INSTITUTE VISION

To be a centre of excellence for development and dissemination of knowledge in Applied Sciences, Technology, Engineering and Management for the Nation and beyond.

INSTITUTE MISSION

We are committed to value based Education, Research and Consultancy in Engineering and Management and to bring out technically competent, ethically strong and quality professionals to keep our Nation ahead in the competitive knowledge intensive world.

QUALITY POLICY

We are committed to

- Provide value based quality education for the development of students as competent and responsible citizens.
- Contribute to the nation and beyond through research and development
- Continuously improve our services

DEPARTMENT OF ELECTRONICS AND INSTRUMENTATION ENGINEERING
--

VISION

To become a technically competent centre in the domain of Electronics and Instrumentation Engineering to take care of the national and international needs.

MISSION

Department of Electronics and Instrumentation Engineering is committed to:
--

MS1:	To develop innovative, competent, efficient, disciplined and quality Electronics and Instrumentation Engineers.
MS2:	To produce engineers who can participate in technical advancement and social upliftment of the country.
MS3:	To excel in academic and research activities by facilitating the students to explore the state-of-the-art techniques to meet the industrial needs

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

Graduates of Electronics and Instrumentation Engineering will

PEO1:	Excel in professional career and higher education using their fundamental knowledge in mathematical and engineering principles
PEO2:	Analyse, design, develop and maintain the instrumentation systems of an industry and also offer solutions that are technically feasible, economically viable and socially relevant.
PEO3:	Exhibit Professional and Ethical code of conduct, communication skills, team work and lifelong learning to resolve societal issues

PROGRAM OUTCOMES (POs)

Graduates of Automobile Engineering will:

PO1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

Graduates of Electronics and Instrumentation Engineering will:

PSO1	Development and Automation: Develop an industrial instrumentation system and provide automation by using modern automation tools.
PSO2	Entrepreneurship: Become an entrepreneur by inculcating the skills of project management and

	finance with the knowledge of instrumentation technology.

KONGU ENGINEERING COLLEGE, PERUNDURAI, ERODE – 638060

(Autonomous)

REGULATIONS 2022

CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

BACHELOR OF ENGINEERING (BE) / BACHELOR OF TECHNOLOGY (BTech) DEGREE PROGRAMMES

These regulations are applicable to all candidates admitted into BE/BTech Degree programmes from the academic year 2022 – 2023 onwards.

1. DEFINITIONS AND NOMENCLATURE

In these Regulations, unless otherwise specified:

- i. “University” means ANNA UNIVERSITY, Chennai.
- ii. “College” means KONGU ENGINEERING COLLEGE.
- iii. “Programme” means Bachelor of Engineering (BE) / Bachelor of Technology (BTech) Degree programme
- iv. “Branch” means specialization or discipline of BE/BTech Degree programme, like Civil Engineering, Information Technology, etc.
- v. “Course” means a Theory / Theory cum Practical / Practical course that is normally studied in a semester like Mathematics, Physics etc.
- vi. “Credit” means a numerical value allocated to each course to describe the candidate’s workload required per week.
- vii. “Grade” means the letter grade assigned to each course based on the marks range specified.
- viii. “Grade point” means a numerical value (0 to 10) allocated based on the grade assigned to each course.
- ix. “Principal” means Chairman, Academic Council of the College.
- x. “Controller of Examinations (COE)” means authorized person who is responsible for all examination related activities of the College.

xi. “Head of the Department (HOD)” means Head of the Department concerned.

2. PROGRAMMES AND BRANCHES OF STUDY

The following programmes and branches of study approved by Anna University, Chennai and All India Council for Technical Education, New Delhi are offered by the College.

Programme	Branch
BE	Civil Engineering
	Mechanical Engineering
	Electronics and Communication Engineering
	Computer Science and Engineering
	Electrical and Electronics Engineering
	Electronics and Instrumentation Engineering
	Mechatronics Engineering
	Automobile Engineering
	Computer Science and Design
BTech	Chemical Engineering
	Information Technology
	Food Technology
	Artificial Intelligence and Data Science
	Artificial Intelligence and Machine Learning

3. ADMISSION REQUIREMENTS

3.1 First Semester Admission

The candidates seeking admission to the first semester of the eight semester BE / BTech Degree Programme:

Should have passed the Higher Secondary Examination (10 + 2) in the academic stream with Mathematics, Physics and Chemistry as three of the four subjects of study under

Part-III subjects of the study conducted by the Government of Tamil Nadu or any examination of any other University or authority accepted by the Anna University, Chennai as equivalent thereto.

(OR)

Should have passed the Higher Secondary Examination of Vocational stream (Vocational groups in Engineering / Technology) as prescribed by the Government of Tamil Nadu.

They should also satisfy other eligibility conditions as prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

3.2 Lateral Entry Admission

The candidates who hold a Diploma in Engineering / Technology awarded by the State Board of Technical Education, Tamilnadu or its equivalent are eligible to apply for Lateral entry admission to the third semester of BE / BTech.

(OR)

The candidates who hold a BSc degree in Science(10+2+3 stream) with mathematics as one of the subjects at the BSc level from a recognised University are eligible to apply for Lateral entry admission to the third semester of BE / BTech. Such candidates shall undergo two additional Engineering course(s) in the third and fourth semesters as prescribed by the College.

They should also satisfy other eligibility conditions prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

4. STRUCTURE OF PROGRAMMES

4.1 Categorisation of Courses

The BE / BTech programme shall have a curriculum with syllabi comprising of theory, theory cum practical, practical courses in each semester, professional skills training/industrial training, project work, internship, etc that have been approved by the respective Board of Studies and Academic Council of the College. All the programmes have well defined Programme Outcomes (PO), Programme Specific Outcomes (PSO) and Programme Educational Objectives (PEOs) as per Outcome Based Education (OBE). The content of each course is designed based on the Course Outcomes (CO). The courses shall be categorized as follows:

- i. Humanities and Social Sciences (HS) including Management Courses, English

Communication Skills, Universal Human Values and Yoga & Values for Holistic Development.

- ii. Basic Science (BS) Courses
- iii. Engineering Science (ES) Courses
- iv. Professional Core (PC) Courses
- v. Professional Elective (PE) Courses
- vi. Open Elective (OE) Courses
- vii. Employability Enhancement Courses (EC) like Project work, Professional Skills/Industrial Training, Comprehensive Test & Viva, Entrepreneurships/Start ups and Internship / In-plant Training in Industry or elsewhere
- viii. Audit Courses (AC)
- ix. Mandatory Courses (MC) like Student Induction Program and Environmental Science.
- x. Honours Degree Courses (HC)

4.2 Credit Assignment and Honours Degree

4.2.1. Credit Assignment

Each course is assigned certain number of credits as follows:

Contact period per week	Credits
1 Lecture / Tutorial Period	1
2 Practical Periods	1
2 Project Work Periods	1
40 Training / Internship Periods	1

The minimum number of credits to complete the BE/BTech programme is 168.

4.2.2 Honours Degree

If a candidate earns 18 to 20 additional credits in an emerging area, then he/she can be awarded with Honours degree mentioning that emerging area as his/her specialization.

The respective board of studies shall recommend the specializations for honours degree and appropriate additional courses to be studied by the candidate which shall get approval from Academic Council of the institution. A candidate shall have not less than 8 CGPA and no history of arrears to opt for the honours degree and has to maintain the same during the entire programme.

Various specializations for various branches recommended by the respective boards of studies are given below:

S.No	Specializations for Honours degree in emerging areas	To be offered as Honours, Only for the following branches mentioned against the specialization
1.	Construction Technology	BE – Civil Engineering
2.	Smart Cities	BE – Civil Engineering
3.	Smart Manufacturing *	BE – Mechanical Engineering
4.	Computational Product Design *	BE – Mechanical Engineering
5.	Intelligent Autonomous Systems *	BE – Mechatronics Engineering
6.	E-Mobility *	BE – Automobile Engineering
7.	Artificial Intelligence and Machine Learning	BE – Electronics and Communication Engineering
8.	System on Chip Design *	BE – Electronics and Communication Engineering
9.	Electric Vehicles	BE – Electrical and Electronics Engineering
10.	Microgrid Technologies	BE – Electrical and Electronics Engineering
11.	Intelligent Sensors Technology *	BE – Electronics and Instrumentation Engineering
12.	Smart Industrial Automation *	BE – Electronics and Instrumentation Engineering
13.	Data Science	BE – Computer Science and Engineering
14.	Cyber Security	BE – Computer Science and Engineering
15.	Data Science	BTech – Information Technology
16.	Cyber Security	BTech – Information Technology
17.	Petroleum and Petrochemical Engineering *	BTech – Chemical Engineering
18.	Waste Technology *	BTech – Chemical Engineering
19.	Food Processing and Management *	BTech – Food Technology
20.	Virtual and Augmented Reality	BE- Computer Science and Design
21.	Data Science	BE- Computer Science and Design
22.	Internet of Things (IoT)	BTech – Artificial Intelligence and Data Science
23.	Blockchain	BTech – Artificial Intelligence and Data Science
24.	Internet of Things (IoT)	BTech – Artificial Intelligence and Machine Learning

25.	Blockchain	BTech – Artificial Intelligence and Machine Learning
-----	------------	--

*Title by KEC

The courses specified under Honours degree in the emerging area may include theory, theory cum practical, practical, project work, etc. under the particular specialization. A candidate can choose and study these specified courses from fourth semester onwards and he/she shall successfully complete the courses within the stipulated time vide clause 5. Total number of credits earned in each semester may vary from candidate to candidate based on the courses chosen. The registration, assessment & evaluation pattern and classification of grades of these courses shall be the same as that of the courses in the regular curriculum of the programme of the candidate vide clause 6, clause 7 and clause 15 respectively. A candidate can earn Honours degree in only one specialization during the entire duration of the programme.

4.3 Employability Enhancement Courses

A candidate shall be offered with the employability enhancement courses like project work, internship, professional skills training/industrial training, comprehensive test & viva, and entrepreneurship/start ups during the programme to gain/exhibit the knowledge/skills.

4.3.1 Professional Skills Training/ Industrial Training/Entrepreneurships/Start Ups/ Inplant Training

A candidate may be offered with appropriate training courses imparting programming skills, communication skills, problem solving skills, aptitude skills etc. It is offered in two phases as phase I in fourth semester and phase II in fifth semester including vacation periods and each phase can carry two credits.

(OR)

A candidate may be allowed to go for training at research organizations or industries for a required number of hours in fifth semester vacation period. Such candidate can earn two credits for this training course in place of Professional Skills Training course II in fifth semester. He/She shall attend Professional Skills Training Phase I in fourth semester and can earn two credits.

(OR)

A candidate may be allowed to set up a start up and working part-time for the start ups by applying his/her innovations and can become a student entrepreneur during BE/BTech programme. Candidates can set up their start up from fifth semester onwards either inside or outside of the college. Such student entrepreneurs may earn 2 credits in place of Professional Skills Training II. The area in which the candidate wants to initiate a start up may be interdisciplinary or multidisciplinary. The progress of the startup shall be evaluated by a panel of

members constituted by the Principal through periodic reviews.

4.3.2 Comprehensive Test and Viva

The overall knowledge of the candidate in various courses he/she studied shall be evaluated by (i) conducting comprehensive tests with multiple choice questions generally with pattern similar to GATE and/or (ii) viva-voce examination conducted by a panel of experts assigned by the Head of the department. The members can examine the knowledge of the candidate by asking questions from various domains and the marks will be assigned based on their answers. This course shall carry two credits.

4.3.3 Full Time Project through Internships

The curriculum enables a candidate to go for full time project through internship during a part of seventh semester and/or entire final semester and can earn credits vide clause 7.6 and clause 7.11.

A candidate is permitted to go for full time projects through internship in seventh semester with the following condition: The candidate shall complete a part of the seventh semester courses with a total credit of about 50% of the total credits of seventh semester including Project Work-II Phase-I in the first two months from the commencement of the seventh semester under fast track mode. The balance credits required to complete the seventh semester shall be earned by the candidate through either approved One/Two Credit Courses /Online courses / Self Study Courses or Add/Drop courses as per clause 4.4 and clause 4.5 respectively.

A candidate is permitted to go for full time projects through internship during eighth semester. Such candidate shall earn the minimum number of credits required to complete eighth semester other than project through either approved

One / Two Credit Courses /Online courses / Self Study Courses or Add/Drop courses as per clause 4.4 and clause 4.5 respectively.

Assessment procedure is to be followed as specified in the guidelines approved by the Academic Council.

- 4.3.4** A student shall go for in-plant training for duration of two weeks during the entire programme. It is mandatory for all the students.

4.4 One / Two Credit Courses / Online Courses / Self Study Courses

The candidates may optionally undergo One / Two Credit Courses / Online Courses / Self Study Courses as elective courses.

4.4.1 One / Two Credit Courses: One / Two credit courses shall be offered by the college with the prior approval from respective Board of Studies. A candidate can earn a maximum of six credits through one / two credit courses during the entire duration of the programme.

4.4.2 Online Courses: Candidates may be permitted to earn credits for online courses, offered by NPTEL / SWAYAM / a University / Other Agencies, approved by respective Board of Studies.

4.4.3 Self Study Courses: The Department may offer an elective course as a self study course. The syllabus of the course shall be approved by the respective Board of Studies. However, mode of assessment for a self study course will be the same as that used for other courses. The candidates shall study such courses on their own under the guidance of member of the faculty following due approval procedure. Self study course is limited to one per semester.

4.4.4 The elective courses in the final year may be exempted if a candidate earns the required credits vide clause 4.4.1, 4.4.2 and 4.4.3 by registering the required number of courses in advance.

4.4.5 A candidate can earn a maximum of 30 credits through all one / two credit courses, online courses and self study courses.

4.5 Flexibility to Add or Drop Courses

4.5.1 A candidate has to earn the total number of credits specified in the curriculum of the respective programme of study in order to be eligible to obtain the degree. However, if the candidate wishes, then the candidate is permitted to earn more than the total number of credits prescribed in the curriculum of the candidate's programme.

4.5.2 From the first to seventh semesters the candidates have the option of registering for additional elective/Honours courses or dropping of already registered additional elective/Honours courses within two weeks from the start of the semester. Add / Drop is only an option given to the candidates.

- 4.6** Maximum number of credits the candidate can enroll in a particular semester cannot exceed 30 credits.
- 4.7** The blend of different courses shall be so designed that the candidate at the end of the programme would have been trained not only in his / her relevant professional field but also would have developed to become a socially conscious human being.
- 4.8** The medium of instruction, examinations and project report shall be English.

5. DURATION OF THE PROGRAMME

- 5.1** A candidate is normally expected to complete the BE / BTech Degree programme in 8 consecutive semesters/4 Years (6 semesters/3 Years for lateral entry candidate), but in any case not more than 14 semesters/7 Years (12 semesters/6 Years for lateral entry candidate).
- 5.2** Each semester shall consist of a minimum of 90 working days including continuous assessment test period. The Head of the Department shall ensure that every teacher imparts instruction as per the number of periods specified in the syllabus for the course being taught.
- 5.3** The total duration for completion of the programme reckoned from the commencement of the first semester to which the candidate was admitted shall not exceed the maximum duration specified in clause 5.1 irrespective of the period of break of study (vide clause 11) or prevention (vide clause 9) in order that the candidate may be eligible for the award of the degree (vide clause 16). Extension beyond the prescribed period shall not be permitted.

6. COURSE REGISTRATION FOR THE EXAMINATION

- 6.1** Registration for the end semester examination is mandatory for courses in the current semester as well as for the arrear courses failing which the candidate will not be permitted to move on to the higher semester. This will not be applicable for the courses which do not have an end semester examination.
- 6.2** The candidates who need to reappear for the courses which have only continuous assessment shall enroll for the same in the subsequent semester, when offered next, and repeat the course. In this case, the candidate shall attend the classes, satisfy the attendance requirements (vide clause 8) and earn continuous assessment marks. This will

be considered as an attempt for the purpose of classification.

- 6.3** If a candidate is prevented from writing end semester examination of a course due to lack of attendance, the candidate has to attend the classes, when offered next, and fulfill the attendance requirements as per clause 8 and earn continuous assessment marks. If the course, in which the candidate has a lack of attendance, is an elective, the candidate may register for the same or any other elective course in the subsequent semesters and that will be considered as an attempt for the purpose of classification.
- 6.4** A candidate shall register for the chosen courses as well as arrear courses (if any vide clause 6.2 and 6.3) from the list of courses specified under Honours degree.

7. ASSESSMENT AND EXAMINATION PROCEDURE FOR AWARDING MARKS

- 7.1** The BE/BTech programmes consist of Theory Courses, Theory cum Practical courses, Practical courses, Comprehensive Test and Viva, Project Work, Industrial Training /Professional Skills Training, Internship/In-plant Training and Entrepreneurships/ Start ups. Performance in each course of study shall be evaluated based on (i) Continuous Assessments (CA) throughout the semester and (ii) End Semester Examination (ESE) at the end of the semester except for the courses which are evaluated based on continuous assessment only. Each course shall be evaluated for a maximum of 100 marks as shown below:

Sl. No.	Category of Course	Continuous Assessment Marks	End Semester Examination Marks
1.	Theory	40	60
2.	Theory cum Practical (The distribution of marks shall be decided based on the credit)	50	50
3.	Practical	60	40
4.	Professional Skills Training / Comprehensive Test & Viva / Entrepreneurships / Start ups / Project Work I / Mandatory Course/Industrial Training/ Universal Human Values / Yoga and Values for Holistic Development	100	---
5.	Project Work II Phase I / Project Work II Phase II / Internships	50	50
6.	One / Two credit Course	The distribution of marks shall be decided based on the credit weightage assigned	---
7.	All other Courses		

7.2 Examiners for setting end semester examination question papers for theory courses, theory cum practical courses and practical courses and evaluating end semester examination answer scripts, project works, internships and entrepreneurship/start ups shall be appointed by the Controller of Examinations after obtaining approval from the Principal.

7.3 Theory Courses

For all theory courses out of 100 marks, the continuous assessment shall be 40 marks and the end semester examination shall be for 60 marks. However, the end semester examinations shall be conducted for 100 marks and the marks obtained shall be reduced to 60. The continuous assessment tests shall be conducted as per the schedule laid down in the academic schedule. The total of the continuous assessment marks and the end semester examination marks shall be rounded off to the nearest integer.

- 7.3.1** The assessment pattern for awarding continuous assessment marks shall be as follows:

Sl. No.	Type	Max. Marks	Remarks
1.	Test - I	20	Average of best 2 tests (20 marks)
	Test - II	20	
	Test - III	20	
2.	Tutorial: (Tutorial/Problem Solving (or) Simulation (or) Simulation & Mini Project (or) Mini Project (or) Case Studies (or) Any other relevant to the course)	15	Type of assessment is to be chosen based on the nature of the course and to be approved by Principal
3.	Others: Assignment / Paper Presentation in Conference / Seminar / Comprehension / Activity based learning / Class notes	05	To be assessed by the Course Teacher based on any one type.
Total		40	Rounded off to the one decimal place

However, the assessment pattern for awarding the continuous assessment marks may be changed based on the nature of the course and is to be approved by the Principal.

- 7.3.2** A reassessment test or tutorial covering the respective test or tutorial portions may be conducted for those candidates who were absent with valid reasons (Sports or any other reason approved by the Principal).

- 7.3.3** The end semester examination for theory courses shall be for a duration of three hours and shall be conducted between November and January during odd semesters and between April and June during even semesters of every year.

7.4 Theory cum Practical Courses

For courses involving theory and practical components, the evaluation pattern as per the clause 7.1 shall be followed. Depending on the nature of the course, the end semester examination shall be conducted for theory and the practical components. The apportionment of continuous assessment and end semester examination marks shall be decided based on the credit weightage assigned to theory and practical components approved by Principal.

7.5 Practical Courses

For all practical courses out of 100 marks, the continuous assessment shall be for 60 marks and the end semester examination shall be for 40 marks. Every exercise / experiment shall be evaluated based on the candidate's performance during the practical class and the candidates' records shall be maintained.

- 7.5.1** The assessment pattern for awarding continuous assessment marks for each course shall be decided by the course coordinator based on rubrics of that particular course, and shall be based on rubrics for each experiment.
- 7.5.2** The end semester examination shall be conducted for a maximum of 100 marks for duration of 3 hours and reduced to 40 marks. The appointment of examiners and the schedule shall be decided by chairman of Board of Study of the relevant board.

7.6 Project Work II Phase I / Project Work II Phase II

- 7.6.1** Project work shall be assigned to a single candidate or to a group of candidates not exceeding 4 candidates in a group. The project work is mandatory for all the candidates.
- 7.6.2** The Head of the Department shall constitute review committee for project work. There shall be two assessments by the review committee during the semester. The candidate shall make presentation on the progress made by him/her before the committee.
- 7.6.3** The continuous assessment and end semester examination marks for Project Work II Phase I /Project Work II Phase II and the Viva-Voce Examination shall be distributed as below.

Continuous Assessment (Max. 50 Marks)						End Semester Examination (Max. 50 Marks)			
Zeroth Review		Review I (Max.. 20 Marks)		Review II Max. 30 Marks)		Report Evaluation (Max. 20 Marks)	Viva - Voce Max. 30 Marks)		
Rv. Co m	Sup e r visor	Review Commit tee (excludi ng supervi sor)	Sup ervi sor	Review Committ ee (excludi ng supervis or)	Sup e r visor	Ext. Exr.	Sup e r viso r	Exr. 1	Exr.2
0	0	10	10	15	15	20	10	10	10

- 7.6.4** The Project Report prepared according to approved guidelines and duly signed by the Supervisor shall be submitted to Head of the Department. The candidate(s) must submit the project report within the specified date as per the academic schedule of the semester. If the project report is not submitted within the specified date then the candidate is deemed to have failed in the Project Work and redo it in the subsequent semester.
- 7.6.5** If a candidate fails to secure 50% of the continuous assessment marks in the project work, he / she shall not be permitted to submit the report for that particular semester and shall have to redo it in the subsequent semester and satisfy attendance requirements.
- 7.6.6** The end semester examination of the project work shall be evaluated based on the project report submitted by the candidate in the respective semester and viva-voce examination by a committee consisting of two examiners and supervisor of the project work.
- 7.6.7** If a candidate fails to secure 50 % of the end semester examination marks in the project work, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted as per clause 7.6.6.
- 7.6.8** A copy of the approved project report after the successful completion of viva-voce examination shall be kept in the department library.

7.7 Project Work I / Industrial Training

The evaluation method shall be same as that of the Project Work II as per clause 7.6 excluding 7.6.3, 7.6.5, 7.6.6 and 7.6.7. The marks distribution is given below.

Continuous Assessment (Max. 100 Marks)									
Zeroth Review		Review I (Max.. 20 Marks)		Review II ax.. 30 Marks)		Review III (Max. 50 Marks)			
						Report Evaluation (Max. 20 Marks)	Viva - Voce (Max. 30 Marks)		
Revie w Comm ittee	Supe r visor	Review Committee (excluding supervisor)	Supe r visor	Review Committee (excluding supervisor)	Sup er viso r	Review Committee	Super visor	Review Committee	
0	0	10	10	15	15	20	10	20	

If a candidate fails to secure 50 % of the continuous assessment marks in this course, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted.

7.8 Professional Skills Training

Phase I training shall be conducted for minimum of 80 hours in 3rd semester vacation and during 4th semester. Phase II training shall be conducted for minimum of 80 hours in 4th semester vacation and during 5th semester. The evaluation procedure shall be approved by the board of the offering department and Principal.

7.9 Comprehensive Test and Viva

A candidate can earn 2 credits by successfully completing this course. The evaluation procedures shall be approved by the Principal.

7.10 Entrepreneurships/ Start ups

A start up/business model may be started by a candidate individually or by a group of maximum of three candidates during the programme vide clause 4.3.1. The head of the department concerned shall assign a faculty member as a mentor for each start up.

A review committee shall be formed by the Principal for reviewing the progress of the Start ups / Business models, innovativeness, etc. The review committee can recommend the appropriate grades for academic performance for the candidate(s) involved in the start ups. This course shall carry a maximum of two credits in fifth semester and shall be evaluated through continuous assessments for a maximum of 100 marks vide clause 7.1. A report about the start ups is to be submitted to the review committee for evaluation for each start up and the marks will be given to Controller of Examinations after getting approval from Principal.

7.11 In-Plant Training

Each candidate shall go for In-Plant training for a duration of minimum of two weeks during the entire programme of study and submit a brief report about the training undergone and a certificate issued from the organization concerned.

7.12 One / Two Credit Courses

For all one/ two credit courses out of 100 marks, the continuous assessment shall be 50 marks and the model examination shall be for 50 marks. Minimum of two continuous assessments tests shall be conducted during the one / two credit course duration by the offering department concerned. Model examination shall be conducted at the end of the course.

7.13 Online Course

The Board of Studies will provide methodology for the evaluation of the online courses. The Board can decide whether to evaluate the online courses through continuous assessment and end semester examination or through end semester examination only. In case of credits earned through online mode from NPTEL / SWAYAM / a University / Other Agencies approved by Chairman, Academic Council, the credits may be transferred and grades shall be assigned accordingly.

7.14 Self Study Course

The member of faculty approved by the Head of the Department shall be responsible for periodic monitoring and evaluation of the course. The course shall be evaluated through continuous assessment and end semester examination. The evaluation methodology shall be the same as that of a theory course.

7.15 Audit Course

A candidate may be permitted to register for specific course not listed in his/her programme curriculum and without undergoing the rigors of getting a 'good' grade, as an Audit course, subject to the following conditions.

The candidate can register only one Audit course in a semester starting from second semester subject to a maximum of two courses during the entire programme of study. Such courses shall be indicated as 'Audit' during the time of registration itself. Only courses currently offered for credit to the candidates of other branches can be audited.

A course appearing in the curriculum of a candidate cannot be considered as an audit course. However, if a candidate has already met the Professional Elective and Open Elective credit requirements as stipulated in the curriculum, then, a Professional Elective or an Open Elective course listed in the curriculum and not taken by the candidate for credit can be considered as an audit course.

Candidates registering for an audit course shall meet all the assessment and examination requirements (vide clause 7.3) applicable for a credit candidate of that course. Only if the candidate obtains a performance grade, the course will be listed in the semester Grade Sheet and in the Consolidated Grade Sheet along with the grade SC (Successfully Completed). Performance grade will not be shown for the audit course.

Since an audit course has no grade points assigned, it will not be counted for the purpose of GPA and CGPA calculations.

7.16 Mandatory Courses

A candidate joined in first semester shall attend and complete a mandatory course namely Student Induction Program of duration three weeks at the beginning of first semester. The candidates studying in second year shall attend and complete another one mandatory course namely Environmental Science. No credits shall be given for mandatory courses and shall be evaluated through continuous assessment tests only vide clause 7.1 for a maximum of 100 marks each. Upon the successful completion, these courses will be listed in the semester grade sheet and in the consolidated grade sheet with the grade "SC" (Successfully Completed). Since no grade points are assigned, these courses will not be counted for the purpose of GPA and CGPA calculations.

7.17 Universal Human Values (UHV) and Yoga and Values for Holistic Development (YVHD)

Courses YVHD shall be offered to all first year candidates of all BE/ BTech programmes to impart knowledge on yoga and human values. Course UHV shall be offered to all the second year BE/ BTech students. These courses shall carry a maximum of 100 marks each and shall be evaluated through continuous assessment tests only vide clause 7.1. The candidate(s) can earn 2 credits for UHV and 1 credit for YVHD by successfully completing these courses. Two continuous assessment tests will be conducted and the average marks will be taken for the calculation of grades.

8. REQUIREMENTS FOR COMPLETION OF A SEMESTER

8.1 A candidate who has fulfilled the following conditions shall be deemed to have satisfied the requirements for completion of a semester and permitted to appear for the examinations of that semester.

8.1.1 Ideally, every candidate is expected to attend all classes and secure 100 % attendance. However, a candidate shall secure not less than 80 % (after rounding off to the nearest integer) of the overall attendance taking into account the total number of working days in a semester.

8.1.2 A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to medical reasons (hospitalization / accident / specific illness) but has secured not less than 70 % in the current semester may be permitted to appear for the current semester examinations with the approval of the Principal on payment of a condonation fee as may be fixed by the authorities from time to time. The medical certificate needs to be submitted along with the leave application. A candidate can avail this provision only twice during the entire duration of the degree programme.

A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to his/her entrepreneurship/ start ups activities, but has secured not less than 60 % in the current semester can be permitted to appear for the current semester examinations with the recommendation of review committee and approval from the Principal.

8.1.3 In addition to clause 8.1.1 or 8.1.2, a candidate shall secure not less than 60 % attendance in each course.

8.1.4 A candidate shall be deemed to have completed the requirements of study of any semester only if he/she has satisfied the attendance requirements (vide clause 8.1.1 to 8.1.3) and has registered for examination by paying the prescribed fee.

8.1.5 Candidate's progress is satisfactory.

8.1.6 Candidate's conduct is satisfactory and he/she was not involved in any

indisciplined activities in the current semester.

- 8.2.** The candidates who do not complete the semester as per clauses from 8.1.1 to 8.1.6 except 8.1.3 shall not be permitted to appear for the examinations at the end of the semester and not be permitted to go to the next semester. They have to repeat the incomplete semester in next academic year.
- 8.3** The candidates who satisfy the clause 8.1.1 or 8.1.2 but do not complete the course as per clause 8.1.3 shall not be permitted to appear for the end semester examination of that course alone. They have to repeat the incomplete course in the subsequent semester when it is offered next.

9. REQUIREMENTS FOR APPEARING FOR END SEMESTER EXAMINATION

- 9.1** A candidate shall normally be permitted to appear for end semester examination of the current semester if he/she has satisfied the semester completion requirements as per clause 8, and has registered for examination in all courses of that semester. Registration is mandatory for current semester examinations as well as for arrear examinations failing which the candidate shall not be permitted to move on to the higher semester.
- 9.2** When a candidate is deputed for a National / International Sports event during End Semester examination period, supplementary examination shall be conducted for such a candidate on return after participating in the event within a reasonable period of time. Such appearance shall be considered as first appearance.
- 9.3** A candidate who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of letter grades / marks.

10. PROVISION FOR WITHDRAWAL FROM EXAMINATIONS

- 10.1** A candidate may, for valid reasons, be granted permission to withdraw from appearing for the examination in any regular course or all regular courses registered in a particular semester. Application for withdrawal is permitted only once during the entire duration of the degree programme.
- 10.2** The withdrawal application shall be valid only if the candidate is otherwise eligible to write the examination (vide clause 9) and has applied to the Principal for permission prior to the last examination of that semester after duly recommended by the Head of the Department.
- 10.3** The withdrawal shall not be considered as an appearance for deciding the eligibility of a candidate for First Class with Distinction/First Class.

- 10.4** If a candidate withdraws a course or courses from writing end semester examinations, he/she shall register the same in the subsequent semester and write the end semester examinations. A final semester candidate who has withdrawn shall be permitted to appear for supplementary examination to be conducted within reasonable time as per clause 14.
- 10.5** The final semester candidate who has withdrawn from appearing for project viva-voce for genuine reasons shall be permitted to appear for supplementary viva-voce examination within reasonable time with proper application to Controller of Examinations and on payment of prescribed fee.

11. PROVISION FOR BREAK OF STUDY

- 11.1** A candidate is normally permitted to avail the authorised break of study under valid reasons (such as accident or hospitalization due to prolonged ill health or any other valid reasons) and to rejoin the programme in a later semester. He/She shall apply in advance to the Principal, through the Head of the Department, stating the reasons therefore, in any case, not later than the last date for registering for that semester examination. A candidate is permitted to avail the authorised break of study only once during the entire period of study for a maximum period of one year. However, in extraordinary situation the candidate may apply for additional break of study not exceeding another one year by paying prescribed fee for the break of study.
- 11.2** The candidates permitted to rejoin the programme after break of study / prevention due to lack of attendance shall be governed by the rules and regulations in force at the time of rejoining.
- 11.3** The candidates rejoining in new Regulations shall apply to the Principal in the prescribed format through Head of the Department at the beginning of the readmitted semester itself for prescribing additional/equivalent courses, if any, from any semester of the regulations in-force, so as to bridge the curriculum in-force and the old curriculum.
- 11.4** The total period of completion of the programme reckoned from the commencement of the semester to which the candidate was admitted shall not exceed the maximum period specified in clause 5 irrespective of the period of break of study in order to qualify for the award of the degree.
- 11.5** If any candidate is prevented for want of required attendance, the period of prevention shall not be considered as authorized break of study.
- 11.6** If a candidate has not reported to the college for a period of two consecutive semesters without any intimation, the name of the candidate shall be deleted permanently from the college enrollment. Such candidates are not entitled to seek readmission under any circumstances.

12. PASSING REQUIREMENTS

- 12.1** A candidate who secures not less than 50 % of total marks (continuous assessment and end semester examination put together) prescribed for the course with a minimum of 45 % of the marks prescribed for the end semester examination in all category of courses vide clause 7.1 except for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course in the examination.
- 12.2** A candidate who secures not less than 50 % in continuous assessment marks prescribed for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course. If a candidate secures less than 50% in the continuous assessment marks, he / she shall have to re-enroll for the same in the subsequent semester and satisfy the attendance requirements.
- 12.3** For a candidate who does not satisfy the clause 12.1, the continuous assessment marks secured by the candidate in the first attempt shall be retained and considered valid for subsequent attempts. However, from the fourth attempt onwards the marks scored in the end semester examinations alone shall be considered, in which case the candidate shall secure minimum 50 % marks in the end semester examinations to satisfy the passing requirements.

13. REVALUATION OF ANSWER SCRIPTS

A candidate shall apply for a photocopy of his / her semester examination answer script within a reasonable time from the declaration of results, on payment of a prescribed fee by submitting the proper application to the Controller of Examinations. The answer script shall be pursued and justified jointly by a faculty member who has handled the course and the course coordinator and recommended for revaluation. Based on the recommendation, the candidate can register for revaluation through proper application to the Controller of Examinations. The Controller of Examinations will arrange for revaluation and the results will be intimated to the candidate concerned. Revaluation is permitted only for Theory courses and Theory cum Practical courses where end semester examination is involved.

14. SUPPLEMENTARY EXAMINATION

If a candidate fails to clear all courses in the final semester after the announcement of final end semester examination results, he/she shall be allowed to take up supplementary examinations to be conducted within a reasonable time for the courses of final semester alone, so that he/she gets a chance to complete the programme.

15. AWARD OF LETTER GRADES:

For all the passed candidates, the relative grading principle is applied to assign the letter grades.

Marks / Examination Status	Letter Grade	Grade Point
Based on the relative grading	O (Outstanding)	10
	A+ (Excellent)	9
	A (Very Good)	8
	B+ (Good)	7
	B (Average)	6
	C (Satisfactory)	5
Less than 50	U (Reappearance)	0
Successfully Completed	SC	0
Withdrawal	W	-
Absent	AB	-
Shortage of Attendance in a course	SA	-

The Grade Point Average (GPA) is calculated using the formula:

$$GPA = \frac{\sum[(\text{course credits}) \times (\text{grade points})]}{\sum(\text{course credits})} \text{ for all courses in the specific semester}$$

The Cumulative Grade Point Average (CGPA) is calculated from first semester (third semester for lateral entry candidates) to final semester using the formula

$$CGPA = \frac{\sum[(\text{course credits}) \times (\text{grade points})]}{\sum(\text{course credits})} \text{ for all courses in all the semesters so far}$$

The GPA and CGPA are computed only for the candidates with a pass in all the courses.

The GPA and CGPA indicate the academic performance of a candidate at the end of a semester and at the end of successive semesters respectively.

A grade sheet for each semester shall be issued containing Grade obtained in each course, GPA and CGPA.

A duplicate copy, if required can be obtained on payment of a prescribed fee and satisfying other procedure requirements.

Withholding of Grades: The grades of a candidate may be withheld if he/she has not cleared his/her dues or if there is a disciplinary case pending against him/her or for any other reason.

16. ELIGIBILITY FOR THE AWARD OF DEGREE

A candidate shall be declared to be eligible for the award of the BE / BTech Degree provided the candidate has

- i. Successfully completed all the courses under the different categories, as specified in the regulations.

- ii. Successfully gained the required number of total credits as specified in the curriculum corresponding to the candidate's programme within the stipulated time (vide clause 5).
- iii. Successfully passed any additional courses prescribed by the respective Board of Studies whenever readmitted under regulations other than R-2022 (vide clause 11.3)
- iv. No disciplinary action pending against him / her.

17. CLASSIFICATION OF THE DEGREE AWARDED

17.1 First Class with Distinction:

17.1.1. A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the **First Appearance** within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 8.50

(OR)

17.1.2 A candidate who joins from other institutions on transfer or a candidate who gets readmitted and has to move from one regulations to another regulations and who qualifies for the award of the degree (vide clause 16) and satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the **First Appearance** within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Submission of equivalent course list approved by the respective Board of studies.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 9.00

17.2 First Class:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class:

- Should have passed the examination in all the courses of all eight semesters (six semesters for lateral entry candidates) within ten consecutive semesters (eight consecutive semesters for lateral entry candidates) excluding authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from the examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 6.50

17.3

Second Class:

All other candidates (not covered in clauses 17.1 and 17.2) who qualify for the award of the degree (vide clause 16) shall be declared to have passed the examination in Second Class.

17.4

A candidate who is absent for end semester examination in a course / project work after having registered for the same shall be considered to have appeared for that examination for the purpose of classification.

17.5

Honors Degree:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have earned the BE/BTech degree with Honours (vide clause 16 and clause 4.2.2):

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the **First Appearance** within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 7.50

18. MALPRACTICES IN TESTS AND EXAMINATIONS

If a candidate indulges in malpractice in any of the tests or end semester examinations, he/she shall be liable for punitive action as per the examination rules prescribed by the college from time to time.

19. AMENDMENTS

Notwithstanding anything contained in this manual, the Kongu Engineering College through the Academic council of the College, reserves the right to modify/amend without notice, the Regulations, Curricula, Syllabi, Scheme of Examinations, procedures, requirements, and rules pertaining to its BE / BTech programme.

LIST OF PROFESSIONAL ELECTIVES (PEs) (For the students admitted in the academic year 2022-23)							
S. No.	Course Code	Course Name	L	T	P	C	Domain/ Stream
Semester - V							
Elective – I							
1.	22EIE01	Biomedical Instrumentation	3	0	0	3	AI
2.	22EIE02	Instrumentation System Design	3	0	0	3	EEA
3.	22EIE03	Soft Computing Techniques	3	0	0	3	EEA
4.	22EIE04	Analytical Instrumentation	3	0	0	3	AI
5.	22EIE05	Industrial Electronics and Drives	3	0	0	3	EL
6.	22EIE06	Advanced Control Techniques	3	0	0	3	CS
Semester - VI							
Elective – II							
7.	22EIE07	SCADA and its Applications	3	0	0	3	EEA
8.	22EIE08	Virtual Instrumentation	3	0	0	3	AI
9.	22EIE09	Digital Image Processing	3	0	0	3	EEA
10.	22EIE10	Power Plant Instrumentation	3	0	0	3	IA
11.	22EIE11	Embedded Systems	3	0	0	3	AE
12.	22EIE12	Control System Components	3	0	0	3	CS
Semester - VII							
Elective - III							
13.	22EIE13	Fiber Optics and Laser Instruments	3	0	0	3	AI
14.	22EIE14	Wireless Instrumentation	3	0	0	3	AE
15.	22EIE15	Instrumentation Techniques in Agriculture	3	0	0	3	IA
16.	22EIE16	Safety in Process Industries	3	0	0	3	AI
17.	22EIE17	Instrumentation and Control in Process Industries	3	0	0	3	IA
18.	22GEE02	Total Quality Management	3	0	0	3	GE

Elective – IV						
19.	22EIE18	Instrumentation in Aircraft Navigation and Control	3	0	0	3
20.	22EIE19	Industrial Data Communication	3	0	0	3
21.	22EIE20	MEMS and Nano Technology	3	0	0	3
22.	22EIE21	Optimal and Adaptive Control	3	0	0	3
23.	22EIE22	Wearable Technology	3	0	0	3
24.	22GEE01	Fundamentals of Research	3	0	0	3
Elective – V						
25.	22EIE23	Instrumentation in Building Automation	3	0	0	3
26.	22EIE24	Electronic Instrumentation	3	0	0	3
27.	22EIE25	Piping and Instrumentation Diagrams	3	0	0	3
28.	22EIE26	Machine Learning and its Applications	3	0	0	3
29.	22EIE27	Model Predictive Control	3	0	0	3
30.	22EIE28	Multi Sensor Data Fusion	3	0	0	3
Semester - VIII						
Elective - VI						
31.	22EIE29	Diagnostic and Therapeutic Instruments	3	0	0	3
32.	22EIE30	Instrumentation and Control in Paper Industries	3	0	0	3
33.	22EIE31	Instrumentation and Control in Petro Chemical Industries	3	0	0	3
34.	22EIE32	VHDL Programming and Its Applications	3	0	0	3
35.	22EIE33	Computer Control of Processes	3	0	0	3
36.	22EIE34	Digital Twins	3	0	0	3

* Domain/Stream Abbreviations: IN-Instrumentation, EL-Electronics, AI-Applied Instrumentation, AE-Applied Electronics and Industry 4.0, EEA-Experimental Engineering and Analysis, IA-Industry Automation, CS-Control Systems, GE – General Engineering.

22EGT11 - COMMUNICATION SKILLS I							
(Common to All Engineering and Technology Branches)							
Programme & Branch	All B.E./B.Tech. Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	I	HS	3	0	0	3
Preamble	This course is designed to impart required levels of Communication Skills and Proficiency in English language necessary for different professional contexts.						
Unit – I	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
Grammar: Parts of speech - Tenses - Types of sentences: Assertive, Imperative, Interrogative & Exclamatory – Affirmative & Negative - Gerunds & Infinitives - Vocabulary: Affixes - Synonyms & Antonyms - Listening: Types of listening - Barriers to listening - Listening to short talks - TV shows - Speaking: Verbal & Non-verbal communication - Pair conversation - Role play - Reading: Types of Reading – Intensive: scanning, word by word, survey - Writing: Dialogue writing, Informal Letters - Paragraph writing							
Unit – II	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
Grammar: Voices - Impersonal passives - Vocabulary: Homonyms, Homophones & Homographs - Listening: Importance of listening - Listening to announcements & radio broadcasts - Speaking: Persuasive & Impromptu talks - Narrating a story - Reading: Reading comprehension - Articles from Newspapers/Magazines - Cloze exercises - Writing: Essay writing, Jumbled sentences							
Unit – III	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
Grammar: Prepositions - Vocabulary: Compound Nouns - Listening: Listening to TED Talks, Commentaries - Speaking: Self Introduction - Reading: Extensive: speed, skimming - Identifying lexical & contextual meanings - Writing: Instructions & Warnings - Formal letters: Seeking permission for Industrial visits & Inviting guests							
Unit – IV	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
Grammar: Articles & Determiners - Vocabulary: Technical Vocabulary - Analogy - Unscrambling words - Logical reasoning - Listening: Listening to conversations - Speaking: Tongue twisters - Skill Sharing - Note-taking - Reading: Note making - Paraphrasing & Summarizing - Writing: Recommendations & Suggestions - Business letters: Enquiry, Calling for quotations & placing orders							
Unit – V	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
Grammar: Cause and effect expressions - Vocabulary: Abbreviations & acronyms, Definitions Listening: Listening to eminent personalities - Speaking: Commonly mispronounced words - Welcome address, Chief guest address & Vote of thanks - Reading: IELTS type passages - Writing: Preparing transcript for a speech - Interpreting news articles & advertisements

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	use language effectively by acquiring vocabulary and syntax in context	Applying (K3)
CO2	listen and comprehend different spoken discourses from a variety of situations	Applying (K3)
CO3	speak confidently in different professional contexts and with peers	Creating (K6)
CO4	comprehend different genres of texts by adopting various reading strategies	Understanding (K2)
CO5	write legibly and flawlessly at varied professional contexts proficiently with appropriate choice of words and structures	Creating (K6)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1						2			1	3	1	1
CO2									2	3		1
CO3									2	3		2
CO4						1				3	1	1
CO5										3		2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN – THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		37	30			33	100
CAT2		30	30			40	100
CAT3		33	34			33	
ESE		17	63			20	100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

22MAC11 - MATRICES AND ORDINARY DIFFERENTIAL EQUATIONS**(Common to all Engineering and Technology branches)**

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit

Prerequisites	Nil	1	BS	3	1*	2*	4
Preamble	To provide the skills to the students for solving different real time problems by applying matrices and ordinary differential equations.						
Unit – I	Matrices:						9
	Introduction – Characteristic equation – Eigen values and Eigen vectors of a real matrix – Properties of Eigen values and Eigen vectors (without proof) – Cayley – Hamilton theorem (Statement and applications only) - Orthogonal matrices – Orthogonal transformation of a symmetric matrix to diagonal form – Quadratic form – Nature of Quadratic forms - Reduction of quadratic form to canonical form by orthogonal transformation – Applications of Eigen values and Eigen vectors: Stretching of an elastic membrane.						
Unit – II	Ordinary Differential Equations:						9
	Introduction – Solutions of First order differential equations: Exact differential equations – Leibnitz's Linear Equation – Bernoulli's equation –Clairaut's equation - Applications: Law of natural growth and decay.						
Unit – III	Ordinary Differential Equations of Higher Order:						9
	Linear differential equations of second and higher order with constant coefficients - Particular Integrals for the types: e^{ax} – $\cos ax$ / $\sin ax$ – x^n – $e^{ax}x^n$, $e^{ax} \sin bx$ and $e^{ax} \cos bx$ – $x^n \sin ax$ and $x^n \cos ax$ – Differential Equations with variable coefficients: Euler-Cauchy's equation – Legendre's equation.						
Unit – IV	Applications of Ordinary Differential Equations:						9
	Method of variation of parameters – Simultaneous first order linear equations with constant coefficients – Applications of differential equations: Simple harmonic motion – Electric circuits (Differential equations and associated conditions need to be given).						
Unit – V	Laplace Transform:						9
	Laplace Transform: Conditions for existence – Transform of elementary functions – Basic properties – Derivatives and integrals of transforms –Transforms of derivatives and integrals – Transform of unit step function – Transform of periodic functions. Inverse Laplace transform: Inverse Laplace transform of elementary functions – Partial fraction method – Convolution theorem (Statement only) – Applications: Solution of linear ODE of second order with constant coefficients.						
LIST OF EXPERIMENTS / EXERCISES:							
1.	Introduction to MATLAB						
2.	Computation of eigen values and eigen vectors						
3.	Plotting and visualizing single variable functions						
4.	Solving first and second order ordinary differential equations						
5.	Solution of Simultaneous first order ODEs						
6.	Solving second order ODE by variation of parameters						
7.	Determining Laplace and inverse Laplace transform of basic functions						
8.	Solution of Second order ODE by employing Laplace transforms						
Lecture:45, Tutorials and Practical:15, Total:60							
TEXT BOOK:

5.	MATLAB – Laboratory Manual						

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	solve engineering problems which needs matrix computations.	Applying (K3)
CO2	identify the appropriate method for solving first order ordinary differential equations.	Applying (K3)
CO3	solve higher order linear differential equations with constant and variable coefficients.	Applying (K3)
CO4	apply the concept of ordinary differential equations for modeling and finding solutions to engineering problems.	Applying (K3)
CO5	apply Laplace Transform to find solutions of Linear Ordinary Differential Equations	Applying (K3)
CO6	understand the basics of MATLAB, solve ordinary differential equations and compute Laplace transforms using MATLAB.	Applying (K3), Manipulation (S2)

Mapping of COs with POs and PSOs

22PHT16 – PHYSICS FOR ELECTRONICS AND INSTRUMENTATION ENGINEERING								
Programme & Branch	BE- Electronics & Instrumentation Engineering			Sem.	Category	L	T	P
Prerequisites	Nil			1	BS	3	0	0
Preamble	This course aims to impart the knowledge on oscillations and waves, acoustics, ultrasonics, quantum physics, conductors, superconductors, semiconductors and dielectrics. It also describes the applications of aforementioned topics in instrumentation engineering.							
Unit – I	Oscillations and Waves:							
Periodic motion – Oscillations – Simple harmonic motion – Differential equation of simple harmonic motion – Forced oscillations – Damped oscillations – Application of simple harmonic motion in torsional pendulum, cantilever and LC circuit – Resonance – Waves – Equation of plane progressive wave – Types of progressive waves – Reflection and transmission of waves at a boundary (qualitative) – Energy transport of progressive waves.								
Unit – II	Acoustics and Ultrasonics:							

Classification of sound – Characteristics of sound – Reverberation and reverberation time – Growth and decay of sound – Sabine's formula for reverberation time – Determination of sound absorption coefficient – Factors affecting acoustics of buildings and the remedies – Ultrasonics – Properties of ultrasonic waves – Generation of ultrasonic waves – Magnetostrictive generator and Piezoelectric generator – Non-destructive testing – Flaw detection.

Unit – III	Quantum physics:	9
-------------------	-------------------------	----------

Blackbody radiation – Planck's theory – Compton scattering – Matter waves – Properties of matter waves – Heisenberg uncertainty principle (qualitative) – Schrodinger's time-independent and time-dependent wave equations – Physical significance of wave function – Particle in a one-dimensional box.

Unit – IV	Conducting and Superconducting materials:	9
------------------	--	----------

Classical free electron theory of metals – Electrical conductivity – Drawbacks of classical free electron theory – Quantum free electron theory (qualitative) – Fermi distribution function – Effect of temperature on Fermi function – Superconductivity – Temperature dependence of resistivity – Critical field – Meissner effect – Critical current – Persistent current – Isotope effect – Type-I superconductors and Type-II superconductors – Cryotron.

Unit – V	Semiconducting and Dielectric materials:	9
-----------------	---	----------

Intrinsic semiconductor – Carrier concentration – Fermi level – Electrical conductivity and band gap – Extrinsic semiconductors (qualitative) – Dielectric constant – Types of polarization mechanisms: Electronic, ionic, orientational and space-charge – Dielectric loss – Dielectric breakdown – Applications of dielectric materials in capacitor.

3.	Tamilarasan K. and Prabu K., "Materials Science", 1 st Edition, McGraw Hill Education Pvt. Ltd., New Delhi, 2019.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	make use of the concepts of oscillatory and wave motion to comprehend the phenomena related to the propagation of elastic waves.	Applying (K3)
CO2	apply the concepts of growth and decay of sound energy in a hall to compute Sabine's formula and to recognize the requirements of acoustically good buildings and also to describe the production of ultrasonic wave and the testing materials by non-destructive method.	Applying (K3)
CO3	use the concepts of quantum mechanics to describe the behavior of electrons in a metal by solving Schrodinger's wave equations.	Applying (K3)
CO4	apply the concepts of classical and quantum free electron theory of metals to compute the electrical conductivity and to comprehend the effect of temperature on Fermi function and also to apply the concept of Cooper pair to comprehend the properties, types and application of superconductors.	Applying (K3)
CO5	use the concept of density of states to compute the carrier concentration, electrical conductivity, band gap of intrinsic semiconductor. To use concepts of electric polarization to comprehend the select polarization mechanisms in dielectrics and the related phenomena.	Applying (K3)

Mapping of Cos with POs and PSOs

Cos/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	2						2	2		2	1

22EIT11 - ELECTRON DEVICES AND CIRCUITS

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit

Prerequisites	Nil	1/2	PC	3	0	0	3
Preamble	Electron Devices and circuits deals with diodes and special diodes along with its applications. It also focus on BJT Biasing, working of FET, different types of amplifiers, feedback amplifiers and oscillators.						
Unit – I	Diode Applications and Special Devices:						
Semiconductors – PN junction Diode: Volt-Ampere Characteristics, Effect of temperature on Diode Characteristics, Applications: Clippers, Clampers and Voltage multipliers. Special Devices: Varactor diode – Tunnel diode – PIN diode - LCD – LDR - Surface Mount Devices – OLED.							9
Unit – II	BJT Biasing and Stabilization:						
Characteristics of BJT – Current gains in CB, CE and CC Configuration– Load line and Operating point - Thermal runaway – Stability and Stability Factor. Transistor Biasing: Fixed bias circuits and Voltage - divider bias – Hybrid model of CE configuration.							9
Unit – III	FET, MOSFET and UJT:						
Construction, Characteristics and Applications of JFET – JFET parameters – FET in CS, CD and CG configurations. MOSFET Types and its characteristics – UJT as relaxation oscillator.							9
Unit – IV	Differential Amplifier, Large Signal Amplifier and Tuned Amplifier:						
Differential amplifier using BJT – Differential and common mode gain, CMRR. Power Amplifiers: Class A, Class B Amplifier and Push Pull amplifier. Tuned amplifiers: Single Tuned Amplifier and Double Tuned Amplifier.							
Unit – V	Feedback Amplifiers and Oscillators:						
Feedback amplifiers – Basic Concept of Feedback - Effects of negative feedback – Types of Negative Feedback Connections: Voltage / current, series/shunt feedback amplifiers. Oscillators: Classification of Oscillators - Conditions for Oscillation – RC oscillators and LC oscillators.							
Total:45							
TEXT BOOK:

(Common to All Engineering and Technology branches except CSE, IT, CSD, AIDS & AIML)

Programme & Branch	All BE/BTech Engineering & Technology branches , except CSE, IT, CSD, AIDS & AIML	Sem.	Category	L	T	P	Credit
--------------------	---	------	----------	---	---	---	--------

Prerequisites	Nil	1	ES	3	0	2	4
Preamble	The course aims to provide exposure to problem-solving through programming. It introduces all the fundamental concepts of C Programming. This course provides adequate knowledge to solve problems using C						
Unit – I	Introduction to C and Operators: The structure of a C program – Compiling and executing C program – C Tokens – Character set in C – Keywords – identifiers- Basic data Types – Variables – constants – Input / Output statements – Operators						9
Unit – II	Control Statements and Arrays: Decision-making and looping statements, Arrays: Declaring, initializing and accessing arrays – operations on arrays – Two-dimensional arrays and their operations.						9
Unit – III	Functions: Functions: Introduction- Using functions, function declaration and definition – function call – return statement – passing parameters to functions: basic data types and arrays – storage classes – recursive functions						9
Unit – IV	Strings and Pointers: Strings: Introduction – operations on strings: finding length, concatenation, comparing and copying – string and character manipulation functions, Arrays of strings. Pointers : declaring pointer variables – pointer expression and arithmetic, pointers and 1D arrays, pointers and strings						9
Unit – V	User-defined Data Types and File Handling: User-defined data types: Structure: Introduction – nested structures– arrays of structure – structure and functions -unions – enumerated data type. File Handling : Introduction - opening and closing files – reading and writing data to files -Manipulating file position indicator : fseek(), ftell() and rewind()						9
LIST OF EXPERIMENTS / EXERCISES:							
1.	Programs for demonstrating the use of different types of format Specifiers						
2.	Programs for demonstrating the use of different types of operators like arithmetic, logical, relational, and ternary operators						
3.	Programs for demonstrating the use of using decision making statements						
4.	Programs for demonstrating the use of repetitive structures						
5.	Programs for demonstrating one-dimensional arrays						
6.	Programs for demonstrating two-dimensional arrays						
7.	Programs to demonstrate modular programming concepts using functions						
8.	Programs to demonstrate recursive functions.						
9.	Programs to demonstrate strings (Using built-in and user-definedfunctions)						
10.	Programs to illustrate the use of pointers						
11.	Programs to illustrate the use of structures and unions						
12.	Programs to implement file Handling						
Lecture:45, Practical:30, Total:75							
TEXT BOOK:							
1.	Reema Thareja, "Programming in C ", 2nd Edition, Oxford University Press, New Delhi, 2018.						
REFERENCES/ MANUAL / SOFTWARE:							
1.	Yashavant Kanetkar, "Let us C", 16th Edition, BPB Publications, 2018.						
2.	Sumitabha Das, "Computer Fundamentals and C Programming", 1st Edition, McGraw Hill, 2018.						
3.	Balagurusamy E., "Programming in ANSI C", 7th Edition, McGraw Hill Education, 2017.						
4.	Behrouz A. Forouzan & Richard F.Gilberg, "Computer Science A Structured Programming Approach Using C", 3 rd Edition, Cengage,2017.						
5.	https://www.cprogramming.com/tutorial/c-tutorial.html						

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	develop simple programs using input/output statements and operators												Applying (K3), Precision (S3)
CO2	identify the appropriate looping and control statements in C and develop applications using these statements												Applying (K3), Precision (S3)
CO3	develop simple C programs using the concepts of arrays and modular programming												Applying (K3), Precision (S3)
CO4	apply the concepts of pointers and develop C programs using strings and pointers												Applying (K3), Precision (S3)
CO5	make use of user-defined data types and file concepts to solve given problems												Applying (K3), Precision (S3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	2	2	1				1	1		1		
CO2	3	2	2	2	1				1	1		1		
CO3	3	2	2	2	1				1	1		1		
CO4	3	2	2	2	1				1	1		1		
CO5	3	2	2	2	1				1	1		1		

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	10	30	60				100
CAT2	10	30	60				100
CAT3	10	30	60				100
ESE	10	30	60				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

22MET11 - ENGINEERING DRAWING

(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1 / 2	ES	2	1	0	3
Preamble	To impart knowledge on orthographic, isometric projections, sectional views and development of surfaces by solving different application oriented problems.						
Unit – I	General Principles of Orthographic Projection:						
Importance of Graphics in Engineering Applications - Use of Drafting Instruments - BIS Conventions and Specifications - Size, Layout and Folding of Drawing Sheets - Lettering and Dimensioning - Projections of Points, Lines and Planes - General Principles of Orthographic Projection - First Angle Projection - Layout of Views - Projection of Points Located in all Quadrant and Straight Lines Located in the First Quadrant - Determination of True Lengths and True Inclinations and Location of Traces - Projection of Polygonal Surface and Circular Lamina Inclined to both Reference Planes.							
Unit – II	Projections of Solid:						
6+3							

Projections of Simple Solids Like Prisms, Pyramids, Cylinder and Cone when the Axis is inclined to One Reference Plane by Change of Position Method.		
Unit – III	Sectioning of Solids:	6+3
Sectioning of Solids - Prisms, Pyramids, Cylinder and Cone in Simple Vertical Position by Cutting Planes inclined to One Reference Plane and Perpendicular to the other - Obtaining True Shape of Section.		
Unit – IV	Development of Surfaces:	6+3
Development of Lateral Surfaces of Simple Solids Like Prisms, Pyramids, Cylinders and Cones -Development of Simple Truncated Solids Involving Prisms, Pyramids, Cylinders and Cones.		
Unit – V	Isometric Projection and Introduction to AutoCAD:	6+3
Principles of Isometric Projection - Isometric Scale - Isometric Projections of Simple and Truncated Solids Like Prisms, Pyramids, Cylinders and Cones - Conversion of Isometric Projection into Orthographic Projection - Introduction to AutoCAD.		
Lecture: 30, Tutorial:15, Total:45		
TEXT BOOK:		
1.	Natarajan.K.V. "A Textbook of Engineering Graphics",35 th Edition, Dhanalakshmi Publishers, Chennai, 2022,

3.	Parthasarathy N.S., Vela Murali. "Engineering Drawing", 1 st Edition, Oxford University Press, 2015.	

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)	
CO1	interpret international standards of drawings and sketch the projections of points, lines and planes											Applying (K3)
CO2	draw the projections of 3D primitive objects like prisms, pyramids, cylinders and cones											Applying (K3)
CO3	construct the various sectional views of solids like prisms, pyramids, cylinders and cones											Applying (K3)
CO4	develop the lateral surfaces of simple and truncated solids											Applying (K3)
CO5	sketch the isometric projections of simple and truncated solids and convert isometric drawing into orthographic projection											Applying (K3)

Mapping of COs with POs and PSOs

22TAM01 - தமிழ் மரபு (Common to All Engineering and Technology Branches)										
Programme & Branch	All BE / BTech Branches				Sem.	Category	L	T	P	Credit

Prerequisites	Nil	1 / 2	HS	1	0	0	1
Preamble	தமிழர்களின் மொழி, இலக்கியம், ஓவியங்கள், சிற்பக்கலைகள், நாட்டுப்புறக் கலைகள், வீர வினையாட்டுக்கள், திணைக் கோட்பாடுகள், இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பைப் பற்றிய அறிவை வழங்குவதே இந்த பாடத்தின் நோக்கமாகும்.						
அலகு - I	மொழி மற்றும் இலக்கியம்						3
	இந்திய மொழிக் குடும்பங்கள் - திராவிட மொழிகள் - தமிழ் ஒரு செம்மொழி - தமிழ் செவ்விலக்கியங்கள் - சங்க இலக்கியத்தின் சமயச் சார்பற்ற தன்மை - சங்க இலக்கியத்தில் பகிர்தல் அறம் - திருக்குறளில் மேலாண்மைக் கருத்துக்கள் - தமிழ் காப்பியங்கள், தமிழகத்தில் சமண பெள்த சமயங்களின் தாக்கம் - பக்தி இலக்கியம், ஆழ்வார்கள் மற்றும் நாயன்மார்கள் - சிற்றிலக்கியங்கள் - தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி - தமிழ் இலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.						
அலகு - II	மரபு - பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை - சிற்பக் கலை						3
	நடுகல் முதல் நவீன சிற்பங்கள் வரை - ஜம்பொன் சிலைகள் - பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினைப் பொருட்கள், பொம்மைகள் - தேர் செய்யும் கலை - சுடுமண் சிற்பங்கள் - நாட்டுப்புறத் தெய்வங்கள் - குமரிமுனையில் திருவள்ளுவர் சிலை - இசைக் கருவிகள் - மிருதங்கம், பறை, வீணை, யாழ், நாதஸ்வரம் - தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு.						
அலகு - III	நாட்டுப்புறக் கலைகள் மற்றும் வீர வினையாட்டுக்கள்						3
	தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஓயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம், தமிழர்களின் வினையாட்டுக்கள்.						
அலகு - IV	தமிழர்களின் திணைக் கோட்பாடுகள்						3
	தமிழகத்தின் தாவரங்களும், விலங்குகளும் - தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள் - தமிழர்கள் போற்றிய அறக்கோட்பாடு - சங்க காலத்தில் தமிழகத்தில் எழுத்தறிவும் கல்வியும் - சங்ககால நகரங்களும் துறை முகங்களும் - சங்ககாலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி - கடல்கடந்த நாடுகளில் சோழர்களின் வெற்றி.						
அலகு - V	இந்திய தேசிய இயக்கம் மற்றும் இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு						3
	இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு - இந்தியாவின் பிறபகுதிகளில் தமிழ் பண்பாட்டின் தாக்கம் - சுயமரியாதை இயக்கம் - இந்திய மருத்துவத்தில் சித்த மருத்துவத்தின் பங்கு - கல்வெட்டுகள், கையெழுத்துப்படிகள் - தமிழ்ப் புத்தகங்களின் அச்சு வரலாறு.

22TAM01 - HERITAGE OF TAMILS							
(Common to All Engineering and Technology Branches)							
Programme & Branch	All BE / BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1 / 2	HS	1	0	0	1
Preamble	The objective of this course is to impart knowledge about Tamil language, literature, paintings, sculptures, folk arts, heroic games, doctrines, contribution of Tamils to Indian culture.						
UNIT I	Language and Literature						
Language families in india - dravidian languages – tamil as a classical language - classical literature in tamil – secular nature of sangam literature – distributive justice in sangam literature - management principles in thirukural - tamil epics and impact of buddhism & Jainism in tamil land - Bakthi literature azhwars and nayanmars - forms of minor poetry - development of modern literature in tamil - contribution of bharathiya and bharathidhasan.							
UNIT II	Heritage - Rock Art Paintings to Modern Art – Sculpture						

Hero stone to modern sculpture - bronze icons - tribes and their handicrafts - art of temple car making - massive terracotta sculptures, village deities, thiruvalluvar statue at kanyakumari, making of musical instruments - mridhangam, parai, veenai, yazh and nadhaswaram - role of temples in social and economic life of tamils.

UNIT III	Folk and Martial Arts	3
-----------------	------------------------------	----------

Therukoothu – karagattam - villu pattu - kaniyan koothu – oyillattam - leather puppetry – silambattam – valari - tiger dance - sports and games of tamils.

UNIT IV	Thinai Concept of Tamils	3
----------------	---------------------------------	----------

Flora and fauna of tamils & aham and puram concept from tholkappiyam and sangam literature - aram concept of tamils - education and literacy during sangam age - ancient cities and ports of sangam age - export and import during sangam age - overseas conquest of cholas.

UNIT V	Contribution of Tamils to Indian National Movement and Indian Culture	3
---------------	--	----------

Contribution of tamils to indian freedom struggle - the cultural influence of tamils over the other parts of india – self-respect movement - role of siddha medicine in indigenous systems of medicine – inscriptions & manuscripts – print history of tamil books.

22TAM02 - TAMILS AND TECHNOLOGY

(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	2 / 3	HS	1	0	0	1
Preamble	This course aims to impart the essential knowledge on the tamil culture and related technology						
UNIT – I	WEAVING AND CERAMIC TECHNOLOGY						
Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries.							3
UNIT – II	DESIGN AND CONSTRUCTION TECHNOLOGY						
Designing and Structural construction House & Designs in household materials during Sangam Age – Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram – Sculptures and Temples of Mamallapuram – Great Temples of Cholas and other worship places – Temples of Nayaka Period – Type study (Madurai Meenakshi Temple) – Thirumalai Nayakar Mahal – Chetti Nadu Houses, Indo – Saracenic architecture at Madras during British Period.							3
UNIT – III	MANUFACTURING TECHNOLOGY						
Art of Ship Building – Metallurgical studies – Iron industry – Iron smelting, steel – Copper and gold – Coins as source of history – Minting of Coins – Beads making – industries Stone beads – Glass beads –Terracotta beads –Shell beads/ bone beats – Archeological evidences – Gem stone types described in Silappathikaram.							3
UNIT – IV	AGRICULTURE AND IRRIGATION TECHNOLOGY						
Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoompu of Chola Period, Animal Husbandry – Wells designed for cattle use – Agriculture and Agro Processing – Knowledge of Sea – Fisheries – Pearl – Conche diving – Ancient Knowledge of Ocean – Knowledge Specific Society.							3
UNIT – V	SCIENTIFIC TAMIL & TAMIL COMPUTING						
Development of Scientific Tamil – Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.							
Total:15							
TEXT BOOK:							
1.	Social Life of Tamils (Dr.K.K.Pillay) A joint Publication of TNTB & ESC and RMRL – (in print)						
2.	Social Life of the Tamils – The Classical Period (Dr.S.Sigaravelu) (Published by: International Institute of Tamil Studies).

22PHL16 - PHYSICS LABORATORY FOR ELECTRONICS AND INSTRUMENTATION ENGINEERING							
Programme & Branch	BE- Electronics and Instrumentation Engineering			Sem.	Category	L	T
Prerequisites	Nil			1	BS	0	0
				2	1		

Preamble	This course aims to impart hands on training in the determination of parameters such as rigidity modulus, AC frequency, velocity of ultrasonic wave, compressibility of a liquid, specific resistance, thermal conductivity, band gap, Hall coefficient and knowledge on the working of LCR circuit, p-n diode and UJT, and also to impart skills on writing coding / developing project / product related to societal requirement.
----------	---

LIST OF EXPERIMENTS / EXERCISES:

1.	Determination of the rigidity modulus of the given metallic wire using torsional pendulum / Studying the variation of current and voltage in a series LCR circuit.
2.	Determination of the frequency of alternating current using electrically vibrating tuning fork (Meldé's apparatus).
3.	Determination of the velocity of ultrasonic waves in a liquid and the compressibility of the liquid using ultrasonic interferometer.
4.	Determination of the specific resistance of the given metallic wire using Carey-Foster's bridge.
5.	Determination of the thermal conductivity of a bad conductor using Lee's disc.
6.	Determination of the band gap of a given semiconducting material using post-office box.
7.	Observation of the I-V characteristics of a p-n junction diode.
8.	Observation of the I-V characteristics of a uni junction transistor / Determination of Hall coefficient of a material using Hall effect arrangement.
9.	Determination of the thickness of a thin wire using air-wedge method.
10.	Writing coding for any one of the above experiments / developing a project / a product.

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

1.	Physics Laboratory Manual / Record, Department of Physics, 1 st Edition, 2020.
----	---

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	determine the rigidity modulus of a wire using the concepts of twisting couple or to study a series LCR circuit. To determine AC frequency and the velocity of ultrasound in a liquid using the concept of formation of standing waves.	Applying (K3), Precision (S3)
CO2	determine the specific resistance using the principle of Wheatstone bridge and the thermal conductivity of a bad conductor using the concept of heat conduction through materials. To determine the band gap of semiconductor materials using the concept of variation of resistance with temperature and to obtain the I-V characteristics of a p-n junction diode.	Applying (K3), Precision (S3)
CO3	obtain the I-V characteristics of a UJT using the concept of creation of a region with negative resistance or to determine the Hall coefficient of a material using the concept of Hall effect. To determine and thickness of a thin film using the concept of interference and also to write coding / do project / develop product.	Applying (K3), Precision (S3)

22GCL12 – FOUNDATION LABORATORY - ELECTRICAL, IoT AND WEB

(Common to all BE/BTech branches)

Programme& Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1 / 2	ES	0	0	6	3
Preamble	This course is designed to provide a foundational knowledge on engineering with hands-on experience on the house wiring, Internet of Things and Web Technologies.						

LIST OF EXPERIMENTS / EXERCISES:

PART A – Electrical Installation (30 Hours)		
1.	Develop wiring diagrams using software tools.	
2.	Identify and select suitable components for Energy Measurement and Circuit Protection	
3.	Design a wiring circuit integrating Energy Meter, MCB and RCCB	
4.	Develop a wiring circuit for incandescent lamp and fluorescent lamp	
5.	Develop and Investigate Simple and Staircase Wiring for Residential Applications	
6.	Design the Wiring Circuits for Calling Bell System and Dimmable Light	
7.	Create wiring circuits for power loads	
8.	Measurement of Earth Resistance and its connections.	
PART B – Internet of Things (30 Hours)		
1.	Design a Single layer PCB layout designing	
2.	Fabricate Single layer PCB printing	
3.	Assembling, soldering and desoldering practice on single layer PCB	
4.	GPIO programming in ESP8266	
5.	Sensor and actuator interfacing with internet enabled microcontroller device	
6.	Sensor and actuator calibration	
7.	Integration of microcontroller based system with Cloud platform	
PART C – Web Technologies (30 Hours)		
1.	Design a website for an application using HTML and CSS.	
2.	Convert the designed website into responsive website using Bootstrap.	
3.	Add dynamism to the website by using JavaScript and embed the Social Media components to the website.	
4.	Incorporate database interaction to the website.	
5.	Deploy the developed website in the server.	
Total:90		
REFERENCES/ MANUAL /SOFTWARE:

4.	Lynn Beighley,"Head First SQL",1st Editin, O'Reilly,2007.	
COURSE OUTCOMES:		
On completion of the course, the students will be able to		
CO1	design electrical wiring circuits for buildings based on their requirement	Applying(K3), Precision (S3)
CO2	develop IoT based solutions and PCB for real world use cases.	Applying (K3), Precision (S3)
CO3	design and host an interactive dynamic website.	Applying(K3), Precision (S3)

22MEL11 - ENGINEERING PRACTICES LABORATORY (Common to All Engineering and Technology Branches)																								
Programme & Branch		All BE/BTech Branches				Sem.	Category	L	T	P	Credit													
Prerequisites		Nil				1	ES	0	0	2	1													
Preamble		This course is designed to provide a hands-on experience in basic of mechanical and electrical engineering practices.																						
LIST OF EXPERIMENTS / EXERCISES:																								
PART A – MECHANICAL ENGINEERING																								
1.	Prepare a Square / Rectangular / V-Shape Projection with its Counterpart for Mating and Perform the Drilling, Tapping, and Assembling Tasks from the given Square / Rectangular MS Plates using Modern Power Tools.																							
2.	Prepare T / L / Lap Joint from given Wooden Work Piece and Make a Box / Tray out of Plywood using Modern Power Tools.																							
3.	Perform the Thread Formation on a GI/PVC Pipe and Prepare a Water Line from the Overhead Tank that is Leak-Proof.																							
4.	Make a Butt / Lap / Tee Joint of MS Plate using Arc Welding Process and Welding Simulator.																							
5.	Activity: Prepare an Innovative Model with the Knowledge from Fitting / Carpentry / Plumbing / Welding Involving Modern Power Tools.																							
PART B – ELECTRICAL AND ELECTRONICS ENGINEERING																								
6.	Wiring circuit for fluorescent lamp and Stair case wiring																							
7.	Wiring Circuit of Incandescent lamp using Impulse Relay																							
8.	Measurement of Earth Resistance																							
9.	Soldering of Simple Circuits and trouble shooting																							
10.	Implementation of half wave and full wave Rectifier using diodes																							
Total:30																								
REFERENCES/ MANUAL /SOFTWARE:																								
1.	Engineering Practices Laboratory Manual.																							
COURSE OUTCOMES: On completion of the course, the students will be able to																								
CO1	plan the sequence of operations for effective completion of the planned models / innovative articles																							
CO2	identify and use appropriate modern power tools and complete the exercises/models accurately																							
CO3	perform house wiring and realize the importance of earthing																							
CO4	soldering with simple electronics circuits																							
CO5	trouble shoot the electrical and electronic circuits																							
Mapping of COs with POs and PSOs

22VEC11 - YOGA AND VALUES FOR HOLISTIC DEVELOPMENT														
(Common to All Engineering and Technology Branches)														
Programme & Branch	All B.E./B.Tech. Branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	1 / 2	HS	1	0	1	1							
Preamble	Yoga or yogasanas are considered as art and science of healthy living by our ancient gurus. It is method to bring harmony of body and mind for general wellbeing. Yoga is considered as one of the greatest gifts to the world by Indians for healthy living. Students in particular are benefitted by learning yoga.													
Unit – I	Introduction: The Origins of Yoga – Definitions - Concepts - Aims and objectives of Yoga – Yoga is a Science and Art – Rules and Regulations of Asanas – Classifications of Yogasanas – Patanjali's Ashtanga Yoga – Pranayama – Mudras & Bandhas - Shatkarma (Cleansing Practice) - Streams of Yoga – Modern Trends in yoga.													
Unit – II	Yoga and Mind: The Nature of Mind - Five Elements and the Mind - Meditation and the Mind - Functions of the Mind - Role of Yoga in Psychological problems: Mood Disorders, Major Depressive Disorder, Cyclothymic Disorder.													
Unit – III	Yoga and Values, Diet: Human Values – Social Values – Role of Yoga in Personality Integration - Concepts of Natural Diet - Naturopathy Diet – Eliminative Diet – Soothing Diet – Constructive Diet.													
Unit – IV	Asanas: Prayer - Starting & Closing - Preparatory practices – Loosening Practices – Meaning, Definitions and Objectives of Asanas - Principles of Practicing Asanas. Asanas: Standing – Sitting – Prone – Supine – Suryanamaskar.													
Unit – V	Pranayama and Meditation: Breathing Practices for awareness - Definitions and Objectives of Pranayama - Principles of Practicing Pranayama. Pranayama: Nadi Shuddhi - Kapalabathi – Sitali – Sitkari – Bhranari – Ujjayi – Relaxation Techniques – Meditation.													
Lecture: 10, Practical: 10, Total:20														
TEXT BOOK:														
1.	Swami satyananda saraswathi, "Asana pranayama mudra bandha", Bihar school of yoga, 4 th Edition, 1969.													
2.	Swami mukthi Bodhanandha, "Hatha yoga pradipika", Bihar school of yoga, 4 th Edition, 1985.													
REFERENCES:														
1.	B.K.S. Iyengar, "Yoga the path of holistic health", DK Limited, 2 nd Edition, 1969.													
2.	Selvarasu, "Kriya cleansing in yoga", Aruvi yoga, 3 rd Edition, 2002.													

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)
CO1	realize the importance of yoga in physical health.										
CO2	realize the importance of yoga in mental health.										
CO3	realize the role of yoga in personality development and diet.										
CO4	do the loosening practices, Asanas and realize its benefits.										
CO5	do the practice of Pranayama, meditation and realize its benefits

22EGT21 - COMMUNICATION SKILLS II

(Common to All Engineering and Technology Branches)

Programme & Branch	All B.E./B.Tech. Branches	Sem.	Category	L	T	P	Credit
--------------------	---------------------------	------	----------	---	---	---	--------

Prerequisites	Communication Skills I	2	HS	3	0	0	3
Preamble	This course is designed to equip students with the necessary skills to listen, read, write and speak so as to develop their linguistic and communicative competencies.						
Unit – I	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
	Grammar: Sentence Patterns - Simple, Compound & Complex sentences - Vocabulary: Portmanteau words - One word substitution - Listening: Speeches from company CEOs - TV debates Speaking: Just-a-minute talk - Group discussion - Reading: Reading for Gist - Writing: Job application letter with resume – Transcoding						
Unit – II	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
	Grammar: Concord - Vocabulary: Phrasal verbs - Idioms & Phrases - Listening: Listening to celebrity talks - Speaking: Talking about celebrities - Practicing Pronunciation through web tools - Reading: Company correspondence, technical texts/working principles of a machine - Writing: Description: Person, Place, Process, Product and Picture						
Unit – III	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
	Grammar: Discourse markers - Transitional words and phrases - Vocabulary: Commonly confused words - Listening: Listening to guest lectures - Speaking: Technical & Non-technical presentations - Workshop presentations - Reading: Reputed company profiles, Business Plans - Writing: a dream job/company - Letter to the Editor – Biography & Autobiography - Checklist						
Unit – IV	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
	Grammar: Degrees of Comparison - Punctuations – Fragments & run-ons - Vocabulary: British & American - Spelling & words - Listening: Listening to global accents - listening to motivational speeches - Speaking: Narrating personal milestones - Sports commentaries - Movie Enactment - Reading: Narrative passages - Writing: E mail - Agenda & Minutes of Meeting - Special & Technical reports						
Unit – V	Grammar, Vocabulary, Listening, Speaking, Reading & Writing						9
	Grammar: Purpose and Function - If clause - Error detection - Vocabulary: Coding & Decoding - Alphabet test - Listening: Listening to sample HR Interviews - Speaking: Introduction to phonetics - Stress, rhythm & Intonation – Guided & unguided speeches/conversations - Giving feedback – Debate - Reading: Key Note speeches - Newspaper reports - short technical texts from journals Writing: Circulars - Critical Appreciation of a non-detailed text - Technical proposals						
Total:45							
TEXT BOOK:							
1.	Sanjay Kumar & Pushp Lata, "Communication Skills", 2 nd Edition, Oxford University Press, New Delhi, 2018.

3.	Jack C. Richards and Chuck Sandy, "Passages" Student's Book 2, 3 rd Edition, Cambridge University Press, New York, 2014.						

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	use functional grammar for improving communication skills	Applying (K3)
CO2	listen and comprehend different accents and infer implied meanings	Applying (K3)
CO3	speak clearly, initiate and sustain a discussion and negotiate using appropriate communicative strategies	Creating (K6)
CO4	read different genres of texts, infer implied meanings and critically analyze and evaluate them	Understanding (K2)
CO5	produce different types of narrative, descriptive expository texts and understand creative, critical, analytical and evaluative writing	Creating (K6)

Mapping of COs with POs and PSOs

22MAC21 - MULTIVARIABLE CALCULUS AND COMPLEX ANALYSIS**(Common to CIVIL, MECH, MTS, ECE, EEE, EIE & FT branches)**

Programme & Branch	B.E & Civil, Mech, MTS, ECE, EEE, EIE & FT branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	2	BS	3	1*	2*	4							
Preamble	To impart the knowledge of partial derivatives, evaluation of real and complex integrals, vector calculus and analytic functions to the students for solving the problems related to various engineering disciplines.													
Unit – I	Functions of Several Variables:													
Functions of two or more variables – Partial derivatives – Total differential – Taylor's series for functions of two variables – Applications: Maxima and minima – Constrained maxima and minima – Lagrange's multiplier method.														
Unit – II	Multiple Integrals:													
Double integration in cartesian coordinates – Change of order of integration – Application: Area between two curves – Triple integration in cartesian coordinates – Volume as triple integrals.														
Unit – III	Vector Calculus:													
Directional derivative – Gradient of a scalar point function – Divergence of a vector point function – Curl of a vector – Solenoidal and Irrotational vectors – Vector Integration: Introduction – Green's, Stoke's and Gauss divergence theorems (without proof) – Verification of the above theorems and evaluation of integrals using them.														
Unit – IV	Analytic Functions:													
Functions of a complex variable – Analytic functions – Necessary and sufficient conditions (excluding proof) – Cauchy–Riemann equations (Statement only) – Properties of analytic function (Statement only) – Harmonic function – Construction of analytic function – Applications: Fluid flow – Conformal mapping: $w = z + a, az, 1/z$ – Bilinear transformation.														
Unit – V	Complex Integration:													
Introduction – Cauchy's theorem (without proof) – Cauchy's integral formula – Taylor's and Laurent series – Singularities – Classification – Cauchy's residue theorem (without proof) – Applications: Evaluation of definite integrals involving sine and cosine functions over the circular contour.														
LIST OF EXPERIMENTS / EXERCISES:														
1.	Finding ordinary and partial derivatives													
2.	Computing extreme values of function of two variables													
3.	Evaluating double and triple integrals													
4.	Finding the area between two curves													
5.	Computing gradient, divergence and curl of point functions													
6.	Applying Milne-Thomson method for constructing analytic function													
7.	Determination of Möbius transformation for the given set of points													
8.	Finding poles and residues of an analytic function													
Lecture:45, Tutorials and Practical:15, Total:60														
TEXT BOOK:														
1.	Ramana B V, "Higher Engineering Mathematics", 1 st Edition, Tata McGraw-Hill Publishing Company Limited, New Delhi, 2018.

5.	MATLAB – Laboratory Manual													

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	compute the total derivatives and extreme values of multivariable functions.	Applying (K3)
CO2	evaluate multiple integrals and apply them to compute the area and volume of the regions.	Applying (K3)
CO3	apply the concepts of derivatives and line integrals of vector functions in engineering problems.	Applying (K3)
CO4	construct analytic functions and bilinear transformations and determine the image of given region under the given conformal mapping.	Applying (K3)
CO5	apply the techniques of complex integration to evaluate real and complex integrals over suitable closed curves.	Applying (K3)
CO6	demonstrate MATLAB programming to understand the concepts of functions of two variables, vector operators, multiple integrals and complex variables.	Applying (K3), Manipulation (S2)

22CYT25 - CHEMISTRY FOR ELECTRONICS AND INSTRUMENTATION ENGINEERING							
Programme & Branch	B.E & Electronics and Instrumentation Engineering			Sem.	Category	L	T
Prerequisites	Nil			2	BS	3	0
Preamble	This course aims to equip the engineering students to realize the importance of electrochemistry, corrosion, metal finishing, electrochemical storage devices, fuel & combustion and the need for e-waste management.						
Unit – I	ELECTROCHEMISTRY AND CORROSION						
Electrochemistry: Introduction – cells – types – representation of galvanic cell – electrode potential – Nernst equation (derivation of cell EMF) – calculation of cell EMF from single electrode potential – reference electrode: construction, working and applications of standard hydrogen electrode – potentiometric titrations (redox) – conductometric titrations – mixture of weak and strong acid Vs strong base. Corrosion: Introduction – chemical corrosion – Pilling – Bedworth rule – electrochemical corrosion and its types–							

galvanic corrosion – differential aeration corrosion with examples- galvanic series- factors influencing rate of corrosion – measurement of corrosion (wt. loss method only).

Unit – II	INDUSTRIAL METAL FINISHING	9
------------------	-----------------------------------	----------

Introduction – technological importance of metal finishing- methods of metal finishing - essentials of metal finishing: polarization, decomposition potential and overpotential – surface preparation – electroplating: process – effect of plating variables on the nature of electrodeposit – electroplating of chromium and silver-electroless plating: process – various steps involved in electroless plating – electroless nickel plating process-advantages of electroless plating- distinction between electroplating and electroless plating – manufacturing of electronic component-printed circuit board (PCB) fabrication.

Unit – III	ELECTROCHEMICAL STORAGE DEVICES	9
-------------------	--	----------

Batteries: Introduction- types of batteries – discharging and charging of battery – characteristics of battery – battery rating – various tests on battery – primary battery: silver button cell – secondary battery: Ni-Cd battery –modern battery: lithium-ion battery – maintenance of batteries – choice of batteries for electric vehicle applications. **Fuel Cells:** Introduction-Importance and classification of fuel cells – description, principle, components and applications of fuel cells: H₂-O₂ fuel cell, alkaline fuel cell, molten carbonate fuel cell and direct methanol fuel cell.

Unit – IV	FUELS AND COMBUSTION	9
------------------	-----------------------------	----------

Introduction – classification of fuels – characteristics of a good fuel – combustion – calorific values – gross and net calorific values – theoretical calculation of calorific value by Dulong's formula – flue gas analysis by Orsat's method – solid fuels – coal and its varieties – proximate analysis – significance – metallurgical coke – Otto-Hoffman byproduct method – liquid fuel – refining of petroleum – manufacture of synthetic petrol – hydrogenation of coal – bergius process – knocking: spark ignition engine – octane number, compression ignition engine – cetane number – power alcohol and biodiesel – gaseous fuel – water gas – introduction of Bharat Stage Emission Standard (BSES) system.

Unit – V	E-WASTE AND ITS MANAGEMENT	9
-----------------	-----------------------------------	----------

Introduction-E- Waste – definition – sources of e-waste– hazardous substances in e-waste – effects of e-waste on environment and human health- need for e-waste management- e-waste handling rules – waste minimization techniques for managing e-waste – recycling of e-waste – disposal treatment methods of e- waste- mechanism of extraction of precious metal from leaching solution – global scenario of E-waste – E-waste in India- case studies.

22EIC21- ELECTRIC CIRCUITS ANALYSIS																
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Nil	2	PC	3	0	2	4									
Preamble	To establish a firm understanding of basic laws of electric circuits and networks, and to provide a comprehensive insight into the techniques for analysing the circuits theoretically.															
Unit – I	DC Circuits:															
Review of electric circuit elements and Kirchhoff's Laws-Dependent and independent sources- open and short circuits- Source transformation-Voltage and current relationship in R,L and C- Steady state analysis of RL, RC and RLC circuits.																
Unit – II	Network Theorems:															
Mesh analysis-Nodal Analysis – Star-Delta transformation -Superposition theorem – Thevenin's and Norton's theorem-Maximum Power transfer theorem.																
Unit – III	Network Synthesis:															
Realizability of one port network- Hurwitz polynomials-Positive Real Functions- RL, RC network using Cauer methods, LC networks using Foster method-applications of passive networks synthesize in filters.																
Unit – IV	Single phase and Three phase AC Circuits:															
Single phase AC Circuits: Phase relation in resistor, inductor, capacitor-Phasor diagram-Series and parallel RLC circuits-power and power factor. Three phase AC circuits: Interconnection of three phase sources and loads –line and phase quantities-voltage, current and power in three phase star and delta connected balanced loads- Power measurement in three phase balanced circuits: Two wattmeter method.																
Unit – V	Time and frequency domain analysis;															
DC Transient response analysis: - RL, RC and RLC series circuits. Resonance analysis: Ideal RLC series and parallel resonance- Impedance and current variations- Bandwidth-Q factor- Magnification factor.																
LIST OF EXPERIMENTS / EXERCISES:																
1.	Measurement of current, voltage, power and power factor in single phase load															
2.	RC transient response analysis															
3.	Frequency Response analysis of RLC circuits															
4.	Experimental verification of Maximum Power Transfer theorem															
5.	Three phase power measurement using two wattmeter method															
6.	Verification of superposition theorem in DC circuits															
7.	Determination of effective resistance in DC circuit using Star Delta transformation															
Lecture:45, Practical:30, Total:75																
TEXT BOOK:																
1.	Sudhakar A and Shyammohan S Palli , "Circuits and Networks Analysis and Synthesis", 4 th Edition , Tata McGraw-Hill, New Delhi, 2010.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	determine the electrical parameters in the fundamental DC circuit												Applying (K3)
CO2	interpret the behavior of DC resistive circuits using network theorems												Analyzing (K4)
CO3	identify suitable network from the given transfer function												Applying (K3)
CO4	determine the electrical parameters in single and three phase AC circuits												Applying (K3)
CO5	assess the characteristics of RLC circuits in time and frequency domain												Analyzing (K4)

Mapping of COs with POs and PSOs

22CSC22 – DATA STRUCTURES USING C**(Common to ECE, EEE, EIE and MTS Branches)**

Programme & Branch	BE - ECE, EEE, EIE and MTS Branches	Sem.	Category	L	T	P	Credit
--------------------	-------------------------------------	------	----------	---	---	---	--------

Prerequisites	Programming in C	2	ES	3	0	2	4
Preamble	This course is intended to introduce the concept of elementary data structures and notion of algorithms to novice learner from cross disciplines in Engineering and Technology.						
Unit – I	List:						9
	Data Structures - Abstract Data Types (ADT) - List ADT and Array Implementation - Linked List - Doubly Linked List - Circular Linked List – Application : Polynomial Addition						
Unit – II	Stack and Queues:						9
	Stack ADT – Array and Linked List implementation of Stacks - Application: Balancing Parenthesis- Infix to Postfix Conversion - Postfix Expression Evaluation - Queue ADT – Array and Linked List implementation of Queues - Applications						
Unit – III	Trees:						9
	Trees-Preliminaries – Binary Trees –Binary Tree Traversals - The Search Tree ADT – Binary Search Trees–Priority Queues (Binary Heap)- Application: Expression Tree						
Unit – IV	Graphs:						9
	Graphs – Definitions – Elementary Graph Operations- Traversals – Shortest-Path Algorithms: Unweighted Shortest Paths – Dijkstra's Algorithm – Minimum Spanning Tree: Prim's Algorithm- Kruskal's Algorithm – Applications: Biconnectivity.						
Unit – V	Sorting and Hashing:						9
	Sorting - Preliminaries – Insertion Sort – Quicksort – Merge sort – Heapsort – Hashing – General Idea – Hash Function – Separate Chaining – Open addressing.						
LIST OF EXPERIMENTS / EXERCISES:							
1.	Implementation of C programs using pointers						
2.	Implementation of singly linked list and its operations						
3.	Implementation of doubly linked list and its operations						
4.	Implementation of Stack and its operations						
5.	Implementation of Queue and its operations						
6.	Implementation of Stack and Queue using Singly Linked List						
7.	Convert a given In-fix Expression into Post-fix Expression using Stack ADT						
8.	Evaluate the Post-fix Expression using Stack ADT						
9.	Implementation of Binary Search Tree traversals						
10.	Implementation of sorting algorithms: Insertion and Quick sort						
Lecture:45, Practical:30, Total:75							
TEXT BOOK:

COURSE OUTCOMES:							
On completion of the course, the students will be able to						BT Mapped (Highest Level)	
CO1	apply List ADT for solving the given problems						Applying (K3)
CO2	make use of arrays and linked lists to create Stack and Queue ADTs.						Applying (K3)
CO3	utilize Tree ADT to develop simple application						Applying (K3)

CO4	make use of Graph ADT for standard problems											Applying (K3)	
CO5	illustrate the use of standard sorting and Hashing Techniques											Applying (K3)	

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIT21 - ELECTRICAL MACHINES																
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Nil	2/5	ES/PC	3	0	0	3									
Preamble	This course discusses the construction, operation and behavior of various electrical machines used in real time applications.															
Unit – I	DC Machines:															
DC Generator: Principle of working – construction –classification – EMF equation – Applications. DC Motor: Construction and Principle of Operation–Back EMF –Torque Equation, Characteristics of Series and Shunt motor – Starters : Three Point starter – Speed Control: Armature and Field Control- Applications.																
Unit – II	Transformer:															
Single Phase Transformer: Construction of a Transformer – Types– E.M.F. Equation– Voltage Transformation Ratio (K) –Simplified Equivalent Circuit of a Loaded Transformer. Open-circuit Test – Short-circuit Test –Voltage Regulation– Efficiency of a Transformer. Autotransformer: Principle of Operation and Applications.																
Unit – III	Induction Motors:															
Three-phase Induction Motors: Construction –Squirrel Cage and Slip-Ring rotors - Principle of Operation – Slip – Torque-Slip Characteristics. Methods of Starting of 3-Phase Induction Motors –Speed Control. Single-Phase Induction Motors: Types–Self-Starting –Split-Phase Induction Motor – Capacitor-Start Motor – Capacitor-Start Capacitor-Run Motor – Shaded-Pole Motor-Applications.																
Unit – IV	Synchronous Machines:															
Construction-Principle of Operation of generator and Motor– Types of rotors– EMF Equation of generator–Starting Methods of Synchronous Motor-V Curves and Inverted V curves – Applications.																
Unit – V	Special Machines:															
Construction, Principle of Operation and Applications: Universal Motor – Brushless D.C. Motor–Stepper Motor: Permanent Magnet-Variable Reluctance –Hybrid. D.C. Servomotor – A.C. Servomotor.																
Total:45																
TEXT BOOK:

3.	Theraja B.L. and Theraja A.K, "A text book of Electrical Technology", Vol.II, S.Chand & Co. Ltd., New Delhi, Reprint-2012.															

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	describe the construction and operation of DC Machines												Understanding (K2)
CO2	assess the performance characteristics of machines												Applying (K3)
CO3	outline the starting and speed control techniques of DC and AC Motors												Understanding (K2)
CO4	identify suitable electrical machine for various applications												Understanding (K2)
CO5	describe the construction and operation of special machines												Understanding (K2)

Mapping of COs with POs and PSOs

22CYL11 - CHEMISTRY LABORATORY FOR ELECTRICAL SYSTEMS											
(Common to ECE, EEE and EIE Branches)											
Programme & Branch	B.E - ECE, EEE & EIE					Sem.	Category	L	T	P	Credit

Prerequisites	Nil	1 / 2	BS	0	0	2	1
Preamble	This course aims to impart the basic concepts of volumetric, conductometric, potentiometric, viscometry, spectrophotometric and pH metry experiments for the estimation of given samples and thereby, to improve the analytical skills. This course also aims to impart the significance of DO, alkalinity, Cu ²⁺ and Cr ⁶⁺ in electrical systems.						
LIST OF EXPERIMENTS / EXERCISES:							
1.	Iodometric analysis of copper content from discarded PCBs.						
2.	Volumetric analysis of chromium prepared from electroplating sludge.						
3.	Find the amount of mineral acids present in the given solution by conductometric based sensor electrode.						
4.	Determination of concentration of H ⁺ ion in a solution using H ⁺ sensing electrode.						
5.	Potentiometric approach using a Pt electrode for the estimation of iron in the given sample.						
6.	Determination of molecular weight of a polymer / liquid by Ostwald viscometer.						
7.	Spectrophotometric method for the determination of Iron in steel.						
8.	Assessment of the given water sample for the suitability of drinking / industrial purpose by estimating the calcium, magnesium and total hardness by EDTA method.						
9.	Estimation of alkalinity of river and borewell water collected from different places.						
10.	Determination of dissolved oxygen in the given wastewater sample.						
11.	Electroplating process (Demonstration).						
12.	Proximate analysis of Coal- determines moisture, volatile matter and ash content of a given sample of coal (Demonstration).						

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

----	---

COURSE OUTCOMES:**On completion of the course, the students will be able to****BT Mapped
(Highest Level)**

CO1	estimate the amount of hardness, alkalinity, DO, Cu and Cr present in the given sample.	Applying (K3), Precision (S3)
CO2	analyze the amount of acids present in the given sample using conductivity and pH meter.	Applying (K3), Precision (S3)
CO3	demonstrate the potentiometric and spectrophotometric method for the estimation of Fe and Viscometer for the determination of molecular weight of a polymer.	Applying (K3), Precision (S3)

Mapping of Cos with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	1	3			3							
CO2	3	2	1	3			3							
CO3	3	2	1	3			2							

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

22GCL11 – FOUNDATION LABORATORY - MANUFACTURING, DESIGN AND ROBOTICS													
(Common to all BE/BTech branches)													
Programme& Branch	All BE/BTech branches							Sem.	Category	L	T	P	Credit
Prerequisites	Nil							1 / 2	ES	0	0	6	3

Preamble	This course is designed to provide foundational knowledge on engineering with hands-on experience on developing a prototype model with the basic knowledge of Computer-aided Design, Manufacturing Processes, 3D Printing Technology, Robotics and Embedded Control.
----------	--

LIST OF EXPERIMENTS / EXERCISES:**PART A – Manufacturing (30 Hours)**

1.	Selection of product, free hand sketching and detailing
2.	Construction of model using Arc/TIG/MIG/Gas/Spot welding operations
3.	Enhancing the model with sheet metal
4.	Creating the parts of the model using lathe
5.	Creating the parts of the model using milling and drilling machines

PART B – Product Design and Development (30 Hours)

1.	Free hand sketching and detailing of the component
2.	3D part modelling of the component using CAD software
3.	Engineering Analysis of the component model
4.	Generate the component using 3D printer
5.	Value addition to the produced component using CNC milling machine, CNC laser cutting machine and CNC router

PART C – Robotics (30 Hours)

1.	Design of electronic circuit and its debugging
2.	Interfacing of sensors, actuators and wireless communion modules with microcontroller
3.	Assembly of Tracker Robot with accessories
4.	Development of control strategies for motion control, path planning and obstacle avoidance
5.	Demonstration and testing of Robot in static environment

Total:90**REFERENCES/ MANUAL /SOFTWARE:**

1.	Laboratory Manual
2.	AutoCAD 2020 and SOLID WORKS 2018 Software

COURSE OUTCOMES:**On completion of the course, the students will be able to****BT Mapped
(Highest Level)**

CO1	develop the prototype model using mechanical operations like welding, forming and machining processes	Applying (K3), Precision (S3)
CO2	sketch 3D model and enhance the prototype using modern machines like 3D printer, CNC milling machine, CNC Laser cutter and CNC Router	Applying (K3), Precision (S3)
CO3	design and develop the autonomous robot for real-time applications	Applying (K3), Precision (S3)

Mapping of COs with POs and PSOs

22EIL21 - DEVICES AND MACHINES LABORATORY								
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit	
Prerequisites	Nil	2	ES	0	0	2	1	
Preamble	This laboratory aims for a better understanding of the operation of electronic circuits and give practical exposure to learn the characteristics of AC and DC machines							
LIST OF EXPERIMENTS / EXERCISES:								
1.	Clipper and clamper circuits using diodes							
2.	Determination of hybrid parameters in CE configuration							
3.	Determination of FET parameters.							
4.	BJT based RC Phase shift oscillator							
5.	Verification of UJT as relaxation oscillator							
6.	Load test on DC series motor							

7.	Speed control of DC shunt motor
8.	Load test on squirrel cage induction motor
9.	Predetermination of efficiency and regulation on single phase transformer
10.	Load test on three phase alternator

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

22ITC31 - JAVA PROGRAMMING													
(Common to ECE,EEE,EIE,MTS Engineering Branches)													
Programme& Branch	ECE,EEE,EIE,MTS	Sem.	Category	L	T	P	Credit						
Prerequisites	Problem Solving and Programming in C	3	ES	3	0	2	4						
Preamble	This course provides the fundamental object-oriented concepts of Java programming including inheritance, exception handling, multithreading, Generics, and Collections.												
Unit – I	Classes and Objects												
History and Evolution of Java – An Overview of Java–Data Types, Variables and Arrays– Operators –Control Statements– Classes: Class Fundamentals–objects – Assigning Object Reference Variables – Introducing Methods –Constructors – this keyword – Garbage Collection – Stack Class.													
Unit – II	Inheritance, Packages, and Interfaces												
Overloading Methods – Objects as Parameters –Argument Passing – Returning Objects –Recursion–Access Control–Static – Nested and Inner Classes–Command-Line Arguments – Variable Length Arguments. Inheritance – Basics– Super keyword - Multilevel Hierarchy–Method Overriding–Dynamic Method Dispatch –Abstract Classes – final with Inheritance. Packages and Interfaces: Packages and Member Access- Importing Packages – Interfaces.													
Unit – III	Exception Handling and Multithreading												
Exception Handling basics – Multiple catch Clauses – Nested try Statements – Java's Built-in Exceptions – User-defined Exception. Multithreaded Programming: Java Thread Model - Creating a Thread and Multiple Threads – Priorities – Synchronization – Inter Thread Communication- Suspending – Resuming, and Stopping Threads –Multithreading.													
Unit – IV	I/O and Generics												
Enumerations – Wrappers – Auto boxing – Annotation Basics. I/O Basics – Reading and Writing Console I/O –Reading and Writing Files. Generics: Introduction – Generic Classes & Methods - Example–Parameters, Constructors and Interfaces													
Unit – V	String Handling and Collections												
String Handling: String constructors – operations – Character Extraction – String Comparison – Searching Strings – Modifying Strings – String Buffer. Collection Framework: Overview – Collection Interfaces – Collection Classes.													
LIST OF EXPERIMENTS / EXERCISES:													
1.	Write Java programs using operators, arrays, and control statements												
2.	Develop a stack and queue data structures using classes and objects												
3.	Program to demonstrate inheritance & polymorphism												
4.	Develop an application using interfaces by accessing superclass constructors and methods												
5.	Develop applications using packages and exception handling												
6.	Program to demonstrate thread concepts												
7.	Write Java program to illustrate file and string manipulations												
8.	Implement Java program to illustrate collection frameworks												
Lecture:45, Practical:30, Total:75													
TEXT BOOK:													
1.	Herbert Schildt, "Java: The Complete Reference", 11 th Edition, McGraw Hill Education, New Delhi, 2019. (Units I - V)												
REFERENCES/ MANUAL / SOFTWARE:													
1.	Cay S.Horstmann, "Core Java Fundamentals", Eleventh Edition, Prentice Hall, 2018.												
COURSE OUTCOMES:													
On completion of the course, the students will be able to													
CO1	apply the concepts of classes and objects to solve simple problems												
BT Mapped (Highest Level)													
Applying (K3)													

CO2	develop programs using inheritance, packages, and interfaces											Applying (K3)	
CO3	make use of exception-handling mechanisms and multithreaded models to solve real-world problems											Applying (K3)	
CO4	develop Java applications with I/O packages and generics concepts											Applying (K3)	
CO5	apply string handling functions and collection classes and interfaces											Applying (K3)	

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	1	1

CO3	3	2	1	1										
CO4	3	2	1	1										
CO5	3	2	1	1										

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	40	40				100
CAT2	10	20	70				100
CAT3	10	20	70				100
ESE	10	20	70				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIT31-TRANSDUCERS ENGINEERING

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	C
Prerequisites	Nil	3	PC	3	0	0	3
Preamble	This course explains the concepts of measurement systems, units and standards. Also it imparts theoretical and practical aspects of resistive, inductive, capacitive and other special types of transducers.						

Unit – I	Measurements and Instrumentation of Transducers:	9
Block diagram of a Measurement system. Fundamental and Derived units –Standards of Measurement. Classification of Errors: Error analysis, Statistical methods, Odds and uncertainty. Classification of transducers – Selection of transducers.		
Unit – II	Characteristics of Transducers:	9
Static characteristics: Accuracy, Precision, Resolution, Threshold, Sensitivity, Linearity, Hysteresis, Range and Span. Dynamic characteristics: Impulse and random response of Zero order transducer. Step and Ramp response of First and Second order transducers.		
Unit – III	Variable Resistance Transducers:	9
Resistive Transducers: Resistance Potentiometer: Loading effect on Potentiometer. Resistance Strain gauges: Unbonded and Bonded type strain gauges. Applications: Temperature Measurement using RTD and Thermistor – Gas flow measurement using hot-wire Anemometer – measurement of moisture in solids and wood – level measurement using resistive tapes.		
Unit – IV	Variable Inductance Transducers:	9
Inductive Transducers: Simple inductance and Mutual inductance Transducers – Induction Potentiometers. Linear Variable Differential Transformers – Variable reluctance transducers – Eddy current transducers. Applications: Displacement measurement - Thickness Measurement – Position Measurement.		
Unit – V	Variable Capacitance Transducers and Other Transducers:	9
Capacitive Transducers: Variable area type – Variable dielectric type – Variable distance type. Applications: Capacitive Thickness Transducers–Capacitive Moisture Transducers - Capacitive Level Transducer. Other Transducers: Piezoelectric Transducers - Magnetostrictive Transducers – Hall Effect Transducers – SQUID Sensors –Film sensors – Smart sensors.

22EIT36 – SENSORS AND TRANSDUCERS

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	C
Prerequisites	Nil	3	PC	3	0	0	3

Preamble	This course explains the concepts of measurement systems, units and standards. Also it imparts theoretical and practical aspects of resistive, inductive, capacitive and other special types of transducers.	
Unit – I	Measurements and Instrumentation of Transducers:	
	Block diagram of a Measurement system. Fundamental and Derived units –Standards of Measurement. Classification of Errors: Error analysis, Statistical methods, Odds and uncertainty. Classification of transducers – Selection of transducers.	
Unit – II	Characteristics of Transducers:	9
	Static characteristics: Accuracy, Precision, Resolution, Threshold, Sensitivity, Linearity, Hysteresis, Range and Span. Dynamic characteristics: Impulse and random response of Zero order transducer. Step and Ramp response of First and Second order transducers.	
Unit – III	Variable Resistance Transducers:	9
	Resistive Transducers: Resistance Potentiometer: Loading effect on Potentiometer. Resistance Strain gauges: Unbonded and Bonded type strain gauges – Load Cells. Applications: Temperature Measurement using RTD and Thermistor – Gas flow measurement using hot-wire Anemometer – measurement of moisture in solids and wood – level measurement using resistive tapes.	
Unit – IV	Variable Inductance Transducers:	9
	Inductive Transducers: Simple inductance and Mutual inductance Transducers – Induction Potentiometers. Linear Variable Differential Transformers – Variable reluctance transducers – Eddy current transducers. Applications: Displacement measurement - Thickness Measurement – Position Measurement.	
Unit – V	Variable Capacitance Transducers and Other Transducers:	9
	Capacitive Transducers: Variable area type – Variable dielectric type – Variable distance type. Applications: Capacitive Thickness Transducers–Capacitive Moisture Transducers - Capacitive Level Transducer. Other Transducers: Piezoelectric Transducers - Magnetostrictive Transducers – Hall Effect Transducers – SQUID Sensors –Film sensors – Vibration Transducer - Smart sensors. Self-Generating Sensors : Pyroelectric Sensors.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	explain the measurement of physical quantities, conversion and classification of transducers												Understanding (K2)
CO2	summarize the concepts of various characteristics of Transducers												Understanding (K2)
CO3	apply the selected types of resistive transducers for various applications												Applying (K3)
CO4	apply the selected types of inductive transducers for various applications												Applying (K3)
CO5	apply various types of capacitive transducers and other transducers for selected applications												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2						1					1	2
CO2	3	2						1					1	2
CO3	3	3	1	1	1			2					1	3
CO4	3	3	1	1	1			2					1	3
CO5	3	3	1	1	1			2					1	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	30	70					100
CAT2	20	50	30				100
CAT3	20	50	30				100
ESE	20	50	30				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

22EIT32 - ANALOG INTEGRATED CIRCUITS

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit

Prerequisites	Nil	3/4	PC	3	0	0	3
Preamble	Analog Integrated Circuits course dealt with circuits of signals free to vary from zero to full power supply voltage. The contents in this course make use of integrated circuit components constructed using opamps and special function ICs.						
Unit – I	Basics and Characteristics of OPAMP:						9
	Introduction-Basics information of operational amplifier -Ideal operational amplifier –Operational amplifier Internal Circuit-Differential Amplifier-Transfer Characteristics. DC Characteristics: Input bias current-Input offset current-Input offset voltage -Thermal drift. AC characteristics: Frequency response-Frequency Compensation -Slew Rate.						
Unit – II	Applications of Operational Amplifier:						9
	Introduction-Inverting, Non inverting, Voltage follower, Summing Amplifier, Subtractor, Differentiator, Integrator, Comparators. Wave generators: Schmitt trigger, Astable and Monostable Multivibrator - RC phase shift oscillator. Precision diode. Active Filters: I order Low pass filters.						
Unit – III	D-A and A-D Converters:						9
	Characteristics: Resolution, Quantization, Range, Settling time. Digital to Analog Converter: Types: Weighted R, R-2R and Inverted R-2R. Analog to Digital Converter: Types: Flash type, Dual slope, and Successive approximation, Sigma delta.						
Unit – IV	Special ICs:						9
	Timer (IC 555) Introduction- Description of Functional block diagram - Monostable and Astable mode of operation. Voltage controlled oscillator (IC 566) – Monolithic Phase locked loop (IC 565).Voltage regulator IC: Series op-amp regulator (78XX) –Switching Mode Power Supply (SMPS).						
Unit – V	Analog Signal Conditioning:						9
	Introduction- Analog Data Representation- Signal Level and Bias Changes, Linearization, conversions, Signal transmission: Current to Voltage converter. Differential Instrumentation Amplifier –Common mode rejection, Differential and Common Mode gain. Analog Controllers: Proportional, Integral and Derivative mode Controllers.

2.	Sergio Franco, "Design with Operational Amplifiers and Analog Integrated Circuits", 4 th Edition, Tata McGraw-Hill, New Delhi, 2016.						

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	interpret the basics and characteristics of opamp	Understanding (K2)
CO2	apply the circuit of opamp for mathematical operation, waveform generation and filter.	Applying (K3)
CO3	implement A/D and D/A converters for real time application	Applying (K3)
CO4	summarize the functional blocks of special ICs.	Applying (K3)
CO5	develop analog signal conditioning circuits using opamp circuits	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2											2	2

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	10	50	40				100
CAT2	10	20	70				100
CAT3	10	20	70				100
ESE	10	20	70				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

22EIT33 - DIGITAL LOGIC CIRCUITS																
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Nil	3	PC	3	1	0		4								
Preamble	To impart the acquaintance about Boolean algebra, logic gates, combinational and sequential logic, logic families, memory and programmable logic devices															
Unit – I	Boolean Algebra and Minimization Techniques: Number systems and conversions – Boolean logic operations – Basic laws of Boolean Algebra – DeMorgan's theorems – Sum of Products and Product of Sums – Karnaugh Map (Two-variable, Three variable, Four-variable) – Quine McCluskey or Tabular method of minimization of logic functions -Don't care condition– Logic gates.															
Unit – II	Combinational Circuits: Procedure for the Design of Combinational circuits – Half adder – Full adder – Half subtractor – Full subtractor – Multiplexers: 4-to-1 and 8-to-1 Multiplexers, Implementation of Boolean expressions using multiplexers – Demultiplexers: 1-to-4 and 1-to-8 Demultiplexers – Decoders: 3-to-8 and 4-to-16 Decoders. Encoders: Octal-to-Binary Encoder – Parity Checkers– Code Converters: BCD-to-Binary converters, Binary-to-Gray code converters – Magnitude Comparators: Single bit Magnitude Comparator															
Unit – III	Synchronous Sequential Circuits: Latches and Flip-flops: Latches – Flip-Flops – S-R, D, J-K and T Flip-flops – Triggering and Characteristics equations of Flip-flops- Master-Slave Flip-flops Realization of one Flip-flop using other Flip-flops - Synchronous Sequential Circuits: General sequential circuit model – Design of synchronous sequential circuits - State reduction and assignment - Analysis of synchronous sequential circuits –Design of synchronous counters: Design of MOD-3 counter –Shift Registers: Universal shift registers.															
Unit – IV	Asynchronous Sequential Circuits: Design of Fundamental mode asynchronous sequential circuits-primitive state / flow table- Problems in asynchronous circuits: Cycles, Races, Hazards –Design of hazard free switching circuits: Static, Dynamic and Essential hazards elimination – Asynchronous counter.															
Unit – V	Logic Families and Memory: Logic Families: Introduction – Characteristics of Digital ICs: Speed of operation, Power dissipation, Fan-in, Fan-out, Noise immunity or noise margin - Transistor Transistor Logic (TTL): Two input TTL NAND Gate – Emitter Coupled Logic (ECL): Inverter. Memory and Programmable Logic Devices: Introduction – Classification of memories – Basic memory structure - Read Only Memory (ROM) : Architecture and types – Random Access Memory (RAM) - Types of RAM: Static RAM, Dynamic RAM - Introduction to PLA, PAL and FPGA.															
Lecture:45, Tutorial:15, Total:60																
TEXT BOOK:																
1.	Salivahanan S., and Arivazhagan S., "Digital Circuits and Design", 5 th Edition, Oxford University Press, New Delhi, 2018.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	simplify the boolean expressions	Applying (K3)
CO2	implement the combinational logic circuits	Applying (K3)
CO3	apply synchronous sequential logic for implementing digital circuits	Applying (K3)
CO4	implement digital circuits using asynchronous sequential logics	Applying (K3)
CO5	identify the role of logic families and memory devices	Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIT34 - ELECTRICAL MEASUREMENTS AND INSTRUMENTATION														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	3	PC	3	1	0	4							
Preamble	The course imparts the knowledge on Principles, Constructions, Dynamics of Electrical and Electronic Measuring Instruments. It discusses the comprehensive techniques for measurement of current, voltage, power energy with Instruments, Potentiometers and Bridges.													
Unit – I	Measurement of Voltage and Current:													
Introduction to essential requirements of instruments- Three operating forces of analog instruments - Permanent Magnet Moving Coil (PMMC): Construction of PMMC Instruments - Torque Equation- Ammeter Shunts- Voltmeter Multipliers. Moving Iron Instruments: General Torque Equation - Classification – Construction - Comparison between Attraction and Repulsion types of Instruments.														
Unit – II	Measurement of Power and Energy:													
Introduction to Electrodynamometer type instruments- Electrodynamometer Wattmeter: Construction – Theory- Torque Equation- Errors. Single Phase Induction Type Meters: Construction –Theory and Operation of Single Phase Induction Type Energy Meters .Testing of Energy Meters: Phantom loading.														
Unit – III	Potentiometers and Instrument Transformers:													
D.C. Potentiometers: Introduction - Basic Potentiometer Circuit – Standardization - Laboratory type (Crompton's) potentiometer – Applications. Instrument Transformers: use of Instrument transformers- Ratios-Burden. Design Features of C.T Current Transformers (C.T) – Potential Transformers (P.T). Difference between C.T and P.T. Measurement of Power using Instrument Transformers.														
Unit – IV	Measurement of Resistance and Impedance with Bridges:													
Classification of Resistances- Measurement of Medium Resistance - Wheat Stone Bridge - Limitations of Wheat Stone Bridge. Low Resistance- Kelvin Double Bridge. High Resistance – Meggar (Earth tester). A.C. Bridges: Introduction - Sources and Detectors - Measurement of Self Inductance & Capacitance: Maxwell's Inductance Bridge - Capacitance Bridge - Anderson's Bridge - Schering Bridge - Wien's Bridge- Sources of Errors in Bridge Circuits.														
Unit – V	Digital Instrumentation (Block Diagram Approach):													
Digital Multimeter, Cathode Ray Oscilloscope. Impedance Measurement: Q meter. RMS Measurement: True RMS Meters. Digital meters: Time, Period and Frequency measurements. Digital Voltmeters: Ramp type Voltmeters. Shielding and Grounding.														
Lecture:45, Tutorial:15, Total:60														
TEXT BOOK:														
1.	Sawhney A.K. "A Course in Electronic Measurements and Instrumentation", 2 nd Edition, DhanpatRai & Co. Pvt. Ltd, New Delhi ,2015.

22EIC31 - NETWORKS, SIGNALS AND SYSTEMS

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	3	PC	3	0	2	4

Preamble	To impart knowledge on electric circuit analysis and to provide fundamental concepts of continuous and discrete signals and systems.	
Unit – I	Steady State Analysis:	9
DC Circuit:	Review of electric circuit elements and Kirchhoff's Laws-Dependent and independent sources- open and short circuits- Source transformation-Voltage and current relationship in R,L and C.	
AC Circuit:	Single phase: Phase relation in resistor, inductor, capacitor-Phasor diagram-Series RLC circuits-power and power factor. Three phase: Interconnection of three phase sources and loads –line and phase quantities. Power measurement in three phase balanced circuits: Two wattmeter method.	
Unit – II	Network Theorems:	9
Mesh analysis-Nodal Analysis – Source transformation - Star-Delta transformation -Superposition theorem – Thevenin's and Norton's theorem-Maximum Power transfer theorem.		
Unit – III	Time and Frequency Domain Analysis:	9
DC Transient response analysis:	- Steady state analysis of RL, RC and RLC series circuits. Resonance analysis: Ideal RLC series and parallel resonance-Impedance and current variations- Bandwidth-Q factor- Magnification factor.	
Unit – IV	Continuous and Discrete Time Signals:	9
Classification- Analog to Digital conversion- Sampling – Aliasing - Signal representation: step, ramp, parabolic, sinusoidal and exponential. Periodical signals-Odd and Even signals-Energy and Power signals - Signal transformations.		
Unit – V	Continuous and Discrete Time Systems:	9
Classification of systems: static and dynamic -time variant and invariant – linear and nonlinear - stable and unstable- causal and non causal-recursive and non recursive. Relation between Laplace and Z transform-Response analysis of linear systems with impulse and step input in continuous and discrete domain using Laplace and Z transform.		

LIST OF EXPERIMENTS / EXERCISES:

1. Determination of effective resistance in DC circuit using Star -Delta transformation
2. Verification of Superposition theorem in DC circuits
3. Experimental verification of Maximum Power Transfer theorem
4. Measurement of current, voltage, power and power factor in single phase load
5. RC transient response analysis
6. Frequency response analysis of RLC circuits
7. Verification of periodicity in analog signals using MATLAB
8. Verification of periodicity in digital signals using MATLAB
9. Stability analysis of continuous -time systems using MATLAB
10. Stability analysis of discrete-time systems using MATLAB

22MNT31 - ENVIRONMENTAL SCIENCE							
(Common to All BE/BTech branches)							
Programme & Branch	All B.E/B.Tech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	3 / 6	MC	2	0	0	0
Preamble	This course provides an approach to understand the various natural resources, ecosystem, bio-diversity, pollution control & monitoring methods for sustainable life and also to provide knowledge and to create awareness for engineering students on biological sciences.						
Unit – I	Environmental Studies and Natural Resources						
Introduction to Environmental Science – uses, over-exploitation and conservation of forest, water, mineral, food, energy and land resources–case studies							
Unit – II	Ecosystem and Biodiversity						

Ecosystems: concept and components of an ecosystem -structural and functional features – Functional attributes (Food chain and Food web only). Biodiversity: Introduction – Classification – Bio geographical classification of India- Values of biodiversity – Threats and Conservation of biodiversity - case studies.

Unit – III	Environmental Pollution	5
-------------------	--------------------------------	----------

Environmental Pollution: Definition – causes, effects and control measures of: (a) Air pollution - Climate change, global warming, acid rain, ozone layer depletion (b) Water pollution (c) Soil pollution - Role of an individual in prevention of pollution - case studies.

Unit – IV	Environmental Monitoring	5
------------------	---------------------------------	----------

Sustainability -three pillars of sustainability- factors affecting environmental sustainability-approaches for sustainable development - Introduction to EIA - objectives of EIA - environment protection act – air (prevention and control of pollution) act – water (prevention and control of pollution) act.

Unit – V	Introduction to Biological Science	5
-----------------	---	----------

Functions of Carbohydrates, lipids, proteins and nucleic acids - Cells and its organelles - plasma membrane, mitochondria and nucleus- Heredity and DNA - organization of DNA in cells - Genes and chromosomes- Cell division -Types of cell division- mitosis & meiosis - Cell cycle and molecules that control cell cycle.

22EIL31 – TRANSDUCERS AND MEASUREMENTS LABORATORY

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	3	PC	0	0	2	1

Preamble		To infer the characteristics of various transducers and Perform various electrical measurements using Instruments and Bridges.
LIST OF EXPERIMENTS / EXERCISES:		
1.		Measurement of temperature using thermocouple, thermistor and resistance temperature detector and infer their I-O characteristics
2.		Measurement of strain using strain gauge and load cell and infer their characteristics as resistance transducers.
3.	(a) (b)	Measurement of displacement using inductive transducer and test its characteristics Test the characteristics of DC potentiometer as resistance transducer
4.		Measurement of speed using photoelectric tachometer and proximity sensor
5.	(a) (b)	Test the characteristics of Hall effect transducers Test the characteristics of Piezoelectric transducer.
6.		Range extension for DC ammeter and Voltmeter.
7.		Calibration of single phase Energy meter and LPF Wattmeter using Phantom loading and Verification with Trivector meter
8.		Measurement of Current and Voltage using CT and PT
9.		Measurement of Resistance using Wheatstone bridge and Kelvin double bridge
10.		Measurement of Inductance and Capacitance using Anderson's bridge and Schering bridge

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

22EIL32 - ANALOG AND DIGITAL INTEGRATED CIRCUITS LABORATORY														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering						Sem.	Category		L	T	P		
Prerequisites	Nil						3/4	PC		0	0	2		
Preamble	This course provides practical knowledge on Integrated circuits design for given specification. It enables to design and verify analog, digital circuits using ICs and simulation software.													
LIST OF EXPERIMENTS / EXERCISES:														

1.	Design and Verification of Full adder and Full Subtractor circuits, JK Flip flop, D Flip flop,
2.	Design and implementation of Binary to Gray and Gray to Binary code converters
3.	Design and implementation of Encoder, Decoder and Multiplexers
4.	Design and implementation of 4 – bit modulo counters
5.	Design and implementation of 4-bit shift registers
6.	Design and implementation of inverting and non-inverting amplifiers using operational amplifier
7.	Design and implementation of Adder & Comparator circuits using operational amplifier
8.	Design and implementation of Integrator and Differentiator circuits using operational amplifier
9.	Implementation of NE/SE 555 timer in Astable and Monostable modes
10.	Simulation of opamp based circuits Anadigm and Implementation in FPAAs

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

1.	Lab Manual
2.	Software: Anadigm tool

COURSE OUTCOMES:**On completion of the course, the students will be able to**

		BT Mapped (Highest Level)
CO1	Design Combinational and Sequential digital circuits using ICs.	Applying(K3), Precision (S3)
CO2	Design linear, non linear, data converters and wave shaping circuits using operational amplifier	Applying(K3), Precision (S3)
CO3	Design circuits with IC555 timer and perform simulation with CAD tools	Applying(K3), Precision (S3)

Mapping of Cos with POs and PSOs

22EIL34 - DEVICES AND CIRCUITS LABORATORY																								
Programme & Branch		BE & Electronics and Instrumentation Engineering					Sem.	Category	L	T	P	Credit												
Prerequisites		Nil					3	PC	0	0	2	1												
Preamble		The Devices and circuits lab aims to assist the students in obtaining a better understanding of the operation of electronic circuits experimented by determining the parameters, generating and analyzing the waveforms.																						
LIST OF EXPERIMENTS / EXERCISES:																								
1.	Zener diode as voltage regulator																							
2.	Clipper and clamper circuits using diodes																							
3..	Determination of hybrid parameters in CE configuration																							
4.	Determination of FET parameters.																							
5.	UJT as relaxation oscillator																							
6.	BJT as Differential Amplifier																							
7.	Frequency response of BJT amplifier																							
8.	BJT based RC Phase shift oscillator																							
9.	BJT based Astable Multivibrator																							
10.	BJT based Monostable Multivibrator																							
Total:30																								
REFERENCES/ MANUAL /SOFTWARE:																								
1.	Devices and Circuits Lab Manual																							
COURSE OUTCOMES: On completion of the course, the students will be able to																								
CO1	Determine the characteristics and parameters of transistors																							
CO2	Generate waveforms using diodes and transistors																							
CO3	Analyzing the frequency response of BJT																							
Mapping of Cos with POs and PSOs

22EGL31 - COMMUNICATION SKILLS DEVELOPMENT LABORATORY																				
(Common to All Engineering and Technology Branches)																				
Programme & Branch	All B.E./B.Tech Branches				Sem.	Category	L	T	P	Credit										
Prerequisites	Nil				3 / 4	HS	0	0	2	1										
Preamble	This course is designed to impart necessary skills to listen, speak, read and write in order to obtain better professional communication skills.																			
LIST OF EXPERIMENTS / EXERCISES:																				
1.	Self Introduction & Mock Interview																			
2.	Job Application letter with Resume																			
3.	Presentation: A Technical topic / Project report & a Case study																			
4.	Situational Dialogues / Telephonic Conversations																			
5.	Group Discussion																			
6.	Reading Aloud																			
7.	Listening Comprehension																			
8.	Writing Company Profiles																			
9.	Preparing reviews of a book/product/movie																			
10.	Pronunciation Test																			
Total: 30																				
REFERENCES/ MANUAL /SOFTWARE:																				
1.	Laboratory Manual																			
2.	Orell Digital Language Lab Software																			
COURSE OUTCOMES: On completion of the course, the students will be able to																				
CO1	enhance effective listening and reading skills							BT Mapped (Highest Level)												
CO2	acquire professional skills required for workplace/higher education							Understanding (K2), Imitation (S1)												
CO3	use English language skills effectively in various situations							Applying (K3), Naturalization (S5)												
Mapping of COs with POs and PSOs

22MAT42- TRANSFORMS AND PARTIAL DIFFERENTIAL EQUATIONS										
(Common to Electrical and Electronics Engineering& Electronics and Instrumentation Engineering Branches)										
Programme & Branch	BE - Electrical and Electronics Engineering& Electronics and Instrumentation Engineering Branches				Sem.	Category	L	T	P	Credit
BE- Electronics and Instrumentation Engineering, Regulation, Curriculum and Syllabus – R2022										

Prerequisites	Nil	4	BS	3	1	0	4
Preamble	To provide the skills for handling discrete and continuous time signals by applying Fourier transform and Z-Transform and impart knowledge in partial differential equations and express functions in terms of Fourier series.						
Unit – I	Fourier Series:						9+3
Dirichlet's conditions – General Fourier series – Change of interval – Odd and even functions – Half range Sine series – Half range Cosine series – Harmonic analysis.							
Unit – II	Fourier Transform:						9+3
Fourier Integral theorem (without proof) – Fourier transform pair – Properties (without proof) – Transforms of simple functions – Fourier Sine and Cosine transforms – Properties (without proof) – Convolution theorem and Parseval's identity (Statement and applications only).							
Unit – III	Z –Transform:						9+3
Definition – Z-transform of some basic functions – Elementary properties – Inverse Z-transform: Partial fraction method – Residue method – Convolution theorem – Applications of Z-transforms: Solution of difference equations.							
Unit – IV	Partial Differential Equations:						9+3
Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – Lagrange's linear equation – Solution of homogeneous linear partial differential equations of higher order with constant coefficients.							
Unit – V	Applications of Partial Differential Equations:						9+3
Classification of second order quasi linear partial differential equations – Solutions of one dimensional wave equation – One dimensional heat equation – Steady state solution of two dimensional heat equation (excluding insulated edges).							
Lecture:45, Tutorial:15, Total:60							
TEXT BOOK:							
1.	Ramana B V, "Higher Engineering Mathematics", 1 st Edition, Tata McGraw-Hill Publishing Company Limited, New Delhi, 2018.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	express the given function or data in terms of Fourier series.												Applying (K3)
CO2	understand the concept of Fourier transform and its properties which will provide the ability to formulate and solve physical problems in engineering.												Understanding (K2)
CO3	possess knowledge of Z transform to analyze linear time invariant systems.												Applying (K3)
CO4	formulate and solve higher order partial differential equations.												Applying (K3)
CO5	apply Fourier series techniques in solving one and two dimensional heat flow problems and one dimensional wave equations.												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22ITC41 – PROGRAMMING IN PYTHON

(Common to ECE, EEE, EIE, MTS Engineering branches)

Programme& Branch	ECE,EEE,EIE,MTS	Sem.	Category	L	T	P	Credit

Prerequisites	ProblemSolvingandProgramming in C	4	ES	3	0	2	4
Preamble	This course introduces the core Python programming. It emphasizes developing Python programs with alldatatypes,functions, classes,objects, and NumPy						
Unit – I	Introduction:						9
	Problem-solvingstrategies—programdesigntools—Typesoferrors—TestingandDebugging-Basics:Literals—variablesandidentifiers—datatypes—inputoperation—comments—reservedwords—indentation—OperatorsandExpressions—Decision ControlStatements:Introduction—conditionalstatement—iterativestatements—NestedLoops—break,continueandpassstatements—elseinloops.						
Unit – II	Lists,TuplesandDictionary:						9
	Lists:Access, update, nested, cloning, operations, methods, comprehensions, looping- Tuple:Create, utility, access, update,delete, operations, assignments, returning multiple values, nested tuples, index, and count method - Dictionary: Create, access, addandmodify,delete,sort,looping,nested,built-inmethods—listvstuplevs dictionary.						
Unit – III	StringsandRegularExpressions:						9
	Strings: Concatenation, append, multiply on strings—Immutable—formatting operator— Built-in string methods and functions—sliceoperation—functions—operators—comparing —iterating —string module—Regular Expressions – match, search, sub,findall and finditerfunctions—flagoptions.						
Unit – IV	FunctionsandModules:						9
	Functions:Introduction-definition—call—variable scope and life time—return statement – function arguments – lambda function – documentation strings— programming practices recursivefunction -Modules: Modules – packages—standard library methods—function redefinition.						
Unit – V	ObjectOrientation:						9
	Class and Objects: Class and objects— class methods and self— constructor—class and object variables—destructor—public and private data member. NumPy : NumPy Arrays—Computation on NumPyArrays . Matplotlib : Lineplots—Scatter Plots						
LIST OF EXPERIMENTS / EXERCISES:							
1.	Programsusingconditionalandloopingstatements						
2.	Implementationoflistandtupleoperations						
3.	Implementationofdictionaryoperations						
4.	Perform variousstringoperations						
5.	Useregularexpressionsforvalidatinginputs						
6.	Demonstrationof differenttypesoffunctionsandparameter passing						
7.	Developprogramsusingclasses andobjects						
8.	Performcomputationon NumPyarrays						
9.	Drawdifferenttypes ofplotsusing Matplotlib						
Lecture:45, Practical:30, Total:75							
TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to						BT Mapped (Highest Level)	
CO1	use basic Python constructs to build simple programs					Applying(K3), Precision(S3)	
CO2	apply list, tuple, and dictionary to handle a variety of data.					Applying(K3), Precision(S3)	
CO3	apply strings and regular expressions for searching and retrieval					Applying(K3), Precision(S3)	

CO4	solve the problems using functions and modules.										Applying(K3), Precision(S3)	
CO5	apply object-oriented concepts and perform basic data science operations using Python										Applying(K3), Precision(S3)	

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIT41 - MICROCONTROLLER AND ITS APPLICATIONS							
Programme & Branch	B.E. & Electronics and Instrumentation Engineering				Sem.	Category	L T P Credit
Prerequisites	Digital Logic Circuits				4	PC	3 0 0 3
Preamble	To get acquaintance with the architecture of 8085 processor and 8051 microcontroller, apply the embedded programming concepts for interfacing peripherals with the controller and to implement the applications of microcontrollers.						
Unit – I	8085 Microprocessor:						
Introduction to 8085 Microprocessor-Architecture-Pin configuration-Interrupts-Instruction Set –Addressing Modes-Timing Diagrams-Memory Interfacing –Simple Assembly Language Programs for arithmetic operations.							

Unit – II	8051 Microcontroller:	9
Introduction to 8051 Microcontroller- Architecture- Memory Organization- Special function registers – Program Counter – PSW register –Stack - Instruction set-Addressing modes.		
Unit – III	8051 Programming:	9
I/O Ports – Timer (Mode 1) / Counter– Serial Communication - Interrupt (Timer, Serial communication) – Programming in Embedded C: I/O port programming- Timer programming-Counter programming-Serial port programming-Interrupt programming		
Unit – IV	Peripheral Interfacing with 8051:	9
Programming in Embedded C: Keypad- LCD – Sensors- A/D and D/A converters- DC Motor -Stepper motor – Servo motor.		
Unit – V	Applications of Microcontrollers(Block Diagram Approach):	9
Smart Card reader, Automated Meter Reading System, Washing machine, Speedometer, Healthcare monitoring systems, 3D Printers, Smart Home automation system.		
Total:45

22EIT42 - CONTROL SYSTEMS

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit

Prerequisites	Nil	4	PC	3	1	0	4
Preamble	This course provides the concepts of the mathematical modeling, response and stability analysis of linear systems in time and frequency domain						
Unit – I	Mathematical Modeling:						
Open loop and closed loop systems-Derivation of transfer function models and state space models(phase variable): Electrical Systems and Mechanical Systems with single and two degree of freedom, Electromechanical Systems: DC Motor - conversion of state model to transfer function- Electrical Analogy of Mechanical Systems. Transfer function derivation using block diagram reduction and signal flow graphs.							9+3
Unit – II	Time Response of Systems:						
Poles, Zeros and System Response-Type and Order of System -Significance of Test Signals-Step response analysis and specifications of first order system and second order under damped System. Steady State Error and Error Constant –State Transition Matrix- time domain solutions of state models of second order systems with impulse input using Laplace transform method.							9+3
Unit – III	Stability Analysis in Time Domain:						
Concepts of Stability - Pole Locations and Stability - Routh Hurwitz Criterion - Root Locus Technique: conditions – angle and magnitude criterion – root locus construction –design of control loop gain.							9+3
Unit – IV	Frequency Response of Systems:						
Concept of Frequency Response, Frequency Response Analysis: Bode Plot and Polar Plot-gain margin and phase margin-deriving transfer function model from bode plot-Stability analysis in Frequency Domain: Nyquist Stability Criterion.							
Unit – V	Compensators and Controllers in Time Domain:						
Effect of addition of poles and zeros on second order system response and system stability - Need for Compensator - Ideal Compensation on Time Response: P, PI, PD and PID controller - Design procedure of Lag and Lead Compensator via Root Locus.							9+3

22EIC41- LINEAR CONTROL SYSTEMS

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	PC	3	0	2	4

Preamble	This course provides the concepts of the mathematical modeling, response and stability analysis of linear systems in time and frequency domain	
Unit – I	Mathematical Modeling:	9
	Open loop and closed loop systems-Derivation of transfer function models and state space models(phase variable): Electrical Systems and Mechanical Systems with single and two degree of freedom, Electromechanical Systems: DC Motor - conversion of state model to transfer function- Electrical Analogy of Mechanical Systems. Transfer function derivation using block diagram reduction and signal flow graphs.	
Unit – II	Time Response of Systems:	9
	Poles, Zeros and System Response-Type and Order of System -Significance of Test Signals-Step response analysis and specifications of first order system and second order under damped System. Steady State Error and Error Constant –State Transition Matrix- time domain solutions of state models of second order systems with impulse input using Laplace transform method.	
Unit – III	Stability Analysis in Time Domain:	9
	Concepts of Stability - Pole Locations and Stability - Routh Hurwitz Criterion - Root Locus Technique: conditions – angle and magnitude criterion – root locus construction –design of control loop gain.	
Unit – IV	Frequency Response of Systems:	9
	Concept of Frequency Response, Frequency Response Analysis: Bode Plot and Polar Plot-gain margin and phase margin-deriving transfer function model from bode plot-Stability analysis in Frequency Domain: Nyquist Stability Criterion.	
Unit – V	Compensators and Controllers in Time Domain:	9
	Effect of addition of poles and zeros on second order system response and system stability - Need for Compensator - Ideal Compensation on Time Response: P, PI, PD and PID controller - Design procedure of Lag and Lead Compensator via Root Locus.	

LIST OF EXPERIMENTS / EXERCISES:

1.	Transfer function of Armature controlled DC motor
2.	Time response analysis of second order systems using MATLAB
3.	State space analysis of second order systems using MATLAB
4.	Analysis of the stability via Root Locus using MATLAB
5.	Effect of addition of poles and zeros on system response using MATLAB
6.	Effect of addition of poles and zeros on stability using MATLAB
7.	Frequency domain analysis via Bode plot using MATLAB
8.	Effect of P,PI,PID controllers on time response of system using MATLAB
9.	Design of Lead compensator using MATLAB
10.	Design of Lag compensator using MATLAB

22EIT43 - INDUSTRIAL INSTRUMENTATION I							
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	PC	3	0	0	3
Preamble	This course imparts the knowledge of instruments used for the measurement of Temperature and Pressure with their principles. It will also provide the methods for the measurement of Force, Torque, Speed, Acceleration and Vibration.						
Unit – I	Temperature Measurement I:						
Physical Effects utilized to measure Temperature – Temperature Scales – Mechanical Thermometers: Filled system Thermometers – Metallic - Expansion Thermometers – Special Temperature Indicating Devices – Bulb Installations– Solid state temperature sensors							9
Unit – II	Temperature Measurement II:						
Electrical Thermometers: Resistance Thermometers – Thermistors – Thermocouples – Radiation Pyrometers. Fiber-optic Temperature measurement systems – Ultrasonic Thermometers –Temperature switch.							9
Unit – III	Pressure Measurement I:						
Units of pressure – Mechanical Pressure Measurement: Manometers – Elastic type pressure gauges: Bourdon type– Metallic Diaphragm – Capsule – Bellows. Electrical Methods of Pressure Measurement: Strain-Gauge – Capacitance – Potentiometric – Resonant Wire – Piezoelectric – Magnetic– Optical.							9
Unit – IV	Pressure Measurement II:						
Vacuum sensors: Mechanical Vacuum Gauges: McLeod gauge – Thermal Vacuum Gauges: Knudsen gauge – Pirani gauge – Thermocouple vacuum gauge – Ionisation Vacuum Gauges – Testing and Calibration of Pressure Detectors: Dead weight tester – Pressure Switches.							9
Unit – V	Force, Torque, Speed, Acceleration and Vibration:						
Force(Weight) Measurement: Mechanical Load Cells – Elastic deflection force transducers – Torque Measurement: Rotary torque sensors – Stationary Sensors – Torque measurement using proximity sensors – Speed Measurements: Stroboscopic tachometers – AC tachometer generator – DC tachometer generator – Eddy current drag-cup tachometer – Acceleration Measurement: Seismic acceleration pickups – variable reluctance accelerometers – Vibration measurement: Mechanical vibration sensors.							9

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	explain the theory and working behind temperature measurement and mechanical thermometers												Understanding (K2)
CO2	interpret the working of various types of electrical thermometers and determine the unknown temperature												Applying (K3)
CO3	interpret the theory and working of pressure measuring instruments for various industrial applications												Applying (K3)
CO4	explain the construction and working of vacuum measuring instruments												Understanding (K2)
CO5	summarize the various measuring parameters such as force, torque, speed, acceleration and vibration for industrial applications												Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2						2				1	2	2
CO2	3	3	1	1	1			2				1	3	3
CO3	3	3	1	1	1			2				1	3	3
CO4	3	2						2				1	2	2
CO5	3	2						2				1	2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	50	30				100
CAT2	20	50	30				100
CAT3	20	50	30				100
ESE	20	50	30				100

* ±3% may be varied (CAT 1,2,3–50 marks & ESE– 100 marks)

22EIT44 - INDUSTRIAL INSTRUMENTATION

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Transducer Engineering	4	PC	3	0	0	3							
Preamble	This Course enhances the students to understand all the processes involved in the industries, the various unit operations and be able to apply control schemes to these processes to get the output with desired specifications.													
Unit – I	Pressure Measurement:													
	Units and Terminologies; Measurement: U Tube manometer, Elastic type: C-type, Spiral, Helical, Electrical type: capacitive, potentiometric, piezo resistive; Vacuum measuring type: McLeod, Ionization, Thermal conductivity, Pirani gauge. Calibration: Deadweight tester													
Unit – II	Temperature Measurement													
	Units and Terminologies; Measurement: Bimetallic and mercury filled thermometers, RTD, Thermistor, thermocouples; pyrometers: total radiation type and optical type; Temperature switches.													
Unit – III	Flow Measurement:													
	Units and Terminologies; Measurement: Orifice, Venturi; Positive Displacement Type, Rotameter, Turbine Type; Electrical Type: Electromagnetic, Ultrasonic; Vortex Shedding, Flow Meter Selection, Calibration: dynamic weighing.													
Unit – IV	Level Measurement:													
	Units and Terminologies; sight glass, float level switch, displacer type, air-purge, boiler drum level measurement; Electrical: resistance tape, capacitive type, radar type, ultrasonic type.													
Unit – V	Viscosity, Density, Humidity and Moisture Measurement:													
	Viscosity Terminologies; capillary and efflux cup viscometers; Density measurement: float type and ultrasonic type; Humidity: Psychrometers; Dew cell; Electrolytic hygrometer; Moisture measurement: electrolytic type, piezoelectric and resistance moisture gauges.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	demonstrate the construction and working of various pressure measuring instruments for industrial applications												Applying (K3)
CO2	demonstrate the working of various types of temperature sensing devices and determine the unknown temperature												Understanding (K2)
CO3	determine the flow rate using various types of mechanical flow meters and identify suitable flow meters for various applications												Applying (K3)
CO4	determine the fluid level using various types of level measuring instruments and identify suitable level gauges for various applications												Understanding (K2)
CO5	illustrate the construction and working of viscosity, density, Humidity and Moisture measuring instruments												Understanding (K2)

Mapping of COs with POs and PSOs

22EIL41 - MICROCONTROLLER AND INTERFACING LABORATORY

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
--------------------	--	------	----------	---	---	---	--------

Prerequisites	Nil	4	PC	0	0	2	1
Preamble	To incorporate practical exposure on programming and interfacing concepts in processor and controller and implement programming using Verilog HDL						
LIST OF EXPERIMENTS / EXERCISES:							
1.	Arithmetic operations using 8085 microprocessor						
2.	Code conversion using 8085 microprocessor						
Interfacing of Peripherals with 8051 microcontroller:							
3.	Interfacing of switches and relays						
4.	Interfacing of LED and Seven segment display						
5.	Interfacing of Keypad and LCD						
6.	Interfacing of ADC and DAC						
7.	Interfacing of DC motor						
8.	Interfacing of stepper motor						
9.	Design and Simulation of Combinational and Sequential Circuits using Verilog HDL						
10.	Design and Implementation of Digital circuits in FPGA using Verilog HDL						

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

1.	Laboratory Manual
2.	V- RIDE Software
3.	Xilinx Software

COURSE OUTCOMES:**On completion of the course, the students will be able to**

										BT Mapped (Highest Level)
CO1	build programs using embedded C									
CO2	design interfacing circuits with 8051 microcontroller									
CO3	develop Verilog HDL programming for digital circuits and implement in FPGA									

Mapping of Cos with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

22EIL42- INSTRUMENTATION DESIGN AND CONTROL SYSTEMS LABORATORY																																
Programme & Branch		B.E. & Electronics and Instrumentation Engineering				Sem.	Category	L	T	P	Credit																					
Prerequisites		Nil				4	PC	0	0	2	1																					
Preamble		To design signal conditioning circuits for various instrumentation systems and also to analyze the response of composite systems in time and frequency domain.																														
LIST OF EXPERIMENTS / EXERCISES:																																
1.	Design of instrumentation amplifiers																															
2.	Design of PWM generator circuits for V to F converter.																															
3.	Design of signal conditioning circuit for RTD and Thermistor																															
4.	Design of signal conditioning circuit for optical sensors																															
5.	Preparation of Piping and Instrumentation diagram , documentation of instrumentation project and project scheduling																															
6.	Derivations of Transfer function of DC motor.																															
7.	Time response analysis of first and second order systems.																															
8.	State space analysis of second order systems using MATLAB.																															
9.	Stability analysis in time and frequency domain using MATLAB.																															
10.	Effect of P, PI and PID controller on time response.																															
Total:30																																
REFERENCES/ MANUAL /SOFTWARE:																																
1.	Laboratory Manual																															
2.	MATLAB User Manual																															
COURSE OUTCOMES:																																
On completion of the course, the students will be able to																																
CO1	Develop signal conditioning circuits and prepare Piping and Instrumentation diagram for various process applications										Applying(K3), Precision S3)																					
CO2	derive the transfer function of the systems using the measured parameters										Applying(K3), Precision S3)																					
CO3	analyze the response and stability in time and frequency domain.										Analyzing(K4), Precision S3)																					
Mapping of Cos with POs and PSOs																																
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

Programme& Branch	BE & Electronics and Instrumentation Engineering					Sem.	Category	L	T	P	Credit											
Prerequisites	Industrial Instrumentation I					4/5	PC	0	0	2	1											
Preamble	To measure various industrial parameters such as flow, level, temperature, and infer the characteristics																					
LIST OF EXPERIMENTS / EXERCISES:																						
1.	Orifice and Electro Magnetic flow meters and comparison their characteristics																					
2.	Measurement of flow rate using Turbine Flow Meter and Ultrasonic flow meter comparison their characteristics																					
3.	a) Calibration of Pressure Gauges using Deadweight Tester b) Measurement of Vacuum Pressure using McLeod Gauge																					
4.	a) Measurement of torque and angle of the given cantilever beam b) Measurement of pH, Conductivity, Turbidity and TDS in different test samples																					
5.	a)Measurement of level in Linear Tanks using Ultrasonic level Transmitter b)Measurement of level in Non- Linear Tanks using Differential Pressure Transmitter																					
6.	a) Calibration of Safety Relief Valves and DPT with HART Communicator b) Measurement of Viscosity using Saybolt Viscometer																					
7.	Measurement of level and pressure in linear tank using optical sensor																					
8.	a) Control of kettle Temperature using Temperature switch b) Control of drum pressure using Pressure switch c) Control of flow process system using Flow switch																					
9.	Measurement of non-electrical parameters of a person																					
10.	Measurement of Bio-potential parameters of a person																					
Total:30																						
REFERENCES/ MANUAL /SOFTWARE:																						
1.	Industrial instrumentation Laboratory Manual																					
COURSE OUTCOMES: On completion of the course, the students will be able to																						
CO1	measure the various industrial process parameter using appropriate sensing meters										BT Mapped (Highest Level)											
CO2	calibrate the various industrial instruments										Applying (K3), Precision (S3)											
CO3	measure the electrical and non electrical human physiological parameters										Applying (K3), Precision (S3)											
Mapping of Cos with POs and PSOs																						
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22GCL41 - PROFESSIONAL SKILLS TRAINING - I														
(Common to All BE/ BTech Engineering and Technology branches)														
Programme & Branch	All BE/ BTech Engineering and Technology branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	4	EC	0	0	80	2							
Preamble	This subject is to enhance the employability skills and to develop career competency													
Unit – I	Soft Skills – I : Soft skills and its importance: Pleasure and pains of transition from an academic environment to work environment-Need for change- Fear, stress and competition in the professional world-Importance of positive attitude- Self motivation and continuous knowledge upgradation-Self-confidence. Professional grooming and practices: Basics of corporate culture-Key pillars of business etiquette- Basics of etiquette-Introductions and greetings-Rules of the handshake, earning respect, business manners-Telephone etiquette- Body Language.													
Unit – II	Quantitative Aptitude and Logical Reasoning – I: Problem solving level I: Number System-LCM &HCF-Divisibility test-Surds and indices-Logarithms- Ratio-proportions and variation-Partnership-Time speed and distance-Data interpretation-data representation. Logical reasoning: Family tree-Deductions-Logical connectives-Binary logic Linear arrangements- Circular and complex arrangement													
Unit – III	Written Communication & Verbal Aptitude Writing Skills: Writing strategies and formats Importance of Résumés Writing a Cover letter -Responding to Job Advertisements Professional e-mail Writing Responding to e-mails and business letters Technical Report writing Interpretation of Technical Data (Transcoding) Writing One-page Essays. Verbal Aptitude Synonyms Antonyms Homonyms One word substitution Idioms and Phrases Paired words Analogies Spelling test Cloze test using suitable verb forms using appropriate articles and prepositions; Spotting Errors Sentence Correction and Formation Grammar Based questions (Transformation : Active-Passive & Direct-Indirect); Rearranging Jumbled Sentences & Jumbled paragraphs, Identifying Facts, Inferences and Judgements statements

ESE	NA							100

* ±3% may be varied (CAT 1,2,3 - 50 marks)

22EIT51 - INDUSTRIAL INSTRUMENTATION II

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
-------------------------------	---	-------------	-----------------	----------	----------	----------	---------------

Prerequisites	Industrial Instrumentation I	5	PC	3	0	0	3
Preamble	To impart the knowledge of instruments used for the measurement of flow and level with their principles and also to provide the methods for the measurement of density, viscosity, humidity and moisture.						
Unit – I	Flow Measurement I:						9
Mechanical Flow Meters – Orifice Flow Meter – Venturi Tubes – Flow Nozzle – Dall Tube – Installation of Head Flow Meters – Pitot Tube – Differential Pressure Transmitters - Quantity Meters -Inferential Flow Meters.							
Unit – II	Flow Measurement II:						9
Mass Flow Meters – Electrical Flow Meters: Electromagnetic Flow meter –Ultrasonic Flow Meters. Other Types of Flow Meters: Vortex Shedding Flow Meter – Cross correlation flow meter. Solid flow Measurement – Flow Switches – Flow Meter Calibration – Flow Meter Selection.							
Unit – III	Level Measurement:						9
Float Type Level Measurement – Boiler Drum Level Measurement- Weight based Level Measurement – Air purge system – Electrical Methods: Resistance Tapes – Capacitance Probes – Radiometric Level Detection and Measurement –Ultrasonic Sensors – Level Switches.							
Unit – IV	Density and Viscosity:						9
Measurement of Density: Displacement and Float Type Densitometers – Hydrostatic Densitometer – Ultrasonic and sonic densitometers – Radiation densitometers – Thermal Conductivity Density Gauges. Measurement of Viscosity: Capillary Viscometers – Efflux Cup Viscometers – Float Viscometers.							
Unit – V	Humidity and Moisture:						9
Measurement of Humidity: Dry and Wet bulb Psychrometers - Hair Hygrometers – Dew point Hygrometers – Electrolytic Hygrometers. Measurement of Moisture in Gases and Liquids: Capacitance Hygrometer - Piezoelectric Hygrometer - Infrared Absorption Hygrometer – Measurement of Moisture in Solids.							
Total:45							
TEXT BOOK:

CO5	3	1						1					2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	50	30				100
CAT2	20	50	30				100
CAT3	20	50	30				100
ESE	20	50	30				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIT52 - PROCESS CONTROL

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Control Systems	5	PC	3	0	0	3
Preamble	This Course enhances the students to apply the concepts of process modeling with transfer function approach and empirical approach. The controller designs, tuning and final control elements with multi-loop control are discussed.						
Unit – I	Process Modeling and Characteristics:						
Need for automatic process Control - Process control terminology - Mathematical modeling of process: First order level, thermal and pressure process - Second order interacting and non-interacting systems: Liquid level process - Processes with inverse response: Boiler drum level control. Process Characteristics: Continuous and Batch process - Self regulation: CSTR with cooling jacket - Servo and Regulatory operations.							9
Unit – II	Empirical Modeling:						
Model development using Linear or non-linear regression: Model building procedure-Linear regression-Non-linear regression. Graphical fitting of first-order and second-order models using step tests: Graphical techniques for second- order models-Regression of Step Response data- Approximation of Higher-Order Systems.							9
Unit – III	Controller Characteristics and Tuning:						
Controller modes: Two position mode, Floating mode, proportional, integral and derivative modes, P+I, P+D, P+I+D modes- Electronic PID controller- Evaluation criteria-Controller Tuning: Process reaction curve method- Ziegler-Nichols method- Damped oscillation method-Frequency response method of tuning.							9
Unit – IV	Final Control Elements:						
Signal conversions: I/P converter - Actuators: Electric and Pneumatic type -Valve positioner – Characteristics of control valves - Valve bodies - Control valve sizing - Cavitations and Flashing - Selection of control valves.							9
Unit – V	Multi-loop Control:						
Feed Forward control - Cascade control - Ratio control - Selective control systems - Split-Range control - Inferential control - Introduction to multivariable control. Case studies: Boiler, Reactor, Distillation Column.							9
Total:45							
TEXT BOOK:

22EIT53 - DIGITAL SIGNAL PROCESSING

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit

Prerequisites	Nil	5	PC	3	1	0	4
Preamble	To impart the fundamental knowledge and applications of Digital Signal Processing.						
Unit – I	Continuous and Discrete Time Signals:						9+3
	Introduction-Classification- Analog to Digital conversion- Sampling – Aliasing - Signal representation: step, ramp, parabolic, sinusoidal and exponential-Periodical signals-Odd and Even signals-Energy and Power signals - Signal transformations-Trigonometric form of Fourier series of periodical signals in continuous and discrete domain.						
Unit – II	Continuous and Discrete Time Systems:						9+3
	Classification of systems: static and dynamic -time variant and invariant – linear and nonlinear - stable and unstable- causal and non causal-recursive and non recursive. Relation between Laplace and Z transform-Response analysis of linear systems with impulse and step input in continuous and discrete domain using Laplace and Z transform-Linear and Circular convolution						
Unit – III	Transforms:						9+3
	Fourier transform of aperiodical signals in continuous and discrete domain- Parseval's theorem-Discrete Time Fourier Transform-Discrete Fourier Transform –Fast Fourier Transform – Decimation in Time FFT algorithm – Decimation in Frequency FFT algorithm – IDFT using FFT.						
Unit – IV	FIR and IIR Filters:						9+3
	FIR Filter :Need, advantages and disadvantages of digital filters- Design of FIR filter (Low Pass Filter only) using windowing techniques (Rectangular, Hanning and Hamming) – Location of zeros of FIR filter - Linear phase realization of FIR filter IIR Filter : Design of analog IIR filter (Low Pass Filter only) –Mapping techniques from s domain to z domain : Impulse invariant, Bilinear Transformation --Design of digital IIR filter using Bilinear Transformation technique –Comparison of FIR and IIR filters- Direct form realization of IIR filter.						
Unit – V	Finite Word Length Effect and Digital Signal Processor:						9+3
	Finite Word Length Effect: Introduction-Digital representation of numbers-Binary number system-Fixed point number representation – Floating point number representation-Fixed point quantization errors-Overflow-Limit cycle oscillations-Coefficient quantization- Coefficient quantization of FIR filters. Digital Signal Processor: Architecture of Digital Signal Processor-Selection of Digital Signal Processor-Addressing modes-On Chip peripherals – TMS320C6748 DSP development kit - Integrated development environment.

3.	Salivahanan S. "Digital Signal Processing", 4 th Edition, Tata McGraw Hill , New Delhi, 2020.						

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	examine continuous and discrete time signals												Applying (K3)
CO2	examine continuous and discrete time systems												Applying (K3)
CO3	apply Fourier transform to determine the frequency response of LTI discrete system												Applying (K3)
CO4	design and realize FIR and IIR filters												Applying (K3)
CO5	examine the effect of word length and role of DSP Processor												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	1	1	1					2			1	3
CO2	3	2	1	1	1					2			1	3
CO3	3	2	1	1	1					2			1	3
CO4	3	2	1	1	1					2			1	3
CO5	3	2	1	1	1					2			1	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	5	20	75				100
CAT2	5	20	75				100
CAT3	5	20	75				100
ESE	5	15	80				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIT54- VLSI SYSTEMS

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit

Prerequisites	Digital Logic Circuits	5	PC	3	0	0	3
Preamble	To impart the knowledge on MOS transistor characteristics, fabrication, programming in Verilog Hardware Description Language and testing of ICs.						
Unit – I	MOS Transistor Theory:						9
MOS Transistor Theory: NMOS enhancement transistor – PMOS enhancement transistor – Threshold voltage – Body effect. MOS transistor switches. Basic D.C. equations – Second order effects: Threshold voltage – Body effect – Sub threshold region – Channel length modulation – Mobility variation – Fowler- Nordheim tunneling – Drain punch through – Hot electron effect.							
Unit – II	CMOS Logic and Circuit Design:						9
CMOS Logic: Inverter – Combinational logic – NAND gate – NOR gate – Compound gates – Multiplexers – Memory – Latches and registers. Complementary CMOS inverter - DC characteristics – β_n/β_p ratio, Noise margin. Switching characteristics: Fall time – Rise time – Delay time. Power dissipation for CMOS logic: Static dissipation – Dynamic dissipation – Short circuit dissipation. Layout design rules and Stick diagram for inverter, NAND and NOR.							
Unit – III	CMOS Fabrication Technology:						9
Basic CMOS technology: N-Well CMOS process – P-Well process – Twin tub process – Silicon on Insulator. Latchup: Physical origin of latchup – Latchup triggering – Latchup prevention – Internal latchup prevention techniques – I/O latchup prevention. FPGA: Programmable Logic – Programmable Logic structures – Programmable Interconnect – Xilinx Programmable Gate Arrays – Design flow.							
Unit – IV	Verilog HDL:						9
Typical design flow, Basic concepts: Lexical conventions – Data types, Modules and Ports, Gate level modeling, Dataflow modeling: Continuous assignment, Behavioral modeling: Structured procedure – Procedural assignments. Switch level modeling: MOS switches – CMOS switches – Bidirectional switches. Implementation of logic using Verilog HDL: Half Adder, Full Adder, Ripple Carry Adder, Multiplexer, D-Flip-Flop.							
Unit – V	CMOS Testing and Verification:						9
Introduction: Logic Verification, Debugging, Manufacturing Test- Manufacturing test principles: Fault Models , Observability, Controllability , Repeatability , Survivability , Fault Coverage Automatic Test Pattern Generation (ATPG). Design strategies for test: Built in Self Test (BIST).

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	examine the characteristics and the second order effects in designing MOSFET												Applying (K3)
CO2	discuss the CMOS logics and its characteristic for different logics												Applying (K3)
CO3	discuss the various fabrication techniques for chip development												Applying (K3)
CO4	develop programming for VLSI systems using Verilog Hardware Description Language												Applying (K3)
CO5	explain the testing process involved in chip design.												Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIT55 – INDUSTRIAL PROCESS CONTROL

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Control Systems	5	PC	3	1	0	4							
Preamble	This Course enhances the students to apply the concepts of process modeling with transfer function approach and empirical approach. The controller designs, tuning and final control elements with multi-loop control are discussed.													
Unit – I	Process Modeling and Characteristics:													
	Need for automatic process Control - Process control terminology - Mathematical modeling of process: First order level, thermal and pressure process - Second order interacting and non-interacting systems: Liquid level process - Processes with inverse response: Boiler drum level control. Process Characteristics: Continuous and Batch process - Self regulation: CSTR with cooling jacket - Servo and Regulatory operations.													
Unit – II	Empirical Modeling:													
	Model development using Linear or non-linear regression: Model building procedure-Linear regression-Non-linear regression. Graphical fitting of first-order and second-order models using step tests: Graphical techniques for second- order models-Regression of Step Response data- Approximation of Higher-Order Systems.													
Unit – III	Controller Characteristics and Tuning:													
	Controller modes: Two position mode, Floating mode, proportional, integral and derivative modes, P+I, P+D, P+I+D modes- Electronic PID controller- Evaluation criteria-Controller Tuning: Process reaction curve method- Ziegler-Nichols method- Damped oscillation method-Frequency response method of tuning.													
Unit – IV	Final Control Elements:													
	Signal conversions: I/P converter - Actuators: Electric and Pneumatic type -Valve positioner – Characteristics of control valves - Valve bodies - Control valve sizing - Cavitations and Flashing - Selection of control valves.													
Unit – V	Multi-loop Control:													
	Feed Forward control - Cascade control - Ratio control - Selective control systems - Split-Range control - Inferential control - Introduction to multivariable control. Case studies: Boiler, Reactor, Distillation Column.													
Lecture:45, Tutorial:15, Total:60														
TEXT BOOK:

3.	George Stephanopoulos, "Chemical Process Control - An Introduction to Theory and Practice", 2 nd Edition, Prentice Hall of India, New Delhi, 2016.													

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	develop mathematical modeling for various processes												Applying (K3)
CO2	determine the real time models using empirical modeling												Applying (K3)
CO3	determine the controller gains and tuning methods for various applications												Applying (K3)
CO4	explain the control valve accessories and its operational characteristics												Understanding (K2)
CO5	apply the concepts of multi-loop control to various applications												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIT56 – MICROPROCESSOR AND MICROCONTROLLER

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	C

Prerequisites	Digital Logic Circuits	5	PC	3	1	0	4
Preamble	To get acquaintance with the architecture of 8085 processor and 8051 microcontroller, apply the embedded programming concepts for interfacing peripherals with the controller and to implement the applications of microcontrollers.						
Unit – I	8085 Microprocessor:						9+3
	Introduction to 8085 Microprocessor-Architecture-Pin configuration-Interrupts–Instruction Set –Addressing Modes–Timing Diagrams–Memory Interfacing –Simple Assembly Language Programs for arithmetic operations.						
Unit – II	8051 Microcontroller:						9+3
	Introduction to 8051 Microcontroller- Architecture- Memory Organization- Special function registers – Program Counter – PSW register –Stack - Instruction set-Addressing modes.						
Unit – III	8051 Programming:						9+3
	I/O Ports – Timer (Mode 1) / Counter– Serial Communication - Interrupt (Timer, Serial communication) – Programming in Embedded C: I/O port programming- Timer programming-Counter programming-Serial port programming-Interrupt programming.						
Unit – IV	Peripheral Interfacing with 8051:						9+3
	Programming in Embedded C: Keypad- LCD – Sensors- A/D and D/A converters- DC Motor -Stepper motor – Servo motor.						
Unit – V	Applications of Microcontrollers(Block Diagram Approach):						9+3
	Smart Card reader, Automated Meter Reading System, Washing machine, Speedometer, Healthcare monitoring systems, 3D Printers, Smart Home automation system.						
Lecture:45, Tutorial:15,Total:60							
TEXT BOOK:							
1.	Senthil Kumar N., Saravanan M., Jeevananthan S., "Microprocessors and Microcontrollers", 2nd Edition, Oxford University Press, New Delhi, 2016.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1 apply assembly language program of 8085 microprocessor												Applying (K3)	
CO2 summarize the basic concepts of 8051 microcontroller												Understanding (K2)	
CO3 write embedded c programs for 8051												Applying (K3)	
CO4 interface peripheral devices with 8051 microcontroller												Applying (K3)	
CO5 interpret the applications of microcontroller												Understanding (K2)	

Mapping of COs with POs and PSOs

22EIL51 - INDUSTRIAL INSTRUMENTATION LABORATORY																						
Programme& Branch	BE & Electronics and Instrumentation Engineering					Sem.	Category	L	T	P	Credit											
Prerequisites	Industrial Instrumentation I					5/4	PC	0	0	2	1											
Preamble	To measure various industrial parameters such as flow, level, temperature, and infer the characteristics																					
LIST OF EXPERIMENTS / EXERCISES:																						
1.	Orifice and Electro Magnetic flow meters and comparison their characteristics																					
2.	Measurement of flow rate using Turbine Flow Meter and Ultrasonic flow meter comparison their characteristics																					
3.	a) Calibration of Pressure Gauges using Deadweight Tester b) Measurement of Vacuum Pressure using McLeod Gauge																					
4.	a) Measurement of torque and angle of the given cantilever beam b) Measurement of pH, Conductivity, Turbidity and TDS in different test samples																					
5.	a) Measurement of level in Linear Tanks using Ultrasonic level Transmitter b) Measurement of level in Non- Linear Tanks using Differential Pressure Transmitter																					
6.	a) Calibration of Safety Relief Valves and DPT with HART Communicator b) Measurement of Viscosity using Saybolt Viscometer																					
7.	Measurement of level and pressure in linear tank using optical sensor																					
8.	a) Control of kettle Temperature using Temperature switch b) Control of drum pressure using Pressure switch c) Control of flow process system using Flow switch																					
9.	Measurement of non-electrical parameters of a person																					
10.	Measurement of Bio-potential parameters of a person																					
Total:30																						
REFERENCES/ MANUAL /SOFTWARE:																						
1.	Industrial instrumentation Laboratory Manual																					
COURSE OUTCOMES: On completion of the course, the students will be able to																						
CO1	measure the various industrial process parameter using appropriate sensing meters										BT Mapped (Highest Level)											
CO2	calibrate the various industrial instruments										Applying (K3), Precision (S3)											
CO3	measure the electrical and non electrical human physiological parameters										Applying (K3), Precision (S3)											
Mapping of Cos with POs and PSOs																						
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11

22EIL52 - PROCESS CONTROL LABORATORY											
---	--	--	--	--	--	--	--	--	--	--	--

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	PC	0	0	2	1

Preamble	This laboratory gives a practical exposure to the students to analyze the characteristics of level, temperature, pressure and flow processes. Selected multi-loop control systems and characteristics of control valve are experimented.
-----------------	--

LIST OF EXPERIMENTS / EXERCISES:

1.	Empirical modeling of non-interacting and interacting second order system
2.	Closed loop analysis of flow process with servo and regulatory control
3.	Closed loop analysis of temperature process with servo and regulatory control
4.	Closed loop analysis of pressure process with servo and regulatory control
5.	Tuning of controller parameters for temperature process
6.	Response of ratio control for the pressure process
7.	Response of feed forward control of liquid level system
8.	Response of Cascade control of Continuous Stirred Tank Reactor
9.	Characteristics of control valves (Quick opening valve, Linear valve, Equal percentage valve)
10.	Empirical modeling of single conical tank system

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

1.	Laboratory Manual
----	-------------------

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)
CO1	analyze the response of different control schemes in process applications										
CO2	analyze the controller parameters for optimal control of temperature process										
CO3	demonstrate the characteristics of pneumatic control valve										

Mapping of Cos with POs and PSOs

22EIL53 - PROCESS CONTROL AND MACHINES LABORATORY														
Programme & Branch	BE & Electronics and Instrumentation Engineering								Sem.	Category	L	T	P	Credit
Prerequisites	Nil								5	PC	0	0	2	1

Preamble	This laboratory gives a practical exposure to the students to analyze the characteristics of level, temperature, pressure and flow processes. Selected multi-loop control systems and characteristics of control valve are experimented. Also it give practical exposure to learn the characteristics of AC and DC machines.
----------	--

LIST OF EXPERIMENTS / EXERCISES:

1.	Empirical modeling of non-interacting and interacting second order system
2.	Closed loop analysis of flow process with servo and regulatory control
3.	Tuning and closed loop analysis of temperature process with servo and regulatory control
4.	Response of ratio control for the pressure process and response of feed forward control of liquid level system
5.	Characteristics of control valves (Quick opening valve, Linear valve, Equal percentage valve)
6.	Load test on DC series motor
7.	Speed control of DC shunt motor
8.	Load test on squirrel cage induction motor
9.	Predetermination of efficiency and regulation on single phase transformer
10.	Load test on three phase alternator

Total:30**REFERENCES/ MANUAL /SOFTWARE:**

22GEL51 - PROFESSIONAL SKILLS TRAINING - II													
(Common to All BE/ BTech Engineering and Technology branches)													
Programme & Branch	All BE/ BTech Engineering and Technology branches							Sem.	Category	L	T	P	Credit
Prerequisites	Nil							5	EC	0	0	80	2
Preamble	This subject is to enhance the employability skills and to develop career competency												
Unit – I	Soft Skills – II :												20

Group discussions: Advantages of group discussions-Structured GD- Team work: Value of team work in organizations- Definition of a team, why team-Elements of leadership, disadvantages of a team, stages of team formation- Group development activities. Facing an interview: Foundation in core subject- industry orientation / knowledge about the company- professional personality- Communication skills-Activities before Interview, upon entering interview room, during the interview and at the end Mock interviews.

Unit – II	Quantitative Aptitude and Logical Reasoning – II:	30
Problem solving level II: Money related problems-Mixtures-Symbol base problem-Clocks and calendars-Simple-linear-quadratic and polynomial equations-Special, equations-Inequalities-Sequence and series-Set theory-Permutations and combinations-Probability-Statistics-Data sufficiency- Geometry-Trigonometry-Heights and distances-Co-ordinate geometry-Mensuration. Logical reasoning: Conditionality and grouping-Sequencing and scheduling- Selections-Networks:-Codes; Cubes-Venn diagram in logical reasoning- Quant based reasoning-Flaw detection- Puzzles-Cryptarithms.		

Unit – III	Reading & Speaking Skills	30
Reading: Reading comprehension– Effective Reading strategies – Descriptive, Inferential, & Argumentative reading passages – Identifying and locating factual information within a text – global reading/skimming for general understanding – selective comprehension / scanning for specific information – detailed comprehension / intensive reading – understanding the development of an argument – identifying the writer's attitude and opinions – Reading news articles in business magazines, newspapers – Reading notices and book reviews –Interpreting graphic data & Advertisements. Speaking: Mock Interviews –Self-Introduction – Sharing of Real Time Experience; Conversational Practices –Role Play – Short Talks / TED Talks –Extempore; Giving a Presentation on Various Topics – Technical / Non-Technical Topics – Project Review Presentation – Oratory and Effective Public Speaking; Pair Discussion – Group Discussion – The process of Group Discussion – Strategies to be adopted – Skills Assessed – Telephonic Conversations & Skills – Negotiating Skills.

**22EIT61 - INDUSTRIAL AUTOMATION USING PLC, SCADA AND DCS**

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Process Control	6	PC	3	0	0	3							
Preamble	Industrial automation is the use of control devices such as PLC/DCS/SCADA etc. to control industrial processes without manual intervention. This course discusses the logic and control systems with its hardware and software modules for implementing monitoring and control systems													
Unit – I	Programmable Logic Controllers (PLCs): Programmable Logic Controllers - Parts of a PLC - Principles of operation - PLC size and application – Discrete I/O modules – Analog I/O modules – Human Machine Interfaces(HMIs). Basics of PLC Programming: Program scan – PLC programming languages. Programming timers: On-Delay timer instruction – Off-Delay timer instruction – Retentive timer													
Unit – II	PLC Programming and Applications: Programming counters: Counter instructions – Up counter – Down counter – Cascading counters – Combining counter and timer functions - Program control instructions: Master control reset instruction – Jump instruction - Subroutine Functions. Data manipulation instructions: Data manipulation – Data compare instructions. Sequencer Instructions. Process control and Data Acquisition systems: Closed loop container filling process - ON/OFF liquid heating system- PLC control of a PID loop.													
Unit – III	Distributed Control Systems: Evolution of Distributed Control Systems: Emergence of the Distributed Control System architecture. Local control unit architecture: Basic elements of a microprocessor based controller – Functional blocks: An introduction. Security design issues for the local control unit: Redundant controller designs.													
Unit – IV	DCS Operator Interfaces and Applications: Operator interfaces: Introduction – Low level operator interface – High level operator interface: Architectural alternatives, Hardware elements in the operator interface, Operator displays. DCS applications: Power Plants- Cement plants – Pulp and Paper plants													
Unit – V	SCADA: Introduction – Elements of a SCADA System - Architecture – Real-time system – Remote terminal unit (RTUs) – Master terminal units (MTUs). Applications: SCADA Monitoring and Control for Gas Lift System – Stamping System – Nonlinear Level control system

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIT62 - INDUSTRY 4.0 WITH INDUSTRIAL IoT														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	6	PC	3	0	0	3							
Preamble	To transform the industrial processes through the integration of modern technologies such as sensors, communication, and computational processing													
Unit – I	Introduction to Industrial IoT and Industry 4.0:													
Introduction - IoT Background and History, IIoT key technologies, IoT and IIoT similarities and differences – Innovations and the IIoT – Intelligent devices – Key opportunities and benefits: Digital and human workforce – Industrial Internet use-cases - Industry 4.0: Characteristics and design principles.														
Unit – II	IIoT Architectures:													
IIoT Reference Architecture – Industrial Internet Architecture Framework – Five Functional domains – Three tier architecture topology – Connectivity: Key system characteristics, Connectivity security and functional characteristics – Functions of communication layer – Overview of Predictive Maintenance Architecture.														
Unit – III	IIoT WAN Technologies and Protocols:													
Need of Protocols – Legacy Industrial protocols – Modern Communication protocols: Industrial Ethernet, Encapsulated Field Bus, Standard Ethernet. IIoT device Low-Power WAN optimized technologies for M2M: SigFox, LoRaWAN, nWave, Dash7, Ingenu RPMA, Low Power Wi-Fi, LTE Category-M, Weightless, Millimeter Radio.														
Unit – IV	Industrial IoT Security and Governance:													
Introduction – Security threats and vulnerabilities of IoT – Industrial challenges – Evolution of Cyber attacks: cyber attacks and solutions – Strategic principles of cyber security – cyber security measures - Industrial IoT security architecture: IIoT architecture patterns – four Tier IIoT security model- Management risks with IIoT.														
Unit – V	Industrial IoT Analytics and Applications:													
Software Defined Networks: Difference between SDN and NFV – Cloud and Fog - Big Data and Analytics in IIoT. Recent Technological components of Robots: Industrial Robotic applications – Industrial application of AR: Maintenance, assembly, operation and training.														
Total:45														
TEXT BOOK:

2.	DimitriosSerpanos and Marilyn Wolf, "Internet-of-Things (IoT) Systems, Architectures, Algorithms, Methodologies", Springer International Publishing AG, Switzerland, 2018.													

COURSE OUTCOMES:												BT Mapped (Highest Level)		
On completion of the course, the students will be able to														
CO1	explore the basics of industrial internet of things												Understanding (K2)	
CO2	develop the concepts of various architectures and components												Applying (K3)	
CO3	design and implement protocols and sensors for IIoT												Applying (K3)	
CO4	impart the knowledge of IIoT security layers												Understanding (K2)	
CO5	apply IIoT in real time Industrial applications												Applying (K3)	
Mapping of COs with POs and PSOs

22EIL61 - PLC AND DCS LABORATORY																						
Programme & Branch	B.E. & Electronics and Instrumentation Engineering					Sem.	Category	L	T	P	Credit											
Prerequisites	Industrial Automation using PLC and DCS					6	PC	0	0	2	1											
Preamble	The PLC and DCS laboratory is a crucial component, where students are trained in the design, implementation, and maintenance of industrial control systems using Programmable Logic Controllers (PLCs) and Distributed Control Systems (DCS). Through hands-on experience, students will learn to program, simulate and troubleshoot these systems, preparing them for careers in the automation and control industry.																					
LIST OF EXPERIMENTS / EXERCISES:																						
1.	Implementation of a simple on/off control of a traffic light system using PLC.																					
2.	Control of speed and direction of a motor using PLC and SCADA																					
3.	Counting and sorting objects on a conveyor belt using PLC and HMI																					
4.	Control of the timing of a filling process operation using PLC.																					
5.	Implementation of a sequential control of a process using PLC.																					
6.	Implementation of pressure and flow control system using DCS.																					
7.	Implementation of an alarm and notification system for a process using DCS.																					
8.	Implementation of a cascade control level system using DCS.																					
9.	Implementation of Packaging Line Control using Factory I/O software																					
10.	Development of simple logic circuits with digital inputs and outputs using Phoenix Contact PLC.																					
Total:30																						
REFERENCES/ MANUAL /SOFTWARE:																						
1.	Laboratory Manual																					
2.	Next-Gen PLC Training - Factory I/O (factoryio.com)																					
3.	PLCnext Technology PHOENIX CONT https://www.phoenixcontact.com/en-pc/industries/plcnext-technology ACT																					
COURSE OUTCOMES: On completion of the course, the students will be able to										BT Mapped (Highest Level)												
CO1	develop Industrial automation applications using PLC									Applying (K3) Precision (S3)												
CO2	develop Industrial automation applications using DCS									Applying (K3) Precision (S3)												
CO3	develop advanced industrial automation application using factory I/O and Phoenix Contact									Applying (K3) Precision (S3)												
Mapping of Cos with POs and PSOs

CO1	3	3	2	3	2	2		1	2	3		1	3	3								
CO2	3	3	2	3	2	2		1	2	3		1	3	3								
CO3	3	3	2	3	2	2		1	2	3		1	3	3								

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

22EIL62 - VIRTUAL INSTRUMENTATION AND INDUSTRIAL IoT LABORATORY																						
Programme & Branch	B.E. & Electronics and Instrumentation Engineering					Sem.	Category	L	T	P	Credit											
Prerequisites	Nil					6	PC	0	0	2	1											
Preamble	To impart the practical knowledge on LabVIEW programming and industrial Internet of Things concept.																					
LIST OF EXPERIMENTS / EXERCISES:																						
1.	Programming with basic functions																					
2.	Programming with FOR Loop, While Loop, Local and Global variables																					
3.	Programming with Array, Cluster and Structures																					
4.	Data acquisition and analysis using DAQ.																					
5.	Data acquisition and analysis using NI-ELVIS.																					
6.	Monitoring data from Wireless Temperature Transmitter using LoRA and IoT 2040																					
7.	Monitoring and Controlling of PLC from cloud platform through IoT 2040																					
8.	Interfacing and transfer of data from LoRa nodes to LoRa Gateway																					
9.	Interfacing Factory I/O and PLCnext with LoRa Gateway using MQTT																					
10.	Emergency Start / Stop of Industrial Machines using LoRa IoT sensors																					
Total:30																						
REFERENCES/ MANUAL /SOFTWARE:																						
1.	LabVIEW Software user Manual.																					
2.	Siemens S7 1200 PLC and IoT 2040 User Manual																					
3.	PLCnext User Manual																					
COURSE OUTCOMES: On completion of the course, the students will be able to										BT Mapped (Highest Level)												
CO1	create LabVIEW programs for real time applications									Applying (K3)												
CO2	develop Industrial automation applications using PLC and IoT gateway									Applying (K3)												
CO3	develop advanced industrial automation application using factory I/O and Phoenix PLCnext									Applying (K3)												
Mapping of Cos with POs and PSOs

22EIP61 - PROJECT WORK I								
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit	
Prerequisites	Nil	6	EC	0	0	8	4	

COURSE OUTCOMES:		BT Mapped (Highest Level)												
On completion of the course, the students will be able to														
CO1	formulate a problem with proper objectives to meet the need of the Society and Industry after detailed literature review	Creating (K6) Characterization (A5) Articulation (S4)												
CO2	design the Model considering all mathematical calculations meeting required standards prescribe by professional bodies	Creating (K6) Characterization (A5) Articulation (S4)												
CO3	select proper instruments for the designed model and develop the model with proper project and finance management and demonstrate the proper working of the model	Evaluating (K5) Characterization (A5) Articulation (S4)												
CO4	articulate the project report and presentations with neat presentation incorporating all parameters	Evaluating (K5) Characterization (A5) Articulation (S4)												
CO5	contribute individually and in team for the development and final working of the project	Evaluating (K5) Characterization (A5) Articulation (S4)												
Mapping of COs with POs and PSOs

22GET31- UNIVERSAL HUMAN VALUES (Common to All Engineering and Technology Branches)														
Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	3/6	HS	2	0	0	2							
Preamble	To make the student to know what they 'really want to be' in their life and profession, understand the meaning of happiness and prosperity for a human being. Also to facilitate the students to understanding of harmony at all the levels of human living, and live accordingly													
Unit – I	Introduction: Need and Basic Guidelines of Value Education – Content and Process of Value Education – Self Exploration – purpose of self-Exploration – Content and Process of Self exploration – Natural Acceptance – Realization and Understanding – Basic Human Aspirations – Continuous Happiness and Prosperity – Exploring Happiness and Prosperity – Basic Requirement for Fulfillment of Human Aspirations – Relationships – Physical Facilities – Right Understanding.													
Unit – II	Harmony in the Self and Body: Human Being and Body – Understanding Myself as Co-existence of Self ('I') and Body, Needs of the Self and Body, Activities in the Self and Body, Self ('I') as the Conscious Entity, the Body as the Material Entity – Exercise – Body as an Instrument– Harmony in the Self ('I') – Understanding Myself – Harmony with Body.													
Unit – III	Harmony in the Family and Society: Harmony in the Family – Justice – Feelings (Values) in Human Relationships – Relationship from Family to Society – Identification of Human Goal – Five dimensions of Human Endeavour.													
Unit – IV	Harmony in Nature and Existence: Order of Nature – Interconnectedness – Understanding the Four order – Innateness – Natural Characteristic – Basic Activity – Conformance – Introduction to Space – Co-existence of units of Space – Limited and unlimited – Active and No-activity – Existence is Co-existence.													
Unit – V	Implications of the above Holistic Understanding of Harmony on Professional Ethics: Values in different dimensions of Human Living – Definitiveness of Ethical Human Conduct –Implications of Value based Living – Identification of Comprehensive Human Goal – Humanistic Education – Universal Human Order – Competence and Issues in Professional Ethics.													
Total:30														
TEXT BOOK:														
1.	Gaur R.R., Sangal R., Bagaria G.P., "A Foundation Course in Human Values and Professional Ethics", 1st Edition, Excell Books Pvt. Ltd., New Delhi, 2016.

2.	Schumacher E.F., "Small is Beautiful: a study of economics as if people mattered", Britain, 1973.													

COURSE OUTCOMES: On completion of the course, the students will be able to											BT Mapped (Highest Level)	
CO1	restate the meaning of happiness and prosperity and do a correct appraisal of the current scenario in the society											Applying (K3)
CO2	distinguish between the Self and the Body, understand the meaning of Harmony in the Self, the Co-existence of Self and Body											Applying (K3)
CO3	infer the value of harmonious relationship based on trust, respect and other naturally acceptable feelings in human-human relationships and explore their role in ensuring a harmonious society											Applying (K3)
CO4	transform themselves to co-exist with nature by realising interconnectedness and four order of nature											Applying (K3)
CO5	distinguish between ethical and unethical practices, and extend ethical and moral practices for a better living											Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO5	3	2	1	1										

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	25	75					100
CAT2	25	75					100
ESE	NA						100

* ±3% may be varied (CAT 1 & 2 – 50 marks & ESE – 100 marks)

22GCT71 - ENGINEERING ECONOMICS AND MANAGEMENT											
(Common to All BE/BTech branches)											
Programme & Branch	All BE/BTech branches					Sem.	Category	L	T	P	Credit

Prerequisites	Nil	7	HS	3	0	0	3
Preamble	The aim of the course is to create fundamental knowledge on management by introducing concepts like economics, national income, marketing, operations management, accounting principles etc.						
Unit – I	Micro Economics						9
Economics – Basics Concepts and Principles – Demand and Supply – Law of demand and Supply – Determinants – Market Equilibrium – Circular Flow of Economic Activities and Income.							
Unit – II	Macro Economics, Business Ownership and Management concepts						9
National Income and its Measurement Techniques. Inflation - Causes of Inflation – Controlling Inflation – Business Cycle - Forms of Business – Ownership Types. Management concepts: Taylor and Fayol's Principles – Functions of Management - Managerial Skills - Levels of Management - Roles of Manager.							
Unit – III	Marketing Management						9
Marketing - Core Concepts of Marketing - Four P's of Marketing - New Product Development – Intellectual Property Rights (IPR), Product Life Cycle - Pricing Strategies and Decisions.							
Unit – IV	Operations Management						9
Operations Management - Resources - Types of Production System - Site Selection, Plant Layout, Steps in Production Planning and Control - Inventory - EOQ Determination.							
Unit – V	Financial Management						9
Accounting Principles – Financial Statements and its Uses – Depreciation - Straight Line and Diminishing Balance Method – Break Even Analysis – Capital Budgeting - Significance –Traditional and Discounted Cash Flow Methods.							
Total:45							
TEXT BOOK:							
1.	Compiled by Department of Management Studies, Kongu Engineering College, "Economics and Management for Engineers", 1 st Edition, McGraw Hill Education, Noida, 2013.						
REFERENCES:

3.	William G. Nickels, James M. McHugh, Susan M. McHugh, "Understanding Business", 12 th Edition, McGraw-Hill Education, New York, 2019.						

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	identify market equilibrium and interpret national income calculations and inflation issues												Applying (K3)
CO2	choose a suitable business ownership for their enterprise and illustrate managerial functions												Applying (K3)
CO3	infer marketing management decisions												Understanding (K2)
CO4	apply appropriate operation management concept in business situations												Applying (K3)
CO5	interpret financial and accounting statements and evaluate new proposals												Applying (K3)

Mapping of COs with POs and PSOs

22EIT71 - DIGITAL SIGNAL PROCESSING AND ITS APPLICATIONS														
Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PC	3	0	0	3							
Preamble	To impart the fundamental knowledge and applications of Digital Signal Processing.													
Unit – I	Discrete Time Signals and Systems: Motivation – Sampling and Quantization of signal – Discrete time (DT) sequences and its representation: Singularity functions, Exponential and Sine – Operations on DT sequence: Shifting, Scaling and Folding – LTI system and Its Properties: Linearity, Causality, and Stability – Linear and circular convolution - Correlation.													
Unit – II	Fourier transform: Discrete Time Fourier Transform – Discrete Fourier Transform – Relationship between DTFT and DFT – Fast Fourier Transform and Its Significance – Decimation in Time FFT algorithm – Decimation in Frequency FFT algorithm – IDFT using FFT – Parseval's theorem.													
Unit – III	FIR Filters: Introduction - Need, advantages and disadvantages of digital filters – Theoretical Design of FIR filter: FIR filter design using windowing techniques (Rectangular, Bartlett, Hanning and Hamming) – Frequency Sampling Method of FIR filter design – Design of FIR filter using Rabiner Method – Linear Phase Characteristics – Stabilities.													
Unit – IV	IIR Filters: IIR Filter: Design of analog IIR filter – Mapping techniques from s domain to z domain: Impulse invariant, Bilinear Transformation – Theoretical Design of IIR filter: Butterworth Filter Design of digital IIR filter – Chebyshev Filter Design of Digital IIR filter– Frequency Transformation – Comparison of FIR and IIR filters – Stabilities.													
Unit – V	Digital Signal Processor: Digital Signal Processor: Architecture of Digital Signal Processor – Selection of Digital Signal Processor – Addressing modes – On Chip peripherals – TMS320C6748 DSP development kit – Integrated development environment.													
Total:45

22EIE01 - BIOMEDICAL INSTRUMENTATION																
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Nil	5	PE	3	0	0	3									
Preamble	To impart the knowledge of some human anatomy and measuring bio potentials using bio electrodes with specific instruments which is most commonly used in hospitals. Also understand the fundamental concept of various biomedical imaging techniques and learn the advanced physiological assistive medical devices.															
Unit – I	Human Physiological Systems: Cell and its structure-Resting and action potentials - Skeletal system - Circulatory system – Respiratory System - Components of the Bio medical instrumentation system. Bio Potential Electrodes: Micro electrode - depth and needle electrode - surface electrodes.															
Unit – II	Biomedical Electrical Signal Measurement: ECG – Einthoven's triangle – 3 lead ECG system, EEG - 10- 20 electrode system, EMG, ERG and EOG: Origin and characteristics - Lead systems, recording methods and typical waveforms.															
Unit – III	Biomedical Non-Electrical Signal Measurement: Digital stethoscope - Phonocardiography (PCG) - Blood pressure Measurement: Sphygmomanometer, MEMS based catheter tip pressure sensor, ultrasonic blood pressure monitor – Spirometer – Capnography - Blood pH measurement - Measurement of blood pCO2 - Blood pO2 measurement - Pulse oximeter - Lung volumes, respiration.															
Unit – IV	Biomedical Imaging Systems: X-ray machine - Computer tomography - Ultrasonic imaging systems - Magnetic resonance imaging - PET - SPECT -FMRI – Magnetic Particle Imaging.															
Unit – V	Physiological Assist Devices: Ventricular asynchronous pacemaker - AC Defibrillator- Heart lung machine - Kidney machine - Audiometer – Biothesiometry Vibroscreen - Ophthalmoscope –Biotelemetry – Telemedicine.

3.	Arumugam. M, "Bio-Medical Instrumentation", 2 nd Edition, Anuradha Agencies, Kumbakonam, 2014.															

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	interpret the basic principles and phenomena of Biomedical Engineering													Understanding (K2)
CO2	record the bioelectric potentials using bio potential electrode through bio signal recording devices													Applying (K3)
CO3	measure biomedical signal parameters through medical instruments													Applying (K3)
CO4	summarize the basic principles in medical imaging techniques													Understanding (K2)
CO5	illustrate the physiological assist devices													Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	40	40				100
CAT2	10	40	50				100
CAT3	10	40	50				100
ESE	10	40	50				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIE02 - INSTRUMENTATION SYSTEM DESIGN														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Industrial instrumentation	5	PE	3	0	0	3							
Preamble	To design controllers and signal conditioning circuits for instrumentation systems.													
Unit - I	Design of Analog Signal Conditioning: Analog Signal Conditioning: Analog Data Representation - Principles Of Analog Signal Conditioning-divider circuits- Guidelines for Analog Signal Conditioning Design - Analog Signal Conditioning Design for various industrial parameters.													
Unit - II	Design Digital Signal Conditioning: Digital Signal Conditioning : Introduction – Converters: Comparator, Digital to Analog Converters, Analog to Digital Converters - Data-Acquisition Systems: Different types of DAS													
Unit - III	Design Of Final Control Elements: Introduction - Final Control Operation - Signal Conversions: Analog Electrical Signals, Digital Electrical Signals–Design Actuators: Electrical Actuators -Control Elements: Electrical, Fluid Valves.													
Unit - IV	Design Of Analog Controllers: Introduction – continuous controller modes -General Features of analog controller –Design of Electronic Controllers: Error Detector, Single Mode, and Composite Mode.													
Unit - V	Computer-Based Control: Introduction - Digital Applications: Alarms, Two-Position Control - Computer-Based Controller: Hardware Configurations, - Other Computer Applications: Data Logging, Supervisory Control - Control System Networks: Development, General Characteristics,

3.	Daniel H Sheingold, "Transducer Interfacing Handbook", 1 st Edition, Analog devices Inc, America, 1980.													

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	narrate the role of signal conditioning circuits in instrumentation	Understanding (K2)
CO2	develop signal transmitter circuits for various process parameter	Applying (K3)
CO3	design final control elements and actuators	Applying (K3)
CO4	design controllers for various applications	Applying (K3)
CO5	describe the role of computer based control systems	Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	5	25	70				100
CAT2	5	25	70				100
CAT3	5	25	70				100
ESE	5	25	70				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIE03 - SOFT COMPUTING TECHNIQUES							
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	PE	3	0	0	3
Preamble	Emphasis of this course will be on Artificial Neural Networks, Fuzzy Logic, Meta-heuristic techniques like Genetic Algorithms and Neuro fuzzy Systems and their applications to different computational problems.						
Unit – I	Introduction to Optimization Techniques:						
Introduction – Hard Computing – Soft computing – Hybrid Computing. Optimization and Some Traditional Methods: Introduction to Optimization – Traditional methods of Optimization. Overview of Non-Traditional Optimization methods: Simulated Annealing – Particle Swarm optimization.							9
Unit – II	Fundamentals of Neural Networks :						
Evolution of Neural Networks – Basic models of Artificial Neural Network- Important Terminologies of ANNs - Linear Separability-Perceptron Networks – Adaptive Linear Neuron – Supervised Learning Network: Back Propagation Network - Radial Basis Function network.							
Unit – III	Unsupervised Learning Networks and Fuzzy Logic Systems:						
Unsupervised Learning Networks: Associative Memory Network: Hopfield Networks – Discrete Hopfield Network. Unsupervised Learning Networks: Kohonen Self Organizing Map.							
Fuzzy Logic Systems: Introduction to fuzzy logic –Classical sets (Crisp sets) - Fuzzy sets. Classical Relation and Fuzzy Relation: Introduction –Membership functions: Introduction – Features of the Membership Functions.							
Unit – IV	Fuzzy Inference Systems:						
Fuzzification – Methods of Membership Value Assignments. Defuzzification: Introduction - Lambda-Cuts for fuzzy sets and fuzzy relations, Defuzzification methods. Fuzzy Rule Base and Approximate Reasoning: Aggregation of Fuzzy Rules – Fuzzy Reasoning – Fuzzy Inference systems (FIS): – Methods of FIS.							
Unit – V	Neuro-Fuzzy System and Genetic Algorithm:						
Neuro-Fuzzy System: Characteristics of Neuro–Fuzzy Hybrids – Adaptive Neuro - Fuzzy Inference System (ANFIS). Genetic Algorithm: Introduction – Biological Background – Traditional Optimization and Search Techniques - Basic Terminologies in GA – Operators in GA – Problem solving using Genetic Algorithm: Maximizing a Function.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	explain the fundamentals and the concepts of optimization techniques	Understanding(K2)
CO2	develop the various neural network algorithms for classification and function approximation and clustering	Applying(K3)
CO3	explain the fundamental concepts of fuzzy logic systems	Understanding(K2)
CO4	design the controller using Fuzzy Inference System	Applying (K3)
CO5	apply Genetic Algorithm and Neuro-Fuzzy concepts for specific applications	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	40	40				100
CAT2	20	30	50				100
CAT3	10	40	40				100
ESE	20	30	50				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIE04 – ANALYTICAL INSTRUMENTATION														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Transducers Engineering	5	PE	3	0	0	3							
Preamble	Analytical Instrumentation provides qualitative and quantitative techniques for analysis in chemical, pharmaceutical, clinical, oil refineries and in pollution monitoring and control. The conventional and modern analytical techniques along with their principle, instrumentation and applications are included in the course.													
Unit – I	Colorimeters and Spectrophotometers:													
The Electromagnetic Spectrum–Laws relating to absorption of radiation–Ultraviolet and Visible Absorption Spectroscopy–Spectrophotometers: IR spectroscopy: Basic components of IR Spectrophotometers – Types of IR Spectrophotometers– FTIR spectrophotometers – Flame Photometers: Principle of Flame Photometers and Construction Details of Flame Photometers –Atomic Absorption Spectroscopy.														
Unit – II	Chromatography and pH Measurement:													
Basic definitions – Gas chromatography – Liquid chromatography –Types of Liquid Chromatography – High Pressure Liquid Chromatography (HPLC). pH Meters: Principle of pH Measurement – Electrodes for pH measurement: Hydrogen electrodes – Glass electrodes – Reference electrodes – Combination electrode – Selective-ION Electrodes – Ammonia Electrode –Fluoride Electrode.														
Unit – III	Industrial Gas Analyzers:													
Types of gas analyzers – Paramagnetic oxygen analyzer –Electrochemical Methods- Infrared gas analyzers – Thermal conductivity analyzers – Analyzers based on Gas density —Method based on Ionization of gases.														
Unit – IV	Radio Chemical Techniques:													
Fundamentals of radiochemical methods – Radiation detectors: Ionization chamber – Geiger-Muller counter – Proportional counter – Scintillation counter – Semiconductor detectors – X-ray spectrophotometer – Mass Spectrometers: Basic Mass Spectrometer- Principle of Operation – Types of Mass Spectrometers: Magnetic deflection mass spectrometer and the Time-of-flight mass spectrometer. NMR Spectrometer: Principle and construction details.														
Unit – V	Applications of Analytical Instrumentation:													
Scanning Electron Microscope, Scanning Probe Microscopes and Particle size analyzers. Air Pollution Monitoring Instruments: CO analyzer, SO ₂ analyzer, Ozone analyzer. Water Pollution Monitoring Instruments: Dissolved oxygen, oxidation-reduction potential, Turbidity meter.														
Total:45														
TEXT BOOK:

3.	Bela G. Liptak, "Analytical Instrumentation", 2 nd Edition, New York: McGraw-Hill Book Co., 2018.													

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	summarize on analytical instruments which utilize electromagnetic spectrum as source	Understanding (K2)
CO2	explain the chromatographic methods and electrodes used in pH measurement	Understanding (K2)
CO3	make use of analyzers for measuring industrial gases and liquids	Applying (K3)
CO4	interpret the sample data with radiochemical techniques	Understanding (K2)
CO5	apply analytical techniques for industrial requirements	Applying (K3)

Mapping of COs with Pos and PSOs

COs/Pos	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1											2	2
CO2	3	1											2	2
CO3	3	2	1	1	1								3	3
CO4	3	1											2	2
CO5	3	2	1	1	1								3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN – THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	30	70					100
CAT2	10	50	40				100
CAT3	10	50	40				100
ESE	20	50	30				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIE05 - INDUSTRIAL ELECTRONICS AND DRIVES														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	5	PE	3	0	0	3							
Preamble	To impart the knowledge on Power semiconductor devices and their characteristics, Controlled rectifiers, Choppers, DC drives, Variable Frequency Drives and to understand the specific applications of different drives.													
Unit – I	Introduction to Power semiconductor devices													
Classification of power semiconductors – Control characteristics of power devices – Types of power electronic circuits – Elements in the design of power electronics equipment – Thyristor: Operating principle – Behaviour under biased condition – Gate triggering – Commutation methods.														
Unit – II	Controlled rectifiers													
Principle of phase controlled converter operation– Single phase half controlled rectifier - Single phase full converter – - Single phase half controlled Bridge converter - Three phase fully controlled Bridge Rectifiers – Three phase dual converters – Three phase semi converters – Inverting mode of a converter - Effect of source and load inductances.														
Unit – III	Choppers and Inverters													
Principle of DC chopper - Step up and Step down Choppers – Classification of choppers - Quadrants of operation – Switching mode Regulators - Buck, Boost and Buck-Boost Regulators. Introduction to Inverters: Principle of Operation- Single phase bridge inverters.														
Unit – IV	DC Drives and AC Drives													
Basic characteristics of DC motors – Operating modes – Single phase semi converter and dual converter drives- Three phase half wave and full converter drives – Control modes - Power control, Regenerative brake control, Rheostatic brake control, Combined regenerative and rheostatic brake control. Introduction to AC drives: Introduction to Variable Frequency Drives.														
Unit – V	Drives for specific applications													
Drive considerations for textile mills – Steel rolling mills – Cranes and Hoist Drives – Cement mills – Sugar mills- Paper mills.														
Total:45

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	interpret the power electronic devices for industrial drives	Understanding(K2)
CO2	describe the various controlled devices	Understanding(K2)
CO3	interpret the different types of choppers, inverters and their working	Understanding(K2)
CO4	develop the operating and control modes of DC drives and learn about variable frequency AC drives	Applying (K3)
CO5	select suitable DC drives and simple AC drives for industrial applications	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	15	85					100
CAT2	15	85					100
CAT3	10	45	45				100
ESE	5	70	25				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIE06 - ADVANCED CONTROL TECHNIQUES																
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Control Systems	5	PE	3	0	0	3									
Preamble	To understand and analyse the performance of linear and nonlinear system in state space domain with and without controllers.															
Unit – I	State Space Analysis in Continuous domain:															
Review of state variable representation and state variable models in continuous systems. Conversion from transfer function to various state space model – Conversion of state space to transfer function-Non-uniqueness of state model – Eigen values and eigen vectors – State transition matrix and its properties. Solutions of state equations — Free and forced responses.																
Unit – II	State Feedback Controllers and Observers:															
Controllability and observability – Relation between transfer function and state model – Effect of sampling time on controllability and observability - State feedback controllers. State estimators: Full and reduced order observer. Steady state error in state model-PI feedback controller- Deadbeat Observers- Dead beat Control.																
Unit – III	Phase Plane Analysis:															
Behaviour of non-linear systems, jump resonance, sub-harmonic oscillation- Singular points Phase plane analysis: Linear and nonlinear systems – Construction of phase portraits using isoclines- Limit cycle analysis.																
Unit – IV	Describing function Analysis:															
Typical non-linearities Describing Function of nonlinearities –Review of Nyquist criterion for linear system –Nyquist stability criteria for nonlinear system-Limit cycle oscillations- Accuracy of Describing Function method.																
Unit – V	Lyapunov Stability Analysis:															
Stability in the sense of Lyapunov – Second method of Lyapunov – Lyapunov stability analysis of linear time invariant systems and non linear system- Krasovski's theorem- Variable gradient method of generating Lyapunov functions. Lyapunov analysis for non autonomous systems.																
Total:45																
TEXT BOOK:																
1.	Gopal M. "Digital Control and State Variable Methods", 4 th Edition, Tata McGraw-Hill, New Delhi, 2008 for Unit-1, 2 & 3

3.	Richard C.Dorf& Robert H.Bishop, "Modern Control Systems"12 th Edition, Pearson Publication, New Jersey, 2013.															

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	analyse the time domain functional tics of continuos systems in state space domain	Analyse(K4)
CO2	Design state feedback controllers and observers	Applying (K3)
CO3	Apply the concepts in the design of state feedback controllers and observers	Analyse(K4)
CO4	Analyse the function of nonlinear systems using describing function method	Analyse(K4)
CO5	Analyse the stability of linear and nonlinear systems using Lyapunov stability method	Analyse(K4)

Mapping of COs with Pos and PSOs

COs/Pos	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIE07 - SCADA AND ITS APPLICATIONS																
Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Process Control	6	PE	3	0	0		3								
Preamble	To develop and implement the SCADA in Industrial Automation															
Unit - I	Introduction to SCADA and Architectures:															
Inductive Automation by Ignition SCADA: Introduction - Basic Architecture - Scale Out Architecture - Hub and Spoke Architecture - Edge Architectures - IIoT Architecture - Redundancy Architecture - Cloud Based Architecture - AWS Outposts Architecture - Security Architecture																
Unit - II	Modules in SCADA:															
Core Modules: Vision Module - Perspective Module – OPC/UA Module: Driver Module – Allen-Bradley Ethernet – Modbus – TCP IP – Siemens – Connecting and configuration to S7 1200 devices – Tag Historian Module – Web Dev module																
Unit - III	Ignition Platform:															
Gateway – Home - status – configuration – Gateway backup and restore – Ignition exchange – Database connections: Installing database – connecting to database MySQL																
Unit - IV	SCADA Security and Tags:															
Gateway general security settings – classic authentication security – Identity provider authentication security – service security. Tags: Tag browser – Types – user defined tags – Alarm – configuring and scheduling.																
Unit - V	Applications:															
Traffic light controls – Lift / Elevator Controls – Water and Sewage Treatment Plants – Building Automation management – Mass Transit and Railway Application – Manufacturing sorting Systems																
Total:45																
TEXT BOOK:																
1.	Ignition 8.1 User Manual – Inductive Automation

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE08 VIRTUAL INSTRUMENTATION														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	6	PE	3	0	0	3							
Preamble	Virtual instrumentation is a powerful concept for control, measuring, testing and analysis of real time problems. This course aims at giving an adequate exposure and practice in LabVIEW programming and DAQ system to overcome the limitations of classical methods.													
Unit – I	Introduction to Virtual Instrumentation: Virtual Instrumentation- Programming Requirements- Drawbacks of Recent Approaches- Virtual Instruments Versus Traditional Instruments- Advantages of VI- Creating Virtual Instruments Using LabVIEW- Virtual Instrumentation in the Engineering Process- Graphical Programming and Textual Programming- Advantages of LabVIEW- LabVIEW Environment- Dataflow Programming- G Programming.													
Unit – II	Basic Tools, Loops and Graphs: Front Panel-Block Diagram Tools and Palettes- Repetition and Loops: FOR Loop, While Loop, Shift Registers, Tunnels, Feedback Nodes, Local and Global Variables – Arrays-Clusters-Waveform Charts-Waveform Graphs-XY Graphs-Intensity Graphs and Charts-Digital Waveform Graph-3D Graphs.													
Unit – III	Programming with Structures: Structures: Case Structure, Sequence Structures, Customizing Structures, Timed Structures, Formula Nodes, Event Structure, MathScript-Strings-File I/O-State Machine.													
Unit – IV	Data Acquisition: Interface Buses: RS 232, RS422, RS485, GPIB and USB. Hardware Aspects: Signal Grounding-Signal Conditioning-Digital I/O Techniques-Data Acquisition in LabVIEW-Hardware Installation and Configuration-Components of DAQ-DAQ Signal Accessory-DAQ Assistant-DAQ Hardware- DAQ Software.													
Unit – V	Tools and Applications: Signal processing and Analysis Tools-Control System Design and Simulation Tools-Signal, Voltage and Current measurement using general purpose DAQ Card-Bio-Medical Signal Acquisition using NI-ELVIS –Temperature Measurement.

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	explain the Virtual Instrumentation concepts													Understanding (K2)
CO2	apply structured programming concepts in developing LabVIEW programs													Applying (K3)
CO3	build LabVIEW programs using structures, nodes and state machine concepts													Applying (K3)
CO4	utilize DAQ System to solve real time problems													Applying (K3)
CO5	apply knowledge on various tools in practical works													Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO4	3	2	1	1	1							1	3	3
CO5	3	2	1	1	1							1	3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		70	30				100
CAT2		30	70				100
CAT3		30	70				100
ESE		30	70				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE09 DIGITAL IMAGE PROCESSING														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Digital Signal Processing	6	PE	3	0	0	3							
Preamble	To impart the fundamental knowledge and applications of Digital Image Processing.													
Unit – I	Introduction to Image Processing:													
Overview to Image Processing – Nature of Image Processing – Image Processing and Related Fields – Digital Image Representation – Types of Images – Fundamental Steps in Image Processing. Digital Image Processing Operations: Basic Relationships and Distance Metrics – Classification of Image Processing Operations – Arithmetic Operations: Image Addition, Image Subtraction, Image Multiplication, Image Division – Logical Operations: AND/NAND, OR/NOR, XOR/XNOR, NOT.														
Unit – II	Image Transform:													
Need for Image Transforms – 2D Discrete Fourier transform – 2D Discrete Cosine Transform – Haar Transform – SVD Transforms.														
Unit – III	Image Enhancement:													
Image Quality and Need for Image Enhancement – Image Enhancement Point Operations – Linear and Non-linear Functions – Piecewise Linear Functions: Intensity Slicing, Bit-plane Slicing – Histogram Equalization – Spatial Filtering Concepts: Design of Discrete Gaussian Mask, Order-statistics Filters (Median, Maximum, Minimum) – Image Smoothing in Frequency Domain – Image Sharpening in Frequency Domain.														
Unit – IV	Image Segmentation:													
Introduction – Classification of Image Segmentation Algorithms – Detection of Discontinuities – Edge Detection: Stages in Edge Detection, Types of Edge Detectors –Edge Detectors: Roberts Operator, Prewitt Operator, Sobel Operator – Canny Edge Detection – Principle of Thresholding: Histogram and Thresholding, Global Thresholding Algorithms – Principle of Region-growing.														
Unit – V	Image Processing Applications:													
Theory and Case study: Image Registration – Image Fusion – Image Mosaicking – Digital Watermarking.														
Total:45														
TEXT BOOK:

**22EIE10 – POWER PLANT INSTRUMENTATION**

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	6	PE	3	0	0	3							
Preamble	To provide an overview of various methods of power generation and the basic concepts and practical aspects of Instrumentation and Control in Thermal Power Plant and Nuclear Power plant.													
Unit – I	Overview of Power Generation: Brief survey of Conventional and non-conventional methods of power generation – Nonconventional: Wind power – Solar power – Geothermal Power – Biomass Power. Conventional: Hydropower – Steam Power – Comparison of various power plants – Piping and Instrumentation diagram – Cogeneration of Power – Control rooms													
Unit – II	Instrumentation and Control in Water Circuit: Water circuit – Boiler Feed water circulation – Measurements in water circuit: Water and Steam flow measurement – Drum water level measurement – Controls in water circuit: Boiler Drum Level Control – Superheated Steam temperature control – Impurities in water and Steam: Impurities in Raw water – Effect of impurities – Measurement of impurities.													
Unit – III	Instrumentation and Control in Air-Fuel Circuit: Air-Fuel circuit – Measurements in air-fuel circuit – Controls in Air- Fuel circuit: Combustion control – Furnace draft control. Analytical Measurement: Oxygen measurement in Flue gas – Measurement of Carbon Dioxide in Flue gas – Combustibles Analyser (CO+H ₂) – Infrared Flue Gas Analysers – Smoke detector – Dust monitor – Chromatography													
Unit – IV	Power Plant Management and Turbine Monitoring and Control: Master control – Boiler Efficiency – Maintenance of Measuring Instruments – Interlocks for Boiler operation – SCADA – Application of DCS in Power Plants. Classification of turbines–Turbine Steam inlet system – Turbine Measurements: Process parameters – Turbine control system: Safety control systems – Process control systems –Lubrication for Turbo-Alternator – Turbo-Alternator Cooling System.													
Unit – V	Instrumentation and Control in Nuclear Power Plant: Nuclear Power Plant components – Sensors and measurement system – Reactor control: Pressurized Water Reactor (PWR) – Boiler Water Reactor (BWR) – Liquid Metal Cooled Reactor (LMCR) – Digital architectures in nuclear power plants – Radiation protection and monitoring – Case study: Three mile island – Chernobyl nuclear power plant – Fukushima nuclear power plant.

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	interpret the knowledge about the basics of power plants and various methods of power generation											Understanding (K2)
CO2	build the instrumentation and control techniques involved in water circuit of thermal power plant											Applying (K3)
CO3	analyse the different measurement and control techniques applied to air-fuel circuit of thermal power plant											Analyzing (K4)
CO4	apply DCS, SCADA, interlock circuits and turbine controls in thermal power plant											Applying (K3)
CO5	develop the concepts of different reactor controlled methods, safety and radiation measures in nuclear power plants											Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIE11 - EMBEDDED SYSTEMS														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Microcontroller and its Applications / Microprocessor and Microcontroller	6	PE	3	0	0	3							
Preamble	To impart the fundamental knowledge and programming concepts of Microcontroller and Embedded systems.													
Unit – I	Introduction to PIC18 Microcontrollers: Architecture of PIC 18 - Pin Description – Memory Organization: Program Memory – Data Memory: Register Organization – Oscillator and Reset Circuits – Addressing Modes – Introduction to Instruction sets and C Programming.													
Unit – II	PIC 18 Programming: Assembly Language/ C Programming to Interface I/O Ports – Timers – Counters – Capture/Compare Mode – PWM.													
Unit – III	Interfacing Peripherals with PIC18 Microcontroller: Interfacing and Assembly Language/ C Programming of ADC – DAC – Temperature Sensor – LCD – Keyboard – Motor Control: DC motor and Stepper motor.													
Unit – IV	Embedded Systems and Interfacing with Arduino Classification of Embedded Systems – Structural units in Embedded processor – Physical device – Arduino Interfaces, Hardware requirement for Arduino, Connecting remotely over the network using VNC, GPIO Basics, Controlling GPIO Outputs Using a Web Interface, – Programming, APIs / Packages- Quark SOC processor, programming, Arduino Boards using GPIO													
Unit – V	RTOS Concepts and case study: Introduction to RTOS – Types of RTOSs – Tasks – Process – Task scheduling – Task Communication – Priority Inversion Problem. Case Study: Automatic Chocolate Vending Machine – Smart Card Reader – Mobile phone software for Key inputs.													
Total:45														
TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	discuss the basic concepts of PIC microcontroller												Understanding (K2)
CO2	demonstrate the programming and interfacing concepts of PIC Microcontroller												Applying (K3)
CO3	Experiment with programming skills to interface peripherals with a PIC Microcontroller.												Analyzing (K4)
CO4	Apply the basics of embedded systems and interfacing sensors with Arduino												Applying (K3)
CO5	explain the applications of embedded system using RTOS												Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1		1				1				1	2	2

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

**22EIE12 – CONTROL SYSTEM COMPONENTS**

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Control Systems	6	PE	3	0	0	3							
Preamble	To emphasize the engineering principles and fundamental characteristics of components and to explain their functions in composite systems													
Unit – I	Mechanical Components:													
Control system parameters- CAM: Components- Classification-CAM profile-CAM as a mechanical function generator-3D CAM. Gears: Types – Gears for load matching- Backlash in gears-Manufacture of gears. Gyroscope: Gyroscopic effect- Construction- Precession and velocity of precession-Generalised equations- Application.														
Unit – II	Electromechanical Components:													
Potentiometer: Types – Applications –Selection. Synchros: Construction and operation – Characteristics – Application – Synchro pair as error detector. Relays: Classification –Relay circuits – Construction-Characteristics of electromechanical and reed relays – Relay problems and remedies.														
Unit – III	Actuators: Servomotors:													
Theory of operation and transfer function of DC servomotors and AC servomotors. Stepper motor: Types – Construction and working – Driver circuits – Applications. Tachogenerators: Characteristic requirements – EMF equation – Commutation and armature reaction problem- AC induction tachogenerators-Working – Sources of errors- Applications														
Unit – IV	Amplifiers and Modulators:													
Rotating amplifiers: Types – Amplidyne generator- Working principle –transfer function. Magnetic amplifiers: Series connected – Parallel connected- Magnetic amplifiers with feedback. Servo amplifiers: Features – AC and DC servo amplifiers – Performance characteristics. Modulators and demodulators: Amplitude modulation theory- Half and full wave balanced modulator- Amplitude modulator circuit.														
Unit – V	Hydraulic systems:													
Components – Classifications- Hydraulic pumps – Hydraulic transmission lines- Hydraulic power supply. Hydraulic valves: Spool type- Nozzle valve- Flapper valve- Pulsed operation of control valves. Pneumatic systems: Pneumatic power supply – Compressor efficiency – Accessories for air compressor- Flow control. Pneumatic control valves: Operating mechanism – Direction control valves- P,PI and PID pneumatic control valves.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	recognize the working and applications of mechanical components used for measuring angular displacement												Applying (K3)
CO2	distinguish the working and applications of electric mechanical components used for measuring angular displacement												Applying (K3)
CO3	identify the suitable actuators used for closed loop control system applications												Applying (K3)
CO4	recognize the working and applications of amplifiers used for composite systems												Applying (K3)
CO5	realize the working and applications of pneumatic and hydraulic components used in control applications												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

**22EIE13 - FIBER OPTICS AND LASER INSTRUMENTS**

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	The course will enable the students to learn about basic concepts and properties of optical fibers and lasers. The course will provide students with adequate knowledge about industrial application of optical fibers and lasers, holography and medical applications of lasers.													
Unit – I	Optical Fibers and their Properties:													
	Ray theory transmission – Optical fibers – Preparation of optical fibers: Liquid-phase (melting) techniques, Vapor–phase deposition techniques – Transmission characteristics of optical Fibers: Attenuation, Material Absorption losses in silica glass fibers, Linear scattering losses, Dispersion, Chromatic dispersion, Intermodal dispersion, Overall fiber dispersion – Optical fiber connection: Fiber splices, Fiber connectors.													
Unit – II	Industrial Applications of Optical Fibers:													
	Fiber optic sensor fundamentals – Intensity-modulated sensors – Phase-modulated sensors – Displacement sensors – Strain sensors – Temperature sensors – Pressure sensors – Magnetic and electric field sensors – Rotation rate sensors(Gyroscopes).													
Unit – III	Laser Fundamentals:													
	Laser rate equations: Introduction, The two-level system, The three-level laser system, The four-level laser system – Pulsed operation of lasers: Q-switching, Mode locking – Properties of lasers: Laser beam characteristics – Laser safety: Physiological effects, Laser safety practices and standards.													
Unit – IV	Industrial Applications of Lasers:													
	Introduction – Applications in material processing: Laser welding, hole drilling, laser cutting – Laser tracking –Lidar – Precision length measurement – Laser interferometry: Homodyne and heterodyne interferometry – Velocity measurement – Lasers in information storage, Bar code scanner – Applications for surface treatment: Hardening, glazing, laser alloying, laser cladding.													
Unit – V	Hologram and Medical Applications:													
	Principles of holography: Formation of holograms, The holographic process, Hologram types and efficiency – Applications of holography: Holographic interferometry – Light and matter: Reflection and refraction, Absorption, Scattering – Interaction mechanisms – Medical applications of lasers: Lasers in ophthalmology, Lasers in neurosurgery, Lasers in angioplasty and cardiology, Lasers in dermatology.

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	outline the fundamentals of pollution control and management											Understanding (K2)
CO2	interpret the concepts of water pollution and control methods											Understanding (K2)
CO3	summarize the methods of wastewater treatment and waste disposal											Understanding (K2)
CO4	apply suitable method for air pollution management techniques											Applying (K3)
CO5	identify various method for solid waste management techniques											Applying (K3)

Mapping of COs with POs and PSOs

22EIE14 - WIRELESS INSTRUMENTATION														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	To impart knowledge on wireless technology for instrumentation, wireless components and its applications. To provide adequate technical information on power sources, wireless protocols and network implementation													
Unit – I	Wireless Instrumentation Technology:													
Introduction – Instruments and Instrumentation: Measurement systems – Multiplexing structures – Wireless instruments and communication protocols – RF interfaces and examples – Networks of wireless instruments – Sensor node components: Computing subsystem – Communication subsystem – Power subsystems – Sensing subsystems.														
Unit – II	Powering Autonomous sensors:													
Autonomous sensors – Ambient energy sources and transducers – Energy storage units – Power considerations of wireless instruments – Energy harvesting: Solar and wind energy harvesting, RF energy harvesting, Energy harvesting from vibration, Thermal energy harvesting – Energy management techniques – Calculation for battery selection – Understanding RSSI and LQI values.														
Unit – III	Wireless Systems/Standards for Automation:													
Wireless HART: Protocol stack – Network components – Addressing control – Coexistence techniques. ISA100.11a: Introduction – Scope – Working group of ISA 100 – Features – Sensor classes – System configuration and architecture of ISA 100.11a – Comparison between ISA100.11a and WHART protocol stacks.														
Unit – IV	Design of Wireless Devices and LoRa:													
Wireless sensor and instrument network design – Wireless integrated network sensors – Plug-and-play sensors and networks – Industrial wireless networks and automation.														
Introduction – Communication Methods – Difference between LoRa and LoRaWAN – LoRaWAN architecture – LoRaWAN classes.														
Unit – V	Wireless Sensor and Instrument Applications:													
Application specific wireless sensors and instruments – Commercial wireless sensors and instruments – Industrial wireless sensor and instrument networks – Wireless human health monitoring and environmental applications – Radio frequency identification – Consumer products and other applications – Applications in Transportation and Agriculture.

22EIE15 INSTRUMENTATION TECHNIQUES IN AGRICULTURE														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Transducers Engineering/Sensors and Transducers	7	PE	3	0	0	3							
Preamble	To discuss the sensing and automation technology associated with agriculture.													
Unit – I	Necessity of Instrumentation:													
Necessity of instrumentation & control for agriculture and food processing requirement, World Agriculture Scenario, Indian Agriculture sector – A synoptic Review- Areas of Concern. Information, Interpretation and Instruction Systems – Agri Instrumentation. Introduction to Transducers – Characteristics.														
Unit – II	Agri Transducers													
Technology Trend – Conventional and Silicon transducers, Capacitive gauges, Silicon Displacement transducer, Silicon Temperature transducer, Silicon Pressure Transducer. Grain Moisture transducers, soil moisture transducers, Humidity transducers, pH transducers, Gas transducers, Intelligent Sensors.														
Unit – III	Automation in Agriculture													
Microprocessor based Grain moisture measurement- Introduction, Sensing Mechanism, I/O requirement analysis. Microprocessor based Soil Nutrient Estimation Systems- Soil nutrients and their role, collection of samples, soil nutrient estimation, sensing mechanism. Preparation of soil extract for estimation of N,P,K and S, I/O requirement Analysis. SCADA Based system for Agriculture process monitoring. Case Study : Interfacing of agri sensors with Microcontroller.														
Unit – IV	Drip Irrigation and Precision Agriculture													
Introduction-Sensors, Hardware block Schematic, system operation, I/O Requirement Analysis, Hardware Systems. Precision: Introduction, need for precision agriculture. Subsystem and components- GPS, Agri sensors, DAS, Communication System. Precision agriculture status – Working Philosophy.														
Unit – V	Green House cultivation:													
Designs and classification of greenhouse- Orientation of Greenhouse / Poly house- Components of green house- Plant growing structures/containers in green house production- Environmental factors influencing greenhouse cultivation- Media preparation and fumigation- Drip irrigation and fertigation systems greenhouse cultivation- Problem management in greenhouse cultivation.														
Total:45

ESE		40	60				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE16 - SAFETY IN PROCESS INDUSTRIES														
Programme& Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	This course will provide the required information for safety management, prevention of accidents, hazard identification and control. It also discusses the risk analysis, management safety strategies, procedures and designs.													
Unit – I	Safety Management:													
Definitions – Safety Culture – Individual Risk, Societal Risk and Risk Populations – Safety Metrics – Risk Perception, Risk Tolerance/Acceptance and Risk Matrix – Safeguards. Toxicology: How Toxicants Enter Biological Organisms – How Toxicants are Eliminated from Biological Organisms –Effects of Toxicants on Biological Organisms.														
Unit – II	Fires and Explosions:													
The Fire Triangle – Distinction between Fires and Explosions – Ignition Energy – Autoignition – Ignition Sources. Explosions: Detonation and Deflagration – Confined Explosions. Concepts to Prevent Fires and Explosions: Inerting: Vacuum Purging, Pressure Purging. Ventilation – Sprinkler Systems.														
Unit – III	Hazards Identification and Evaluation:													
Introduction to Hazard Identification – Hazards identification and risk assessment procedure – Process Hazards Checklists – Hazards Surveys – Hazards and Operability Studies – Case study: HAZOP Study Applied to the Exothermic Reactor.														
Unit – IV	Risk Analysis and Assessment:													
Review of Probability Theory – Event Trees– Fault Trees – Bow-Tie Diagrams– Quantitative Risk Analysis– Layer of Protection Analysis – Relationship between Fault Trees and Event Trees.														
Unit – V	Solid Waste Management:													
Process Safety Strategies – Safe Operating Procedures – Safe Work Practices – Designs for Process Safety – Case study: Static Electricity – Tank Car Loading Explosion – Explosion in a Centrifuge – Duct System Explosion – Conductor in a Solids Storage Bin – Pigment and Filter.														
Total:45														
TEXT BOOK:														
1.	Daniel A Crowl, & Joseph F Louvar, "Chemical Process Safety (Fundamentals with Applications)", 4 th Edition, Pearson India, 2020.													
REFERENCES:

2.	American Institute of Chemical Engineers, "Introduction to Process Safety for Undergraduates and Engineers", John Wiley & Sons, Inc., Hoboken, New Jersey, 2016.													

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)
CO1 outline the fundamentals of safety management and toxicology												Understanding (K2)
CO2 interpret the concepts of fires and explosions and preventing fires and explosions												Understanding (K2)
CO3 summarize the methods of hazard identification/ evaluation												Understanding (K2)
CO4 choose suitable risk analysis and assessment techniques												Applying (K3)
CO5 integrate various safety strategies, procedures, and designs involved in process industries												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	
CO1	2	1				2	1	1					1	2	2
CO2	2	1				2	1	1					1	2	2
CO3	2	1				2	1	1					1	2	2
CO4	3	2	1	1	1	2	1	1					1	3	3
CO5	3	2	1	1	1	2	1	1					1	3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		100					100
CAT2		100					100
CAT3		30	70				100
ESE		70	30				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE17 – INSTRUMENTATION AND CONTROL IN PROCESS INDUSTRIES														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Industrial Instrumentation, Process Control	7	PE	3	0	0	3							
Preamble	This course provides the concepts of various processes in process Industries such as steel, glass, dairy products, pharmaceutical and fermentation. This course emphasizes the Instrumentation and Control techniques involved in such units.													
Unit – I	Basics of Process Measurements:													
Continuous vs. discrete measurement – Continuous vs. Sampled measurement – In-line, On-line and Off-line – Measurement uncertainty – Measurement decision risk –Calibration – Measurement device components – Current loop – Power supply and Wiring – Serial communications – Smart transmitters.														
Unit – II	Instrumentation and Control in Steel Industries:													
Process description in diagrammatic and functional block details – Raw materials preparation – Operation of Blast Furnace (BF) – Basic Oxygen Furnace (BOF) – Electric Furnace (EF) – Open Hearth Furnace (OHF) – Gas and water control system in Basic oxygen furnace–Mold level control system in strand casting operation.														
Unit – III	Instrumentation and Control in Glass Industries:													
Definition and composition of glass – Glassmaking process – Level measurement: Electrical, Pneumatic, Optical method – Temperature measurement: Radiation pyrometer – Furnace pressure measurement – Flow measurement – Automatic inspection in container and flat glass manufacturing – Control of glass melting furnaces – Electric booster melting controls														
Unit – IV	Instrumentation and Control in Dairy Industries:													
Process description in diagrammatic and functional block details – Plate heat exchanger – Single stage and Two stage Homogenizer – Doppler ultrasonic flow meter – Control system in HTST pasteurizer– Temperature control in spray dryer – Automation for Cleaning in Place (CIP) – Refrigeration system – Metal detection system														
Unit – V	Instrumentation and Control in Pharmaceutical and Fermentation Industries:													
Description of the penicillin production process – Flow measurement – Level measurement – Pressure measurement – Temperature measurement – Fermentation control system – Continuous fermentation – pH control – Temperature control – Centrifuge purging control.														
Total:45

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	explain the basics of process measurements in various industries												Understanding (K2)
CO2	Identify the instrumentation and control techniques involved in iron and steel industry												Applying (K3)
CO3	develop the instrumentation and control systems in glass industry												Applying (K3)
CO4	apply the various instrumentation and control schemes in dairy industry												Applying (K3)
CO5	build the different instrumentation and control techniques applied in pharmaceutical and fermentation industry												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1											2	2

ESE		40	60				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22GEE02 - TOTAL QUALITY MANAGEMENT																
(Common to All BE/BTech branches)																
Programme & Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit									
Prerequisites	Nil	7	PE	3	0	0	3									
Preamble	This course deals with quality concepts and Total Quality Management (TQM) principles focusing on process quality for customer perspective. It also deals with the basic and modern quality management tools including ISO standards															
Unit – I	Quality Concepts and Principles															
Definition of Quality - Dimensions of Quality - Quality Planning - Quality Assurance and Control - Quality Costs with Case Studies - Elements / Principles of TQM - Historical Review – Leadership – Qualities / Habits - Quality Council - Quality Statements, Strategic Planning – Importance - Case Studies - Deming Philosophy - Barriers to TQM Implementation – Cases with TQM Success and Failures.																
Unit – II	TQM-Principles and Strategies															
Customer Satisfaction - Customer Perception of Quality - Customer Complaints - Customer Retention, Employee Involvement – Motivation - Empowerment - Teams - Recognition and Reward - Performance Appraisal, Continuous Process Improvement - Juran's Trilogy - PDSA Cycle - 5S - Kaizen, Supplier Partnership - Partnering - Sourcing - Supplier Selection - Supplier Rating - Relationship Development, Performance Measures – Purpose – Methods - Cases.																
Unit – III	Control Charts for Process Control															
Basic Seven Tools of Quality and its Role in Quality Control, Statistical Fundamentals - Measures of Central Tendency and Dispersion, Population and Sample - Normal Curve - Control Charts for Variables and Attributes - Process Capability - Case Study - Introduction to Six Sigma.																
Unit – IV	TQM-Modern Tools															
New Seven Tools of Quality, Benchmarking - Need - Types and Process, Quality Function Deployment - House of Quality (HOQ) Construction - Case Studies, Introduction to Taguchi's Robust Design - Quality Loss Function - Design of Experiments (DOE), Total Productive Maintenance (TPM) - Uptime Enhancement, Failure Mode and Effect Analysis (FMEA) - Risk Priority Number (RPN) – Process - Case Studies.																
Unit – V	Quality Systems															
Need for ISO 9000 and Other Quality Systems - ISO 9000: 2015 Quality System – Elements - Implementation of Quality System - Documentation - Quality Auditing, Introduction to ISO 14000 - IATF 16949 - TL 9000-IEC 17025 - ISO 18000 - ISO 20000 - ISO 22000 - ISO21001. Process of Implementing ISO - Barriers in ISO Implementation.

3.	David Goetsch & Stanley Davis, "Quality Management for Organizational Excellence: Introduction to Total Quality", 8 th Edition, Pearson, 2017.															

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	demonstrate the evolution of TQM principles	Understanding (K2)
CO2	illustrate the principles and strategies of TQM	Understanding (K2)
CO3	use control charts and identify process capability of a process	Applying (K3)
CO4	apply various quality tools and techniques in both manufacturing and service industry	Applying (K3)
CO5	choose appropriate quality standards and implement them in the respective industry	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIE18 - INSTRUMENTATION IN AIRCRAFT NAVIGATION AND CONTROL														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	To discuss the concepts of aircraft instruments and cockpit layout in modern aircraft and deals with the conventional and advanced flight instruments.													
Unit – I	Basics of Aircraft and Aircraft Instruments:													
Introduction – Control Surfaces – Forces – Moments and Angle of Attack – Engines – Avionics – Modern Aircraft System. Aircraft Instruments and their Layout – Aircraft Display Types – Quantitative and Qualitative Display – Instrument Grouping – Basic T Grouping, Glass Cockpits of Modern Aircraft.														
Unit – II	Air Data Instruments and Directional Systems:													
Introduction to Air Data Instruments – Pitot pressure and Pitot tube – Types of Air Data Instruments – Pneumatic-type Air Data Instruments – Air Speed Indicator, Air Data Computer – International Standard Atmosphere – Air Data Instruments – Directional Systems: Magnetic Compass – Earth Magnetic Field – Flux Detector Unit.														
Unit – III	Gyroscopic and Advanced Flight Instruments:													
Introduction – Types of Gyro – Conventional Mechanical, Vibrating Gyros, RLG, FOG – Basic Mechanical Gyro and its Properties – Directional Gyro and limitations – Gyro Horizon – Turn and Bank Indicator – Turn Coordinator – Standby Attitude Director Indicator Advanced Direction Indicators.														
Unit – IV	Engine Instruments and Indicators:													
Introduction – Engine Speed Measurements – Electrical Tacho Generator/Indicator, Servo Type, Non-Contact Type, Optical Tachometer, Hall Effect Sensor – Torque Measurements – Electronic Torque Meter – Pressure Measurements – Engine Pressure Ratio Indicator. Engine Fuel Indicators: Fuel Quantity Indicator.														
Unit – V	Aircraft Navigation and Safety Warning Systems:													
Introduction – Radio Navigation Aids – VHF Omni Directional Range System DME/ILS/INS/GPS – Principle of VOR operation – Distance Measuring Equipment, Instrument Landing Systems –Inertial Navigation System: Principle, Gimbaled and Strap Down INS – Global Positioning System. Air Data Warning Systems.														
Total:45

22EIE19 - INDUSTRIAL DATA COMMUNICATION														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	To educate on the basic concepts of data communication, different industrial communication protocols and wireless communication.													
Unit – I	Serial communication: Serial Communication: OSI reference model – Protocols – RS-232 overview, RS-232 interface standard (CCITT V.24 interface standard) – Half-duplex operation of the RS-232 interface – Limitations – RS-485 overview – The RS-485 interface standard – RS-485 vs RS-422 – The 20 mA Current loop.													
Unit – II	Copper Cable and Fiber Optics Cable Communication: Copper cable: Characteristics – Cable selection – Coaxial cables – Twisted-pair cable – Distribution/installation standards – Connector standards. Fibre optics Communication: Fiber-optic cable components – Cable parameter – Types of optical fiber – Basic cable types – Connecting fibers.													
Unit – III	MODBUS, PROFIBUS PA/DP/FMS and TCP/IP: MODBUS: Modbus Overview – MODBUS protocol structure – Function codes – query response cycle, transmission mode, Message Formatting. PROFIBUS PA/DP/FMS: PROFIBUS protocol stack- The PROFIBUS communication model- Relationship between application process and communication – Communication objects. TCP/IP – TCP/IP overview: Introduction – Internet Layer Protocols (Packet Transport) – Host-to-host layer: end to end reliability. TCP/IP troubleshooting: Introduction – Common problems – Typical network layer problems – Transport layer problems.													
Unit – IV	HART and Foundation Field Bus: HART: HART Introduction – HART and smart instrumentation – Physical layer, Data link and application layer – HART Commands. Foundation Field Bus: Introduction – The Physical layer and Wiring Rules, The Data link layer, The Application layer, The User layer, Error detection and diagnostics - High-speed Ethernet (HSE)													
Unit – V	Industrial Ethernet and Wireless Communication Industrial Ethernet: Introduction – 10 Mbps Ethernet – 100 Mbps Ethernet – Gigabit Ethernet – Industrial Ethernet. Wireless communication: Satellite systems – Wireless LANs- Radio and wireless communication : Introduction – components of radio link – radio spectrum and frequency allocation – Radio MODEMs.

3.	Steve Mackay, Edwin Wright, Deon Reynders," Practical Industrial Data Networks: Design, Installation and Troubleshooting", 1 st Edition, Elsevier, 2005.													

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	Make use of the essentials of the communication system and learn the serial communication interface											Applying (K3)
CO2	Interpret knowledge about Copper cable and Fiber optic cable communication											Understanding(K2)
CO3	Select the suitable communication protocols of various industries.											Understanding(K3)
CO4	Identify the architecture and applications of HART and Field bus											Applying (K3)
CO5	Examine the concepts of Industrial Ethernet and wireless communications											Applying (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIE20 - MEMS AND NANO TECHNOLOGY														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	The course aims to impart the knowledge on different materials, principles used for recent MEMS and NEMS fabrication techniques and applications.													
Unit – I	Microsystems: Overview of microelectronics manufacture and Microsystems technology– Scaling Laws In Miniaturization: Scaling in geometry – Scaling in rigid body dynamics – Scaling in electrostatic and electromagnetic forces – Scaling in Electricity – Scaling in Fluid Mechanic – Scaling in heat transfer – Materials for MEMS and Microsystems.													
Unit – II	Micro sensors and Actuators: Working principle of Microsystems – Micro actuation techniques – Micro actuators: Micro grippers – Miniature Microphones – Micro motors – Micro pumps – Micro valves – Micro accelerometers – Micro gyroscopes –Application of Microsystems in Automotive and Biomedical Field.													
Unit – III	Microsystems Fabrication and Manufacturing: Substrates – Single crystal silicon wafer formation – Photolithography – Ion implantation – Diffusion –Oxidation – CVD – PVD – Deposition by epitaxy – Etching. Manufacturing process: Bulk Micromanufacturing – Surface Micromachining – LIGA –SLIGA. Microsystem Design Considerations.													
Unit – IV	Introduction to Nanotechnology: Carbon Allotropes – CNTs: Structure – Mechanical Properties– Electrical Properties – CNT Electronics – Synthesis – Graphene: Structure – Synthesis– Electrical Properties. Quantum Dots – Synthesis – Optical Properties – Single Electron Transistor – Quantum Dots in Medicine. Nanowires: Metal Nanowires – Semiconductor Nanowires.													
Unit – V	Fields of Nanotechnology: Scanning Tunneling Microscopy – AFM – Scanning Electron Microscopy– TEM. General Principles of Nano Fabrication – Fluid Flow in Sub micrometer and Nanoscales – Heat Conduction at Nanoscale – Measurement of Thermal Conductivity–Nano Products – Application of Nanoproducts – Challenges in Nanoscale Engineering.													
Total:45

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	relate the concepts of scaling laws											Analysing (K4)
CO2	recognise sensors and actuators in micro systems											Understanding(K2)
CO3	compare on the rudiments of micro fabrication techniques											Analysing (K4)
CO4	interpret the properties of nanostructures and Nano synthesis											Applying(K3)
CO5	use the nano-structured materials for engineering applications											Applying (K3)

Mapping of COs with POs and PSOs

**22EIE21 - OPTIMAL AND ADAPTIVE CONTROL**

Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Control Systems	7	PE	3	0	0	3							
Preamble	To provide the knowledge about fundamental concepts of optimal and adaptive control techniques.													
Unit – I	Optimal Control Formulation:													
Matrix properties and definitions – Quadratic forms and definiteness – State space form for continuous systems. Calculus of variations: Fundamental concepts – The functional of a single function- Optimal Control Formulation: The Performance measure: Performance measures for optimal control problems, selecting a performance measure. Constraints – Variational approach to optimal control problems: Necessary conditions for optimal control.														
Unit – II	Linear Quadratic Optimal Control Systems:													
Problem formulation – Linear regulator problem –Infinite time linear quadratic – Meaningful interpretation of Riccati coefficient – Analytical solution of algebraic Riccati equation – Equivalence of open loop and closed loop. Design of LQR: Inverted pendulum, DC motor speed control.														
Unit – III	Dynamic Programming:													
The Optimal control law –Principle of optimality – Dynamic programming applied to routing problem – Recurrence relation of dynamic programming – Computational procedure for solving optimal control problems- Characteristics of dynamic programming solutions.														
Unit – IV	Self Tuning Regulators:													
Introduction to adaptive control –classification –Pole placement design, Direct and Indirect self tuning regulators, continuous time self tuners, minimum variance and moving average controllers, stochastic direct and indirect self tuning regulators, linear quadratic self tuning regulators														
Unit – V	Model Reference Adaptive control:													
The MIT rule- Lyapunov theory – Design of model reference adaptive controller using MIT rule and Lyapunov theory – Relation between MRAS and STR, Introduction to Adaptive back stepping.														
Total:45

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	Select optimal control problem												Understanding (K2)
CO2	apply the concepts in the design of optimal controller using LQR concepts												Applying (K3)
CO3	determine optimal control solution for discrete systems using dynamic programming												Applying (K3)
CO4	Make use of the model reference adaptive control and self-tuning control systems												Applying (K3)
CO5	Examine the Implementation aspects of adaptive control and applications												Analyzing (K4)

Mapping of COs with POs and PSOs

22EIE22 – WEARABLE TECHNOLOGY																
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Nil	7	PE	3	0	0	3									
Preamble	A category of electronic devices that discuss the worn accessories, embedded in clothing, implanted in the user's body. The devices are hands-free gadgets with practical uses, powered by microprocessors and enhanced with the ability to send and receive data via the Internet.															
Unit – I	Introduction to Wearable Technology: An overview of wearable technology – Brief history – Applications of wearable Technology- Wearable Technology in Medicine and Health Care – Smart Glasses – Conventional Textile Wearable Integration Techniques.															
Unit – II	Components and Technologies: Introduction to components and technologies – Microprocessors and Microcontrollers – Operating Systems – Sensors – Wireless connectivity unit – Battery technology – Displays and other user interface elements – Microphones and Speakers. Wearable Technologies and Force Myography for Healthcare: Moving Monitoring – Accelerometers – Inertial Measurement Units – Data Gloves – Myography – Force Myography															
Unit – III	Product Development and Design Considerations: Introduction to Production development process – Engineering analysis – prototyping – Testing and validation – Production – Design considerations –Various factors and requirements – Operational power packing and material – Maintenance.															
Unit – IV	Security Issues and Privacy Concerns: Security issues – Privacy issues – Potential solutions – Product case examples: Blood Glucose Meters - Blood Pressure Monitors - Weighing and Body Analysis Scale – Pulse Oximeters – Electrocardiogram.															
Unit – V	Psychological and Social Impact: Psychological effects of wearables – Social implications – Technology acceptance factors – Electromagnetic radiations – Specific absorption rate – Thermal effects. Health Issues: Cancers – Fertility – Vision and sleep disorder – Pain and discomfort – Electromagnetic intolerance and other risks.

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	infer the recent technology used as wearable devices in medical and health care											Understanding (K2)
CO2	apply various components and technologies for creating wearable devices											Applying (K3)
CO3	analyze the development process and design consideration in wearable products											Analyzing (K4)
CO4	develop the security and privacy issues in wearable technology											Applying (K3)
CO5	explore the psychological and social impact, health concerns in wearable devices											Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22GEE01 - FUNDAMENTALS OF RESEARCH														
(Common to All BE/BTech branches)														
Programme & Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	GE	3	0	0	3							
Preamble	This course familiarizes the fundamental concepts/techniques adopted in research, problem formulation and also disseminates the process involved in collection, consolidation of published literature and rewriting them in a presentable form using latest tools.													
Unit – I	Introduction to Research													
Introduction to Research: Types and Process of Research - Outcomes of Research - Sources of Research Problem - Characteristics of a Good Research Problem - Errors in Selecting a Research Problem - Importance of Keywords.														
Unit – II	Literature Review													
Literature Review: Literature Collection - Methods - Analysis - Citation Study - Gap Analysis - Problem Formulation Techniques.														
Unit – III	Research Methodology													
Research Methodology: Appropriate Choice of Algorithms/Methodologies/Methods – Data Collection – Primary Data Analysis – Experimental Methods and Result Analysis - Investigation of Solutions for Research Problem - Interpretation - Research Limitations.														
Unit – IV	Journals and Papers													
Journals and Papers: Journals in Science/Engineering - Indexing and Impact factor of Journals. Plagiarism and Research Ethics. Types of Research Papers - Original Article/Review Paper/Short Communication/Case Study.														
Unit – V	Reports and Presentations													
How to Write a Report - Language and Style - Format of Project Report - Title Page - Abstract - Table of Contents - Headings and Sub-Headings - Footnotes - Tables and Figures - Appendix - Bibliography etc - Different Reference Formats. Presentation using PPTs. Research Tools.														
Total:45														
TEXT BOOK:														
1.	Walliman, Nicholas. "Research Methods: The basics". 2 nd edition, Routledge, 2017., for Units I, II, III, IV & V

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	list the various stages in research and categorize the quality of journals												Applying (K3)
CO2	formulate a research problem from published literature/journal papers												Evaluating (K5)
CO3	write, present a journal paper/ project report in proper format												Creating (K6)
CO4	select suitable journal and submit a research paper												Applying (K3)
CO5	compile a research report and the presentation												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIE23 - INSTRUMENTATION IN BUILDING AUTOMATION																
Programme& Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Nil	7	PE	3	0	0	3									
Preamble	Building Management System is computer-based control system installed in building that controls and monitors the total MEP (Mechanical – Electrical – Plumbing) and security Structure. It consists of both Hardware and software. This subject will help the students to understand the various aspects of different systems seen in well-structured building.															
Unit – I	Introduction and Fire Alarm System:															
Introduction: Concept and application of Building Management System (BMS) and Automation, requirements and design considerations and its effect on functional efficiency of building automation system, architecture and components of BMS. Fire Alarm: Fundamentals – FAS Components – Fire control panels- Field Components, Panel Components- FAS Architectures- FAS loops – Fire Standards- Concept of IP enabled fire & alarm system, design aspects and components of PA system.																
Unit – II	Access Control System:															
Access Control System: Access Components, Access control system Design. CCTV: Camera: Camera Applications, DVR Based system, DVM, Network design, Storage design. Components of CCTV controlling system. CCTV Applications: CCTV Applications. Security Systems Fundamentals: Introduction to Security Systems, Concepts. Security Design: Security system design for – RFID enabled access control with components, Computer system access control – DAC, MAC, RBAC.																
Unit – III	HVAC system:															
HVAC system Fundamentals: Introduction to HVAC, HVAC Fundamentals, Basic Processes Human Comfort: Human comfort zones, Effect of Heat, Humidity, Heat loss. Processes: Heating Process & Applications. Cooling Process & Applications, Ventilation Process & Applications, Unitary Systems.																
Unit – IV	Energy Management System:															
Energy Management System: ASHRAE Symbols Energy Management: Energy Savings concept & methods, Lighting control, Building Efficiency improvement, Green Building (LEED) Concept & Examples –Energy conservation and Sustainability																
Unit – V	Building Management System:															
Building Management System: IBMS (HVAC, Fire & Security) project cycle, Project steps BMS. Verticals: Advantages & Applications of BMS, Examples Integration: IBMS Architecture, Normal & Emergency operation. Advantages of BMS.																
Total:45																
TEXT BOOK:

3.	Albert Ting-Pat So, WaiLok Chan, “Intelligent Building Systems”, 3 rd Edition, Kluwer Academic Publishers, 2012															

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	Realize current philosophy, technology, terminology, and practices used in building automation											Understanding (K2)
CO2	Interpret different safety and security standards for building management system											Understanding (K2)
CO3	Understand various hardware and software requirement for given HVAC system											Understanding (K2)
CO4	Evaluate energy management and communication for efficient Building Management System											Applying (K3)
CO5	Use various tools and techniques in BMS for Design of Secure, Safe and Green building											Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	
CO1	2	1				2	1	1					1	2	2
CO2	2	1				2	1	1					1	2	2
CO3	2	1				2	1	1					1	2	2

22EIE24 - ELECTRONIC INSTRUMENTATION														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	To provide fundamentals of the Electronic Instruments in the field of Instrumentation Engineering. It discusses the concepts of digital instruments, signal generators, display devices and calibration.													
Unit – I	Digital Instruments													
Block diagram of Digital Instrument-Digital Voltmeters: Dual slope Integrating type -Digital Multimeters-True RMS Meter-Digital Frequency meter-Digital Measurement of Time- Universal counter-Decade counter- Generalized Data Acquisition System (DAS).														
Unit – II	Measuring Instruments													
Output Power meters-Field strength meter-Stroboscope-Phase meter-Vector Impedance meter: Direct Reading, Commercial vector Impedance meter-Rx meters-Automatic Bridges.														
Unit – III	Signal Generators													
Introduction – Fixed Frequency AF Oscillator– Variable AF Oscillator - Basic Standard Signal Generator (Sine Wave)– Modern Laboratory Signal Generator - AF Sine and Square Wave Generator – Function Generator– Square and Pulse Generator (Laboratory Type)- Random Noise Generator- Sweep Generator.														
Unit – IV	Display Devices													
Displays-Classification-LED & LCD-LCOS-Bar graph display-Segmental and Dot matrix display-Plasma Display-OLED-FOLED-simple CRO.														
Unit – V	Instrument Calibration													
Introduction-Comparison methods- Digital multimeters as standard Instruments-Calibration instruments-Potentiometers- Potentiometer calibration methods-Multifunction calibrators-Multiproduct calibrators-Automated calibration.														
Total:45														
TEXT BOOK:														
1.	Kalsi H.S. "Electronic Instrumentation", 3 rd Edition, Tata McGraw Hill, New Delhi, 2019 for Unit 1,2,3,4.													
2.	David A Bell, Electronic Instrumentation and Measurements, 2 nd Edition, Oxford University Press, New Delhi, 2003 for Unit 5

2.	R.S.Sedha, "Electronic Measurements And Instrumentation" 1 st Edition, S Chand & Company ,2013													

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1 interpret the fundamentals of digital instruments in various measurements												Understanding (K2)	
CO2 employ the functions of measuring instruments												Applying(K3)	
CO3 make use of various instruments to generate the waveforms												Applying (K3)	
CO4 infer the types of displays used in electronics instruments												Understanding (K2)	
CO5 assess calibration methods reliability in maintaining instrument accuracy and precision.												Analyzing (K4)	

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1						1					2	2

CO3	3	2	1	1	1			1					3	3
CO4	2	1						1					2	2
CO5	2	1						1					2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		60	40				100
CAT2		30	70				100
CAT3		30	30	40			100
ESE		30	55	15			100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE25 - PIPING AND INSTRUMENTATION DIAGRAMS														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	This course discusses the basic knowledge on Instrumentation standards and to make students familiarize with Instrumentation Symbols, Abbreviations and Identification of Instruments to create Piping and Instrumentation Diagrams for Process Industries													
Unit – I	Instrument Symbols And Standards:													
Instrumentation standards: Purpose, Industry codes and standards, Government Regulations – Application to Industries, Application to work activities – Application to classes of Instrumentation and to Instrument functions. Identification Systems: Identification System guidelines: Instrument Index – Multipoint, Multivariable and Multifunction devices – System Identification – Loop Identification number – Identification Letter Tables														
Unit – II	Graphic Symbol Systems:													
Instrument Line symbols – Measurement and control devices – AND/OR function symbols – Discrete devices – Shared continuous devices – Shared On/Off devices – Multipoint, Multifunction, Multivariable devices and loops. Primary elements – Final control elements – Electrical schematic symbols.														
Unit – III	Fundamentals of P&ID Development:													
Identification of P&ID and its role in process industries - P&ID Development Activity- Anatomy of a P&ID Sheet – Title Block - Ownership Block - Reference Drawing Block – Revision Block – Comments Block – Main Body of a P&ID. Pipes and Equipments: Fluid Conductors: Pipes, Tubes, and Ducts – Pipe Identifiers – Pipe Symbol – Pipe Tag – Pipe fittings. Manual Valves and Automatic Valves – classification of valves – valve operators – Actuators – Tagging Automatic valves – valve positions. Heat Transfer units: Heat exchanger identifier – Heat exchanger identifier Symbol – Heat exchanger Tag – Heat exchanger P&ID.														
Unit – IV	Instrumentation and Control System:													
Fundamentals of Instrumentation and Control - ICSS System Technology - ICSS Elements – Basic Process Control System (BPCS) –Instruments on P&IDs - Instrument Identifier – Signals: Communication Between Instruments – Different Instrument Elements - Simple control loops – Level Control Loops –Pressure Control Loops –Temperature Control Loops – Composition Control Loops – Flow Control Loops.														
Unit – V	Plant Interlocks and Alarms:													
Introduction- Safety strategies – Concept of a SIS – SIS extent – Anatomy of a SIS: SIS Element Symbols, SIS Final Elements, SIS Logic – Showing Safety Instrumented Functions on P&IDs – Discrete Control – Alarm System: Anatomy of Alarm systems, Alarm requirements, Alarm system Symbology, Concept of ‘Common Alarm’.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)
CO1 summarize the basics of instrumentation standards and symbols.												Understanding (K2)
CO2 identify the instrument symbols and function symbols for various elements												Understanding(K2)
CO3 interpret the symbols of pipes and various equipments in process industry and recognize P&ID and its role in process industry												Understanding (K2)
CO4 implement the control concepts in basic process systems and develop simple control loops												Applying (K3)
CO5 develop the safety interlock systems and alarm systems in process plants and equipments												Applying (K3)

Mapping of COs with POs and PSOs

22EIE26 - MACHINE LEARNING AND ITS APPLICATIONS														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	PE	3	0	0	3							
Preamble	This course is intended to provide the foundation on topics in probability and various statistical methods which form the basis for many other areas in the mathematical sciences including parametric methods and decision theory. As application of machine learning case studies will also be addressed.													
Unit – I	Machine Learning Basic Concepts:													
Learning Associations – Classification – Regression – Unsupervised Learning – Reinforcement Learning. Supervised Learning: Learning Multiple Classes - Model Selection and Generalization. Bayesian Decision Theory: Introduction – Classification - Losses and Risks – Discriminant Function.														
Unit – II	Dimensionality Reduction, Clustering and Decision Trees:													
Introduction – Subset Selection – Principal Component Analysis – Factor Analysis – Multidimensional Scaling – Linear Discriminate Analysis. Clustering: Introduction – Mixture Densities – K-means Clustering .Decision Trees: Univariate Trees - Pruning – Multivariate Trees.														
Unit – III	Multilayer Perceptrons:													
Introduction – The Perceptron - Training a Perceptron – Learning Boolean Function – Multilayer Perceptrons - MLP as a Universal Approximator – Back Propagation Algorithm – Training Procedures - Tuning the Network Size – Bayesian View of Learning – Learning Time: Time Delay Neural Networks – Recurrent Networks.														
Unit – IV	Local and Graphical Models:													
Local Models: Introduction – Competitive Learning– Normalized and Competitive Basis Function – Learning Vector Quantization. Graphical Models: Canonical cases for conditional independence – Example of Graphical Models. Reinforcement Learning: Introduction – Elements of Reinforcement Learning – Model Based Learning - Temporal Difference Learning – Generalization.														
Unit – V	Applications of Machine Learning:													
Clustering: Analysis for Market Research -Regression: Predicting house prices with regression. Classification: Music Genre Classification – Computer vision.

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE27 – MODEL PREDICTIVE CONTROL														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Control Systems	7	PE	3	0	0	3							
Preamble	To understand the basic principles and algorithm of predictive control and to get acquainted with the fundamental contents of predictive control theory and applications													
Unit – I	Need for Predictive Control: Classical control assumptions: PID compensation-lag-lead compensation-classical control analysis. Challenges in classical methods: Controlling systems with non-minimum phase zeros and time delays – impact of delays- control of open loop unstable systems-the potential value of prediction-main components of Model Predictive Control (MPC)													
Unit – II	Generation and Development of Predictive Control: Principles of Predictive Control (PC)-prediction model-dynamic matrix control (DMC) based on step response model-DMC algorithm and implementation-DMC in state space framework-general predictive control based on the linear difference equation model – PC based on state space model.													
Unit – III	Synthesis of Stable Predictive Control: Fundamental philosophy of qualitative synthesis theory of PC –relationship between MPC and optimal control-synthesis of stable PC – PC with zero terminal constraints – PC with terminal cost functions-general stability conditions of PC- sub-optimality analysis of PC													
Unit – IV	Predictive Control of Non-linear Systems: General description of PC for non-linear systems- PC based on input-output linearization – multiple MPC based on fuzzy clustering – neural network PC – PC for Hammersian systems – PC with feed-forward and feedback structure – cascade PC.													
Unit – V	Applications of Predictive Control: Industrial applications and software development of PC –role of PC in industrial process optimization – key technologies pf PC implementation – process description and control system configuration –problem formulation and variable selection – plant testing and model identification-application of PC in an automatic train operation system and in solar power plant.

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	recognize the need for predictive control and to identify the main components											Understanding (K2)
CO2	formulate the predictive control problem and algorithms											Applying (K3)
CO3	apply the concepts of synthesizing stable predictive control											Applying (K3)
CO4	apply the concepts of predictive control in non-linear systems											Applying (K3)
CO5	realize the applications of model predictive control in industries											Analyzing (K4)

ESE		30	55	15			100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE28 - MULTISENSOR AND DATA FUSION														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Digital Signal Processing	7	PE	3	0	0	3							
Preamble	To impart the fundamental knowledge and applications of data fusion and implementation of data fusion algorithms													
Unit – I	Sensor and Data Fusion: Introductions, Sensors and Sensor data. Use of multiple sensors, Fusion applications. The inference hierarchy: Output data. Data fusion model: Architectural concepts and issues – Benefits of data fusion.													
Unit – II	Data Registration: Introduction – Registration Problem – Review of existing research – Registration using Meta-Heuristics – Wavelet-based registration of Range Images – Registration Assistance/Preprocessing – Registration using Elastic Transformations – Theoretical Bounds.													
Unit – III	Principles of Image and Spatial Data Fusion: Introduction – Motivation for combining image and spatial data – Defining image and spatial data fusion – Three classic levels of combination for Multisensor Automatic Target – Image data fusion for Enhancement of Imagery data – Spatial data fusion applications – Spatial data fusion GEOINT.													
Unit – IV	Identity Declaration: Identity declaration and pattern recognition – Future extraction – Parametric Templates – Cluster Analysis Techniques – Adaptive Neural Networks – Physical Models – Knowledge-based Methods – Hybrid Techniques.													
Unit – V	Implementation of Data Fusion: Introduction – Requirements Analysis and Definition – Sensor Selection and Evaluation – Functional Allocation and Decomposition – Architecture Trade-Offs – Algorithm Selection – Database Definition – HCI design – Software Implementation – Test and Evaluation – Survey on Military Applications.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	implement the basics concepts of sensor and data fusion												Applying (K3)
CO2	examine the data registration for data fusion												Applying (K3)
CO3	examine the principles of image and spatial data fusion												Understand (K2)
CO4	explain the various techniques in data fusion												Understand (K2)
CO5	perform case study on the data fusion algorithm for realtime applications												Applying (K3)

Mapping of COs with POs and PSOs

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE29- DIAGNOSTIC AND THERAPEUTIC INSTRUMENTS														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Bio Medical Instrumentation	8	PE	3	0	0	3							
Preamble	To impart the fundamental knowledge and applications of Digital Signal Processing.													
Unit – I	Respiratory Measurements Systems: Pulmonary function measurements – Basic spirometer- Ultrasonic spirometer – Fleisch Pneumotachometer – Pulmonary function analyzers – Respiratory gas analyzers-Apnea monitor. Types of ventilators – Ventilator terms – Pressure volume flow diagram – Microprocessor controlled ventilator.													
Unit – II	Ultrasonic Imaging Systems: Diagnostic ultrasound – Physics of ultrasonic waves – Medical ultrasound – Basic pulse-echo apparatus – Imaging modes – Real-time ultrasonic imaging systems – Duplex scanner – Modern ultrasound imaging systems –Three-dimensional ultrasound imaging systems-Portable ultrasound systems.													
Unit – III	Arrhythmia and Ambulatory Monitoring Instruments: Cardiac Arrhythmias – Arrhythmia monitor – QRS detection techniques – Ambulatory monitoring instruments – Data recording – Data replay and analysis. Foetal monitoring instruments: Cardiotocograph – Abdominal foetal Electrocardiogram – Foetal Phonocardiogram.													
Unit – IV	Blood Cell Counters: Types of blood cells – Cell counting: Microscopic method – Automatic optical method – Electrical conductivity method. Anaesthetic system: Need of anaesthesia – Anaesthesia machine. Audiometers: Mechanism of hearing –Measurement of sound – Bekesy audiometry.													
Unit – V	Surgical and Therapeutic Instruments: Surgical diathermy-Endoscopy basic components-Laparoscope, gastro scope, bronchoscope-Cryogenic techniques and application-Operating microscope-arthroscopy-Modern lithotripter system-laser lithotripsy.

3.	Leslie Cromwell, "Biomedical Instrumentation and Measurement", 2 nd Edition, Prentice Hall of India, New Delhi, 2007.													

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	apply appropriate measurement techniques to assess respiratory function in clinical scenarios.											Applying (K3)
CO2	Make use of the ultrasound imaging techniques and its usefulness in diagnosis											Applying (K3)
CO3	Illustrate the various monitoring instruments											Applying (K3)
CO4	Discover the functionality and effectiveness of special assist devices in diverse clinical scenarios.											Analyzing(K4)
CO5	understand the concepts in surgical and therapeutic instruments											Understanding(K2)

Mapping of COs with POs and PSOs

22EIE30 - INSTRUMENTATION AND CONTROL IN PAPER INDUSTRIES														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	8	PE	3	0	0	3							
Preamble	This course discusses the basic knowledge on Instrumentation in paper making process and expose the students to various control strategies employed in paper industries													
Unit – I	Paper Making Process: Paper making process: Raw materials, pulping and preparation, screening – bleaching, cooking, chemical addition, approach system, paper machine, drying section, calenders, drive, finishing, other after treatment processes, coating. Properties of paper: physical, electrical, optical and chemical properties.													
Unit – II	Wet End Instrumentation: Conventional measurements at wet end, pressure and vacuum, temperature, liquid density and specific gravity, level, flow, consistency measurement, pH and ORP measurement, freeness measurement.													
Unit – III	Dry End Instrumentation: Conventional measurements, moisture basis weight, caliper, coat thickness, optical variables, measurement of length and speed. Digester: Rotary and Batch type.													
Unit – IV	Control Strategies: Machine and cross direction control techniques, control of pressure, vacuum, temperature, liquid density and specific gravity, level, flow, pH, freeness, thickness, consistency, basis weight and moisture.													
Unit – V	Modernization in Paper Industries: Paper cutting mechanism – packaging mechanism – Computer controls for online basis weight and web moisture in modern mills – Case Studies: Waste water Management, Advances in Pulp Purification, Paper making and Finishing

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	describe the different stages of operation in Paper Industries	Understanding (K2)
CO2	explain the working operation of instruments used in wet end section	Understanding(K2)
CO3	explain the working operation of instruments used in dry end section.	Understanding (K2)
CO4	apply the control aspects used in the paper industry	Applying (K3)
CO5	demonstrate about the evolution of computer applications in paper industry	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1						1					2	2

CO5	3	2	1		1			2					3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		100					100
CAT2		100					100
CAT3		50	50				100
ESE		80	20				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE31 – INSTRUMENTATION AND CONTROL IN PETROCHEMICAL INDUSTRIES														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Industrial Instrumentation, Process Control	8	PE	3	0	0	3							
Preamble	This course provides the concepts of petroleum processing and various measurement and control techniques applied to reactors, crystallizers, distillation columns, safety and regulations													
Unit – I	Petroleum Processing: Petroleum Exploration – Composition of petroleum – Drilling – Recovery techniques – Oil and Gas separation: Well completion methods – Feed stocks of Petrochemicals – Separation of Gases into individual constituents – Separation of liquids.													
Unit – II	Operations in Petroleum Industry: Crude oil distillation – Refining of crude oil – Thermal conversion processes: Thermal cracking – Catalytic conversion processes: Catalytic cracking – Catalytic reforming – Hydro cracking – Catalytic alkylation – Catalytic Isomerisation – Catalytic polymerization.													
Unit – III	Control of Reactors and Crystallizers: Reactors: Basic operation and fundamentals – Temperature control – Once through cooling – Recirculated cooling – Cascade control – Split range controls with multiple coolants – Crystallizers: Control basis – Cooling crystallizers – Classifying crystallizers – Evaporator crystallizers – Vacuum crystallizers – Reaction crystallizers.													
Unit – IV	Control of Distillation Columns: Distillation equipment – Column variables – Control configurations – Product Quality Control – Direct control: Feedback control – Feed forward control – Cascade control - Inferring composition from Temperature – Column pressure control – Feed control: Feed flow rate control - Temperature control.													
Unit – V	Safety and ATEX Terminology & Regulations: Introduction - Intrinsic Safety - Certification of Intrinsic Safety – NEC Definition of Hazardous Locations - IEC Definition of Hazardous Locations – Introduction to ATEX Terminology & Regulations: EC Directives - Directive 94/9/EC – ATEX 95 – Directive 1999/92/EC – ATEX 137 - North America - International IECEx Scheme - IECEx Scheme Objective – IECEx International Certification Scheme.

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	explain the basics of petroleum exploration and processing in petroleum industry											Understanding (K2)
CO2	Make use of the different operations of petroleum refining process in petroleum industry											Applying (K3)
CO3	Analyze the several control techniques applied in reactors and crystallizers in petroleum industry											Analyzing (K4)
CO4	build the various instrumentation and control schemes in distillation columns											Applying (K3)
CO5	Utilize the Intrinsic safety systems and ATEX terminology and regulations in industries											Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CAT2		40	40	20			100
CAT3		40	60				100
ESE		30	55	15			100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE32 – VHDL PROGRAMMING AND ITS APPLICATIONS														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	8	PE	3	0	0	3							
Preamble	To impart knowledge about different modeling in VHDL programming and synthesize complex digital circuits at several level of abstractions.													
Unit – I	VHDL Fundamentals:													
History of Hardware Description Languages – HDL Abstraction – The Modern Digital Design Flow – VHDL Constructs – Data Types – Libraries and Packages – The Entity – The Architecture – Modeling Concurrent Functionality in VHDL – Concurrent Signal Assignments – Concurrent Signal Assignments with Logical Operators –Conditional Signal Assignments.														
Unit – II	Dataflow Modeling:													
Concurrent Signal Assignment Statement – Concurrent versus Sequential Signal Assignment – Delta Delay – Conditional Signal Assignment Statement – Block Statement – Concurrent Assertion Statement – Value of a signal.														
Unit – III	Structural Modeling:													
Components: Component Declarations – Component Instantiation – Packaging Components – Configuring Component Instances: Basic Configuration Declarations – Configuring Multiple Levels of Hierarchy – Direct Instantiation of Configured Entities –Port Maps in Configurations.														
Unit – IV	Behavioral Modeling													
If Statements: Conditional Variable Assignments – Case Statements: Selected Variable Assignments – Null Statements – Loop Statements: Exit Statements – Next Statements – While Loops – For Loops – Summary of Loop Statements.														
Unit – V	Applications of VHDL in Digital System Design:													
Combinational Logic Circuits: Adders, Multiplexer, Decoders and Encoders. Sequential logic Circuits: Flip flops, – ALU — Counters – Shift registers.														
Total:45

3.	Sung Mo Kang, Yousef Leblebici & Chulwoo Kim, "CMOS Digital Integrated Circuits, Analysis and Design", 4 th Edition, McGraw Hill Education, New Delhi, 2019.													

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	understand the significance of VHDL											Understanding (K2)
CO2	apply the concepts for creating dataflow modeling											Applying(K3)
CO3	design the logic circuits using structural modeling											Applying(K3)
CO4	develop the digital circuits using behavioral modeling											Applying(K3)
CO5	ANALYSE the various applications of digital circuits using VHDL programming											Analysing(K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIE33 COMPUTER CONTROL OF PROCESSES														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Process Control	8	PE	3	0	0	3							
Preamble	To provide knowledge, and understanding required to effectively analyze and design computer-controlled systems.													
Unit – I	Computer Aided Process Control:													
Introduction- Role of computers in process control – Classification of computer aided process control system – batch and sequential control processes – supervisory computer control processes – Direct Digital Control processes-Computer aided process control architecture- Centralized computer control systems – Distributed computer control systems – Hierarchical computer control systems-Man Machine Interface-Economics of computer aided process control-Process related interfaces – Types of computer control process software.														
Unit – II	Sampled Data Control Systems:													
Conventional control Vs Computer control– Mathematical representation of the sampling Process– Sampling frequency considerations – Selection of optimum sampling period – Zero Order Hold-First order hold –Pulse transfer function- Complex series representation of the sampler – Development of the Pulse transfer Function – Modified z Transform-stability analysis: Asymptotic stability - BIBO stability – Internal stability- Jury's stability analysis.														
Unit – III	Design of Controllers for Linear Systems:													
Digital equivalent of conventional PID controller – implementation of discrete PID algorithm-controller design for process with difficult dynamics: Non-minimum phase systems – time delay systems- Smith Predictor algorithm –Inverse response systems-Inverse response compensator-Open loop unstable systems														
Unit – IV	Pole Placement Design:													
State space approach-concepts of controllability, observability, reachability and detectability-regulation by state feedback-observers-output feedback –the servo problem. Polynomial approach): simple design problem – The Diophantine equation – Design procedure –Design of controller for double integrator, Harmonic oscillator and flexible robotic arm.														
Unit – V	Controller Design for Nonlinear Systems:													
Linearization and the classical approach-Adaptive control principles: Scheduled adaptive control –Model reference adaptive control-Self tuning adaptive control-Variable transformations. Model based control: Direct synthesis control –First order systems – Higherorder systems –Time delay systems-Inverse response systems-Internal model control.

22EIE34 - DIGITAL TWINS														
Programme & Branch	B.E. & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	8	PE	3	0	0	3							
Preamble	This course is designed to impart students with introduction to foundation of digital twins in a pragmatic way for cyber –physical fusion, as emerging approach to support engineering design.													
Unit – I	Introduction to Digital Twin Driven Smart Design: Development of Product design and Prospect forecast-Digital Twin and its Applications- History, Concept, Applications of Digital twins-Five Dimension digital twin of a Product-physical, virtual, Digital twin data, Services and connections.-Framework for Digital twin driven smart product design-Case study: Bicycle and Landing gear.													
Unit – II	Digital Twin Driven Conceptual Design Conceptual design methodology foundation of digital twin: Design theory-general, Axiomatic, systematic, Function-Behaviour-structure ontology, Digital twin based conceptual design: function modeling, concept generation, concept evaluation, contradiction resolution, constraint management, complexity management, collaborative conceptual design, digital twin based design affordance. Case study: robot vacuum cleaner (functional formulation, concept generation, constraint management, contradiction solving).													
Unit – III	Digital Twin Driven Energy-aware Green Design Iterative optimization of energy consumption-energy consumption digital thread-product –life cycle, green design (in material selection, disassembly, supply chain and its potential applications). Energy aware five-dimension digital twin,													
Unit – IV	Application and Case Study Digital twin driven factory design: framework, functions at different stages and modular approach-case study: digital twin driven factory design of a paper cup factory, digital twin driven factory design of a nylon factory.													
Unit – V	Digital Twin Driven Process Design Evaluation Process design- process design evaluation- Digital Twin driven process design evaluation-framework for Digital Twin driven process design evaluation-Reconfigurable process plan creation-Digital twin data generation-process plan evaluation based on digital twin data-case study: digital engine connecting rod model description-real time data collection and management-verification of process design evaluation.

COURSE OUTCOMES:												BT Mapped (Highest Level)	
On completion of the course, the students will be able to													
CO1	Understand digital twin product design framework from a holistic perspective and discuss the related key processes and technologies.												Understanding (K2)
CO2	Describe envisions a Digital twin driven conceptual design at basic levels.												Understanding (K2)
CO3	Dramatize and relate digital twin (DT) to green design												Applying(K3)
CO4	Employ the practical application of DT driven smart design												Applying(K3)
CO5	Analyse digital twin (DT) based process design and exemplify the machining process of diesel engine												Analysing (K4)

Mapping of COs with POs and PSOs

22EIO01 - MEASUREMENTS AND INSTRUMENTATION (Offered by Department of Electronics and Instrumentation Engineering)							
Programme & Branch	All BE/Btech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	1	0	4
Preamble	This course imparts the knowledge of measuring instruments for measuring electrical and electronic parameters. Measurements and Instrumentation course gives overview of various measurements like PMMC, MI, power, Energy, recorders and various methods of measurements using AC bridges and transducers.						
Unit – I	Electrical Meters:						
Deflecting, controlling and damping forces in indicating instruments – Principle and operation: D'Arsonval Galvanometers-Torque Equation- Permanent Magnet Moving Coil instruments -Moving iron instruments -Dynamometer type Wattmeter- Single Phase induction type Energy meters.							9+3
Unit – II	DC Null Methods:						
Measurement of Resistances: Classification of Resistances –Measurement of Medium Resistances: Wheatstone Bridge Measurement of low resistance: Kelvin Double Bridge– Measurement of high resistance: Megger – Earth resistance measurement. Potentiometers: Basic Potentiometer circuit-Laboratory Type (Crompton's) potentiometer-Applications: calibration of ammeter, voltmeter, wattmeter using potentiometer, measurement of unknown resistance using DC potentiometer.							9+3
Unit – III	Methods of Measurements using AC bridges :						
Introduction to A.C. bridges-Sources and detectors-General Equation for bridge balance-General form of an AC bridge Measurement of Self Inductance: Maxwell's inductance Bridge and Anderson's bridge. Measurement of Capacitance: Schering bridge. Measurement of Mutual Inductance: uses of Mutual Inductance in bridge circuits, Heaviside mutual inductance bridge. Measurement of frequency: Wien's bridge.							
Unit – IV	Display Devices and Recorders:						
Segmental Displays: Seven segment display-Dot Matrices-Rear Projection Display-Nixie Tube- Light Emitting Diode-Liquid Crystal Diode-X-Y Recorders-Magnetic Tape Recorders-Digital tape recorders							9+3
Unit – V	Transducers:						
Classification of Transducers-Primary and Secondary –Passive and Active- Analog and Digital-Inverse Transducers. Resistive Transducers: Strain Gauges-Theory of Strain Gauge- Thermistor: Construction of Thermistor. Thermocouple: Construction of Thermocouple. Linear Variable Differential Transformers (LVDT): Construction – Advantages and Disadvantages.

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN – THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	40	30	30				100
CAT2	30	30	40				100
CAT3	40	60					100
ESE	40	40	20				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIO02 - BIOMEDICAL INSTRUMENTATION AND APPLICATIONS
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/Btech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	1	0	4
Preamble	To impart the knowledge of some human anatomy and measuring bio potentials using bio electrodes with specific instruments which is most commonly used in hospitals. Also understand the fundamental concept of various biomedical imaging techniques and learn the advanced physiological assistive medical devices						
Unit – I	Human Physiological Systems:						
Cell and its structure – Resting and action potentials – Different systems of human body: Circulatory system – Respiratory system – nervous system – Components of the Bio medical instrument system – strain gauge as pressure transducer – photoelectric type resistive transducer – piezoelectric ultrasonic transducer.							9+3
Unit – II	Bio Potential Electrodes:						
Micro electrode-depth and needle electrode-surface electrodes. Biomedical Electrical signal measurement: ECG, EEG, EMG, EOG and ERG: Lead systems, recording methods and typical waveforms.							9+3
Unit – III	Biomedical Non Electrical Signal Measurement:						
Phonocardiography – GSR- Blood pressure Measurement: Sphygmomanometer, MEMS based catheter tip pressure sensor, ultrasonic blood pressure monitor. Spirometer – Blood pH measurement – Ear oximeter – Pulse oximeter – Lung volumes, respiration and cardiac rate.							9+3
Unit – IV	Biomedical Imaging Systems:						
X-ray machine – Computer tomography – Thermography – Ultrasonic imaging systems – Magnetic resonance imaging – PET – SPECT – FMRI – Magnetic Particle Imaging.							9+3
Unit – V	Physiological Assist Devices:						
Ventricular asynchronous pacemaker – AC Defibrillator – Heart lung machine – Kidney machine – Audiometer – Biothesiometry- Vibroscreen – Biotelemetry – Telemedicine.							9+3

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	interpret the basic principles and phenomena of Biomedical Engineering													Understanding (K2)
CO2	record the bioelectric potentials using bio potential electrode through bio signal recording devices													Applying (K3)
CO3	measure biomedical signal parameters through medical instruments													Applying (K3)
CO4	summarize the basic principles in medical imaging techniques													Understanding (K2)
CO5	illustrate the physiological assist devices													Applying (K3)

Mapping of COs with Pos and PSOs

COs/Pos	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1				2		1					2	2
CO2	3	2	1	1	1	2		1					3	3
CO3	3	2	1	1	1	2		1					3	3
CO4	3	1				2		1					2	2
CO5	3	2	1	1	1	2		1					3	3

ASSESSMENT PATTERN – THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	40	40				100
CAT2	10	40	50				100
CAT3	10	40	50				100
ESE	10	40	50				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIO03 - INDUSTRIAL AUTOMATION
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/Btech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	1	0	4
Preamble	To provide solution towards better control action for various process applications						
Unit – I	Introduction To Industrial Automation:						
Automation – Industrial Automation vs. Industrial Information Technology – Role of automation in industry – Types of production systems – Types of Automation Systems – The Functional Elements of Industrial Automation – Industrial Sensors and Instrument Systems – Industrial Actuator Systems – Industrial Control Systems – The Architecture of Elements: The Automation Pyramid.							9+3
Unit – II	Programmable Logic Controllers (PLCs) An Overview:						
Parts of a PLC –Principle of operation. PLC Hardware Components: Discrete I/O Modules- Analog I/O modules – The Central Processing Unit (CPU) – Programming Terminal Devices. Converting Relay Schematics into PLC Ladder Programs. Programming Timers: Timer Instructions – Types of timers – On-Delay Timer Instruction – Off-Delay Timer Instruction – Retentive Timer.							9+3
Unit – III	Advanced PLC Programming:						
Programming Counters: Counter Instructions – Up-Counter – Down counter – Cascading Counters – Program Control Instructions: Master Control Reset Instruction – Subroutine Functions. Data Manipulation Instructions: Data Compare Instructions. Math Instructions: Addition Instruction – Subtraction Instruction – Multiplication Instruction – Division Instruction.							9+3
Unit – IV	Process Control, Network Systems, and SCADA:						
Types of Processes – Structure of Control Systems – On/Off Control – PID Control – Motion Control – Data Communications – Supervisory Control and Data Acquisition (SCADA) – Human Machine Interfaces (HMIs) – Introduction to DCS							9+3
Unit – V	Internet of Things – An Overview:						
Introduction – Internet of Things Definition Evaluation – IoT Architectures – IoT Data Management and Analytics – Communication Protocols – Internet of Things Applications – Security – Identity Management and Authentication – Privacy – Standardization and Regulatory Limitations.							9+3
Lecture:45, Tutorial:15, Total:60							
TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	explain the concepts about basics of automation system	Understanding (K2)
CO2	develop programming with PLC	Applying (K3)
CO3	analyze theory of operation in advanced PLC and SCADA	Applying (K3)
CO4	interpret the architectural interfaces and operation about DCS	Understanding (K2)
CO5	illustrate the advanced technologies, opportunities, challenges to bring out industry 4.0	Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1											2	2
CO2	3	2	1	1	1								3	3

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	50	30				100
CAT2	10	40	50				100
CAT3	30	70	-				100
ESE	10	50	40				100

* ±3% may be varied (CAT 1, 2 & 3 – 50 marks & ESE – 100 marks)

22EIO04 -PLC PROGRAMMING WITH HIGH LEVEL LANGUAGES
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	6	OE	3	1	0	4							
Preamble	To develop PLC programs using high-level languages, troubleshoot and debug PLC programs													
Unit - I	Programmable Logic Controllers (PLCs) An Overview:													
Introduction - Parts of a PLC - Principle of operation - PLC Hardware Components: The I/O Section - Discrete I/O Modules- Analog I/O modules - Special I/O modules - I/O Specifications – The Central Processing Unit (CPU) – Programming Devices.														
Unit - II	Basics of PLC Programming:													
Program Scan – PLC Programming Languages –Instruction Addressing – Branch Instructions – NO and NC Instructions – Modes of Operations. Seal-In Circuits – Latching – Simple PLC ladder programming.														
Unit - III	Programming Timers and Counters:													
Timers: On-Delay Timer Instruction – Off-Delay Timer Instruction – Retentive Timer – basic applications. Counters: Counter Instructions – Up-Counter – Down-Counter –Combining Counter and Timer Functions - basic applications.														
Unit - IV	PLC Programming with high level languages:													
Review of Python syntax and data structures - Python scripts with Node-RED - communication between Node-RED and PLCs - Reading and writing data to PLC registers -IoT devices with Node-RED.														
Unit - V	Advanced PLC Programming for Basic Applications:													
PLC programming with C++ - Database creation with MySQL - Automatic Door opening and closing –One way traffic light control - Motor Start-Stop Operation control- Elevator Control - Water Tank Level Control														
Lecture:45, Tutorial:15, Total:60														
TEXT BOOK:														
1.	Frank D. Petruzzella, "Programmable Logic Controllers", 5 th Edition, Tata McGraw Hill Education Private Limited, New Delhi, 2019.

2.	http://instrumentation tools.com/learn-programmable-logic-controller-plc/													

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	examine the basic components of PLC												Applying (K3)
CO2	distinguish between programming logics and languages of PLC												Understanding (K2)
CO3	develop PLC programs with times and counters												Applying (K3)
CO4	develop PLC programs with high level languages												Applying (K3)
CO5	create database for data storage and develop select applications												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO3	3	2	1		1								3	3
CO4	3	2	1		1								3	3
CO5	3	2	1		1								3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		40	60				100
CAT2		60	40				100
CAT3		20	80				100
ESE		40	60				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIO05 - VIRTUAL INSTRUMENTATION
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	OE	3	1	0	4
Preamble	Virtual instrumentation is a powerful concept for control, measuring, testing and analysis of real time problems. This course aims at giving an adequate exposure and practice in LabVIEW programming and DAQ system to overcome the limitations of classical methods.						
Unit – I	Introduction to Virtual Instrumentation:						
Virtual Instrumentation- Programming Requirements- Drawbacks of Recent Approaches- Virtual Instruments Versus Traditional Instruments- Advantages of VI- Creating Virtual Instruments Using LabVIEW- Virtual Instrumentation in the Engineering Process- Graphical Programming and Textual Programming- Advantages of LabVIEW- LabVIEW Environment- Dataflow Programming- G Programming.							9+3
Unit – II	Basic Tools, Loops and Graphs:						
Front Panel-Block Diagram Tools and Palettes- Repetition and Loops: FOR Loop, While Loop, Shift Registers, Tunnels, Feedback Nodes, Local and Global Variables – Arrays-Clusters-Waveform Charts-Waveform Graphs-XY Graphs-Intensity Graphs and Charts-Digital Waveform Graph-3D Graphs.							9+3
Unit – III	Programming with Structures:						
Structures: Case Structure, Sequence Structures, Customizing Structures, Timed Structures, Formula Nodes, Event Structure, MathScript-Strings-File I/O-State Machine.							9+3
Unit – IV	Data Acquisition:						
Interface Buses: RS 232, RS422, RS485, GPIB and USB. Hardware Aspects: Signal Grounding-Signal Conditioning-Digital I/O Techniques-Data Acquisition in LabVIEW-Hardware Installation and Configuration-Components of DAQ-DAQ Signal Accessory-DAQ Assistant-DAQ Hardware- DAQ Software.							9+3
Unit – V	Tools and Applications:						
Signal processing and Analysis Tools-Control System Design and Simulation Tools-Signal, Voltage and Current measurement using general purpose DAQ Card-Bio-Medical Signal Acquisition using NI-ELVIS –Temperature Measurement.							9+3
Lecture:45, Tutorial:15, Total:60							
TEXT BOOK:							
1.	S.Sumathi , P.Surekha, "LabVIEW based Advanced Instrumentation Systems", 1 st Edition, Springer Berlin, Heidelberg, 2007.						
REFERENCES:							
1.	Jovitha Jerome, "Virtual Instrumentation Using LabVIEW", 3 rd Edition, PHI Learning Pvt. Ltd., New Delhi, 2012.						

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	explain the Virtual Instrumentation concepts												Understanding (K2)
CO2	apply structured programming concepts in developing LabVIEW programs												Applying (K3)
CO3	build LabVIEW programs using structures, nodes and state machine concepts												Applying (K3)
CO4	utilize DAQ System to solve real time problems												Applying (K3)
CO5	apply knowledge on various tools in practical works												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1											2	2
CO2	3	2	1	1	1								3	3
CO3	3	2	1	1	1								3	3
CO4	3	2	1	1	1								3	3
CO5	3	2	1	1	1								3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		70	30				100
CAT2		30	70				100
CAT3		30	70				100
ESE		30	70				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIO06 - INTRODUCTION TO DISTRIBUTED CONTROL SYSTEMS
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	OE	3	0	0	3

Preamble This course provides the basic concepts in Control Systems and gives an introduction to distributed control systems, its interfaces, displays and applications.

Unit - I	Control Systems:	9
-----------------	-------------------------	----------

Control System: Definition, Open loop and closed loop control system, Open loop and closed loop systems-P, PI, PD and PID controller-Signal conversions: I/P converter - Actuators: Electric and Pneumatic type-Sensors

Unit - II	Distributed Control Systems:	9
------------------	-------------------------------------	----------

Evolution of Distributed Control Systems: Traditional Control System Developments – Computer-based Control System Developments – Resulting System Architecture - Emergence of the Distributed Control System architecture: Hybrid System Architecture, Central Computer System Architecture – Generalized Distributed Control System Architecture

Unit - III	Microprocessor based Controller:	9
-------------------	---	----------

Basic elements of a microprocessor based controller – Functional blocks: An introduction – Comparison of Architectures - Security design issues for the local control unit: Redundant controller designs.

Unit - IV	DCS Operator Interfaces:	9
------------------	---------------------------------	----------

Operator interfaces: Introduction – Low level operator interface – High level operator interface: Architectural alternatives, Hardware elements in the operator interface, Operator displays. Engineering interfaces: Engineering interface requirements.

Unit - V	DCS issues and Applications:	9
-----------------	-------------------------------------	----------

Power Plants - Water and waste water treatment plants - Cement plants – Pulp and Paper plants – Glass –making Plants – Oil and Gas Fields.

Total:45

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	provide basic concepts in Control Systems													Understanding (K2)
CO2	describe the architecture of Distributed Control Systems													Understanding (K2)
CO3	give adequate information with respect to interfaces used in DCS													Applying (K3)
CO4	choose the operator Interfaces and displays in DCS													Applying (K3)
CO5	apply DCS for select applications													Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1						1		2			2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		100					100
CAT2		50	50				100
CAT3		30	70				100
ESE		40	60				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

\

22EIO07 - INSTRUMENTATION IN AIRCRAFT NAVIGATION AND CONTROL
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	OE	3	0	0	3							
Preamble	To discuss the concepts of aircraft instruments and cockpit layout in modern aircraft and deals with the conventional and advanced flight instruments.													
Unit – I	Basics of Aircraft and Aircraft Instruments:													
Introduction – Control Surfaces – Forces – Moments and Angle of Attack – Engines – Avionics – Modern Aircraft System. Aircraft Instruments and their Layout – Aircraft Display Types – Quantitative and Qualitative Display – Instrument Grouping – Basic T Grouping, Glass Cockpits of Modern Aircraft.														
Unit – II	Air Data Instruments and Directional Systems:													
Introduction to Air Data Instruments – Pitot pressure and Pitot tube – Types of Air Data Instruments – Pneumatic-type Air Data Instruments – Air Speed Indicator, Air Data Computer – International Standard Atmosphere – Air Data Instruments – Directional Systems: Magnetic Compass – Earth Magnetic Field – Flux Detector Unit.														
Unit – III	Gyroscopic and Advanced Flight Instruments:													
Introduction – Types of Gyro – Conventional Mechanical, Vibrating Gyros, RLG, FOG – Basic Mechanical Gyro and its Properties – Directional Gyro and limitations – Gyro Horizon – Turn and Bank Indicator – Turn Coordinator – Standby Attitude Director Indicator Advanced Direction Indicators.														
Unit – IV	Engine Instruments and Indicators:													
Introduction – Engine Speed Measurements – Electrical Tacho Generator/Indicator, Servo Type, Non-Contact Type, Optical Tachometer, Hall Effect Sensor – Torque Measurements – Electronic Torque Meter – Pressure Measurements – Engine Pressure Ratio Indicator. Engine Fuel Indicators: Fuel Quantity Indicator.														
Unit – V	Aircraft Navigation and Safety Warning Systems:													
Introduction – Radio Navigation Aids – VHF Omni Directional Range System DME/ILS/INS/GPS – Principle of VOR operation – Distance Measuring Equipment, Instrument Landing Systems –Inertial Navigation System: Principle, Gimbaled and Strap Down INS – Global Positioning System. Air Data Warning Systems.														
Total:45														
TEXT BOOK:														
1.	Nagabhushana S & Sudha L K. "Aircraft Instrumentation and Systems", 2 nd Edition, I.K. International Publishing House Pvt. Ltd., New Delhi, 2013.

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		60	40				100
CAT2		30	70				100
CAT3		60	40				100
ESE		50	50				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

**22EIO08 - INDUSTRY 4.0 WITH INDUSTRIAL IoT
(Offered by Department of Electronics and Instrumentation Engineering)**

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	OE	3	0	0	3
Preamble	To transform the industrial processes through the integration of modern technologies such as sensors, communication, and computational processing.						
Unit – I	Introduction to Industrial IoT and Industry 4.0:						
Introduction - IoT Background and History, IIoT key technologies, IoT and IIoT similarities and differences – Innovations and the IIoT – Intelligent devices – Key opportunities and benefits: Digital and human workforce – Industrial Internet use-cases - Industry 4.0: Characteristics and design principles.							9
Unit – II	IIoT Architectures:						
IIoT Reference Architecture – Industrial Internet Architecture Framework – Five Functional domains – Three tier architecture topology – Connectivity: Key system characteristics, Connectivity security and functional characteristics – Functions of communication layer – Overview of Predictive Maintenance Architecture.							
Unit – III	IIoT WAN Technologies and Protocols:						
Need of Protocols – Legacy Industrial protocols – Modern Communication protocols: Industrial Ethernet, Encapsulated Field Bus, Standard Ethernet. IIoT device Low-Power WAN optimized technologies for M2M: SigFox, LoRaWAN, nWave, Dash7, Ingenu RPMA, Low Power Wi-Fi, LTE Category-M, Weightless, Millimeter Radio.							9
Unit – IV	Industrial IoT Security and Governance:						
Introduction – Security threats and vulnerabilities of IoT – Industrial challenges – Evolution of Cyber attacks: cyber attacks and solutions – Strategic principles of cyber security – cyber security measures - Industrial IoT security architecture: IIoT architecture patterns – four Tier IIoT security model- Management risks with IIoT.							
Unit – V	Industrial IoT Analytics and Applications:						
Software Defined Networks: Difference between SDN and NFV – Cloud and Fog - Big Data and Analytics in IIoT. Recent Technological components of Robots: Industrial Robotic applications – Industrial application of AR: Maintenance, assembly, operation and training.							
Total:45							
TEXT BOOK:							
1.	Alasdair Gilchrist, "Industry 4.0: The Industrial Internet of Things", 1 st Edition, Apress Media, NewYork, 2016.

COURSE OUTCOMES:												BT Mapped (Highest Level)	
On completion of the course, the students will be able to													
CO1	explore the basics of industrial internet of things												Understanding (K2)
CO2	develop the concepts of various architectures and components												Applying (K3)
CO3	design and implement protocols and sensors for IIoT												Applying (K3)
CO4	impart the knowledge of IIoT security layers												Understanding (K2)
CO5	apply IIoT in real time Industrial applications												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1		1				1				1	2	2
CO2	3	2	1	2	1			2				2	3	3
CO3	3	2	1	2	1			2				2	3	3
CO4	2	1		1				1				1	2	2
CO5	3	2	1	2	1			2				2	3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		40	60				100
CAT2		20	80				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIO09 - INDUSTRIAL DATA COMMUNICATION (Offered by Department of Electronics and Instrumentation Engineering)														
Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	OE	3	0	0	3							
Preamble	To educate on the basic concepts of data communication, different industrial communication protocols and wireless communication.													
Unit – I	Serial communication:													
Serial Communication: OSI reference model – Protocols – RS-232 overview, RS-232 interface standard (CCITT V.24 interface standard) – Half-duplex operation of the RS-232 interface – Limitations – RS-485 overview – The RS-485 interface standard – RS-485 vs RS-422 – The 20 mA Current loop.														
Unit – II	Copper Cable and Fiber Optics Cable Communication:													
Copper cable: Characteristics – Cable selection – Coaxial cables – Twisted-pair cable – Distribution/installation standards – Connector standards. Fibre optics Communication: Fiber-optic cable components – Cable parameter – Types of optical fiber – Basic cable types – Connecting fibers.														
Unit – III	MODBUS, PROFIBUS PA/DP/FMS and TCP/IP:													
MODBUS: Modbus Overview – MODBUS protocol structure – Function codes – query response cycle, transmission mode, Message Formatting. PROFIBUS PA/DP/FMS: PROFIBUS protocol stack- The PROFIBUS communication model- Relationship between application process and communication – Communication objects. TCP/IP – TCP/IP overview: Introduction – Internet Layer Protocols (Packet Transport) – Host-to-host layer: end to end reliability. TCP/IP troubleshooting: Introduction – Common problems – Typical network layer problems – Transport layer problems.														
Unit – IV	HART and Foundation Field Bus:													
HART: HART Introduction – HART and smart instrumentation – Physical layer, Data link and application layer – HART Commands. Foundation Field Bus: Introduction – The Physical layer and Wiring Rules, The Data link layer, The Application layer, The User layer, Error detection and diagnostics - High-speed Ethernet (HSE)														
Unit – V	Industrial Ethernet and Wireless Communication:													
Industrial Ethernet: Introduction – 10 Mbps Ethernet – 100 Mbps Ethernet – Gigabit Ethernet – Industrial Ethernet. Wireless communication: Satellite systems – Wireless LANs- Radio and wireless communication : Introduction – components of radio link – radio spectrum and frequency allocation – Radio MODEMs.

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	Make use of the essentials of the communication system and learn the serial communication interface												Applying (K3)
CO2	Interpret knowledge about Copper cable and Fiber optic cable communication												Understanding(K2)
CO3	Select the suitable communication protocols of various industries.												Understanding(K3)
CO4	Identify the architecture and applications of HART and Field bus												Applying (K3)
CO5	Examine the concepts of Industrial Ethernet and wireless communications												Applying (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	1		1		1	2				1	3	3
CO2	2	1						1				1	2	2
CO3	2	1						1				1	2	2
CO4	3	2	1		1		1	2				1	3	3
CO5	3	2	1		1		1	2				1	3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		30	70				100
CAT2		40	60				100
CAT3		30	70				100
ESE		40	60				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIO10 - WIRELESS INSTRUMENTATION
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	OE	3	0	0	3							
Preamble	To impart knowledge on wireless technology for instrumentation, wireless components and its applications. To provide adequate technical information on power sources, wireless protocols and network implementation													
Unit – I	Wireless Instrumentation Technology:													
Introduction – Instruments and Instrumentation: Measurement systems – Multiplexing structures – Wireless instruments and communication protocols – RF interfaces and examples – Networks of wireless instruments – Sensor node components: Computing subsystem – Communication subsystem – Power subsystems – Sensing subsystems.														
Unit – II	Powering Autonomous Sensors:													
Autonomous sensors – Ambient energy sources and transducers – Energy storage units – Power considerations of wireless instruments – Energy harvesting: Solar and wind energy harvesting, RF energy harvesting, Energy harvesting from vibration, Thermal energy harvesting – Energy management techniques – Calculation for battery selection – Understanding RSSI and LQI values.														
Unit – III	Wireless Systems/Standards for Automation:													
Wireless HART: Protocol stack – Network components – Addressing control – Coexistence techniques. ISA100.11a: Introduction – Scope – Working group of ISA 100 – Features – Sensor classes – System configuration and architecture of ISA 100.11a – Comparison between ISA100.11a and WHART protocol stacks.														
Unit – IV	Design of Wireless Devices and LoRa:													
Wireless sensor and instrument network design – Wireless integrated network sensors – Plug-and-play sensors and networks – Industrial wireless networks and automation. Introduction – Communication Methods – Difference between LoRa and LoRaWAN – LoRaWAN architecture – LoRaWAN classes.														
Unit – V	Wireless Sensor and Instrument Applications:													
Application specific wireless sensors and instruments – Commercial wireless sensors and instruments – Industrial wireless sensor and instrument networks – Wireless human health monitoring and environmental applications – Radio frequency identification – Consumer products and other applications – Applications in Transportation and Agriculture.

3.	Halit Eren, "Wireless Sensors and Instruments: Networks, Design, and Applications", 1 st Edition, CRC Press, 2006													

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	identify different instrumentation systems and fundamentals of wireless technology												Understanding (K2)
CO2	make use of the power sources and energy storage units used for autonomous sensors												Applying (K3)
CO3	recognize the different wireless protocols and network standards for wireless instruments												Understanding (K2)
CO4	discover design concepts and procedure for wireless devices and LoRA												Applying (K3)
CO5	demonstrate the various applications of wireless sensor and instrument systems and networks												Applying (K3)

Mapping of COs with POs and PSOs

COs/ POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22EIO11 - INSTRUMENTATION TECHNIQUES IN AGRICULTURE
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	7	OE	3	0	0	3							
Preamble	To discuss the sensing and automation technology associated with agriculture.													
Unit – I	Necessity of Instrumentation:													
Necessity of instrumentation & control for agriculture and food processing requirement, World Agriculture Scenario, Indian Agriculture sector – A synoptic Review- Areas of Concern. Information, Interpretation and Instruction Systems – Agri Instrumentation. Introduction to Transducers – Characteristics.														
Unit – II	Agri Transducers:													
Technology Trend – Conventional and Silicon transducers, Capacitive gauges, Silicon Displacement transducer, Silicon Temperature transducer, Silicon Pressure Transducer. Grain Moisture transducers, soil moisture transducers, Humidity transducers, pH transducers, Gas transducers, Intelligent Sensors.														
Unit – III	Automation in Agriculture:													
Microprocessor based Grain moisture measurement- Introduction, Sensing Mechanism, I/O requirement analysis. Microprocessor based Soil Nutrient Estimation Systems- Soil nutrients and their role, collection of samples, soil nutrient estimation, sensing mechanism. Preparation of soil extract for estimation of N,P,K and S, I/O requirement Analysis. SCADA Based system for Agriculture process monitoring. Case Study : Interfacing of agri sensors with Microcontroller.														
Unit – IV	Drip Irrigation and Precision Agriculture:													
Introduction-Sensors, Hardware block Schematic, system operation, I/O Requirement Analysis, Hardware Systems. Precision: Introduction, need for precision agriculture. Subsystem and components- GPS, Agri sensors, DAS, Communication System. Precision agriculture status – Working Philosophy.														
Unit – V	Green House Cultivation:													
Designs and classification of greenhouse- Orientation of Greenhouse / Poly house- Components of green house- Plant growing structures/containers in green house production- Environmental factors influencing greenhouse cultivation- Media preparation and fumigation- Drip irrigation and fertigation systems greenhouse cultivation- Problem management in greenhouse cultivation.														
Total:45

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	Discuss the necessity of instrumentation for agriculture												Understanding (K2)
CO2	Make use of the Soil parameters and transducers in agricultural instrumentation												Applying(K3)
CO3	Interpret the techniques of agriculture using Microprocessor and SCADA												Understanding (K2)
CO4	Employ the agricultural concepts required for Drip Irrigation and Precision Agriculture												Applying(K3)
CO5	Utilize the concepts of instruments in Green house cultivation												Applying(K3)

Mapping of COs with POs and PSOs

22EIO12 - ENVIRONMENTAL SENSORS
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	8	OE	3	0	0	3							
Preamble	This course is a fundamental course on sensors, instruments and real-time systems to monitor environmental systems.													
Unit – I	Fibre Optic Sensors:													
The need for environmental monitoring and new technology-principles of fibre optic chemical sensors: Fluorescence sensors- Raman sensors-Evanescent field sensors - fibre optic sensors for environmental applications: Air pollutants, Seawater monitoring, Ground and drinking water contamination and Soil contamination.														
Unit – II	Integrated Optic Sensors:													
Introduction to integrated optics- Fabrication of integrated optic devices- Sensor techniques in integrated optics: Evanescent waves, Spectroscopy, Ellipsometry, Surface plasmon resonance, Light scattering - Applications of integrated optic devices for environmental sensing: An integrated optic biosensor- An integrated optic gas sensor.														
Unit – III	Piezoelectric Sensors and Gas Analysers:													
Piezoelectric crystal theory, Instrumentation, Gas analysis, Piezoelectric aerosol sensors, Piezoelectric crystal liquid sensors, PZ sensor coatings operating in liquids. Gas analysers: Principles of operation, Differential optical absorption spectroscopy, Fourier transform IR spectroscopy, Differential absorption LIDAR, Laser-induced fluorescence, Chemiluminescent techniques.														
Unit – IV	Monitoring of Land Pollution:													
Common contaminant types and environmental behavior: Contaminants and site use, Commonly occurring contaminant types, Factors affecting contaminant behavior - Monitoring equipment and instrumentation: Discrete monitoring: indirect determination of subsurface conditions, Discrete monitoring: direct determination of subsurface conditions, Field testing kits, Continuous and automatic monitoring.														
Unit – V	Monitoring of Water Pollution and Air Pollution:													
Water Pollution: Continuous monitoring - Physical variables: Temperature, Conductivity, salinity and total dissolved solids, Turbidity and suspended solids, Colour. Chemical variables: Dissolved oxygen, Acidity, alkalinity and pH, Anions, Cations. Biological variables: Biochemical oxygen demand- Total organic carbon, Chemical oxygen demand. Air Pollution: Air quality standards - Characterisation of atmospheric pollutants – Air pollution sampling - Monitoring modes.														
Total:45														
TEXT BOOK:														
1.	Miguel F. Acevedo, "Real-Time Environmental Monitoring Sensors and Systems", 1 st Edition, CRC Press, United States, 2015.

COURSEOUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	Identify the role of fibre optic sensors for environmental monitoring	Understanding(K2)
CO2	Apply the integrated optic sensors for environmental sensing	Applying(K3)
CO3	Apply the piezoelectric sensors and gas analyzers for environmental monitoring	Applying(K3)
CO4	Identify the cases and concept to land pollution	Applying(K3)
CO5	Explain the concept of Water pollution and Air pollution	Understanding(K2)

Mapping of Cos with Pos and PSOs

*±3% maybe varied(CAT1,2&3–50 marks & ESE– 100 marks)

22EIO13 - POLLUTION CONTROL AND MANAGEMENT
(Offered by Department of Electronics and Instrumentation Engineering)

Programme & Branch	All BE/BTech branches except Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	8	OE	3	0	0	3
Preamble	The course will cover various aspects of pollution control, including the causes and effects of pollution, regulatory frameworks, and management strategies. Students will gain an understanding of the various types of pollutants, their sources, and the impact they have on the environment and human health.						
Unit – I	Introduction to Pollution Control Management:						
Introduction to Pollution Control Management - Professional Codes of Ethics - Environmental Ethics - Environmental Systems Overview: Water Resource Management System - Wastewater Disposal Subsystem - Air Resource Management System.							9
Unit – II	Water Pollution:						
Water Pollutants And Their Sources - Water Pollution In Rivers - Water Pollution In Lakes - Water Pollution In Estuaries - Groundwater Pollution – Applications.							9
Unit – III	Wastewater Treatment:						
Characteristics of Wastewater - Wastewater Treatment Standards - Municipal Wastewater Treatment Systems - Land Treatment For Sustainability - Sludge Treatment - Alternative Sludge Disposal Techniques.							9
Unit – IV	Air Pollution:						
Air Pollution Perspective - Effects of Air Pollutants - Origin and Fate of Air Pollutants - Micro and Macro Air Pollution - Air Pollution Meteorology - Air Pollution Control of Stationary Sources - Air Pollution Control of Mobile Sources.							9
Unit – V	Solid Waste Management:						
Characteristics of Solid Waste - Solid waste management decision alternatives - Integrated Solid Waste Management - Collection Methods - Disposal by Municipal Solid Waste Landfill - Waste to Energy – Case study.							9
Total:45							
TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	outline the fundamentals of pollution control and management												Understanding (K2)
CO2	interpret the concepts of water pollution and control methods												Understanding (K2)
CO3	summarize the methods of wastewater treatment and waste disposal												Understanding (K2)
CO4	apply suitable method for air pollution management techniques												Applying (K3)
CO5	identify various method for solid waste management techniques												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		100					100
CAT2		100					100
CAT3		40	60				100
ESE		70	30				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22GEO01 - GERMAN LANGUAGE LEVEL 1														
(Offered by Department of Electronics and Communication Engineering)														
Programme& Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	All	OE	4	0	0	4							
Preamble	This course serves as an introduction to the German language and awareness towards German lifestyle and cultural aspects of Germany and German speaking countries. One can learn to introduce oneself and able to gain the basic day to day vocabulary. On keen learning one would be able to understand the sentence structure and be able to reciprocate to basic questions													
Unit – I	Good Day (Guten Tag)													
	Greetings, Self-introduction and introducing others, Numbers, Alphabets, Countries and languages spoken. Grammar – W questions, Simple sentences, Verb conjugation and personal pronoun.													
Unit – II	Friends & Colleague (Freund und Kollegen):													
	Hobbies, Profession, Week, Months, Season and Generate Profile. Grammar – Articles, Plural, Verbs – have and to be, Yes/No questions.													
Unit – III	In the City (In der Stadt):													
	Name of places/buildings in the city, asking for directions, Understanding means of transport. Grammar – definite and indefinite articles, Negation articles and Imperative													
Unit – IV	Food and Appointment (Essen und Termin):													
	Food, Shopping, initiate conversations to understand and do shopping. Grammar – Accusative case, Verbs with Accusative. Understanding time and reciprocating, Appointments, Asking excuse, Family. Grammar – Prepositions: <i>am, um, von...bis</i> , Possessive articles- <i>mein, dein..</i> , Modal verbs- <i>müssen, können, wollen</i>													
Unit – V	Socializing (Zeit mit Freunden):													
	Planning together, Birthday, Invitation, Restaurant, looking for specific information in texts. Grammar – Separable verbs, Prepositions with Accusative case, Past tense of have and to be, Personal pronoun with Accusative.													
Total:60														
TEXT BOOK:														
1.	Stefanie Dengler, Paul Rusch, Helen Schmitz, Tanja Sieber, "Netzwerk Deutsch als Fremdsprache A1–ursbuch, Arbeitsbuch und Glossar with 2 CDs", Goyal Publishers, Delhi, 2015.

2.	https://www.dw.com/en/learn-german - Deutsche Welle, Germany's International Broadcaster													

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	understand structure of language and introducing each other													Remembering (K1)
CO2	understand vocabulary on seasons and basic verbs													Understanding (K2)
CO3	ask for directions in a new place and avail transport as required													Understanding (K2)
CO4	understand food habits of German and ask for appointments.													Understanding (K2)
CO5	learn to socialize in a German speaking country													Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1								1	2	3			3	
CO2								1	2	3			3	
CO3								1	2	3			3	
CO4								1	2	3			3	
CO5								1	2	3			3	

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	75	25					100
CAT2	25	75					100
CAT3	25	75					100
ESE	25	75					100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

22GEO02 - JAPANESE LANGUAGE LEVEL 1														
(Offered by Department of Electronics and Communication Engineering)														
Programme& Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	All	OE	4	0	0	4							
Preamble	The basic level of Japanese which provides understanding of Hiragana, Katakana and 55 Kanjis also enables one to greet, introduce oneself and other person and also provides the ability to understand basic day to day conversations													
Unit – I	Introduction to Hiragana and Katakana: Chart 1, Chart 2, Chart 3, Annexures 1 and 2 and basic Japanese rules along with similar sounded vocabularies for each chart.													
Unit – II	Introduction to Nouns, various particles and usages: Forming simple sentences, asking questions, positioning differentiation and owning fundamentals – new particles and usages													
Unit – III	Introduction of Verbs, time and place markers: Usage of action words in sentences and framing them – place and time markers usages – giving and receiving – omission of certain particles in a sentence.													
Unit – IV	Introduction of Adjectives, Adverbs and usages: Describing nouns and verbs and framing them to relate day to day conversations- positive and negative ending of the same – introduction of the likes and dislikes expressions													
Unit – V	Introduction to Counters and Kanji: How to use numbers-How to use quantifiers-Present form of adjectives and Nouns-Other necessary particles-How to use numbers and quantifiers – 55 kanji characters													
Total:60

CAT3	25	75					100
ESE	25	75					100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

22GEO03 - DESIGN THINKING FOR ENGINEERS													
(Offered by Department of Computer Science and Engineering)													
Programme & Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit						
Prerequisites	Nil	5	OE	3	1	0	4						
Preamble	Design Thinking is human-centered problem solving tool which emphasize on empathy, collaboration, co-creation and stakeholder feedback to unlock creativity and innovation, to devises feasible and viable idea/solutions.												
Unit – I	Design Thinking and Explore:						9+3						
Design Thinking: Key Principles and Mindset – Five Phases, Methods and Tools of Design Thinking – User Guide – Foundation Building for Design Thinking – Explore: Methods & Tools – STEEP Analysis – Strategic Priorities – Activity System – Stakeholder Mapping – Opportunity Framing.													
Unit – II	Empathize						9+3						
Empathize: Methods & Tools – Field Observation – Deep User Interview – Empathy Map – User Journey Map - Need Finding – User Insights - User Persona Development.													
Unit – III	Experiment						9+3						
Experiment: Methods & Tools – Ideation – SCAMPER – Analogous Inspiration – Deconstruct & Reconstruct – User Experience Journey – Prototyping– Idea Refinement.													
Unit – IV	Engage						9+3						
Engage: Methods & Tools – Story Telling – Art of Story Telling – Storyboarding – Co-Creation with Users – Collect Feedback from Users.													
Unit – V	Evolve						9+3						
Evolve: Methods & Tools – Concept Synthesis – Strategic Requirements –Evolved Activity Systems – Activity System Integration – Viability Analysis – Innovation Tools using User Needs, CAP, 4S – Change Management - Quick Wins.													
Lecture:45, Tutorial:15, Total:60													
TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	Construct design challenge and reframe the design challenge into design opportunity.												Applying (K3)
CO2	Interview the user, and know the feelings of users to foster deep user understanding and be able to uncover the deep user insights and needs.												Applying (K3)
CO3	Develop ideas and prototypes by brain storming using the ideation tools.												Applying (K3)
CO4	Organize the user walkthrough experience using ideal user experience journey.												Applying (K3)
CO5	Develop smart strategies & implementation plan that will deliver/achieve the idea/solution deduced from earlier phases.												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO 1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22GEO04 - INNOVATION AND BUSINESS MODEL DEVELOPMENT														
(Offered by Department of Mechatronics Engineering)														
Programme & Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	6	OE	3	1	0	4							
Preamble	This course will inspire the students to think innovation concepts and ideas for business model developments.													
Unit - I	Innovation and Design Thinking:													
Innovation and Creativity– Types of innovation – challenges in innovation- steps in innovation management- 7 concerns of design. Design Thinking and Entrepreneurship – Design Thinking Stages: Empathize – Define – Ideate – Prototype – Test. Design thinking tools: Analogies – Brainstorming – Mind mapping														
Unit - II	User Study and Contextual Enquiry:													
Explanatory research – primary and secondary data – classification of secondary data – sources of secondary data – qualitative research – focus groups – depth interviews – analysis of qualitative data – survey methods – observations- Process of identifying customer needs –organize needs into a hierarchy –establish relative importance of the needs- Establish target specifications														
Unit - III	Product Design:													
Techniques and tools for concept generation, concept evaluation – Product architecture –Minimum Viable Product (MVP)- Product prototyping – tools and techniques– overview of processes and materials – evaluation tools and techniques for user-product interaction														
Unit - IV	Business Model Canvas (BMC):													
Lean Canvas and BMC - difference and building blocks- BMC: Patterns – Design – Strategy – Process–Business model failures: Reasons and remedies														
Unit - V	IPR and Commercialization:													
Need for Intellectual Property- Basic concepts - Different Types of IPs: Copy Rights, Trademarks, Patents, Geographical Indications, Trade Secrets and Industrial Design– Patent Licensing - Technology Commercialization – Innovation Marketing														
Lecture:45, Tutorial:15, Total:60														
TEXT BOOK:														
1.	Rishikesha T.Krishnan, "8 Steps To Innovation: Going From Jugaad To Excellence", Collins India, 2013.

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

22GEO05 - GERMAN LANGUAGE LEVEL 2														
(Offered by Department of Electronics and Communication Engineering)														
Programme& Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit							
Prerequisites	German Language Level 1	All	OE	4	0	0	4							
Preamble	This course aims to help the learner to acquire the vocabulary as per the Common European framework of German language A1 level competence. This course will help to assimilate the basic grammar structures and gain vocabulary to understand and reciprocate in daily life situations on a broader sense. A thorough learner will be able to gain a comprehensive understanding of the German grammar and confidently articulate in day today situations													
Unit – I	Contacts(Kontakte):													
Understanding Letters, simple instructions, speaking about language learning, finding specific information in text, Acknowledging the theme and understanding conversations, Making appointments. Grammar – Preposition with Dative, Articles in Dative and Accusative possessive articles.														
Unit – II	Accommodation(Die Wohnung):													
Understanding Accommodation advertisements, describing accommodation and directions, responding to an invitation, Expressing feelings, Colours. Grammar – Adjective with to be verb, Adjective with <i>sehr/zu</i> , Adjective with Accusative, prepositions with Dative														
Unit – III	Are you Working?(Arbeiten Sie):													
Daily Schedule, speaking about past, understanding Job openings advertisements, Opinions, Telephonic conversations, Speaking about Jobs. Grammar – Perfect tense, Participle II – regular and irregular verbs, Conjunctions – <i>und, oder, aber</i>														
Unit – IV	Clothes and Style(Kleidung und mode):													
Clothes, Chats on shopping clothes, reporting on past, Orienting oneself in Supermarkets, Information and research about Berlin. Grammar – Interrogative articles and Demonstrative articles, Partizip II – separable and non-separable verbs, Personal pronouns in Dative, Verbs with Dative														
Unit – V	Health and Vacation(Gesundheit und Urlaub):													
Personal information, Human Body parts, Sports, Understanding instructions and prompts, health tips. Grammar – Imperative with <i>du/Ihr</i> , Modal verbs – <i>sollen, müssen, nicht dürfen, dürfen</i> . Suggestions for travel, Path, Postcards, weather, Travel reports, Problems in hotel, Tourist destinations. Grammar – Pronoun: <i>man</i> , Question words – <i>Wer, Wen, Was, Wem</i> , Adverbs – <i>Zuerst, dann, Später, Zum Schl</i>

1.	Cadets Handbook – Common Subjects SD/SW published by DG NCC, New Delhi.													
2.	Cadets Handbook- Specialized Subjects SD/SW published by DG NCC, New Delhi													
3.	NCC OTA Precise published by DG NCC, New Delhi.													

COURSE OUTCOMES:											BT Mapped (Highest Level)	
On completion of the course, the students will be able to												
CO1	display sense of patriotism, secular values and shall be transformed into motivated youth who will contribute towards nation building through national unity and social cohesion.											Applying (K3)
CO2	demonstrate Health Exercises, the sense of discipline, improve bearing, smartness, turnout, develop the quality of immediate and implicit obedience of orders..											Applying (K3)
CO3	basic knowledge of weapons and their use and handling.											Applying (K3)
CO4	understanding about social evils and shall inculcate sense of whistle blowing against such evils and ways to eradicate such evils											Applying (K3)
CO5	acquaint, expose & provide knowledge about Army/Navy/ Air force and to acquire information about expansion of Armed Forces, service subjects and important battles.											Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1						3	3	3	3	3				
CO2					3									
CO3	3	2	1	1										
CO4	3	2	1	1										
CO5	3	2	1	1										

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	-	-	-	-	-	-	-
CAT2	-	-	-	-	-	-	-
CAT3	-	-	-	-	-	-	-
ESE	The examination and award of marks will be done by the Ministry of Defence, Government of India which includes all K1 to K6 knowledge levels. The maximum marks for the End Semester Examination is 500 marks. It will be converted to 100 marks.						

22GEX02 - NCC STUDIES (AIR WING) - I														
(Offered by Department of Information Technology)														
Programme & Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	5 / 6	OE	3	0	2	4							
Preamble	This course is designed especially for NCC Cadets. This course will help develop character, camaraderie, discipline, secular outlook, the spirit of adventure, sportsman spirit and ideals of selfless service amongst cadets by working in teams, honing qualities such as self-discipline, self-confidence, self-reliance and dignity of labour in the cadets.													
Unit-I	NCC Organization and National Integration													
NCC Organization – History of NCC- NCC Organization- NCC Training- NCC Uniform – Promotion of NCC cadets – Aim and advantages of NCC Training - NCC badges of Rank - Honors' and Awards – Incentives for NCC cadets by central and state govt. History and Organization of IAF - Indo-Pak War-1971 - Operation Safed Sagar. National Integration - Unity in diversity - contribution of youth in nation building - national integration council - Images and Slogans on National Integration.														
Unit-II	Drill and Weapon Training													
Drill- Words of commands - position and commands - sizing and forming - saluting - marching - turning on the march and wheeling - saluting on the march - side pace, pace forward and to the rear - marking time - Drill with arms - ceremonial drill - guard mounting.(WITH DEMONSTRATION). Main Parts of a Rifle - Characteristics of .22 rifle - loading and unloading – position and holding - safety precautions – range procedure - MPI and Elevation - Group and Snap shooting - Long/Short range firing (WITH PRACTICE SESSION).														
Unit-III	Principles of Flight													
Laws of motion-Forces acting on aircraft – Bernoulli's theorem - Stalling - Primary control surfaces – secondary control surfaces - Aircraft recognition.														
Unit-IV	Aero Engines													
Introduction of Aero engine -Types of engine - piston engine - jet engines - Turbo prop engines-Basic Flight Instruments - Modern trends.														
Unit-V	Aero Modeling													
History of aeromodeling - Materials used in Aero-modeling - Types of Aero-models – Static Models - Gliders - Controlline models - Radio Control Models - Building and Flying of Aero-models.														
Lecture:45, Tutorial:30, Total:75														
TEXT BOOK:														
1.	“National Cadet Corps - A Concise handbook of NCC Cadets”, Ramesh Publishing House, New Delhi, 2014.													
REFERENCES/ MANUAL / SOFTWARE:

22MBO01 - COST ACCOUNTING FOR ENGINEERS (Offered by Department of Management)								
Programme& Branch	All BE/B. Tech Programme	Sem.	Category	L	T	P	Credit	
Prerequisites	NIL	5	OE	3	1	0	4	
Preamble	To provide an In-depth study of the Cost Accounting principles and techniques for identification, analysis and classification of costs components to facilitate decision Making.							
Unit – I	Introduction to Cost Accounting							
Introduction to Cost Accounting: Meaning - Scope, objectives and significance of Cost Accounting its relationship with financial accounting and management accounting– cost centres – cost units – Elements of cost – classification of cost – preparation of cost sheet.								9 + 3
Unit – II	Cost Ascertainment – Elements of cost							
Material Costs: Procurement of materials – Inventory management and control – scrap, spoilage, defectives and wastage Labour Costs: Time Keeping, Time booking and payroll – Labour turnover – principles and methods of remuneration and incentive schemes. Overheads: Collection, classification and apportionment and allocation of overheads.								9 + 3
Unit – III	Basic Costing Methods							
Operating Costing - Meaning - Preparation of Operating Cost Sheet - Transport Costing - Power Supply Costing - Hospital Costing.								
Unit – IV	Advanced Costing Methods							
Features of Job Costing - Batch Costing - Preparation of Cost Sheet Under Job Costing, and Batch Costing - Process Costing - Process Loss - Normal and Abnormal Loss.								
Unit – V	Cost Accounting Techniques							
Budget and Budgetary Control: Budgetary control as a management Tool – Installation of Budgetary control system classification of budgets – Fixed and Flexible Budgeting. Standard Costing and Variance Analysis: Budgetary control and standard costing – Suitability of standard costing – Standard costing as a management Tool – Cost variances – Direct material cost variances – Direct labour cost variances – Overhead variances – Sales variance.								
Lecture: 45, Tutorial: 15, Total:60								
TEXT BOOKS								
1.	JawaharLal, SeemaSrivastava, Manisha Singh, " Cost Accounting, Text, Problems and Cases", 6th Edition, McGraw Hill Education, New Delhi, 2020.							
2.	William Lanen, Shannon Anderson and Michael Maher, "Fundamentals of cost Accounting",7th Edition, McGraw Hill Education, New Delhi, 2020.							
REFERENCES								
1.	M.N.Arora and PriyankaKatyal, "Cost Accounting", 5th Edition, Vikas publishing House, New Delhi, 2023.							
2.	Ravi M.Kishore, " Cost and Management Accounting", 6th Edition, Taxmann, New Delhi, 2021							
3.	M.N.Arora, "Cost and Management Accounting",11th Edition, Vikas Publishing, New Delhi, 2021.							

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	understand the conceptual frame work of cost accounting												Understanding (K2)
CO2	understand the basic concepts and process in determination of cost of product and services												Understanding (K2)
CO3	use the basic costing methods in different business situation												Applying (K3)
CO4	demonstrate the advanced costing methods in various decision making situation												Applying (K3)
CO5	prepare various types of budgets and determine variance in different situations.												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1										2	3	1		
CO2										2	3	1		
CO3										2	3	1		
CO4										2	3	1		
CO5										2	3	1		

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	--	40	60	--	--	--	100
CAT2	--	40	60	--	--	--	100
CAT 3	--	40	60	--	--	--	100
ESE	--	20	80	--	--	--	100

* ±3% may be varied (CAT 1,2 & 3 – 50 marks & ESE – 100 marks)

22MBO02 - ECONOMIC ANALYSIS FOR DECISION MAKING (Offered by Department of Management)								
Programme& Branch	All BE/B. Tech Programme	Sem.	Category	L	T	P	Credit	
Prerequisites	Nil	5	OE	3	1	0	4	
Preamble	The course aims at introducing a few vital techniques required for carrying out economic analysis for making informed managerial decisions.							
Unit – I	Economic Optimization							
Economic Optimization: Theory of firm – Business versus Economic profit – Revenue relations – Cost relations – Profit relations – Marginal versus incremental concept.								9 + 3
Unit – II	Forecasting							
Forecasting: Forecasting applications – Techniques –Naive method – Moving average – Exponential smoothing - Trend analysis – Linear Trend – Growth Trend – Sales, cost and revenue forecasting.								
Unit – III	Production and Cost Analysis							
Production: Production function – Returns to scale and returns to factor – Total, managerial and average product – Law of diminishing returns – Optimal input usage – Production function estimation.								9 + 3
Cost Analysis: Economic and Accounting costs – Time in cost analysis – Short run cost – Long run cost – cost relations – cost volume – profit analysis.								
Unit – IV	Competitive Market Analysis							
Competitive Market Analysis: Characteristics of competitive markets – Profit maximisation – Marginal analysis in competition – competitive market supply curve – Equilibrium in competitive markets - Monopoly – Monopolistic competition.								
Unit – V	Game theory and Competitive Strategy							
Game Theory Basics - Prisoner's Dilemma - Saddle Point - Two Person Zero Sum Game - Games without Saddle Points - Dominance Rule - Mixed Strategies.								
Lecture: 45, Tutorial: 15, Total:60								
TEXT BOOKS								
1.	Mark Hirschey, "Managerial Economics", 12 th Edition, Cengage Learning, New Delhi, 2022.							
2.	Geetika, PiyaliGhosh, Purba Roy Choudhury, "Managerial Economics", 3rd Edition, McGraw Hill Education, New Delhi, 2019.							
REFERENCES

2.	Ahuja. H. L, "Principles of Microeconomics", 22nd Edition, S. Chand Publishing, New Delhi, 2019.							
3.	PanneerSelvam R, P. Sivasankaran, P. Senthilkumar., "Managerial Economics", 1st Edition, Cengage Learning, New Delhi, 2018.							

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	Understand revenue, cost and profit relations and apply techniques to find best course of action.													Applying (K3)
CO2	Apply appropriate forecasting techniques for estimating sales, cost and revenue.													Applying (K3)
CO3	Understand the relation between inputs and output of production system and perform cost – volume – profit analysis													Applying (K3)
CO4	Apply market equilibrium concepts in monopoly and monopolistically competitive markets.													Applying (K3)
CO5	Understand game theory and apply in different strategic decisions													Applying (K3)
Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1									3	1				
CO2									3	1				
CO3									3	2				
CO4									3		2			
CO5									3		1			
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														
ASSESSMENT PATTERN - THEORY														
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %		Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %		Creating (K6) %	Total %					
CAT1	--	40		60	--	--		--	100					
CAT2	--	40		60	--	--		--	100					
CAT 3	--	50		50	--	--		--	100					
ESE	--	20		80	--	--		--	100					

* ±3% may be varied (CAT 1,2 & 3 – 50 marks & ESE – 100 marks)

22MBO03 - MARKETING ANALYTICS (Offered by Department of Management)														
Programme& Branch	All BE/B. Tech Programme	Sem.	Category	L	T	P	Credit							
Prerequisites	Nil	6	OE	3	1	0	4							
Preamble	Marketing analytics enables marketers to measure, manage and analyze marketing performance to maximize its effectiveness and optimize return on investment (ROI). This course exposes the students with the tools to measure customer value and apply analytic tools to various marketing decisions.													
Unit – I	Market & Marketing Analytics													
Introduction - Introduction to marketing analytics, Models & Metrics Market Insight - Market sizing. Market Segmentation –Segmentation, Targeting & Positioning														
Unit – II	Business & Competition													
Competitive Analysis - Competitor identification, analysis, and actions Business Strategy –Scenarios, Decision Model, Metrics Business Operations - Forecasting														
Unit – III	Product and Price													
Product and Service Analytics - Conjoint analysis and product/service metrics Price Analytics - Pricing techniques and assessment														
Unit – IV	Distribution & Promotion													
Distribution Analytics –Characteristics, Channel evaluation and selection, Multichannel distribution and metrics. Promotion Analytics - Promotion budget estimation and allocation, Metrics														
Unit – V	Sales													
Sales Analytics - Metrics for sales, profitability, and support														
Lecture: 45, Tutorial: 15, Total:60														
TEXT BOOKS														
1.	Stephen Sorger, "Marketing Analytics: Strategic Models and Metrics", 1st Edition, Admiral Press, UK, 2016.													
2.	Wayne L. Winston, "Marketing Analytics: Data-Driven Techniques with Microsoft Excel", 1st Edition, Wiley, New Delhi, 2018.													
REFERENCES

3.	David A. Aaker, V. Kumar, Robert P. Leone, George S. Day., "Marketing Research", 1st Edition, Wiley, New Delhi, 2019.													

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	Understand the importance of Analytics in Marketing, size and segment the market													Understanding (K2)
CO2	Understand the Business, competition and its related decisions.													Understanding (K2)
CO3	Identify important features of a product and suitable pricing methods.													Applying (K3)
CO4	Assess Channel performance and Promotion Metrics.													Applying (K3)
CO5	Assess sales performance.													Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

PROGRAMME: BE - EIE

HONOURS DEGREE TITLE: INTELLIGENT SENSOR TECHNOLOGY

The following courses are identified to earn additional 18 credits to get a Honours degree with specialization in EIE.

S.No	Course Code	Course Title	Credits	Prerequisites	Semester
1.	22EIH01	Intelligent Building Automation	4	Transducers Engineering	5
2.	22EIH02	System on chip	3	Digital Logic Circuits	5
3.	22EIH03	Intelligent Technology in Industrial Automation	4	Transducers Engineering	6
4.	22EIH04	Embedded IoT	3	Microcontroller and its Applications	6
5.	22EIH05	Smart Sensors and Intelligent Instrumentation	4	Transducers Engineering	7
		TOTAL	18		

22EIH01- INTELLIGENT BUILDING AUTOMATION														
Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Transducers Engineering	5/6/7	HN	3	1	0	4							
Preamble	This course discusses about the wide variety of techniques available for all building automation areas such as energy, HVAC, information, transportation, safety, security, maintenance, and facility management. This course enables scientists and engineers engaged in research on and the development and application of sensors in the building control area													
Unit – I	Building Automation System													
Introduction–Definitions of intelligent building – Facilities management vs intelligent buildings – Technology systems and evolution of intelligent buildings – Introduction to building automation System (BAS) –The progress of BAS – Programming and monitoring platforms and environment.														
Unit – II	BAS Communication Standards and Internet Technologies													
BACnet and its features – Lon Works and its features– EIB and its features – Compatibility of different open protocol standards – Integration at management level – Internet protocols – use of Internet technologies at automation level – use of Internet technologies at management level – Convergence networks and total integration.														
Unit – III	Lighting, Security and Safety Control Systems													
Introduction to lighting control systems – Systems based on common automation protocols–Strategies for energy management and lighting control – Basic CCTV components and analogue CCTV systems – IP surveillance system – Access control systems – Burglar alarm systems.														
Unit – IV	Control and Optimization of Air- Conditioning Systems													
Typical control loops of the air- conditioning process – Control of CAV systems: Basic control of CAV systems, Sequential split range control of AHU – Control of VAV systems: Control of VAV air handling units, VAV terminal and room temperature control – Outdoor air ventilation control and optimization – Optimal control methods used for HVAC systems – Optimal control of air side systems.														
Unit – V	Control and Optimization of Central Chilling Systems													
Basic working principles – Basic components and typical types – Chiller capacity control and safety interlocks – Chiller energy performance – Optimal control of central chilling systems – Optimal set point reset of chilled water supply temperature – Sequence control of multiple chiller plants: Temperature based sequence control, Bypass flow based sequence control.														
Lecture:45, Tutorial:15, Total:60														
TEXT BOOK:														
1.	Shengwei Wang, "Intelligent Buildings and Building Automation", 1 st Edition, Spon Press (an imprint of the Taylor & Francis Group), 2010.													
REFERENCES:

3.	Singh S. K., 'Industrial Instrumentation and Control', 3 rd Edition, Tata McGraw Hill Publishing Company, New Delhi, 2009.													

COURSE OUTCOMES:												BT Mapped (Highest Level)	
On completion of the course, the students will be able to													
CO1	describe the functions intelligent building automation system												Understanding (K2)
CO2	summarize the need of BAS Communication Standards and Internet Technologies												Understanding (K2)
CO3	explain the different lighting, safety and security systems in building automation												Understanding (K2))
CO4	interpret the various Control and Optimization of Air- Conditioning Systems												Applying (K3)
CO5	illustrate the various Control and Optimization of Central Chilling Systems												Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2											2	2

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIH02- SYSTEM ON CHIP														
Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Digital Logic Circuits	5/6/7	HN	3	0	0	3							
Preamble	To infer the concepts of hardware and software with the communication, design flow, subsystems and methodologies on a chip													
Unit - I	System-on-Chip:													
The System-on-Chip Concept -The Cast of Players- SoC Interfaces for Custom Hardware-Four Design Principles in SoC Architecture-Heterogeneous and Distributed Data Processing-Heterogeneous and Distributed Communications-Heterogeneous and Distributed Storage-Hierarchical Control.														
Unit - II	Principles of Hardware/Software Communication:													
Connecting Hardware and Software-Synchronization Schemes-Synchronization Concepts-One-Way and Two-Way Handshake-Blocking and Non-blocking Data-Transfer-Tight and Loose Coupling. Introduction to Bus.														
Unit - III	VLSI Sub Systems:													
Introduction- single bit addition-carry propagate addition-subtraction- multiplier input addition-Magnitude comparators-Binary counters-Serial Multiplication-low power Static RAMs.														
Unit - IV	VLSI Design Flow :													
Introduction to Integrated Circuits-Pre-RTL Methodologies-RTL to GDS Implementation Flow-Verification Techniques-Testing Techniques-Post-GDS Processes. Chip Planning –Placement-Routing-Physical Verification and Signoff-Post-silicon Validation.														
Unit - V	Design Methodologies:													
Microprocessor / DSPs –Programmable Logics-gate Array and Sea of Gate arrays-Cell based Design-Full Custom Design-Platform based Design-System on Chip. Mixed Signal and Custom Design Flow. Example: Portable Multimedia System- Network On Chip.														
Total:45														
TEXT BOOK:

2.	Neil H.E.Waste and David Money Harris,"CMOS VLSI Design - A Circuits and Systems Perspective", 4 th Edition, Addison Wesley, Boston, 2011.													

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	recall the basic concepts of System on Chip												Understanding (K2)
CO2	acquire the knowledge of the communication architectures used in System on Chip												Understanding (K2)
CO3	apply data path logic to design combinational and sequential circuits												Applying(K3)
CO4	make use of the design flow for design of high performance circuits												Applying(K3)
CO5	explain the various design methodologies for chip design												Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1				1		1					2	2

CO3	3	2	1	1	1	1		1					3	3
CO4	3	2	1	1	1	1		1					3	3
CO5	2	1				1		1					2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		100					100
CAT2		60	40				100
CAT3		50	50				100
ESE		60	40				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

**22EIH03- INTELLIGENT TECHNOLOGY IN INDUSTRIAL AUTOMATION**

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit							
Prerequisites	Transducers Engineering	5/6/7	HN	3	1	0	4							
Preamble	To impart the significance of intelligent techniques in measurements and automation.													
Unit – I	Modeling and Linearization of Intelligent Sensors:													
	Introduction –classification –smart sensors-cogent sensors – soft sensors-rough set theory – model structures: ARMAX model-artificial neural network model. Self adapting sensors - Self validating sensors: functional validation –applications. Linearization of positive and negative coefficient resistive sensors - amplifier based linearization-interpolation- piecewise linearization-artificial neural network based linearization – non-linear adaptive filter based linearization.													
Unit – II	Intelligent Technology in Signal Analysis :													
	Introduction – types of test and metering instruments – example of intelligent instrument – structure principle of data acquired system –simulation of ADC -noise analysis technology –noise simulation model –weak signal detection. Measurement uncertainty – data processing algorithms – inverse problem and its processing – methodologies in intelligent instrument design – intelligent computing – accuracy design theory – software test – reliability engineering in intelligent instrument.													
Unit – III	Arduino and MATLAB in Intelligent Instrument:													
	MATLAB in intelligent Instrument: Predictive maintenance - computer vision – robotics system- Arduino in intelligent Instrument: SLAM –PHM – IoT in intelligent instrument: power instrument in IoT - vector network analyser in IoT –Data communication technology: IIC bus –SPI bus – EPA bus- blue tooth communication technology in IoT. Foundational design using Proteus: 7 segment LED and matrix key design – IoT design by Proteus.													
Unit – IV	Sensors with Artificial Intelligence:													
	Introduction -Multi dimensional intelligent sensors- AI for prognostic instrumentation – ANN based intelligent sensors – fuzzy logic based intelligent sensors- intelligent sensors standards and protocols:IEEE 1451 standard –CEBUS communication protocol for smart home –J1850 Bus – MI bus-plug-n-play smart sensor protocol.													
Unit – V	Applications of Intelligent Sensor Technology:													
	State –of -the- art instruments of Siemens, Honeywell and ABB – fault tolerance of condition monitoring – fault analysis and diagnosis. Wearable intelligent instrument – bio-potential measurements – Mobile robot –smart car –smart UAV.													
Lecture:45, Tutorial:15, Total:60														
TEXT BOOK:

3.	Rich and Knight, "Artificial Intelligence", 3 rd Edition, Tata McGraw Hill, 2014.													

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	develop modelling of instrument using intelligent technologies												Applying (K3)
CO2	apply the intelligent technologies for analyzing the signal												Applying (K3)
CO3	interface MATLAB and Arduino for intelligent sensor technology and communication												Applying (K3)
CO4	understand the applications of artificial intelligence and its protocols in sensor technology												Understanding (K2)
CO5	understand the recent trends in intelligent sensor technology in industrial applications												Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	1	1	1								3	3
CO2	3	2	1	1	1								3	3
CO3	3	2	1	1	1								3	3
CO4	2	1											2	2
CO5	2	1											2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		40	60				100
CAT2		40	60				100
CAT3		100					100
ESE		40	60				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIH04- EMBEDDED IOT																
Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit									
Prerequisites	Microcontroller and its Applications	5/6/7	HN	3	0	0	3									
Preamble	To impart basic principles and concepts on Internet of Things technologies and its role in real time applications															
Unit – I	Fundamentals and Applications of IoT: Introduction to Internet of Things (IoT) – Characteristics – IoT architecture – Architecture Layers – Functional components of IoT – IoT Technology Fundamentals – Challenges of IoT – Introduction to IIoT and its requirements.															
Unit – II	IoT Network Protocols and Communication: Infrastructure protocol: Internet Protocol Version 6, Data protocols: Message Queue Telemetry Transport – Constrained Application Protocol – Advanced Message Queuing Protocol. Connectivity Technologies: RFID – ZigBEE – Bluetooth – Near Field Communication – Wireless HART – Z-Wave – 6 LoWPAN – LoRaWAN.															
Unit – III	Sensor Networks and Cloud Computing: Wireless Sensor Networks – Sensor Nodes – Software Defined Networking. Machine to Machine Communication. Cloud Computing Fundamental: Components and Cloud Models – Service Model – Service Management and Security.															
Unit – IV	IoT Physical Devices and End Points : Review of Python Programming – Raspberry Pi Basic Architecture – Pin Configuration – Accessing GPIO – Remote Data Logging – Integration of Sensors and Actuators with Raspberry Pi – LED, Camera, Temperature and Humidity Sensor Interfacing.															
Unit – V	Applications of IoT: Smart Cities and Smart Homes Monitoring, Weather Monitoring System, Agriculture: Smart water management system, Remote Healthcare Monitoring System, Smartphone based Monitoring system (Only Block diagram Approaches)															
Total:45																
TEXT BOOK:																
1.	Misra, S., Mukherjee, A., & Roy, A, "Introduction to IoT", 1 st Edition, Cambridge: Cambridge University Press. 2021. (Unit I,II, III, IV,V)															
2.	Arshdeep Bahga, Vijay Madisetti, "Internet of Things – A hands-on approach", 1 st Edition, Universities Press, 2015. (Unit III, IV)

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)	
CO1	understand the basic concepts of IoT and its present developments												Understanding (K2)
CO2	understand IoT communication protocols for Interfacing												Understanding (K2)
CO3	acquire knowledge about sensor networks and Cloud Computing												Understanding (K2)
CO4	implementation on IoT Physical Devices and sensor interfacing												Applying (K3)
CO5	recognize IoT applications and control												Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1											2	2
CO2	3	1											2	2
CO3	3	1											2	2
CO4	3	2	1	1	1								3	3
CO5	3	1											2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		100					100
CAT2		100					100
CAT3		80	20				100
ESE		80	20				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

22EIH05- SMART SENSORS AND INTELLIGENT INSTRUMENTATION							
--	--	--	--	--	--	--	--

Programme & Branch	BE & Electronics and Instrumentation Engineering	Sem.	Category	L	T	P	Credit
Prerequisites	Transducers Engineering	5/6/7	HN	3	1	0	4
Preamble	This course enhances the students to understand all the processes involved in the industries, the various unit operations and be able to apply control schemes to these processes to get the output with desired specifications						
Unit – I	Basics of Smart Sensors and Micromachining:						
Introduction, Mechanical-Electronic transitions in sensing, nature of sensors, overview of smart sensing and control systems, integration of micromachining and microelectronics, introduction to micromachining, bulk micromachining, wafer bonding, surface micromachining, other micromachining techniques. Case study to build smart sensors.							9+3
Unit – II	MCUs and DSPs for Sensor:						
Introduction, MCU control, MCUs for sensor interface: Peripherals, Memory, Input / Output, Onboard ADC, Power saving capability, Local voltage or current regulation, Modular MCU design. DSP control, Software, tools and support, sensor integration. Case study for building smart sensors with MCUs and DSPs.							9+3
Unit – III	Sensor Communication and MEMS:						
Wireless zone sensing, surface acoustical wave devices, intelligent transportation system, RF-ID, Micro optics, micro-grippers, micro-probes, micro-mirrors, FEDs, communications for smart sensors - sources and standards, automotive protocols, industrial networks, office and building automation, home automation, protocols in silicon, other aspects of network communications.							9+3
Unit – IV	Packaging, Testing and Reliability of Smart Sensors:						
Introduction, Semiconductor packaging applied to sensors, hybrid packaging, packaging for monolithic sensors, reliability implications, testing smart sensors. Unit Standards for Smart Sensors: Introduction, setting the standards for smart sensors and systems, IEEE 1451.1, IEEE 1451.2, IEEE P1451.3, IEEE 1451.4, extending the systems to network.							9+3
Unit – V	Implications of Smart Sensor Standards and Recent Trends:						
Introduction, sensor plug-and-play, communicating sensor data via existing wiring, automated/remote sensing and web, process control over the internet, alternative standards, HVAC sensor chip, MCU with integrated pressure sensors, alternative views of smart sensing, smart loop.							9+3
Lecture:45, Tutorial:15, Total:60							
TEXT BOOK:							
1.	Randy Frank, "Understanding Smart Sensors", 2 nd Edition, Artech House Publications, 2013.						
2.	Youn-Long Lin, "Smart Sensors and Systems", Springer Nature, 2015						
REFERENCES:

2.	Krzysztof Iniewski, "Smart Sensors for Industrial Applications", CRC Press, 2013.						
3.	Santhosh K V, "Smart Sensors Measurements and Instrumentation", Lecture Notes in Electrical Engineering, Springer Nature, 2021.						

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	describe the principle of smart sensors and process of micromachining in development of smart sensors.	Applying (K3)
CO2	apply the intelligent systems by interfacing the smart sensors to MCUs and DSPs.	Applying (K3)
CO3	apply the use of smart sensors in communication, MEMS and automation	Applying (K3)
CO4	explain the standards of smart sensors by the assessment of reliability testing and packaging	Understanding (K2)
CO5	discuss the applications of smart sensors in different fields and recent development.	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1											2	2
CO2	3	2	1	1	1								3	3
CO3	3	2	1	1	1								3	3
CO4	3	1											2	2
CO5	3	2	1	1	1								3	3

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		40	60				100
CAT2		40	60				100
CAT3		50	50				100
ESE		40	60				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)
