ITC21- PROGRAMMING AND LINEAR DATA STRUCTURES																				
Programme & Branch	B.Tech. & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Programming in C	2	PC	30	0	30	30	90	3											
Preamble	This course helps the students to learn the concept of pointers in C language, and basic concepts of Linear data Structures like linked list, stack and queue.																			
Unit – I	Pointers and Arrays:																			
Introduction to Pointers -The & and * Operators – Pointer Expressions – char, int and float pointers – Passing addresses to Functions – Functions returning Pointers – Pointers and Arrays: Passing array elements to a Function – Accessing array elements using Pointers –Passing an Array to a Function – Dynamic Memory Allocation – Pointers and 2-D arrays – Pointer to an array – Passing 2-D array to a Function – Array of Pointers – Returning Array from a Function.																				
Unit – II	Pointers and Strings:																			
Standard Library String Functions – The const Qualifier – const Pointers – Returning const values – Two dimensional array of characters – Array of pointers to strings – Limitations of array of pointers to strings.																				
Unit – III	Pointers and Structures:																			
Array of Structures – Intricacies of Structures – Structure Pointers – Offsets of Structure Elements – Pointers to Functions – typedef with Function Pointers – args and argv-Arguments to main() – Pointers and variable number of arguments – near, far and huge pointers.																				
Unit – IV	Linked Lists:																			
Linked lists –adding a node: Beginning of the linked list –End of a linked list- After specified number of nodes – Display the linked list – count the number of nodes present in the linked list –delete the specified node from the linked list.																				
Unit – V	Stack and Queue and Application of pointers:																			
Stack – Implementation of stack as array and linked list - Queue - Implementation of Queue as array and linked list – Application of Pointers - Infix to Postfix, Evaluation of postfix expression.																				
LIST OF EXPERIMENTS / EXERCISES:																				
1.	Program to access a 1-D array using pointers																			
2.	Program to access a 2-D array using pointers																			
3.	Program to demonstrate dynamic memory allocation																			
4.	Program to pass an array to a function																			
5.	Program to manipulate strings using pointers																			
6.	Programs to demonstrate structure pointers																			
7.	Program to demonstrate pointers to functions																			
8.	Program to implement linked list																			
9.	Program to implement stack and queue using array																			
10.	Program to implement stack and queue using linked list																			
11.	Program to implement infix to postfix																			
12.	Program to implement evaluation of postfix expression

*includes Term Work (TW) & Online / Certification course hours

COURSE OUTCOMES:											BT Mapped (Highest Level)
On completion of the course, the students will be able to											
CO1	make use of the basic concepts of pointers and develop C programs using pointers and arrays.										
CO2	develop simple programs to manipulate string operations using pointers.										
CO3	apply functions and structures with pointers for solving problems.										
CO4	utilize the different operations on linked list and apply it for developing simple applications.										
CO5	apply the concept of arrays and linked lists to create Stack and Queue.										

Mapping of COs with POs and PSOs

COs/POs/ PSOs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2

24ITC22-OBJECT ORIENTED PROGRAMMING																				
Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Programming in C	2	ES	45	0	30	45	120	4											
Preamble	This course enables the student to learn the fundamentals of C++ with Object Oriented Programming. They will be able to create, manipulate and operate on classes and objects to utilize them for real world problem solving.																			
Unit – I	Object Oriented Programming Paradigm 9																			
Introduction: Principles of Object Oriented Programming – structure of C++ – Tokens, Expressions and Control Structures. Functions: Function prototyping – Call by Reference – Return by Reference - Inline Functions- Default Arguments- const Arguments - Function Overloading.																				
Unit – II	Classes and Objects 9																			
Classes and Objects: Specifying a class – Defining member functions – Making an outside function inline – Nesting of member functions- Private member functions- arrays within a class- Memory allocation for objects – Static Data members and Functions Arrays of objects- Objects as function arguments- Friendly functions - Returning Objects- Local Classes. Constructors and Destructors.																				
Unit – III	Operator Overloading and Inheritance 9																			
Inheritance: Defining Derived Classes – Single Inheritance – Multilevel Inheritance – Multiple Inheritance – Hierarchical Inheritance - Hybrid Inheritance - Virtual Base Class- Abstract Class. Operator Overloading: Defining Operator Overloading - Overloading Unary Operators- Overloading- Binary Operators.																				
Unit – IV	Pointers, Virtual functions and Strings 9																			
Pointers- Pointers to objects - this Pointer- Polymorphism - Pointers to derived classes - Virtual functions – Pure Virtual functions – Manipulating strings.																				
Unit – V	Templates and Exception Handling 9																			
Templates: Class Templates – Function Templates- Overloading of Template Functions. Exception Handling: Introduction – Basics of Exception handling- Exception handling mechanism – Throwing mechanism - Catching mechanism - Rethrowing an Exception.																				
LIST OF EXPERIMENTS / EXERCISES:																				
1.	Programs using control statements , Inline Functions and Default Argument																			
2.	Programs to implement the concept of Call by Value, Call by Reference and Call by Address.																			
3.	Programs to implement Function overloading																			
4.	Programs to understand Classes and objects																			
5.	Programs using Constructors and destructors																			
6.	Programs to understand friend function & friend class																			
7.	Programs using Unary and Binary operator overloading.																			
8.	Programs to demonstrate the various forms of inheritance																			
9.	Programs to illustrate Virtual function and Abstract class.																			
10.	Programs to define the Function templates and Class templates.

24TAM02 - TAMILS AND TECHNOLOGY

(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	SL*	TOT	Credit									
Prerequisites	Nil	2	HS	15	0	0	15	30	1									
Preamble	This course aims to impart the essential knowledge on the tamil culture and related technology																	
UNIT – I	WEAVING AND CERAMIC TECHNOLOGY																	
Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries.									3									
UNIT – II	DESIGN AND CONSTRUCTION TECHNOLOGY																	
Designing and Structural construction House & Designs in household materials during Sangam Age – Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram – Sculptures and Temples of Mamallapuram – Great Temples of Cholas and other worship places – Temples of Nayaka Period – Type study (Madurai Meenakshi Temple) – Thirumalai Nayakar Mahal – Chetti Nadu Houses, Indo – Saracenic architecture at Madras during British Period.																		
UNIT – III	MANUFACTURING TECHNOLOGY																	
Art of Ship Building – Metallurgical studies – Iron industry – Iron smelting, steel – Copper and gold – Coins as source of history – Minting of Coins – Beads making – industries Stone beads – Glass beads –Terracotta beads –Shell beads/ bone beats – Archeological evidences – Gem stone types described in Silappathikaram.																		
UNIT – IV	AGRICULTURE AND IRRIGATION TECHNOLOGY																	
Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoompu of Chola Period, Animal Husbandry – Wells designed for cattle use – Agriculture and Agro Processing – Knowledge of Sea – Fisheries – Pearl – Conche diving – Ancient Knowledge of Ocean – Knowledge Specific Society.																		
UNIT – V	SCIENTIFIC TAMIL & TAMIL COMPUTING																	
Development of Scientific Tamil – Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.																		
TEXT BOOK:																		
1.	Social Life of Tamils (Dr.K.K.Pillay) A joint Publication of TNTB & ESC and RMRL – (in print)

*includes Term Work (TW) & Online / Certification course hours

COURSE OUTCOMES:			BT Mapped (Highest Level)
படிப்பை முடித்தவுடன், மாணவர்கள்			
CO1	தமிழ் கலாச்சாரம் மற்றும் தமிழ் சமூகத்தினுடைய நெசவு மற்றும் பானை தொழில்நுட்பம் பற்றி விளக்க முடியும்.		Understanding (K2)
CO2	தமிழர்களின் வடிவமைப்பு மற்றும் கட்டிடத் தொழில்நுட்ப ஆற்றல் பற்றி விளக்க முடியும்.		Understanding (K2)
CO3	தமிழர்களின் உற்பத்தித் தொழில்நுட்பம் பற்றி சுருக்கமாகக் கூற முடியும்.		Understanding (K2)
CO4	தமிழர்களின் வேளாண்மை மற்றும் நீர்ப்பாசனத் தொழில்நுட்பம் பற்றி விளக்க முடியும்.		Understanding (K2)
CO5	தமிழர்களின் அறிவியல் தமிழ் மற்றும் கணினித்தமிழ் பற்றி விளக்க முடியும்.		Understanding (K2)

24GCL12 - FOUNDATION LABORATORY – ELECTRICAL, IOT AND WEB TECHNOLOGIES																						
(Common to all BE/BTech branches)																						
Programme & Branch		All BE/BTech Branches			Sem.	Category	L	T	P	SL*	Total	Credit										
Prerequisites		Nil			1/2	ES	0	0	90	0	90	3										
Preamble		This course is designed to provide a foundational knowledge on engineering with hands-on experience on the house wiring, Internet of Things and Web Technologies.																				
LIST OF EXPERIMENTS / EXERCISES:																						
PART A – Electrical Installation (30 Hours)																						
1.	Determination of load currents and select suitable components for Protection																					
2.	Develop a wiring circuit for incandescent lamp and fluorescent lamp using Simple and Staircase Wiring																					
3.	Develop and Investigate wiring circuits for Calling Bell System and Dimmable Light																					
4.	Create wiring circuit for single phase motor																					
5.	Development of IOT based energy monitoring and control																					
6.	Measurement and analysis of electrical parameters for Photovoltaic Solar Panel																					
PART B – Internet of Things (30 Hours)																						
1.	Design a Single layer PCB layout designing																					
2.	Fabricate Single layer PCB printing																					
3.	Assembling, soldering and desoldering practice on single layer PCB																					
4.	Sensor and actuator interfacing with internet enabled microcontroller																					
5.	Sensor and actuator calibration																					
6.	Integration of microcontroller based system with Cloud platform																					
PART C – Web Technologies (30 Hours)																						
1.	Design a simple web page using basic HTML tags and CSS properties																					
2.	Design a responsive webpage using Bootstrap framework																					
3.	Design a webpage for signup and login validation form using Javascript and PHP																					
4.	Create a database connectivity using PHP, MySQL and host the website in the server.																					
REFERENCES/ MANUAL /SOFTWARE:																						
1.	Laboratory Manual																					
2.	Eric T.Freeman,Elisabeth Robson, "Head First JavaScript Programming A Brain-Friendly Guide", 1st Edition, O'Reilly , 2014.																					
3.	Eric T.Freeman,Elisabeth Robson, "Head First HTML and CSS",2nd Edition, O'Reilly , 2012																					
4.	Lynn Beighley,"Head First SQL",1st Edition, O'Reilly,2007.																					
COURSE OUTCOMES:																						
On completion of the course, the students will be able to																						
CO1	Design electrical wiring circuits for buildings based on their requirement										BT Mapped (Highest Level)											
CO2	Develop IoT based solutions and PCB for real world use cases.										Applying(K3), Precision (S3)											
CO3	Design and host an interactive dynamic website.										Applying(K3), Precision (S3)

24CYL13 – CHEMISTRY LABORATORY FOR ELECTRONICS AND COMPUTER SYSTEMS

(Common to EEE, EIE, ECE, CSE, CSD, IT, AIDS & AIML branches)

Programme & Branch	B.E & EEE, EIE, ECE, CSE, CSD, B.Tech & IT, AIDS & AIML branches	Sem.#	Category	L	T	P	SL*	Total	Credit
Prerequisites	Nil	1 / 2	BS	0	0	30	0	30	1
Preamble	This course aims to impart the basic concepts of volumetric, conductometric, spectrophotometric and pHmetry experiments for the estimation of given samples and thereby, to improve the analytical skills. This course also aims to impart the knowledge on hardness, DO, COD, alkalinity, Fe^{2+} , Cu^{2+} and Cr^{6+} in computer systems.								

LIST OF EXPERIMENTS / EXERCISES:

1. Assessment of the given water sample for the suitability of drinking / industrial purpose by estimating the carbonate, non-carbonate and total hardness by EDTA method.
2. Estimation of type and amount of alkalinity present in the given river/bore well water sample.
3. Perform Winkler's method for the determination of dissolved oxygen in the given wastewater sample.
4. Determination of COD in the given water sample.
5. Estimation of strength and amount of acid in a given solution using pH meter.
6. Determination of strength and amount of mixture of acids present in the given solution using Conductivity meter.
7. Determination of concentration of Nickel by Spectrophotometric method.
8. Estimation of copper content from discarded PCB's by Iodometric method.
9. Determination of iron present in the given sample by permanganometric method.
10. Volumetric estimation of chromium from electroplating sludge using permanganometric method.
11. Electroplating process (Demonstration).
12. Report preparation -based on the data received from the analysed water quality parameters (Demonstration).

COURSE OUTCOMES:

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	estimate the amount of hardness, alkalinity, DO and COD present in the given sample.	Analyzing (K4), Precision (S3)
CO2	interpret the experimental results obtained from conductivity meter and pH meter.	Analyzing (K4), Precision (S3)
CO3	demonstrate the determination of Nickel by Spectrophotometer, Copper by Iodometry, Iron and Chromium by Permanganometry.	Analyzing (K4), Precision (S3)

Mapping of COs with POs and PSOs

24ITT31- INFORMATION AND CODING

Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit							
Prerequisites	Nil	3	ES	45	15	0	60	120	4							
<hr/>																
Preamble	This course aims at introducing information theory and the practical aspects of various error-control coding and data compression techniques.															
Unit – I	Information Entropy Fundamentals:							9+3								
Uncertainty, Information and Entropy – Source coding Theorem – Data Compaction – Discrete Memoryless channels – Mutual Information - Channel Capacity.																
Unit – II	Error Control Coding:							9+3								
Discrete-Memory less Channels- Linear Block codes- Syndrome - Minimum Distance Considerations – Syndrome Decoding - Cyclic codes – Generator Polynomial – Parity Check Polynomial – Generator and Parity-Check Matrices - Encoder for Cyclic codes – Calculation of the Syndrome.																
Unit – III	Convolutional codes and Text Compression:							9+3								
Convolutional Codes: Code Tree, Trellis and State Diagram- Compression Principles – Text compression: Static Huffman Coding - Dynamic Huffman coding – Arithmetic coding – LZW coding.																
Unit – IV	Image and Audio Compression:							9+3								
Image Compression: Graphics Interchange format – Tagged Image File Format – Digitized documents – Digitized Pictures - JPEG Standards- Audio Compression: Differential Pulse code Modulation – Adaptive Differential Pulse Code Modulation – Adaptive Predictive coding –Linear Predictive coding – Code-Excited LPC – Perceptual coding- MPEG audio coders.																
Unit – V	Video Compression:							9+3								
Principles: Frame types-Motion estimation and compensation-Implementation issues – H.261- H.263- MPEG: MPEG-1 - MPEG-2 - MPEG-4 video standards.																
<hr/>

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	apply source coding theorem and entropy to quantify information											Applying (K3)
CO2	apply error control coding for block and cyclic codes											Applying (K3)
CO3	make use of the convolutional codes and apply different compression methods for text compression											Applying (K3)
CO4	apply various image and audio compression coding standards in different applications											Applying (K3)
CO5	make use of the different video compression standards in different applications											Applying (K3)

24ITT32 - PROGRAMMING IN JAVA

Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit									
Prerequisites	Nil	3	PC	45	0	0	45	90	3									
Preamble	This course provides a concise introduction to Java programming including inheritance, interfaces, exception handling, threads and collection framework.																	
Unit – I	Classes and Objects																	
Overview of OOP —Data Types, Variables and Arrays – Operators – Control Statements- Classes: Class Fundamentals-objects—Assigning Object Reference Variables – Introducing Methods.																		
Unit - II	Nested Classes																	
Constructors – this keyword – Garbage Collection – Stack Class. Overloading Methods – Objects as Parameters – Argument Passing – Returning Objects – Recursion – Access Control–Static – Nested and Inner Classes – Command-Line Arguments – Variable Length Arguments.																		
Unit - III	Inheritance, Packages and Interfaces																	
Inheritance: Basics – Super keyword -Multilevel Hierarchy–Method Overriding – Dynamic Method Dispatch –Abstract Classes – final with Inheritance. Packages and Interfaces: Packages – Packages and Member Access –Importing Packages – Interfaces.																		
Unit - IV	Exception Handling, Multithreading and I/O																	
Exception Handling basics – Multiple catch Clauses – Nested try Statements – Java's Built-in Exceptions – User defined Exception. Multithreaded Programming: Java Thread Model–Creating a Thread and Multiple Threads – Priorities – Synchronization–Multithreading - I/O Basics – Reading and Writing Console I/O – Reading and Writing Files.																		
Unit - V	String Handling, Generics and Collections																	
Strings: Basic String class, methods and String Buffer Class. Generics: Introduction – Example – Parameters – General Form – Generic Methods, Constructors and Interfaces. Strings: Basic String class, methods and String Buffer Class. Collection frameworks: Overview – Collection Classes – Collection Interfaces.																		
TEXT BOOK:

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES:											BT Mapped (Highest Level)
On completion of the course, the students will be able to											
CO1	apply basic constructs of java programming to solve simple problems using classes										
CO2	build java applications using nested classes										
CO3	utilize the features such as inheritance, packages and interfaces in various applications										
CO4	make use of exception handling mechanisms, multithreaded model and java I/O packages to solve real world problems										
CO5	develop java applications with generics concepts and collection frame works.

24ITT33- COMPUTER ORGANIZATION																		
Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit									
Prerequisites	Nil	3	PC	45	0	0	45	90	3									
Preamble	This course deals with the basics of computers and its functional units. It also covers the interfacing with memory and I/O devices. Advanced topics like pipelining and computer performance are also covered.																	
Unit – I	Basic Structure of Computers and Machine Instructions: 9																	
Functional Units–Basic Operational Concepts–Number Representation and Arithmetic Operations – Performance – Memory Locations and Addresses – Memory Operations – Instruction and Instruction Sequencing – Addressing Modes – CISC Instruction Sets – RISC and CISC Styles.																		
Unit – II	Arithmetic Unit: 9																	
Addition and Subtraction of Signed Numbers–Design of Fast Adders–Multiplication of Unsigned Numbers – Multiplication of Signed Numbers – Fast Multiplication – Integer Division – Floating Point Numbers and Operations.																		
Unit - III	Basic Processing Unit and Pipelining: 9																	
Fundamental Concepts–Instruction Execution –Hardware Components–Instruction Fetch and Execution Steps – Control Signals - Hardwired control – CISC Style Processors. Pipelining – Basic concepts – Pipeline Organization – Pipelining Issues - Data Dependencies – Memory Delay – Branch Delay.																		
Unit - IV	Memory System: 9																	
Basic Concepts–Semiconductor RAM Memories – Read-Only Memories – Direct Memory Access – Memory Hierarchy - Cache Memories: Mapping Functions – Performance Consideration.																		
Unit – V	Virtual Memory and I/O Organization: 9																	
Virtual Memory – Secondary Storage- Magnetic Hard Disks- Interrupts – Enabling and Disabling Interrupts – Handling Multiple Devices.																		
TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	identify the basic structure, arithmetic and memory operations of a digital computer and illustrate the addressing modes for set of instructions	Applying (K3)
CO2	apply algorithms for performing different arithmetic operations.	Applying (K3)
CO3	make use of the data path in a processor to write the sequence of steps to fetch and execute a given instruction and apply the concepts of pipelining	Applying (K3)
CO4	identify the different types of memory and apply the mapping functions between different levels of memory	Applying (K3)
CO5	make use of the virtual memory and identify the various types of interrupts in I/O transfer.	Applying (K3)

Mapping of COs with POs and PSOs

24ITC31- FULL STACK DEVELOPMENT																				
Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Nil	3	PC	45	0	30	45	120	4											
Preamble	This course provides knowledge in web development, client side programming, server side programming, No SQL database and user interface design.																			
Unit – I	UI Design																			
HTML5: – Cascading Style Sheet – Table – HTML Forms Element– Responsive Web Design: Bootstrap - Grid -Buttons – Tables –Images - Nav Bar - Forms-Input – Input Groups – Modal.																				
Unit – II	JavaScript ES6:																			
Introduction – Variables – Operators - Control structures -Functions – Arrow function - Scope - Objects – Array- Date - RegExp – HTML DOM –Collections - Event Handling – JSON parsing.																				
Unit – III	Server-side JS Framework:																			
Node JS: Introduction – Architecture – Features- Creating Web Servers with HTTP -Request - Response – Event Handling - GET and POST Methods - Connect to NoSQL Database using Node JS – Implementation of CRUD operations- REST API																				
Unit – IV	React JS Part I																			
React: Introduction –create React app – Elements – React DOM - Components – Component Life cycle – React JSX - state – props - Forms – controlled and uncontrolled component – Events - conditional rendering.																				
Unit – V	React JS Part II																			
List – keys – refs – Fragments - Router – Map – Table –Code splitting – Hooks: useState–useEffect–useContext.																				
LIST OF EXPERIMENTS / EXERCISES:																				
1.	Create an website using CSS and Bootstrap																			
2.	Develop an Javascript code to validate the form																			
3.	Design a web application using Node JS to handle the different HTTP Request.																			
4.	Develop a web application using Node JS to handle the GET and POST request																			
5.	Design a webpage to maintain product information using CRUD operations in MongoDB.																			
6.	Create React JS application using components, state, props and modules																			
7.	Design an form using React JS																			
8.	Design an React application using Router to navigate different pages.																			
9.	Implement different Hooks in React JS																			
10.	Create an To- Do list application using React JS																			
TEXT BOOK:

24ITC32 - ADVANCED DATA STRUCTURES																			
Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL *	Total	Credit										
Prerequisites	Programming & Linear Data Structures	3	PC	45	0	30	45	120	4										
Preamble	This course focuses on the fundamental data structures. It also introduces the basic concepts of graphs to enhance problem solving.																		
UNIT I	Linear Data Structures - List:									9									
Overview of Array, List, Stack and Queue – Abstract Data Types - Doubly Linked List: Structure, Operations and Implementation – Circular Linked List: Structure, Operations and Implementation - Examples: The Polynomial ADT – Radix Sort.																			
UNIT II	Sorting and Hashing:									9									
Sorting: Insertion sort –Shell sort -Merge sort – Quick sort –Hashing: Hash Function – Separate Chaining – Open Addressing: Linear Probing – Quadratic Probing – Double Hashing – Rehashing – Extendible Hashing.																			
UNIT III	Trees:									9									
Preliminaries: Implementation of Trees – Tree Traversals with an Application – Binary Trees: Implementation – Expression Trees – The Search Tree ADT – Binary Search Trees: MakeEmpty– Find – FindMin – FindMax – Insert – Delete– AVL Trees: Single Rotation-Double Rotation - Splay Trees– B-Trees.																			
UNIT IV	Priority Queues:									9									
Priority Queues (Heaps) – Model – Simple Implementations – Binary Heap – Application of Priority Queues - d-heaps – Leftist Heaps – Skew Heaps – Binomial Queues.																			
UNIT V	Graphs:									9									
Definitions – Representation of Graphs – Topological Sort – Shortest-Path Algorithms: Unweighted shortest paths – Dijikstra's Algorithm – Graphs with negative edge costs - Applications of DFS: Bi-connectivity – Euler Circuits – Finding StrongComponents.																			
LIST OF EXPERIMENTS / EXERCISES:																			
1.	Implementation of doubly linked list and its operations																		
2.	Implementation of circular linked list and its operations																		
3.	Implementation of polynomial addition using linked list ADT																		
4.	Implementation of Merge sort algorithm																		
5.	Implementation of Quick sort algorithm																		
6.	Implement the following operations in hash table using array i) Insert the element in hash table ii) Search an element from the table iii) Delete an element from the table																		
7.	Implementation of the binary search tree and its operations																		
8.	Implement the following operations of AVL Tree: i)Insert a number on to the tree ii) Delete a number from the tree iii) Display all the numbers in the tree																		
9.	Implement the following operations of B tree: i)Insert a number on to the tree ii) Delete a number from the tree iii) Display all the numbers in the tree																		
10.	Implementation of Binary heap and its operations																		
11.	Implementation of Dijikstra's algorithm																		
12.	Implementation of topological sort algorithm

COURSE OUTCOMES:

On completion of the course, the students will be able to

BT Mapped
(Highest Level)

CO1	apply doubly linked list and circular linked list for solving problems	Applying (K3), Precision (S3)
CO2	apply the concept of sorting and hashing techniques for solving problems	Applying (K3), Precision (S3)
CO3	build trees and perform its various operations	Applying (K3), Precision (S3)
CO4	utilize priority queues to develop simple application	Applying (K3), Precision (S3)
CO5	choose appropriate graph algorithm for solving problems	Applying (K3), Precision (S3)

24MNT31 - ENVIRONMENTAL SCIENCE																				
(Common to All Engineering and Technology Branches)																				
Programme & Branch	All B.E/B.Tech Branches	Sem.	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Nil	3 / 6	MC	30	0	0	0	30	0											
Preamble	This course provides an approach to understand the various natural resources, ecosystem, bio-diversity, pollution control & monitoring methods for sustainable life and also to provide knowledge and to create awareness for engineering students on social issues and the environment.																			
Unit – I	Environmental Studies and Natural Resources																			
Introduction to Environmental Science – uses, over-exploitation and conservation of forest, water, mineral, food, energy and land resources – case studies.																				
Unit – II	Ecosystem and Biodiversity																			
Ecosystems: concept and components of an ecosystem - structural and functional features – Functional attributes (Food chain and Food web only). Biodiversity: Introduction – Classification – Bio geographical classification of India- Values of biodiversity – Threats and Conservation of biodiversity - case studies.																				
Unit – III	Environmental Pollution																			
Environmental Pollution: Definition – causes, effects and control measures of: (a) Air pollution - Climate change, global warming, acid rain, ozone layer depletion (b) Water pollution (c) Soil pollution - Role of an individual in prevention of pollution - case studies.																				
Unit – IV	Environment Quality Standards and Monitoring																			
Ambient air quality standards - Water quality parameters and standards: Turbidity, pH, Suspended solids, hardness, residual chlorine, sulfates, phosphates, iron and manganese, DO, BOD, COD (definition, specifications and limits only) - Introduction to EIA – objectives and process of EIA - environment protection act – air (prevention and control of pollution) act – water (prevention and control of pollution) act- case studies																				
Unit – V	Social Issues and the Environment																			
From Unsustainable to Sustainable development - three pillars of sustainability- factors affecting environmental sustainability- approaches for sustainable development- Social issues: Urban problem related to energy - population growth and explosion - issues related to resettlement and rehabilitation, E-waste recycling - role of IT in environment and human health - case studies.

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES:										BT Mapped (Highest Level)	
On completion of the course, the students will be able to											
CO1	illustrate the various natural resources and role of individual for its conservation										Understanding (K2)
CO2	elaborate the features of ecosystem and biodiversity to find the need for conservation.										Understanding (K2)
CO3	manipulate the sources, effects and control methods of various environmental pollution.										Applying (K3)
CO4	make use of the knowledge of Quality standards, EIA and environmental legislation laws to monitor the environment.										Applying (K3)
CO5	utilize the knowledge of various social issues and impact of population explosion on environment towards sustainability.										Understanding (K2)

24ITL31 - PROGRAMMING IN JAVA LABORATORY

Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit
Prerequisites	Nil	3	PC	0	0	30	0	30	1

Preamble This course provides knowledge to develop applications using java programming language.

LIST OF EXPERIMENTS / EXERCISES:

1. Write simple Java programs using operators, arrays and control statements.
2. Develop stack and queue data structures using classes and objects.
3. Demonstrate the concepts of inheritance & polymorphism.
4. Develop an application using interfaces by accessing super class constructors and methods.
5. Develop an employee payroll application using packages.
6. Implement exception handling and creation of user defined exception.
7. Implement program to demonstrate multithreading and inter thread communication.
8. Write a program to perform file operations.
9. Develop applications to demonstrate the features of generics classes and interfaces.
10. Implement the concepts of collection frameworks.
11. Develop student's academic performance system using JDBC

REFERENCES/ MANUAL /SOFTWARE:

1. Linux / Windows
2. Eclipse IDE / Netbeans IDE / IntelliJ IDEA
3. Lab manual

COURSE OUTCOMES:

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	construct java programs using object oriented programming concepts	Applying (K3), Precision (S3)
CO2	develop simple applications using package, exceptions, multithreading, and generics concepts	Applying (K3), Precision (S3)
CO3	build database applications for real world problems using java database connectivity	Applying (K3), Precision (S3)

Mapping of COs with POs and PSOs

COs/ POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
CO1	3	2	2	2	3	1					2	3	2
CO2	3	2	2	2	3	1					2	3	2
CO3	3	2	2	2	3	1					2	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

*includes Term Work(TW) & Online / Certification course hours

24ITL32 – DESIGN THINKING LABORATORY

Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit
Prerequisites	Nil	3	PC	0	0	30	0	30	1

Preamble This course provides an exposure to develop a prototype model for a design challenge

LIST OF EXPERIMENTS / EXERCISES:

1.	Develop SCOPES Template for your design challenge.
2.	Perform User Research by using explore method and tools
3.	Conduct Field Observation for your design challenge
4.	Conduct an interview with your customer by using empathy map and journey map.
5.	Create user personas for your product or service
6.	Develop SCAMPER template for ideation.
7.	Create user scenario/story telling for your product or service.
8.	Create low-fidelity prototypes (paper prototypes) for your design challenge.
9.	Create medium-fidelity prototypes (hardware/software prototypes) for your design challenge.
10.	Collect feedback from users for your prototype model.

REFERENCES/ MANUAL /SOFTWARE:

1.	Chart Papers, Stick Notes, IOT Components
2.	Lee Chong Hwa, "Design Thinking the Guidebook", Design Thinking Master Trainers of Bhutan, 2017. (E-Book).
3.	Any Web Browser.
4.	Laboratory Manual

COURSE OUTCOMES:

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	construct templates for the given design challenge in an orderly manner.	Applying (K3), Precision (S3)
CO2	identify the customers and interview them to understand their feelings and requirements.	Applying (K3), Precision (S3)
CO3	model the challenges using prototypes and make use of it to collect the feedback from end users.	Applying (K3), Precision (S3)

Mapping of COs with POs and PSOs

COs/ POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
CO1	3	2	2	2	3	1					2	3	2
CO2	3	2	2	2	3	1					2	3	2
CO3	3	2	2	2	3	1					2	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

*includes Term Work(TW) & Online / Certification course hours

24ITL33 - ANIMATION LABORATORY													
Programme & Branch		B. Tech & Information Technology		Sem.	Category	L	T	P	SL*	Total	Credit		
Prerequisites		Nil		3	PC	0	0	30	0	30	1		
Preamble This course provides hands-on experience in graphics design and animation tools													
LIST OF EXPERIMENTS / EXERCISES:													
1.	Create an invitation for an event												
2.	Design a promotional poster for an organization / product.												
3.	Design a banner for an event, trade show, or advertising campaign												
4.	Design a business card using CorelDRAW.												
5.	Experiment with different shapes, text styles, and color combinations to create a visually appealing logo, header and button for website.												
6.	Design a wireframe for a website homepage , landing page and other pages.												
7.	Design a wireframe for a mobile app landing page and other pages.												
8.	Create a simple object like a mug, a chair, a table using Blender.												
9.	Create simple animations such as a bouncing ball or a rotating object or a character walk cycle using Blender.												
10.	Create a python script interface to automate repetitive tasks in Blender												
REFERENCES/ MANUAL /SOFTWARE:													
1.	GIMP												
2.	Audacity												
3.	Blender												
4.	Filmora												
5	Laboratory Manual												
COURSE OUTCOMES: On completion of the course, the students will be able to										BT Mapped (Highest Level)			
CO1	build a poster invitation using graphic tool.									Applying (K3), Precision (S3)			
CO2	develop UI templates for website and mobile applications.									Applying (K3), Precision (S3)			
CO3	construct 3D models and visual effects using animation tools.									Applying (K3), Precision (S3)			
Mapping of Cos with POs and PSOs													
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2

24MAT44 – DISCRETE MATHEMATICS																				
Programme & Branch	B.Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Nil	4	BS	45	15	0	60	120	4											
Preamble	To impart knowledge in mathematical logic, relations, investigate various category of functions and also develop skills to apply counting principles in algorithms and group structures in coding theory.																			
Unit – I	Propositional Calculus: 9+3																			
Propositions – Logical connectives – Compound propositions – Conditional and biconditional propositions – Truth tables – Tautologies and Contradictions – Inverse, Converse and Contrapositive – Logical equivalences and implications –Normal forms – Principal conjunctive normal form and Principal disjunctive normal form – Rules of inference – Arguments – Validity of arguments.																				
Unit – II	Predicate Calculus: 9+3																			
Predicates – Statement function – Variables – Quantifiers – Universe of discourse – Theory of inference – Rules of universal specification and generalization – Rules of Existential specification and generalization - Validity of arguments.																				
Unit – III	Combinatorics: 9+3																			
Permutations and Combinations - Pigeonhole principle - Principle of inclusion and exclusion - Mathematical Induction - Recurrence relations - Solution of recurrence relations - Generating Functions - Solving recurrence relation by generating functions.																				
Unit – IV	Relations and Functions: 9+3																			
Relations: Cartesian product of sets – Relations on sets – Types of relations and their properties – Matrix representation of a relation - Graph of a relation – Equivalence relations. Functions: Definition – Classification of functions – Composition of functions – Inverse functions.																				
Unit – V	Group Theory: 9+3																			
Groups and Subgroups (Definitions only) – Homomorphism – Cosets – Lagrange's theorem – Coding Theory : Group codes –Hamming distance – Basic notions of error correction – Error recovery in group codes (Excluding theorems in coding theory)																				
TEXT BOOK:

*includes Term Work (TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)
CO1	Apply propositional logic to validate the arguments.										
CO2	Apply the rules of inference and methods of proof in predicate calculus to verify the validity of arguments.										
CO3	Use combinatorial concepts in analysis of algorithms.										
CO4	Understand various concepts of relations and different types of functions.										
CO5	Apply the concepts of group structures in coding theory.										

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2

24ITT41-DESIGN AND ANALYSIS OF ALGORITHMS																				
Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Data Structures & Programming in C	4	PC	45	15	0	60	120	4											
Preamble	This course imparts a formal introduction to various algorithm design techniques for analyzing the performance of algorithms.																			
Unit – I	Introduction								9 +3											
Notion of an Algorithm - Fundamentals of Algorithmic Problem Solving - Important Problem Types - Fundamentals of the Analysis of Algorithm Efficiency - Analysis Framework - Asymptotic Notations and its properties - Mathematical analysis for Recursive and Non-recursive algorithms - Empirical analysis of algorithms .																				
Unit – II	Brute Force								9 +3											
Selection and Bubble Sort, Sequential search and String Matching - closest pair and convex hull problem- Divide and Conquer methodology: Merge sort - Quick sort - Binary search - Binary tree traversals and related properties - Multiplication of large integers and Strassen's Matrix Multiplication .																				
Unit – III	Decrease and Conquer								9 +3											
Insertion sort -Topological Sorting - Fake coin problem - Computing a Median and the Selection Problem - Transform and conquer: Presorting - Balanced search trees -AVL trees -2-3 Trees- Heaps and Heap sort.																				
Unit – IV	Dynamic Programming								9 +3											
Warshall's and Floyd's algorithm - Optimal Binary Search Trees - Knapsack Problem and Memory functions - Greedy Technique: Prim's algorithm - Kruskal's Algorithm - Dijkstra's Algorithm - Huffman Trees.																				
Unit – V	Backtracking								9 +3											
n-Queens problem - Hamiltonian Circuit Problem - Subset Sum Problem-Branch and Bound: Assignment problem - Knapsack Problem - Traveling Salesman Problem - Overview of P, NP and NP-Complete Problems.

24ITT42- OPERATING SYSTEMS

Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL *	Total	Credit									
Prerequisites	Nil	4	PC	45	15	0	60	120	4									
<hr/>																		
Preamble	This course describes about operating system abstractions, mechanisms and their implementations such as process management, synchronization, scheduling, deadlock and file systems.																	
Unit – I	Operating Systems Overview																	
Introduction – Computer System Organization – Computer System Architecture – Operations – Resource Management – Security and Protection – Virtualization – Computing Environments. Operating Systems Structures: Services – User and OS Interface – System Calls – Linkers and Loaders – Operating system Structure – Building and Booting OS.																		
Unit – II	Process Management:																	
Process Concept, Process Scheduling, Operations on Processes, Interprocess Communication – IPC in Shared Memory and Message Passing Systems. Threads: Overview - Multicore Programming - Multithreading Models. CPU Scheduling: Scheduling Criteria – Scheduling Algorithms.																		
Unit – III	Process Synchronization																	
CriticalSection Problem –Petersons solution-Hardware support for synchronization-Mutex Locks – Semaphores – Monitors. Deadlocks: Deadlock Characterization – Methods for handling deadlocks – Deadlock Prevention and Avoidance – Deadlock Detection – Recovery from Deadlock.																		
Unit – IV	Memory Management																	
Main Memory – Background – Contiguous Memory Allocation – Paging – Structure of the page table – Swapping. Virtual Memory: Background – Demand Paging – Page Replacement – thrashing.																		
Unit – V	Storage Management																	
Mass Storage Structure – Overview – HDD Scheduling – File System: File Concept – Access Methods – Directory Structure – Protection – File System Implementation – File System Structure-File System Operations – Directory Implementation – Allocation Methods – Free Space Management – Case study: Linux System.																		
<hr/>

24ITT43 - DATABASE MANAGEMENT SYSTEMS																		
Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Credit									
Prerequisites	Nil	4	PC	45	0	0	45	90	3									
Preamble	This course provides the fundamentals of database concepts, SQL queries and transactions. It also deals with various concurrency control techniques for transactions.																	
Unit – I	Data Models and Relational Model:								9									
Introduction–Database System Applications–Purpose of database systems – View of data – Database Languages – Relational Databases– Database Architecture – Database Users and administrators – Relational Model – Structure of Relational Databases – Database Schema – Keys – Schema Diagrams – Relational Query Languages – Relational Operations- Relational Algebra.																		
Unit – II	SQL and Database Design:								9									
Database Design – E-R model- Constraints – ER diagrams – Reduction to Relational Schema – ER design issues. SQL: Basic structure – Operations –Aggregate Functions –Sub queries – Nested Sub queries – Intermediate SQL: Joins – views– Index – Integrity Constraints– SQL data types and schemas.																		
Unit – III	Relational Database Design:								9									
Features of good relational designs- Functional dependency theory – Decomposition using functional dependencies–Algorithms for decomposition. Normal Forms: 1NF, 2NF, 3NF, BCNF, 4NF, 5NF.																		
Unit – IV	Storage and Indexing:								9									
Data Storage: RAID – Tertiary storage – File Organization – Organization of Records in Files – Data dictionary storage- Ordered indices– B+ Tree index files–Multiple key access – Static and Dynamic Hashing – Bitmap indices.																		
Unit – V	Transaction , Concurrency Control and Recovery System:								9									
Transaction concept –Transaction model–Storage structure–Transaction atomicity and durability – Isolation – Serializability.Lock-based Protocols – Deadlock Handling – Timestamp and Validation Based Protocols – Failure classification – Storage – Recovery and atomicity – Algorithm – Buffer management .

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES:											BT Mapped (Highest Level)
On completion of the course, the students will be able to											
CO1	identify the features, architecture and applications of database system										
CO2	develop an ER model and use relational database with SQL statements										
CO3	build relational database using normalization methods										
CO4	apply indexing and hashing techniques in relational database, and perform transaction processing										
CO5	apply the concepts of concurrency control and recovery in a relational database										

Mapping of COs with POs and PSOs

COs/POs/ PSOs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2

24ITC41- PYTHON PROGRAMMING AND FRAMEWORKS

Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL *	Total	Credit									
Prerequisites	Nil	4	PC	45	0	30	45	120	4									
Preamble	This course provides fundamental knowledge on Python programming and its frameworks. It also explores various packages for data manipulation and analysis.																	
Unit – I Basic Concepts																		
Introduction – Variables, Expressions and Statements – Functions – Conditionals and recursion – Fruitful Functions – return values, parameters, local and global scope, function composition, recursion – Iteration Statements – Mutable vs Immutable data types – Strings – String slices – Searching – Looping and Counting – String methods – String Comparison.																		
Unit – II	Data Structures																	
Lists – List operations – slices and methods – Dictionaries – Dictionaries as set of Counters – Looping and Dictionaries – Dictionaries and Lists – Tuples – Tuples Basics – Lists and Tuples – Dictionaries and Tuples – Sequences of sequences – Sets – Sets Basics – Set Operations – Case Study – Data Structure Selection – Files – Basic File Operations – File names and paths – Exception Handling.																		
Unit – III	Object Oriented Programming & Python Database Integration																	
Classes and Objects – Classes and Functions – Classes and methods – Object-oriented features –init() method –str() method – Operator Overloading – Type-based dispatch – Polymorphism – Inheritance – Aggregation and Association – Need for database programming – Connect Database – CRUD operations – Cursor Attributes.																		
Unit – IV	Data Manipulation with NumPy Arrays																	
Python Environment & Frameworks: Anaconda – Jupyter notebook – NumPy: The Basics of NumPy Arrays – Computation on NumPy Arrays – Aggregations – Case Study Using Aggregation and Histogram – Computation on Arrays: Broadcasting – Comparisons, Masks and Boolean Logic – Sorting Arrays – Structured Arrays.																		
Unit – V	Data Manipulation with Pandas and Visualization																	
Data Manipulation with Pandas: Pandas Objects – Data Indexing and Selection – Operating on data – Handling missing data – Hierarchical Indexing – Concat and Append – Merge and Join – Aggregation and Grouping - Data Visualization with Matplotlib: Line plots: Line Colors and Styles – Axes Limits – Labeling Plots.																		

LAB EXERCISES

1. Implement linear search and binary search
2. Implement Quick Sort and Merge Sort
3. Find the most frequent words from a given text file and copy the same into another file
4. Explore string manipulation functions (word play)
5. Program using user-defined functions with different types of argument passing methods
6. Demonstrate tuple, list, set and dictionary operations
7. Program to illustrate the concept of constructors
8. Program to implement different types of inheritance, Aggregation and Association
9. Develop an application to illustrate CRUD operations using python and MySQL
10. Program to demonstrate the usage of exception handling
11. Perform data manipulation using NumPy
12. Demonstrate Data Visualization using Pandas and Matplotlib

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)
CO1	develop simple applications using python - functions, string, data structures											
CO2	build Python applications making use of List, Dictionaries, Tuples and Sets											
CO3	apply Object Oriented Programming concepts and CRUD operations in Python applications											
CO4	make use of NumPy Arrays in Python applications											
CO5	utilize Pandas and Matplotlib for developing advance applications in Python											

Mapping of COs with POs and PSOs

COs/POs/ PSOs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2	
CO1	3	2	2	2	3	1						2	3	2
CO2	3	2	2	2	3	1						2	3	2
CO3	3	2	2	2	3	1						2	3	2
CO4	3	2	2	2	3	1						2	3	2
CO5	3	2	2	2	3	1						2	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN – THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		40	60				100
CAT2		25	75				100
CAT3		25	75				100
ESE		30	70				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

24ITL41-DATABASE MANAGEMENT SYSTEMS LABORATORY

Programme & Branch	B. Tech & Information Technology	Sem.	Category	L	T	P	SL*	Total	Cred
Prerequisites	Nil	4	PC	0	0	30	0	30	1
Preamble	This course provides hands-on experience in databases and its operations using SQL and other high level languages.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Demonstrate Data definition language and integrity constraints.								
2.	Demonstrate Data manipulation language, Data control language commands and TCL commands.								
3.	Execute nested , sub queries and Join operations in SQL.								
4.	Create Views and index and perform SQL operations.								
5.	Demonstrate SQL String and DATE Functions.								
6.	Execute Aggregate Functions, GROUP BY and HAVING Clauses of SQL								
7.	Demonstrate the concepts of looping and decision making using PL/SQL statements.								
8.	Implement Cursors and Triggers and its operations.								
9.	Develop Procedures and Functions to perform operations using PL/SQL.								
10.	Mini project: (Application Development using Oracle/ SQL SERVER / MYSQL)- Sample Applications: • Inventory Control System • Hospital Management System • Railway Reservation System • Web Based User Identification System • Hotel Management System and etc.,								

REFERENCES/ MANUAL /SOFTWARE:

- | | |
|----|---|
| 1. | Front End: Microsoft Visual Studio 6.0, Microsoft .NET Framework SDK v2.0, Java etc |
| 2. | Back End : ORACLE / SQL SERVER / MYSQL |

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	execute SQL commands to create and manipulate databases	Applying (K3), Precision (S3)
CO2	develop PL/SQL programs and execute on databases	Applying (K3), Precision (S3)
CO3	apply database concepts to solve real world problems	Applying (K3), Precision (S3)

Mapping of Cos with POs and PSOs

COs/POs /PSOs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO	
CO1	3	2	2	2	3	1						2	3	2
CO2	3	2	2	2	3	1						2	3	2
CO3	3	2	2	2	3	1						2	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

24EGL41 - COMMUNICATION SKILLS LABORATORY													
(Common to all Engineering and Technology branches)													
Programme & Branch		All B.E/B.Tech branches		Sem	Category	L	T	P	S L*	Total	Credit		
Prerequisites		NIL		4 / 5	HS	0	0	30	0	30	1		
Preamble	This course is designed to impart necessary skills to listen, speak, read and write in order to acquire better professional communication skills, soft skills and verbal aptitude skills.												
LIST OF EXPERIMENTS / EXERCISES:													
1.	Self Introduction & Mock Interviews												
2.	Resume Writing – One Page Resumes and Conventional Resumes												
3.	Reading Aloud: Techniques and Practices												
4.	Presentation: Technical Topics/Case Studies												
5.	Situational Dialogues/Conversational Practices												
6.	Group Discussions												
7.	Book/Movie Reviews												
8.	Soft Skills (Computer Based Test)												
9.	Listening Test (Computer Based Test)												
10.	Verbal Aptitude (Computer Based Test)												
REFERENCES/MANUAL/SOFTWARE:													
1.	Lab Manual												
2.	Orell Talk Corporate Language Lab Software												
COURSE OUTCOMES:													
On completion of the course, the students will be able to										BT Mapped (Highest Level)			
CO1	acquire career-related soft skills and verbal skills									Understanding (K2), Imitation (S1)			
CO2	enhance essential professional and workplace communication skills									Applying (K3), Naturalization (S5)			
CO3	communicate effectively in English in different contexts									Applying (K3), Articulation (S4)			
Mapping of Cos with POs and PSOs													
COs/ POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
CO1								2	3		1		
CO2								2	3		2		
CO3								2	3		2		
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

24GCL41 - PROFESSIONAL SKILLS TRAINING – I																						
(Common to all Engineering & Technology Branches)																						
Programme & Branch	All B.E/B.Tech Branches			Sem.	Category	L	T	P	SL*	Total	Credit											
Prerequisites	Nil			4	EC	0	0	45	35	80	2											
Preamble	This subject is to enhance the employability skills and to develop career competency.																					
Unit – I	Soft Skills - I																					
Soft skills and its importance: Pleasure and pains of transition from an academic environment to work environment-Need for change- Fear, stress and competition in the professional world-Importance of positive attitude- Self motivation and continuous knowledge upgradation-Self-confidence. Professional grooming and practices: Basics of corporate culture-Key pillars of business etiquette- Basics of etiquette-Introductions and greetings-Rules of the handshake, earning respect, business manners-Telephone etiquette- Body Language.																						
Unit – II	Quantitative Aptitude & Logical Reasoning - I																					
Problem solving level I: Quantitative Aptitude: Numbers, H.C.F. and L.C.M. of Numbers, Square Root and Cube Root, Simplification, Percentage, Average, Ratio and Proportion, Partnership, Profit and Loss, Alligation or Mixture, Permutations and Combinations, Probability. Logical Reasoning : Series, Analogy, Coding Decoding, Directions Decision Making, Blood Relations.																						
TEXT BOOK:

2.	Gopalaswamy Ramesh & Mahadevan Ramesh - The Ace of Soft Skill: Attitude, Communication and Etiquette for Success, Pearson Education, 2024.																					
COURSE OUTCOMES:																						
On completion of the course, the students will be able to											BT Mapped (Highest Level)											
CO1	develop the soft skills of learners to support them work efficiently in an organization as an individual and as a team.										Applying(K3), Precision(S3)											
CO2	solve real time problems using numerical ability.										Applying(K3), Precision(S3)											
CO3	solve basic problems in logical reasoning by applying standard problem-solving techniques.										Applying(K3), Precision(S3)											
Mapping of COs with POs and PSOs																						
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11											
CO1	3	2				3		3		3	2											
CO2	3	2				3		3		3	2											
CO3	3	2				3		3		3	2											
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy																						
ASSESSMENT PATTERN - THEORY																						
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %															
CAT1		50	50				100															
CAT2		50	50				100															
CAT3		50	50				100															
ESE	NA																					

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks)
